

LED T8 Plug & Play Tubes

SHAT-R-SHIELD'S LED T8 Plug & Play Tubes are an instant fit retrofit for T8 fluorescent lamps, designed to operate on the existing electronic ballast while using only a fraction of the energy. These lamps are the easiest way to upgrade to LED lighting without having to rewire or replace current systems.

- Compatible with instant & program start fluorescent electronic ballasts
- Frosted glass lens is safety coated for protection if lamp is accidentally broken
- Guaranteed not to yellow, crack or flake
- Excellent color consistency-- no flickering, noise-free
