A lot of things have changed at Weiser, except our commitment to security, quality and innovation. Throughout our history, Weiser has consistently demonstrated its ability to provide solutions to our builder and design communities with products that express the lifestyle of their homeowners. Weiser has taken over 100 years of experience and crafted the most distinctive line of products, in the latest styles and finishes, with their highest level of security available for your home.

Security & Innovation Since 1904.

WEISER
SECURITY & INNOVATION SINCE 1904™

WEISER®

It takes only one.

A simple statement that starts a revolution. At Weiser, we respect the need for balance between industry and a healthy, sustainable environment.

Our role in supporting this balance is to design, manufacture, and distribute products and services in a way that protects the quality of the environment.

We continue to use the highest quality recycled materials to create our products. To help our builder and design communities reach the maximum efficiency rating we have products that qualify under the following categories that can contribute towards achieving LEED points for your projects.

LEED Categories:

Credit 4.1: Recycled Content: 7.5% (post-consumer + 1/2 post-industrial) 1 Point

Intent: Increase demand for building products that incorporate recycled content materials, therefore reducing impacts resulting from extraction and processing of new virgin materials and by-passing energy and greenhouse gas – intensive industrial and manufacturing processes.

Credit 4.2: Recycled Content: 15% (post-consumer + 1/2 post-industrial)

1 Point in addition to MR Credit 4.1

Requirements: Use materials with recycled content such that the sum of post-consumer recycled content plus one-half of the pre-consumer content constitutes at least 15% of the total value of the materials in the project.

With the introduction of our revolutionary SmartKey cylinder we have created a new platform that helps eliminate waste for future generations. The SmartKey cylinder may qualify for the Green Building Credits with the following sustainability aspects:

1. SmartKey Contributes to a Reduced Carbon Footprint – SmartKey eliminates the need for locksmiths to travel to and from the building.
2. SmartKey Improves Resource Efficiency – SmartKey eliminates waste from rekeying process, including lock pins and key cutting scraps
3. SmartKey Reduces Lock Replacements – The ease of the SmartKey system allows individuals to rekey a lock without buying a new lock assembly or contacting a locksmith
4. SmartKey Includes Recycled Content – SmartKey locks typically contain 24-27% recycled content

What is SmartKey?

SmartKey™ is a technology that allows you to re-key a lock in just seconds while improving security without removing the lock from the door.

How Does it Work?

SmartKey™ has a patented side locking bar technology that replaces the traditional pin and tumbler design. This new design includes BumpGuard™ for improved security against lock-bumping, an attack technique that can defeat traditional pin and tumbler locks.

Advanced Security.
Increased Durability.
Superior Convenience.

WEISER®

DURABLE TECHNOLOGY

Locking bar, racks and pins are made out of stainless steel for increased strength and durability.

BUMPGUARD™

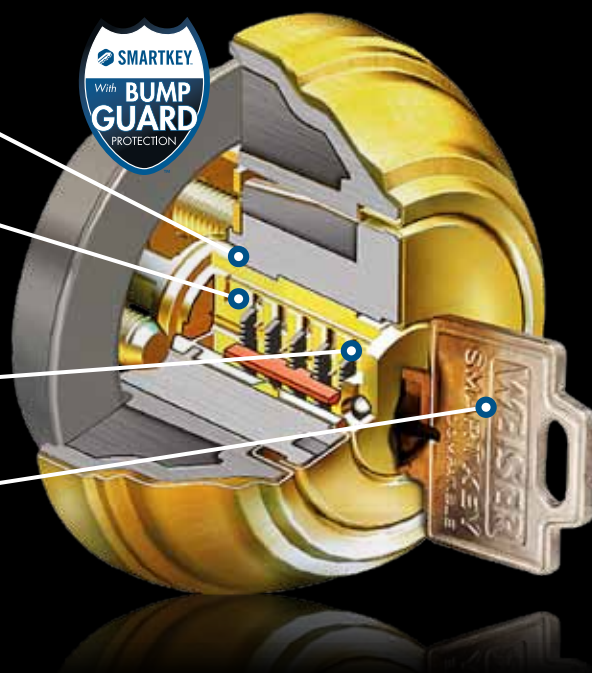

The SmartKey™ system provides ultimate security versus other deadbolts by protecting you from the unlawful entry method known as Lock Bumping. Lock bumping is an illegal technique using specially cut keys that can defeat conventional pin and tumbler locks

DRILL RESISTANCE

Two steel balls are inserted into the front of the cylinder to resist attacks from drilling.

REKEY IT YOURSELF

SmartKey™ locks allow **you** to rekey your locks in less than 30 seconds by using the SmartKey™ Learn Tool (included). If you ever find yourself concerned about who might have a key to your door, simply rekey your SmartKey lock in less than 30 seconds, and you'll be feeling safe and sound.

AS EASY AS 1 • 2 • 3

Insert functioning key and turn 1/4 turn clockwise.

Insert and remove the Learn Tool. Take out current key.

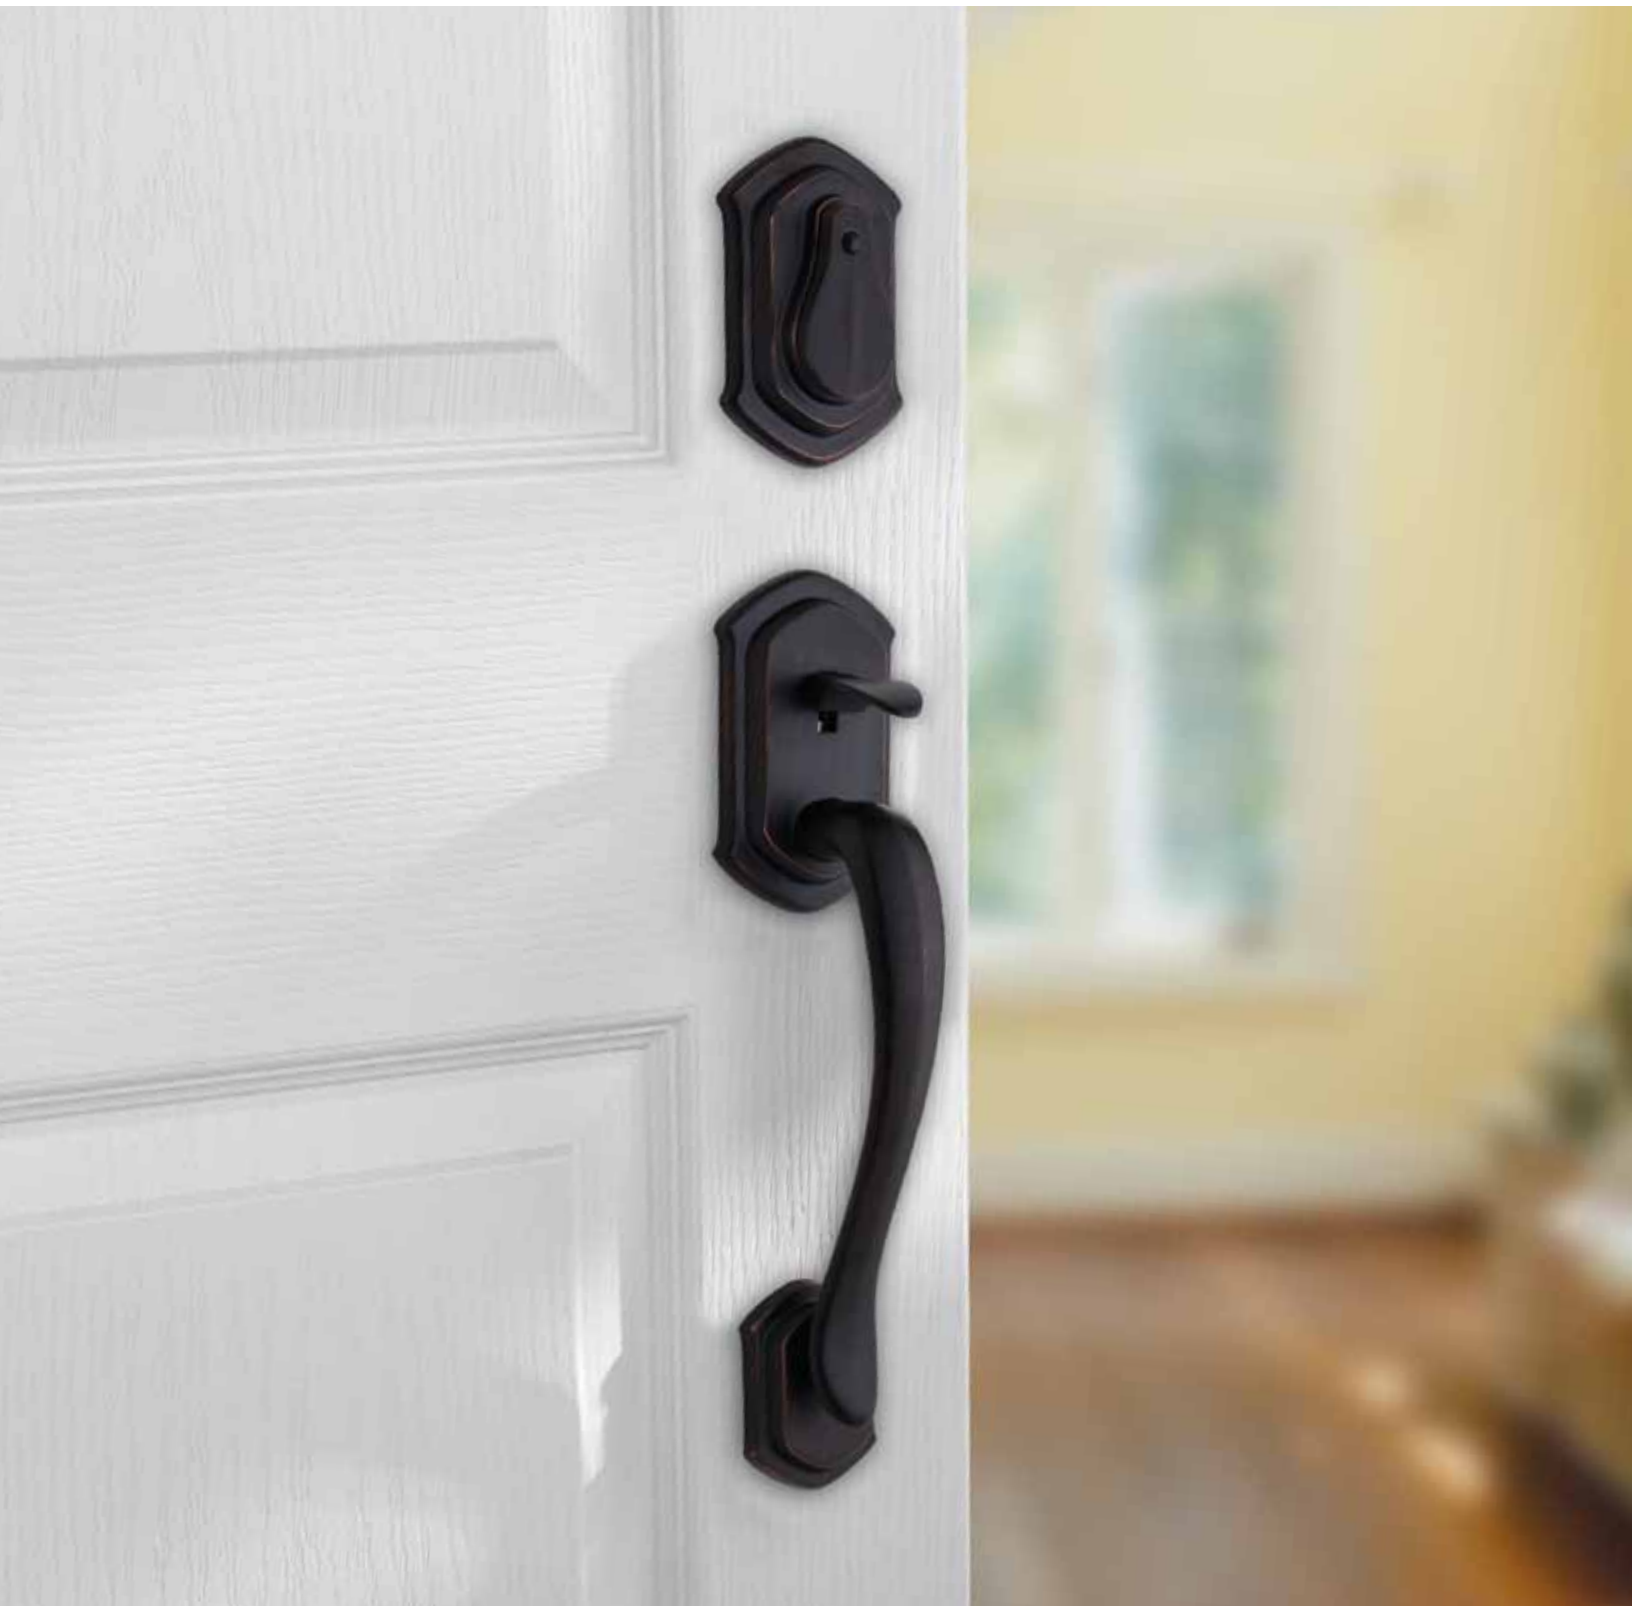

Insert new key and turn 1/2 turn counter-clockwise. Your lock is now re-keyed!

Why Would I Need To Re-Key My Locks?

Have you ever loaned out a key that was never returned, or wondered what happened to a lost key?

Would you like to be able to grant temporary access to neighbors, contractors, or hired help without giving them your personal house key?

Do you have different keys for your front, back, and side doors?

Monaco, Venetian Bronze

Our finest door hardware ever – Collections by Weiser provides the best security and styles you can buy. We have taken over 100 years of experience, and crafted a distinctive line of architecturally inspired products, featuring the latest in styles and finishes.
