

POWER YOUR
ENERGY EFFICIENCY
PROGRAMS
with proven lighting controls

HOW TO USE THIS GUIDE

Legrand's popular stand-alone lighting controls offer proven performance for virtually every commercial application space. You can rely on us to help solve energy code compliance issues easily and cost effectively with Wattstopper Lighting Controls.

This guide will help you choose the correct lighting control device for your next lighting project.

We have also included some of the most common commercial spaces and highlighted them in this guide for quicker identification.

Step 1 Choose the correct voltage

Step 2 Choose the appropriate device placement

Step 3 Choose the technology

Step 4 Choose the right coverage pattern

Step 5 Choose the right color

LEGENDS

VOLTAGE		APPLICATION	
	120V		347V
	230V		480V
	240V		24VPP = Power Pack Required
	277V		
TECHNOLOGY			
	Passive Infrared		Dual Technology
	Ultrasonic		
NEUTRAL			
	Required		
	Optional		
COVERAGE PATTERN		PLATE COLOR	
	360° Coverage		White
	120° Coverage		Black
	90° Coverage		Grey
	45° Coverage		Almond
			Light Almond
			Brown
			Ivory
			Red

It's easy to choose the right sensor technology.

PIR

Passive Infrared technology detects heat emitted from a human body in motion and relies on a clear line of sight.

Ideal for:

- Small offices
- Conference rooms

Ultrasonic

Ultrasonic technology detects occupant movement within a room and has the ability to detect movement around partitions.

Ideal for:

- Large restrooms
- Hallways
- Open offices

Dual Technology

Combines PIR and Ultrasonic technology for hard to sense spaces when maximized sensitivity is required.

Ideal for:

- Executive offices
- Large conference rooms
- Classrooms
