

## BUL-Z-EYE™ 2-9/16 in. Self-Feed Wood Boring Bit

### Product Resources

[BUL-Z-EYE™ Wood Boring Bits Brochure](#)  
(PDF | 1087K)

### Features

- Twin cutting edges for superior cutting speed and ultra clean holes
- Precision ground teeth with up to 50% wider cutting surface, provides clean and balanced cuts for maximum control
- Robust replaceable lead screw with burr-free threads that feed the bit through the wood at a consistent rate
- Precision machined shaft for bit concentricity to eliminate wobble and deliver a truer hole
- Black oxide coated, heat treated and hardened for added durability
- Quick-change shank for fast, secure change out
