4196112	G-Tape 3035 Black 4in x 65ft			X	Ctn	1.54	18	40	\$ 985.13

Key Features

- Hand-tearable. No tools needed
- Adhesion improves with time
- No roller, primer or heatgun needed
- Face-to-face contact doesn't effect adhesion. Less waste, easier workability
- Wide temperature range (-40°F to 200°F)
- Self-healing technology protects galvanized metal and aluminum fasteners against corrosion.

WOLF RAILING - Curved Rail Guide

PVC RAILING SYSTEM BY WOLF

Section 2 / Page 1.1 - EFFECTIVE DATE: 5/22/24 (replaces 1/18/24)

Curved Vinyl Railing Profile Specifications

Please Note:

- The minimum radius for top and bottom rail bends is 36 inches. Our standard sizes are 36, 48 and 60 inches; please call for information on other sizes.
- Bottom rails are available with or without aluminum reinforcement.
- **The buyer is solely responsible for meeting all applicable regulatory building and safety codes related to installation and reinforcement.**

- **Final Sign-off**
A CAD drawing will be provided with final measurements that is required to be signed-off on before approval for production to begin.

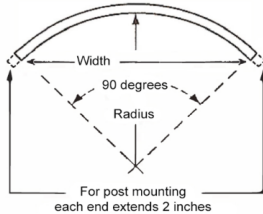

How to Measure Standard Bends

The width of a bend is measured from inside corner to inside corner.

36" radius= 50-15/16"

48" radius= 67-7/8"

60" radius= 84-7/8"

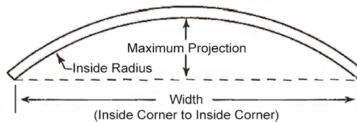

How to Measure Custom Bends

To determine the inside radius of your custom bends, we need two measurements:

1. **Width of the bend:**
Measure straight across between the inside corners of the area where the bend will be placed: post-to-post, the edges of a deck, etc.
2. **Maximum projection of the bend:**
Measuring in a straight line across the width, find the center of the width (1/2 the width). From the center of the width, measure to the inside of the arc.

Templates

We will accept templates that provide as much dimensional information as possible: profile size, offset measurement from edge of deck to edge of railing, post locations, projection, etc.

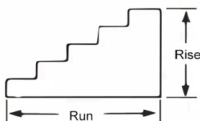

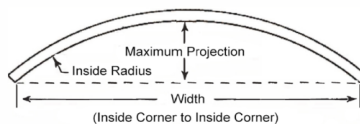

How to Measure Stair Railing

To determine the inside radius of your bends, we need three measurements:

1. **Width of the bend:**
Measure straight across between the inside corners of the area where the bend will be placed: post-to-post, the edges of the railing, etc.
2. **Maximum projection of the bend:**
Measuring in a straight line across the width, find the center of the width (1/2 the width). From the center of the width, measure to the inside of the arc.
3. **Rise over run - slope:**
Measure the rise over the run, from beginning to end of the bend, to determine picket placement throughout the bent rail.

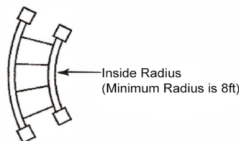

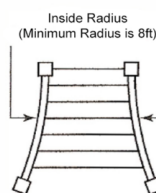

Templates:

We will accept templates that provide as much dimensional information as possible: profile size, projection, width (from post to post), rise/run or slope, etc.

Stair Rail-Please Note:

Bends will be produced on a case-by-case basis to be determined by dimensions. The minimum radius for stair rail is 8 ft.

SHORELINE SPECIAL ORDER GATE FORM

DEALER: _____ DATE: _____

CONTACT: _____

PHONE: _____ EMAIL: _____

1. CHOOSE YOUR VINYL GATE STYLE:

- ☐ 100 Series (all pocketed) ☐ 200 Series pocketed (also compatible with 300 Series) ☐ 200 Series welded (also compatible with 300 Series)

2. CHOOSE YOUR VINYL GATE COLOR:

- ☐ White ☐ Almond ☐ Khaki

3. CHOOSE YOUR BALUSTER TYPE AND COLOR:

Square Vinyl:

- ☐ White ☐ Almond ☐ Khaki

Colonial Vinyl:

- ☐ White ☐ Almond ☐ Khaki

Round aluminum:

- ☐ Black ☐ White ☐ Bronze

Square aluminum:

- ☐ Black ☐ Clear

Glass:

4. CHOOSE YOUR HARDWARE COLOR:

- ☐ Gate Hinge Set — Black (2PC for 1 Leaf - Part # 3263580) ☐ Gate Hinge Set — White (2PC for 1 Leaf - Part # 3263581)
☐ Gate Two-Way Latch — Black (Part # 3263582) ☐ Gate Two-Way Latch — White (Part # 3263583)
☐ Gate Drop-Rod — Black (Part # 3263584) ☐ Gate Drop-Rod — White (Part # 3263585)

5. PROVIDE FINISHED VINYL POST TO FINISHED VINYL POST MEASUREMENT AND ACTUAL GATE WIDTH IN INCHES:

Post to post dimension _____ minus 2" = Actual gate width
(2" is space needed for hardware)

6. CHECK THE APPROPRIATE BOX BELOW:

- ☐ Check here if gate is for 36" high Shoreline Railing ☐ Check here if gate is for 42" high Shoreline Railing
☐ Check here if custom gate height is needed & provide exact gate height in inches _____

CUSTOMER CARE USE ONLY:

GATE HEIGHT:

36" Rail Height:

- ☐ Square or Colonial balusters = 34" ☐ Glass balusters = 34"
☐ Aluminum balusters = 34"

42" Rail Height:

- ☐ Square or Colonial balusters = 40"

SHORELINE - Curved Rail Guide

PVC RAILING SYSTEM BY SHORELINE

Section 2 / Page 1.13 - EFFECTIVE DATE: 5/22/24 (replaces 9/21/23)

Curved Vinyl Railing Profile Specifications

Please Note:

- The minimum radius for top and bottom rail bends is 36 inches. Our standard sizes are 36, 48 and 60 inches; please call for information on other sizes.

- Bottom rails are available with or without aluminum reinforcement.
- The buyer is solely responsible for meeting all applicable regulatory building and safety codes related to installation and reinforcement.**

Final Sign-off

A CAD drawing will be provided with final measurements that is required to be signed-off on before approval for production to begin.

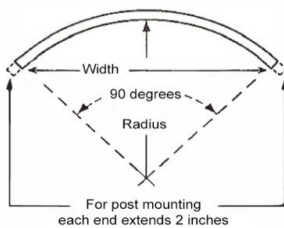

How to Measure Standard Bends

The width of a bend is measured from inside corner to inside corner.

36" radius= 50-15/16"

48" radius= 67-7/8"

60" radius= 84-7/8"

How to Measure Custom Bends

To determine the inside radius of your custom bends, we need two measurements:

1. Width of the bend:

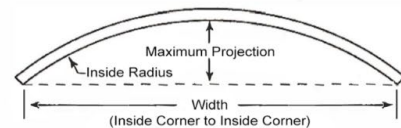

Measure straight across between the inside corners of the area where the bend will be placed: post-to-post, the edges of a deck, etc.

2. Maximum projection of the bend:

Measuring in a straight line across the width, find the center of the width (1/2 the width). From the center of the width, measure to the inside of the arc.

Templates

We will accept templates that provide as much dimensional information as possible: profile size, offset measurement from edge of deck to edge of railing, post locations, projection, etc.

How to Measure Stair Railing

To determine the inside radius of your bends, we need three measurements:

1. Width of the bend:

Measure straight across between the inside corners of the area where the bend will be placed: post-to-post, the edges of the railing, etc.

2. Maximum projection of the bend:

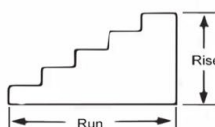

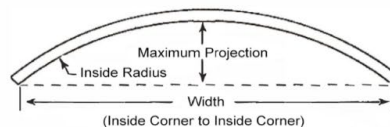

Measuring in a straight line across the width, find the center of the width (1/2 the width). From the center of the width, measure to the inside of the arc.

3. Rise over run - slope:

Measure the rise over the run, from beginning to end of the bend, to determine picket placement throughout the bent rail.

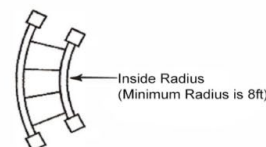

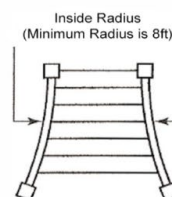

Templates:

We will accept templates that provide as much dimensional information as possible: profile size, projection, width (from post to post), rise/run or slope, etc.

Stair Rail-Please Note:

Bends will be produced on a case-by-case basis to be determined by dimensions. The minimum radius for stair rail is 8 ft.

WARNING see installation instructions for important information to avoid voiding warranty.

- A minimum 95% drainable efficiency (ASTM-E2273) house wrap must be used.
- Use only Wolf Portrait Siding Infinity Seam Plate and Extreme Adhesives White Hot to butt join seams.
- Reference the Trim Spacing Chart in the installation guide.
- Never face nail Wolf Portrait siding unless you pre-drill an expansion slot.
- Potential damage to Wolf Portrait Siding may be caused by light reflecting from Low E Glass. This condition is due to the nature of the material in relation to environmental exposure, and is not covered by any express or implied warranty. Use of screens, awnings and foliage may minimize this effect.

PREMIUM WOOD PRODUCTS FOR RESIDENTIAL AND COMMERCIAL USE

Section 3 / Page 2.1 - EFFECTIVE DATE: 7/18/24 (replaces 5/31/24)

Wolf #	Description	Stock York	Stock NE	Stock MW	Pieces/Pallet	Pallet Weight	List per LINEAL FOOT
THERMALLY MODIFIED WOOD COLLECTION - RANDOM LENGTHS ONLY							
4020758	UFP Vertical Grain Hemlock Nickel Gap 1x6	X	X	X	R/L 6'-20'	3500	\$ 13.47
4020759	UFP Vertical Grain Hemlock V-Groove 1x6	X	X	X	R/L 6'-20'	3500	\$ 13.47
4020760	UFP Vertical Grain Hemlock Bevel 1x6	X	X	X	R/L 6'-20'	3500	\$ 13.47
4020761	UFP Vertical Grain Hemlock S1S2E Trim 1x6	X	X	X	R/L 8'-20'	3500	\$ 13.05
4020762	UFP Vertical Grain Hemlock S1S2E Trim 1x4	X	X	X	R/L 8'-20'	1900	\$ 8.04

RANDOM LENGTH IMPORTANT NOTES:

- Order by total LF needed
- Random lengths vary 6' or 8' min. - 20' (varies by SKU)
- Orders less than 300LF - Total LF could vary up to 5% over
- Orders 300LF or more - Total LF could vary up to 10% over
- S1S2E - Sanded 1 side & 2 edges

FEATURES

- 20-year limited warranty (rot/decay)
- 1x6 widths in 6' or 8' to 20' random lengths (odd/even)
- Bevel, nickel gap and v-groove tongue and groove
- End-matched (nickel gap and v-groove)
- Interior and exterior applications
- All-natural heat preservation process
- Resistant to rot
- Dimensionally stable
- Will naturally to silver/gray
- Paint or stain for desired look

CALCULATIONS

To calculate Lineal Feet from # of SQ

of SQ x 100 = SQFT then SQFT x 2.2 = LNFT

(ex. 5 SQ x 100 = 500 sqft then 500 sqft x 2.2 = 1100 lnft)

To calculate Lineal Feet from Square Feet

SQFT x 2.2 = LNFT

(ex. 500 sqft * 2.2 = 1100 lnft)

AVAILABLE PROFILES

1x6 T&G Nickel Gap (S4S)

1x6 V-Groove T&G (S4S)

1x6 Bevel (Resawn)

1 - 3" Block-It Seam Tape is recommended for cold weather installations. It can be used in all temperatures but the increased surface area works well in the cold (below 40°)

Key Features

- Drainable - 98% efficient in water
- 35% stronger than leading brand
- Self-seals around nail and staple punctures
- 10-year limited warranty

All Flashing Tapes are Butyl Based

1 Pallet Minimum on Non-Stock Items

Co-Branded Rolls are Available - 4 Pallet Minimum per SKU

3998497	Grip-Rite Ninja Hidden Deck Clip 316ss 500 SqFt (1/Mstr; 80/Pal)	X	X	X	CTN	900	\$540.00

Features & Benefits:

- The Grip-Rite Ninja Hidden Deck Clip is the time-saving solution for grooved deck boards
- Includes a pre-assembled compression fit Grip-Bite™ clip with stainless steel screws
- One-pass fast and easy installation with a compression fit lever
- Grip-Bite™ serrated teeth firmly lock deck boards into place
- Marine grade Stainless steel resists corrosion and exposure to the elements
- The hidden deck clip takes the guesswork out of deck spacing, perfectly connecting grooved deck boards
- for a seamless deck appearance
- Flex-Fit™ universal design can be used with PVC or composite grooved deck boards for a variety of deck patterns including straight, diagonal, and herringbone
- For use with Wolf, TREX, and Fiberon grooved deck boards
- Backed by a limited lifetime warranty
