

Eaton's high-efficiency dry-type transformers meet DOE 2016 regulations

Transformer-to-wall clearance

Now only 2 inches to provide optimal placement flexibility and safety

3rd party verified

Meets the most stringent government regulations ever—35% improvement over TP-1. Look for the UL verification seal

Lower center of gravity

For stable shipping, surer handling and less threat of tip overs

Meets OSHPD

California Seismic Certification

Meets NEC 450.10 (A)

With bonding ground bar standard

Top Connection Terminals

For spacious wiring compartment

Easy to move and place

Big 4-inch ground-to-floor clearance for forklift access

Extra-robust mechanical construction

For more trouble-free shipping and long-term operation: reinforced enclosures, repositioned core coils and more

Be sure that your customers get the efficiency they pay for.
