With SmartCool technology, a thermal sensor in the lamp activates during extreme high temperature conditions. Power to the lamp is reduced by up to 20% to cool the lamp and maintain lamp life. Once the sensor reaches an acceptable temperature, the lamp gradually returns to full light output. Included in 54W, 80W, 100W and 110W DirectDrive HID LED lamps.

## Retrofit Installation Instructions for 2x2 and 2x4 Doorframe Troffer Fixtures

**STEP 1: Shut off power to the fixture.** Open the fixture lens and remove the existing fluorescent lamps, ballast cover, and lens. Disconnect the ballast from the building's line voltage.

**STEP 2:** Install the support brackets (x2) and secure with tek screws.

**STEP 3 (Optional):** Install side plates (x2). This step is dependent on whether or not there are gaps between the fixture and the existing ceiling grid.

**STEP 4:** Insert the doorframe of the retrofit into the keyholes of the support brackets and slide the unit into place.

**STEP 5:** Hook the safety cables into the existing lances/holes of the fixture.

**STEP 6:** Make electrical connection for input power via the included Power Quick Disconnect. 0-10V connections are optional.

**STEP 7:** Swing the doorframe assembly up and secure it by locking the latches. Restore power to the fixture.

Each 8' kit includes (2) retrofit housings with pre-wired LED drivers, (3) installation brackets, (2) lenses, (1) label, and installation instructions  
Each 4' kit includes (1) retrofit housing with pre-wired LED driver, (2) installation brackets, (1) lens, (1) label, and installation instructions

### TYPICAL INSTALLATION APPLICATION

**STEP 1: Shut off power to the fixture.** Remove the existing fluorescent lamps and the ballast cover. Disconnect the ballast from the building's line voltage.

**STEP 2:** Cut the wire leads coming from the sockets and remove the sockets and socket bars on both ends of the fixture.

**STEP 3:** Break apart the 1-piece mounting bracket kit into 3 individual pieces. Install a small bracket at each end of the fixture and the large bracket at the center of fixture (for 8' fixtures only). Bend the brackets over the fixture to fit the exact width and fasten them to the fixture with the provided tek screws.

**STEP 4:** Fasten the safety cables (x2) from the retrofit pan(s) to the fixture housing using existing lances/holes of the fixture.

**STEP 5:** Make electrical connections for input power (via the included Power Quick Disconnect) and fixture ground. 0-10V connections optional.

**For 8' kits only:** connect the LED module wiring between the 2 strip pans via the pre-wired linking connector.

**STEP 6:** Fasten the pans to the strip fixture with a quarter turn (provided) on each end.

**STEP 7:** Install the lens by gently squeezing it into the grooved edge of the pan. Restore power to the fixture.
