**Description:**

Cast-Copper Two-Way Reducing Splice for 4/0 Str. Wire to 1/0 Str., Die Code 66 White

**Features**

Ideal for telecom (inside/outside plant), commercial, industrial, MRO, and any other 600V-35KV applications requiring splicing of different-sized conductors.

Tin-plated, sand-cast copper construction provides superior tensile strength, high conductivity, and excellent corrosion-resistance.

Easier to install and insulate than screw-machined, contour designed reducing splices. Constant O.D. saves time on installation by eliminating the need for crimp-tool/die change.
