

## NCGB SERIES NON-METALLIC TRAY CABLE FITTING

The NCGB non-metallic fitting is specifically designed for tray cable. The new NCGB with an internal mechanical grip provides UL and CSA rated pull resistance for tray cable and provides mechanical protection from vibration and movement. This compact design includes an integral gasket on the fitting's external threads that prevents rain and hose directed water from entering an enclosure. The neoprene bushing seals around the cable and keeps out moisture, coolants, oils and dust. The NCGB cable fitting may be used with TC tray cable and round portable cords.

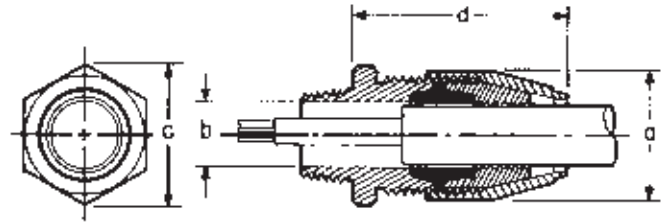

### FEATURES AND BENEFITS

- Non-metallic construction provides superior corrosion protection.
- Compact design allows close grouping of connectors for areas where space is limited.
- No assembly or disassembly required prior to installation.
- Eliminates tools and increases speed of installation. Tightens by hand to create a watertight seal. Exceeds UL and cUL pull-out performance.
- Available in 1/2" to 1" trade sizes.
- Neoprene bushing seals out moisture, coolants, oils and dust over a broad range of cable diameters.
- UL Listed and cUL third-party certified.
- Gasket on external threads seals out water and maintains a Type 3 and 4X rating on associated enclosures.
