

Grounding Busbar – EGBA14424CIGBE

Proper bonding is essential to create an equipotential plane between service grounds and equipment during fault and transient conditions. This equipotential plane provides a near-zero voltage differential, and serves to protect people and equipment during these events. The grounding busbar is the most popular bonding product in use today.

- Provides a convenient, single-point grounding and bonding location
- Conductors are welded to the bar using a ERICO CADWELD exothermic connection or are mechanically fastened by using lugs
- Custom bars can be designed and manufactured to customer specifications

| | |
|-----------------------------|---------------------------------|
| Part Number | EGBA14424CIGBE |
| Material | Copper |
| Busbar Configuration | Busbar, Insulators and Brackets |
| Hole Pattern | CIGBE |
| Mounting Hole Size | 0.438" |
| Length | 24" |
| Width | 4" |
| Thickness | 1/4" |
| Tin Plating | No |
| Pigtail Included | No |
| Certifications | cULus |
| Standard Packaging Quantity | 1 pc |
| UPC | 78285644543 |

Diagrams are representative of the hole pattern. The number of holes is dependent on the length of the grounding busbar. Additional configurations are available by special order. Note special orders may incur additional lead time.

UL, UR, cUL, cUR, cULus and cURus are registered certification marks of UL LLC.

WARNING

Pentair products shall be installed and used only as indicated in Pentair's product instruction sheets and training materials. Instruction sheets are available at erico.pentair.com and from your Pentair customer service representative. Improper installation, misuse, misapplication or other failure to completely follow Pentair's instructions and warnings may cause product malfunction, property damage, serious bodily injury and death and/or void your warranty.
