Jackstands

The RIDGID line of jackstands provides superior pipe support for all of your fabrication needs. Whether you need pipe support for threading, roll grooving or welding, RIDGID has a stand for you.

- VJ-99/VJ-98:** The RIDGID VJ stands are now easier to transport around a job site. With the captured T-handle, a user can pick up the entire stand without the V-head detaching from the base. The VJ-99 and VJ-98 also feature a 2,500 lbs. weight capacity and safety cradle pipe up to 12" diameter.
- RJ-99/RJ-98:** Also featuring the captured T-handle, the RIDGID RJ stands are equipped with roller heads to allow pipe to move freely in the cradle. All RIDGID pipe stands have fully welded seams for superior durability and strength.
- RJ-624:** The RJ-624 is Ridge Tool's newest pipe stand. Designed for large diameter pipe, the RJ-624 will accommodate pipe from 6" diameter up to 24". The RJ-624 is an excellent choice for roll grooving and welding applications of large diameter pipe. The fully adjustable cradle will center the pipe and the heavy-duty rollers allow the pipe to rotate freely with the aid of a power drive. The RJ-624 is rated for loads up to 4,500 lbs.
