Columbus McKinnon designed the CM Bandit to be the best lever hoist on the market. As a result, the Bandit has become the world's first HMI-Certified ratchet lever hoist, meeting strict nationally recognized industry standards. This certification supports our commitment to safety, service and after-market support. It instills customer confidence in the quality and value of the CM Bandit, which is also backed by our industry-leading lifetime warranty.

WHAT IS THE HOIST MANUFACTURERS INSTITUTE (HMI)?

HMI is recognized as the authority and leading advocate for the safe and proper operation of hoisting equipment and related products. HMI members are industry-leading suppliers of material handling equipment, including the manufacturing and distribution of manual and powered hoists and trolleys.

WHAT DOES HMI-CERTIFIED MEAN?

The purpose of HMI certification is to instill consumer confidence that the product and its manufacturer have met strict HMI requirements, which include that the manufacturer:

- Be a manufacturer of industrial hoisting equipment
- Have its product meet one or more requirements as stated by HMI
- Have a qualified, U.S.-registered professional engineer verify, sign and seal that the product meets the requirements

SIMPLIFY INVENTORY & INSPECTION MANAGEMENT PROCESSES

All CM Bandit units for the U.S. market come equipped with CM® Smart ID™ – the new radio frequency identification (RFID) technology from Columbus McKinnon. CM Smart ID can help simplify your inventory and inspection management processes.

Before any CM Bandit leaves our factory, the hoist's CM Smart ID RFID chip is associated with product information that is uploaded and stored on the CM Smart ID Cloud. This free information, which includes the Chip ID number, CM product code, product description and capacity, can be instantly accessed by anyone in your company, anywhere, at any time.

CM Smart ID allows operators, safety managers and plant supervisors to share important safety information and inspection logs about a specific unit, as well as easily record and track equipment inventory.

PROTECT AGAINST UNSAFE LIFTING CONDITIONS

All 3 and 6 ton Bandit units feature the Tri-Point Hook Inspection™ system to help protect the operator against unsafe lifting conditions. Bandit load hooks come with 3 distinct raised points that the operator can use to measure the hook to detect any indication of overload or deformation.

THE ANATOMY OF THE BANDIT™

The CM Bandit was designed and built with one purpose – to be the best ratchet lever hoist in the global marketplace.

Manufactured by Columbus McKinnon at our CMCO China facility, every component on the CM Bandit is engineered for superior design and efficiency. Working together, these components provide best-in-class performance and exceptional value for any application.

BOLT-ON SWIVEL HOOKS

Bolt-on hooks with nylon lock nuts allow the operator to quickly disassemble the hook block for full inspection and easy repairs. Helps users comply with inspection requirements stated in ASME B30.21 and B30.10.

Hooks rotate 360° for faster positioning and attachment to pick points.

CAST SAFETY LATCHES

Upper and lower hooks feature cast safety latches that provide positive and secure load engagement.

WIDE HOOK THROAT OPENINGS

Upper and lower hooks feature extra-wide throat openings to allow for easier attachment to loads and larger pick points.

WESTON-TYPE BRAKE

Enclosed brake stays clean and dry for positive load positioning.

FUSED BRAKE ASSEMBLY

Fused brake and ratchet design provides exceptional performance, durability and long life. Fused brake disks are also less susceptible to cracking and catastrophic failure. Design allows for thinner friction liners, less moving parts and fewer parts to keep in stock.

3-YEAR BRAKE WARRANTY

If the brake discs on the Bandit wear out within three years from the date of purchase, CMCO will replace the ratchet disc assembly free of charge.

BEARINGS

Provide smooth operation, lower handle effort and serve as a barrier to contamination. Plated side plate resists corrosion.

PAWLS & PLATE

Heavy-duty double pawls ensure secure load engagement with ratchet brake assembly to provide better load control. Plated side plate resists corrosion.

HAND WHEEL

Use hand wheel to put the hoist in free chaining mode, which allows for quick take up and positioning of slack chain. Designed not to accidentally free chain while under load.

360° ROTATING HANDLE

Full rotation of handle allows for versatile rigging options when working in confined spaces. Hoist features double-reduction gearing for easy operation with minimal handle effort.

UNIQUE SERIAL NUMBER

Each unit has a unique serial number for easy and accurate identification.

SECURE COMFORT GRIP

Screwed-on comfortable rubber grip ensures a secure hold in all environments.

OPTIONAL INTERNAL LOAD LIMITER

Allows the handle to rotate freely, preventing the lifting of an overload sufficient to damage the hoist.

POCKET WHEEL

2-part design for easy inspection and low-cost replacement.

PINION

Made of tough and durable grade three carburized steel.

CHAIN END STOP

Chain end stop design prevents it from entering the lift wheel and jamming the hoist. Made of forged alloy steel for durability.

GOLD CHROMATE CHAIN

Load-tested, gold-chromate chain is made in the U.S.A. by Columbus McKinnon and meets the strength requirements of Grade 100 chain. Large-diameter chain also provides added strength, safety and long life.

ZINC-PLATED COMPONENTS

Zinc plating provides protection against corrosion when working in harsh environments. (Chain Guide components shown)

HOUSING

Impact-resistant, stamped-steel housing withstands repeated rigorous use. Features recognizable orange powder-coat finish for extra protection against corrosion.

NYLON LOCK NUTS

Nylon lock nuts are used to hold the hoist body together. Lock nuts can be securely torqued and are less likely to loosen in the field.
