

building a smarter, unified business foundation

Connect. Manage. Automate.

Cabling System

Your network drives the critical data, voice, video, and security applications required to support your business. A pre-terminated cabling system simplifies the delivery of those network services by providing reliable infrastructure components assembled and tested in a factory-controlled environment.

Benefits of a Pre-Terminated

An end-to-end pre-terminated cabling system is an ideal solution for data centers especially when time for traditional cable installation, termination, and testing is limited. Pre-terminated cable assemblies offer a simple plug-n-go solution for links between LAN switches, servers, patch panels, and zone distribution areas, for new installations or to enable easy additions to current infrastructure.

Panduit's Unified Physical Infrastructure (UPI)

A unified approach to physical and logical systems architecture is imperative for solutions to fully address the need for availability, agility, integration, and security.

Panduit has developed the industry's most comprehensive and holistic approach to a Unified Physical Infrastructure and can help enterprises align, converge, and optimize critical systems - communication, computing, control, power, and security - to build a smarter, unified business foundation.

Advantages of the Panduit® QuickNet™ Copper Cabling System

As part of the complete QuickNet[™] Solution, the Panduit[®] QuickNet[™] Copper Cabling System is a custom pre-terminated cabling solution, designed to meet unique structured cabling requirements. Fast and simple to install, this high-density solution provides consistent network reliability and reduces initial on-site rework. This leading-edge system delivers ensured performance for the lowest total cost of ownership.

Quick Network Deployment

Pre-terminated cabling systems can be installed in 75% less time than field-termination methods, eliminating the need for on-site bundling, terminating, and testing. Moves, adds, and changes can be made immediately by existing on-site network professionals, increasing productivity relative to traditional field installations. This is critical for areas that require high security and limited access, as changes to the network can be made without scheduling outside personnel.

Mitigates Risks – Quality, Reliability, Performance and Security

The QuickNet™ Cabling System mitigates risk in the areas of the quality, reliability, and performance of the installed system, as well as site security during installation. Quality and reliability of the installed system are ensured through the use of authentic Panduit components that are assembled and tested in Panduit's factory-controlled environment, and performance is ensured by the 100% testing of each finished assembly. Site security risks are minimized due to the significantly reduced installation time, which means fewer installers and less time spent by them on-site.

Provides a Re-Deployable Asset

Each QuickNet™ assembly is labeled with length and unique serial number information so it can be easily catalogued and tracked as a network asset, and as such can quickly and easily be redeployed to address changing network needs.

Why Specify Panduit[®] QuickNet[™] Copper Cabling System?

- Quick Deployment
 75% Faster
- Ease of Installation Plug-n-Go Solution
- Improved Reliability
 100% Factory Performance Tested
- Unified Copper and Fiber Solution
 Copper and Fiber in the
 Same Patch Panels
- High Performing Cabling System Category 6A and Category 6, UTP and Shielded
- Standard Lengths Stocked Immediate Availability
- Custom Assemblies Available
 For Unique Requirements
- "Green" Solution 80% Less Packaging Waste

A Foundation of Excellence

Innovative Design

The Panduit® QuickNet $^{\!\scriptscriptstyle {\rm IM}}$ Copper Cabling System incorporates innovative design features.

- Built-in release mechanism on QuickNet[™] Pre-Terminated Cassettes enables simple installation and removal with one hand
- 48-port (1 RU) high-density angled patch panels and PatchRunner™ Vertical Cable Managers quadruple rack density for reduced real estate costs
- QuickNet[™] Adapter snaps in and out of QuickNet[™] Patch Panels and accepts all Mini-Com[®] Modules to provide flexibility and scalability for changing network requirements
- QuickNet[™] Plug Pack Assemblies facilitate quick and easy connection and disconnection of cables to a variety of switches, reducing time and cost associated when installing and maintaining structured cabling links
- Staggered cable lengths ensure proper bend radius control and an aesthetic solution
- Jack modules, cable, and patch cords are tuned to each other to deliver maximum channel performance and network reliability

World-Class Quality

QuickNet™ Copper Cabling System components are manufactured to strict ISO quality procedures.

- QuickNet[™] Cable Assemblies are 100% performance tested to TIA or ISO electrical permanent link specifications (test report shipped with each assembly)
- Each assembly has a unique serial number for future traceability
- Giga-TX[™] Jack Modules undergo more than 90 additional quality checks for assured performance

World-Class Service and Support

At Panduit, we respond quickly to customer needs and deliver exceptional service levels globally.

- Global sales and technical support teams work together to ensure the optimum solution is provided to meet your requirements
- Short lead times and custom configurations keep your project on schedule
- Design tools facilitate customization and allow flexibility when designing the structured cabling infrastructure

Shielded cassettes provide seamless self bonding for shielded cable assemblies.

Elements of the System

QuickNet™ Cable Assemblies

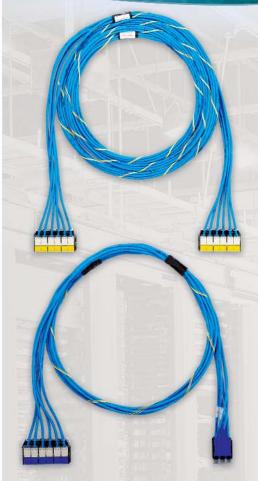

- Offer UTP Category 6 Cabling and UTP/STP Category 6A Cabling (plenum, riser, LSZH, and CM fire ratings)
- Pre-bundled with six cables for easy installation
- Available in lengths from 10 to 295 feet (one foot increments) or 3 meter to 90 meters (half meter increments) and different cable colors for redundant path applications
- Multiple termination types including pre-terminated cassettes, jack modules, modular plugs, plug packs, and/or unterminated options
- Shielded die cast cassette utilizes direct bonding, eliminating external bonding requirement

QuickNet™ Angled and Flat Patch Panels

- Accept Quicknet[™] Pre-Terminated Cassettes, which snap in and out with one hand for quick installation
- Available in 24-port (1 RU) standard density and 48-port (1 RU) high-density configurations
- Angled design allows cable to flow to each side of the rack and eliminates the need for horizontal cable managers by enabling patch cords to be routed directly into vertical cable managers
- Proper identification of each port with pre-printed numbers above each port;
 vertical numbering from top to bottom of panel is also available for high density switch applications

OuickNet™ Patch Panel Accessories

- Patch panel adapter accepts Mini-Com® Modules for UTP, fiber optic, and audio/video applications
- Blank patch panel adapter reserves space for future use while promoting proper airflow and cooling
- Adapters and blanks easily snap in and out of QuickNet™ Patch Panels

QuickNet™ Plug Packs allow multiple cables to be installed simultaneously with one hand for speed of deployment in switch applications.

24-port, flat modular patch panel, populated with pre-terminated shielded cassettes with shielded jack modules.

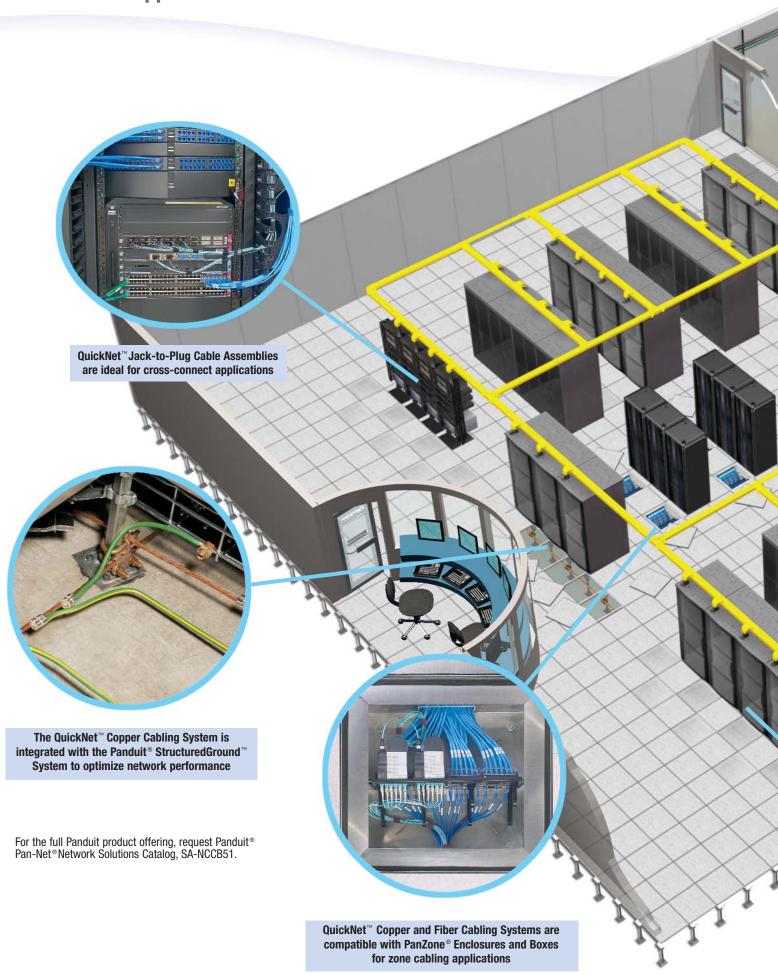

Patch panel blank

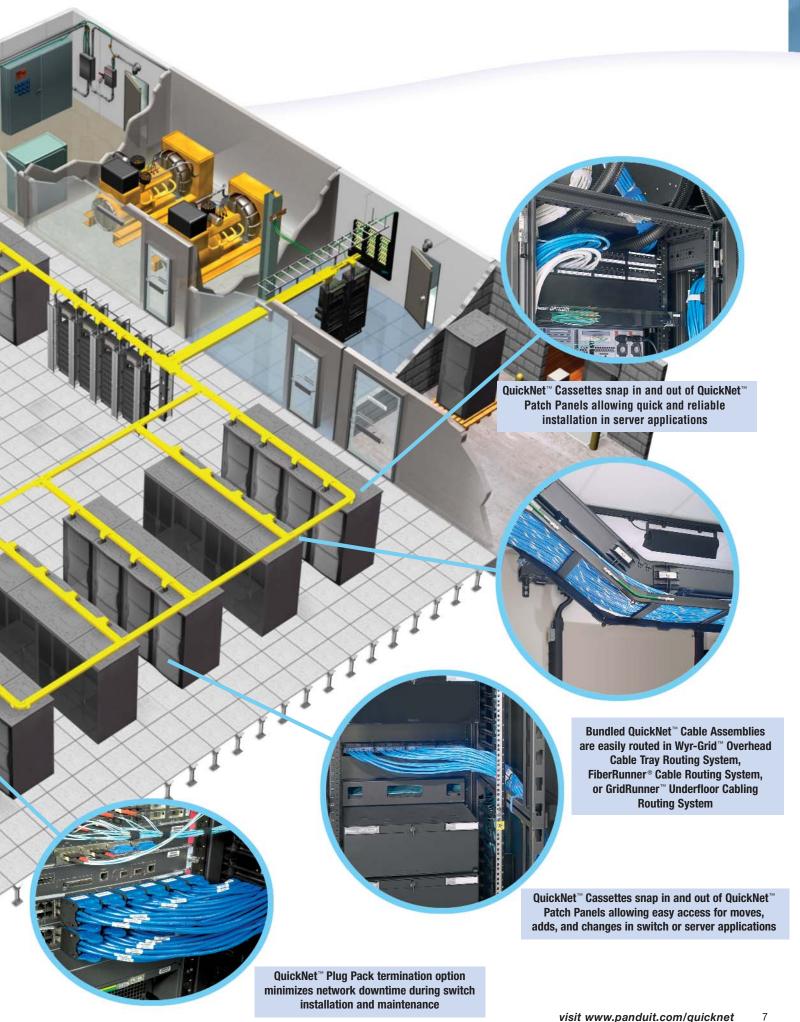

Patch panel adapter, populated with copper, fiber and audio video modules

48-port, angled modular patch panel, populated with pre-terminated cassettes with UTP jack modules

Data Center Applications

Environmental Benefits of the QuickNet™ Copper Cabling System

QuickNet™ installations are more "Green" than traditional installations:

- 80% Less Packaging Waste
- No Termination Scrap Material or Debris to Clean Up
- QuickNet[™] Assemblies are Reusable

A Commitment to Green

As a global manufacturer, Panduit has embraced lean and sustainable thinking as a core value by designing solutions and facilities that are good for the environment and for business. The QuickNet™ Copper Cabling System supports this commitment by significantly reducing the amount of product packaging waste as compared to traditional field-termination installations, and by providing cabling assemblies which are inherently redeployable and reusable.

Typical Waste from Traditional Installation vs. QuickNet™ Installation

(Based on 600 Link Installation)

Traditional Installation

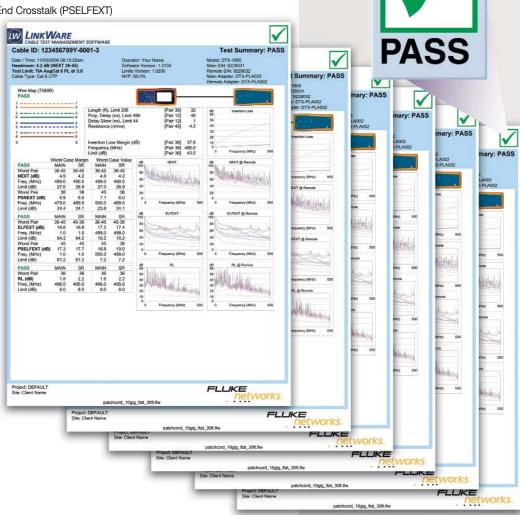

QuickNet™ Installation

Permanent Link Performance

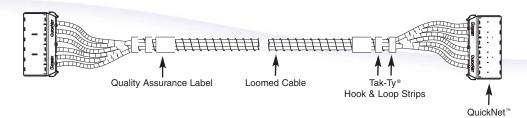

The Panduit® QuickNet™ Copper Cabling System exceeds the applicable permanent link requirements for Category 6A and Category 6 transmission over twisted-pair cabling. Each assembly is 100% performance tested at the factory. A Fluke* Linkware test report accompanies each cable assembly and will also be archived by Panduit. Because the cable assemblies are 100% factory tested, the time and cost associated with on-site field testing are eliminated. The QuickNet™ Copper Cabling System provides risk mitigation and guaranteed performance by providing cable assemblies with a factory product warranty.

Permanent Link Compliance is tested for the following parameters:

- Insertion Loss (IL)
- Return Loss (RL)
- Near-End Crosstalk (NEXT)
- Power Sum Near-End Crosstalk (PSNEXT)
- Equal Level Far-End Crosstalk (ELFEXT)
- Power Sum Equal Level Far-End Crosstalk (PSELFEXT)

Real-World Solutions to Ensure the Success of Our Customers

With a proven reputation for excellence and technology innovation, a robust ecosystem of global partners, and long-term alliances with top industry leaders, Panduit is a valuable, trusted partner offering strategic vision and real-world solutions to ensure the success of our customers.

Innovative Technology Leadership

Panduit is an industry leader in developing innovative technology solutions that meet the rapidly evolving needs of our customers around the world. Our commitment to continued leadership is supported by significant ongoing investment, dedicated manufacturing facilities, strategic technology alliances, and collaborative R&D with other industry leaders.

Global Business & Commitment

Panduit's ongoing commitment to excellence and our technology alliances with key industry leaders such as Cisco Systems, EMC, Emerson, and IBM enables our highly skilled and knowledgeable global sales, systems engineering, and technical support teams to engage with critical customer challenges that range from initial problem determination all the way to resolution. Local specialists, trained to global standards and competencies, provide consistent regional support that brings value to local business. Our global value chain, which combines manufacturing, distribution, and service, provides prompt responses to customer-related issues, and streamlines procurement and delivery to any global destination.

Best-In-Class Partner Ecosystem

Panduit employs a consultative approach to identify customer needs and engage appropriate partners in a collaborative fashion to serve our customers. Panduit's robust ecosystem of architects, consultants, engineers, designers, systems integrators, contractors, and distributors offer a full portfolio of lifecycle services. Our partners are trained on relevant services to Plan & Design, Build & Deploy, and Maintain & Operate to deliver predictable and measurable results.

Worldwide Alliances

Panduit has established long-term strategic alliances with top global industry leaders such as Cisco Systems, EMC, IBM, and Rockwell Automation to develop and integrate innovative, holistic solutions for our customers. We continually invest in relationships and resources for solving our customers' greatest business challenges.

Eco-Sustainability & Global Citizenship

With a long-standing commitment to environmental excellence, Panduit continually develops and implements solutions designed to protect, replenish, and restore the world in which we live and operate. This commitment is demonstrated by Panduit's LEED Gold certified new world headquarters and future sustainable building plans using its own revolutionary Unified Physical InfrastructureSM approach to enable convergence of critical systems for driving energy efficiency.
