SCREW-ON Vapor Boxes for Fixtures, Devices

NEW!

NEW CONSTRUCTION

Arlington's non-metallic ONE-BOX™ fan, fixture and device boxes feature built-in flanges with gaskets attached that form a protective barrier against air infiltration, enabling installers to meet local codes where required.

Fast, easy, secure installation in new construction, our vapor boxes mount to wood or steel joists with nails or screws that ship captive.

ONE-BOX Vapor Boxes for Fixtures, Fans and Devices...

- Non-metallic, non-conductive
- For fixtures (round), fan or fixture (bar hanger) and devices (single and multiple gangs)
- No loose parts – ships with mounting screws or captive nails (on facing page) and installed NM cable connectors with gaskets attached
- For new construction with single or double drywall
- UL/CSA Listed

Patented. Other patents pending

Arlington

For New Construction Plastic Vapor Box with Adjustable Steel Bracket for Fans/Fixtures

Arlington's heavy-duty, non-metallic fan/fixture boxes feature

fully adjustable plated steel brackets that fit joists spaced 16" to 24" o.c.

Just like our vapor boxes for fixtures and devices, these fan/fixture boxes have built-in flanges with gaskets installed that form a protective barrier against air infiltration, so installers can meet residential codes where required.

Best of all, they deliver flush ceiling installations!

Fast, secure installation in new construction, our fan/fixture vapor boxes mount to wood joists with supplied screws.

FBR415F ships ready to install on SINGLE drywall;
FBR425F is for DOUBLE drywall.

FBR415F

FBR425F

- Non-metallic, non-conductive box, with fully adjustable steel bracket
- Position box anywhere along bracket
- Captive fan/fixture bracket installation screws, mud cover, installed NM cable connector, and all gasket material
- UL/CSA Listed
