PanMPO to LC Uniboot Cable Harness (Hydra)

**INSTALLATION INSTRUCTIONS** **FS046A**

Cable Transition Usage

Tak-Ty Option

Slot features in the cable transition allows for the use of a Tak-Ty to either secure the cable harness to a rack feature, such as cable management fingers, or to more robustly secure multiple cable transitions that are interlocked together.

Cable transition

LC Uniboot Connectors

PanMPO Connector
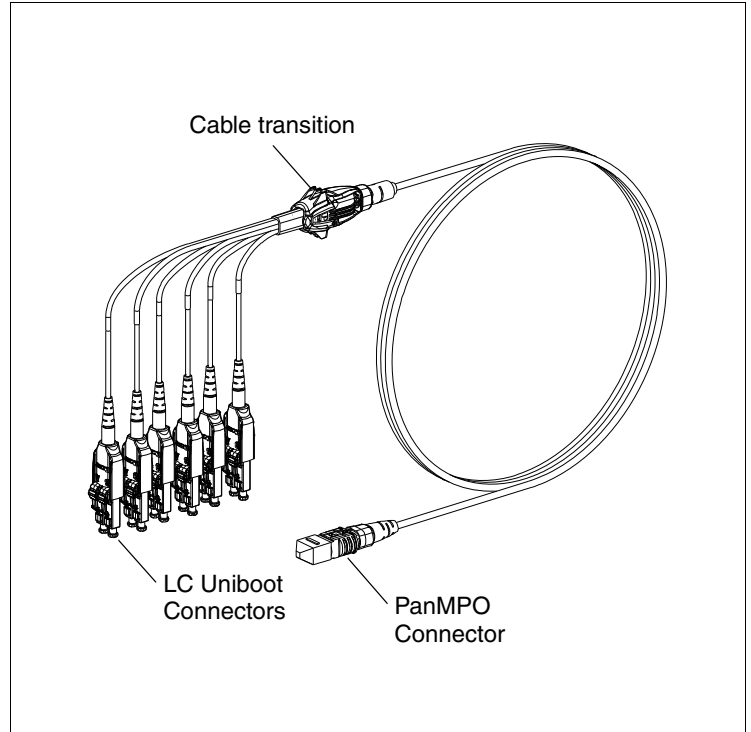

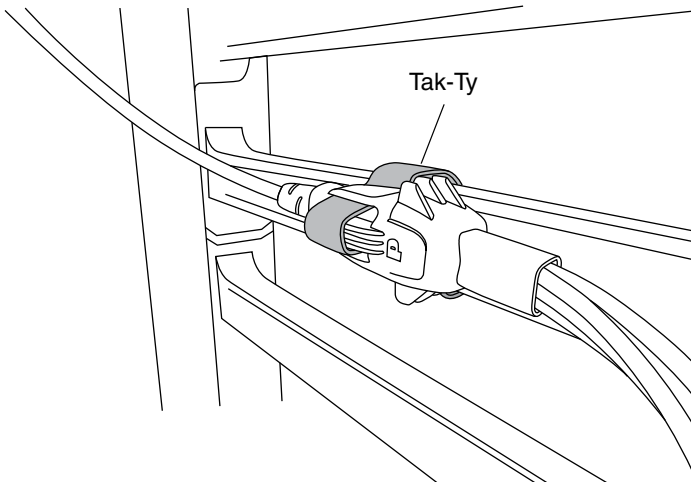

Cable Clips & Housing Ribs Option

3.0mm round cable clips

Housing ribs
(Transitions interlocked)
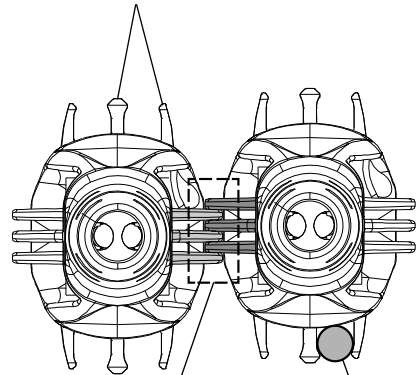

3.0mm round cable
(Cable secured in clip)

Cable management example

PanMPO Gender Changeover

1 **Male** = Pins extracted

Outer housing

Pins extracted
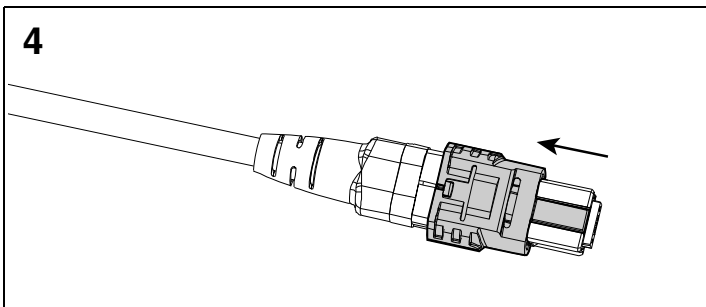

Squeeze both sides of the outer housing at the back end evenly until you hear an audible click. Pull off connector to remove.

2 **CAUTION!** Only Panduit tool is to be used for gender change. Use of any other tool can cause fiber damage and will void the product warranty.

Pin retraction tool
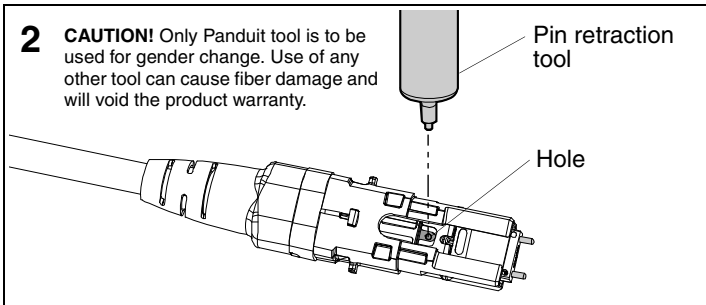

Hole

Locate hole in the inner housing on the slotted side and position pin retraction tool over the hole.

**3** **Female** = Pins retracted

Gently

Pins retracted
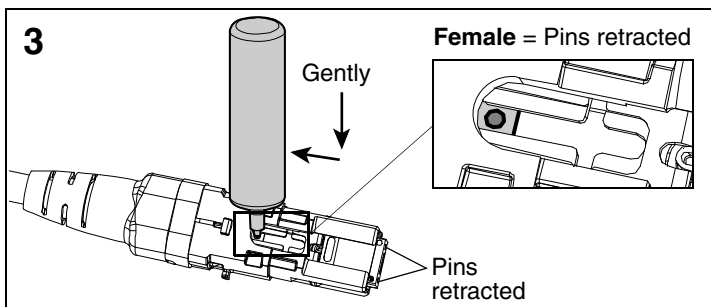

Insert tool into hole, press down gently, and push backward to retract connector pins to the female state. Repeat process in opposite direction to extract pins for male state.
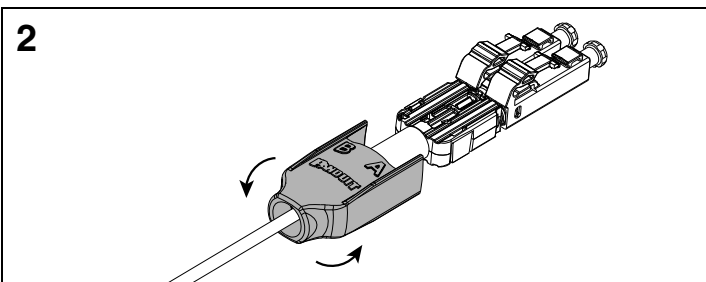

4

Re-install the outer housing. Ensure the key is in the proper orientation. See PanMPO polarity changeover instructions on page 2 of FS041* for more details.
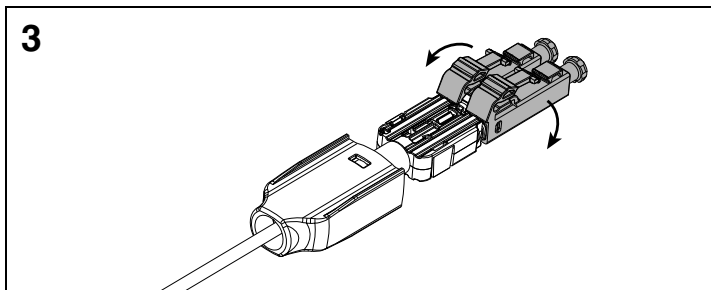

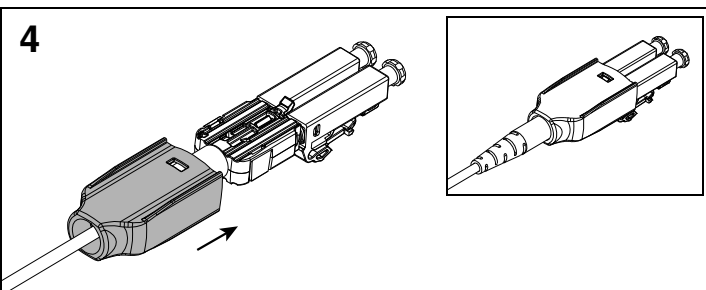

LC Uniboot Polarity Changeover - Pair Flipping

1
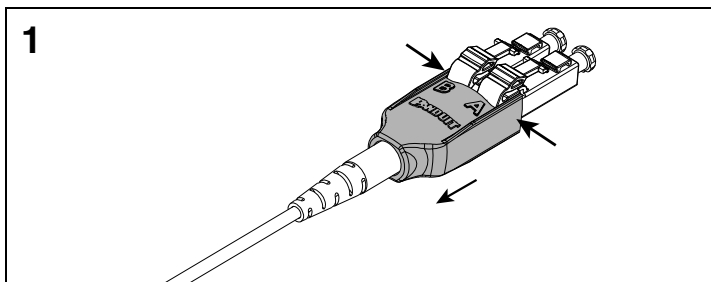

Squeeze both sides of the LC Uniboot cover evenly and pull back to disengage the tab on the opposite side.

2

Slide the LC Uniboot cover back away from connectors and rotate 180°.

3

Rotate each LC connector downward 180°.

4

Re-install the LC Uniboot cover until you hear an audible click.

*Denotes instruction sheet revision letter.
