

A collection of dental hand instruments is displayed on a white background. The instruments include a red plastic block, a wooden-handled knife, a metal punch, a ruler, a pair of tweezers, and a pair of forceps. The ruler is marked with 'ZONA 37-434' and '100mm (4 inches)'.

Prices Effective Jan. 1, 2017

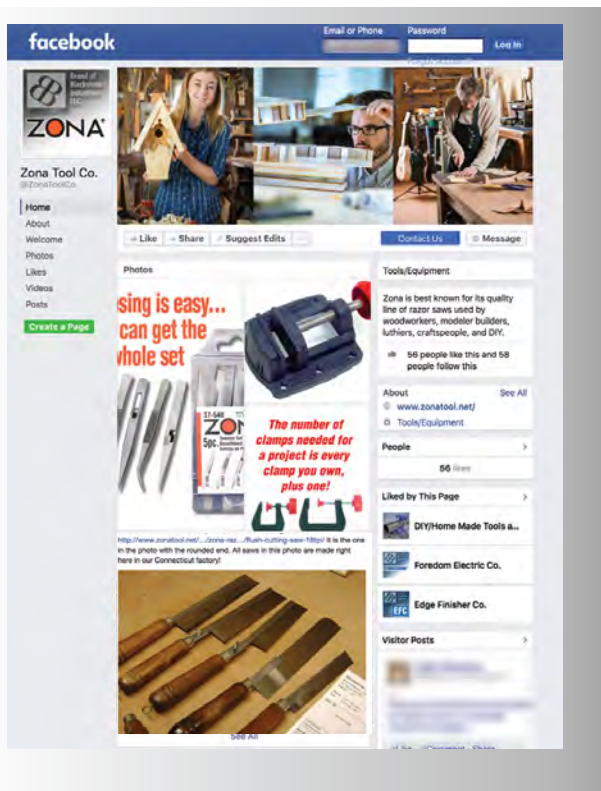

The Buzz about Zona® Razor Saws

The 35-560 Deluxe Handle Fine Kerf Universal Razor Saw has been featured in *Fine Woodworking* and *Popular Woodworking* magazines and recommended by numerous woodworkers online, highly praised for its clean finish and excellent price. "...it shone like it had been planed", versatility "...great for detail work...and to cut dowels, define the limits of hinge mortise and rip wedges before driving them into a joint.", its affordable price, and for being "made in Bethel, CT".

James Brook wrote in the Dec. 2014 issue of *Australian Wood Review* that the **Zona 35-241 Miter Box and Saw Set** is "...very accurate for mitres and splicing." and stated "Overall, this is faster than setting up a power mitre saw, and much safer."

Anissa Kapsales, Associate Editor of *Fine Woodworking Magazine*, Winter 2009/10 # 209 Issue wrote, **"Dirt-cheap dovetail saw cuts like a champ"** There are lots of great high-end dovetail saws, both Western style and Japanese, that cost from \$40 to well over \$100. But I've found a cheap saw that cuts dovetails as well as any expensive saw I've used. The Zona Universal Fine Kerf Razor Saw (No. 35-500)...cuts on the pull stroke, has 32 teeth per inch, and produces a super-thin kerf (0.010 in.)..."

Christopher Schwarz wrote about Zona's 35-560 & 35-050 Razor Saws in *Woodworking Magazine's* June 2007 issue: "They looked like saws for model makers –people who need to cut little balsa parts... But the saws are excellent to have on hand (at this price, why not?) for detail work. Need to cut stringing or inlay banding? These saws will do the job. Trim a dowel. Define the limits of a hinge mortise. Rip or crosscut wedges before driving them into a joint. The surface finish left behind is so clean that it shone like it had been planed. And when used in white oak (a difficult ring-porous wood for fine saws) the saws excelled. They both severed the surface fibers cleanly with no tearing whatsoever. **So sometimes you do get more than what you pay for.**" In his May 11, 2009 Lost Art Press Blog Mr. Schwartz wrote, "All I know is that they can take away my Zona Razor Saw from my cold, dead hands. Or they can take it when it's kinked – whichever comes first."

Who uses Zona tools?

Hobbyists, model ship builders, scale aircraft modelers, model railroad builders, guitar builders, crafters, furniture makers, model car enthusiasts, home improvers, students, educators, do it yourself-ers (DIY), dollhouse & other miniaturists makers, scratch builders, sculptors, luthiers, architects, engineers, makers, independent inventors, designers, tinkerers, and artisans...

Ultra Thin Kerf Razor Saws

\$7.00

35-050 52 TPI

35-150 42 TPI

35-200 32 TPI

Blade Specs

.008" kerf (thickness)

4½" long x

7/16" cutting depth

Ultra Thin Kerf Razor Saws are the thinnest razor saws available with blades that are only .008" thick. Ideal for making super fine cuts in wood, soft metals and plastic without causing splitting or ragged edges. 9" overall length.

Made in USA

- Cut on the pull stroke.
- Steel back for added stability.
- Hardwood handles.

Razor Saws

35-300 Medium Kerf Woodcraft Saw \$8.00

Blade Specs

24 TPI

.015" kerf

(thickness)

6½" blade length x

7/8" cutting depth

Excellent for cutting hard and soft wood and perfect for making small picture frames, shadow boxes, doll house parts, and fine dovetails in cabinetry work. 11" overall length.

35-350 Thick Kerf Woodcraft Razor Saw \$11.50

Blade Specs

14 TPI

.020" kerf (thickness)

6½" long x

1¼" cutting depth

Thick Kerf Saws are excellent for many wood cutting applications, including carpentry, dovetailing and other joints and trim cuts. 11" overall length.

Fine Kerf Universal Razor Saws

\$8.00

35-550 42 TPI

35-500 32 TPI

Blade Specs

.010" kerf (thickness)

6½" long x

1¾" cutting depth

Fine Kerf Universal Razor saws are great all purpose saws for modeling and wood-working. They cut balsa and other wood, plastic, copper and brass, while leaving smooth edges. Suitable for cutting most shapes and thicknesses. 11" overall length.

35-560 Deluxe Handle Fine Kerf Universal Razor Saw \$11.70

Blade Specs

24 TPI

.010" kerf (thickness)

6½" long x

1¾" cutting depth

Deluxe Handle Razor Saw has a more substantial, ergonomic design, New England grown, maple handle. 12¾" overall length.

35-380 Thick Kerf Dovetail Razor Saw \$11.70

Cuts on the push stroke.

Blade Specs 18 TPI
.020" kerf (thickness)
8" long x
1¼" cutting depth

The Thick Kerf Dovetail Saw has Zona's longest razor saw blade and can be used for more forceful 'push stroke' cutting. 12½" overall length.

35-400 Medium Kerf Flush Cutting Saw \$11.70

Shortened steel back for flexible blade.

Blade Specs 16 TPI
.012" kerf (thickness)
6½" long x
1¼" cutting depth

Unique flexible blade and teeth with no set can cut dowels, pegs, and plugs flush without marring surfaces.

It also cuts tenons and excess trim in joinery and fits into hard to reach spots. 11" overall length.

TPI (teeth per inch)
The more teeth per inch (TPI), the finer the cut. For example, blades with 42 TPI leave a smoother finish than those with 24 TPI.

Kerf

Refers to blade thickness or the width of the cut made by the blade in parting the material. Zona saws are available in 4 kerf sizes—
.008" Ultra Thin Kerf
.010" Fine Kerf
.012"—.015" Medium Kerf
.022" Thick Kerf

Length & Depth

Pull vs. Push

Cutting on the pull stroke:
Pulling, rather than pushing the saw through the wood, puts tension on the blade and makes it less likely to bend. Pull stroke blades tend to be thinner than push stroke blades and leave a smaller kerf (width of cut). These blades make faster, easier, cleaner cuts with finer control and less waste yet can still rip and cross-cut. A pull saw blade is ideal for precision woodworking, furniture making, craft and model making. The teeth do not clog with waste material during the cut. When the saw is pulled to cut and returned the blade cleans itself.

Cutting on the push stroke:
A push saw may be preferred for more forceful cutting and for dovetails because sawdust is pushed out the other side of the cut so that the markings are not obscured—while a pull saw may pull sawdust toward you, obscuring markings on the workpiece (which can be blown off during the strokes). A push saw is less steerable than a pull saw. This can be useful because once a cut is started, it stays in a straight line.

Razor Saw Sets

Made in USA

**35-140
4-in-1
Saw Set
\$11.50**

Versatile set comes with four replaceable blades:

36-408 Keyhole Saber (push) 24 TPI .022" kerf, 2 1/4" long are used for trimming and making shorter cuts.

36-458 Large Saber 24 TPI x .022" kerf, 4 1/2" long, ideal for inside cuts and for cutting through thick material such as Styrofoam.

**35-130
Deluxe Handle
4-in-1
Saw Set
\$13.80**

Versatile set comes with four replaceable blades plus substantial, ergonomic design, New England grown, maple handle.
Removable, replaceable blades attach with a knurled nut. See 4-in-1 blade descriptions at left. 11 3/4" overall length.

**35-450
Saber
Saw Set
\$8.50**

Comes with three 24 TPI and .022" kerf blades:

36-458 Large Saber 4 1/2" long ideal for inside cuts and for cutting through thick material including Styrofoam.
The two 2 1/4" long keyhole blades are used for trimming and making shorter cuts.

36-406 Keyhole Saber (pull)

36-408 Keyhole Saber (push)

Removable, replaceable blades attach with a knurled nut. 10" overall length.

Replacement Blades Only fit Razor Saw Sets listed below.

Pin Vises

37-120 Revolving Tool Holder \$9.00

Ball-shaped pin vise head fits the palm of the hand, while thumb and index finger twist the chuck. Useful for drilling larger holes in soft stock. Includes 2 collets with capacity of .015"-.050" & .062"-.113" (.381-1.27 mm & 1.574-2.87 mm) diameter. For drills, taps and reamers. 3 7/8" overall length.

37-160 Spiral Hand Drill \$10.20

Archimedean or spiral hand drill for use with small wire size drills (#70 to #80). Push ring down to turn drill. Spring return makes drilling fast and easy. 4 1/4" overall length.

37-170 Small Pin Vise \$6.90

Small Steel Pin Vise has chuck capacity of .01"-.045" (.25-1.14 mm). 3 3/8" overall length.

37-180 Large Pin Vise \$7.60

Large Steel Pin Vise has chuck capacity of .078"-.125" (1.9-3.1 mm). 3 3/8" overall length.

Steel pin vises for holding wire, rod, drills, taps, reamers, etc. Both can be used in stationary drill press chucks and as an adapter for small drills and taps.

37-130 Tool Holder \$8.70

Ideal for use with small tools including chisels, files, reamers, beading tools, burs and gravers. Includes 2 collets with capacity of .015"-.050" & .062"-.113" (.381-1.27 mm & 1.574-2.87 mm) diameter. 3 7/8" overall length.

37-140 Swivel Head Pin Vise \$8.70

Comes with two double-ended collets in the handle with 0"-.109" or 7/64" (0-2.7686 mm) capacity range. Hexagonal head keeps vise from rolling off of work surface. Holds small tools with round shanks including drills, burs, reamers, taps, needles, scribes: 0"-.05", .03"-.08", .05"-.10", and .07"-.11". Revolving head makes drilling fast. 4" overall length.

37-145 Double Ended Pin Vise \$7.80

Comes with two double-ended collets with 0"-.109" or 7/64" (0-2.7686 mm) capacity range. 3 3/8" overall length. Four chuck sizes for drills, miniature reamers, files and small tools: 0"-.05", .03"-.08", .05"-.10", and .07"-.11".

Twist Drills

37-150 20-Pc High Speed Steel Twist Drill Set \$16.30

Miniature drill set in plastic dispenser with one each of high speed twist drills in wire gauge #61 - #80 (.025"-.053"). For use in small pin vise and other hand tools that hold wire gauges or in rotary handpiece with micro chucks.

37-151 20-Pc Metric High Speed Steel Twist Drill Set \$16.30

Miniature twist drill set in plastic dispenser with one each of high speed twist drills in metric sizes from 0.3mm - 1.6mm. Includes: 0.3, 0.35, 0.4, 0.45, 0.5, 0.55, 0.6, 0.65, 0.7, 0.75, 0.8, 0.85, 0.9, 0.95, 1.0, 1.2, 1.3, 1.4, 1.5, and 1.6. For use in small pin vise, other hand tools or in rotary handpieces with micro chucks.

37-155 20-Pc Diamond Twist Drill Set \$16.30

Diamond coated, wire gauge twist drill set in plastic dispenser. These straight shank drills are made of high quality steel with diamond coating. Set contains one each of drills #61-#80 (.025"-.053").

Wire Gauge	Decimal" Equivalent	Metric (mm) Equivalent

The original Zona Razor Saws were made in the 1950's by a company in Arizona (hence the name "Zona"). Zona's production moved to California and was acquired in the late '90's by Blackstone Industries of Bethel, CT. The acquisition was a good fit since Olson Saw Co. — another manufacturing division of Blackstone Industries— was already making the razor saw blades for Zona's razor saws. Since joining Blackstone, Zona has expanded its line of products and introduced many small hand tools used by hobbyists, model builders, artisans, craftsmen, furniture makers, and do-it-yourselfers.

Olson® Saw makes AllPro® PGT, MVP and other commercial-grade band saw blades in a wide range of sizes and specs, plus the world's

most extensive selection of quality scroll saw blades including PGT®— Precision Ground Tooth, Mach, and other 5" long plain end and pin end blades. Cool Blocks® band saw blade guides and other band/scroll saw accessories, hand held saw frames, blades for jewelers, coping and mini hack saws. www.olsonssaw.net

Edge Finisher manufactures professional quality diamond edge polishing machines that produce clear, polished edges on

acrylic and other rigid plastic sheets. EFC also provides sales, tooling, and technical services for Shannon Plastic Bending Machines made in the Netherlands.
