

Philips Lightolier C-Plus Recessed Incandescent

6" Housing with Quick Plug

Specifier's Reference

Project
Type
Model No.
Comments

application

- For new construction. Thermally protected labor saving recessed housing. Engineered polymer plaster frame includes pre-positioned nails for fast installation. Fixture can be used for direct contact of ceiling insulation and is AirSeal™ rated. For higher wattage non IC applications, ceiling insulation must be a minimum of three inches from recessed fixture. Housing ships without socket bracket and accepts socket supporting trims only.

construction

- Housing: Constructed of .032 aluminum. Adjusts vertically in plaster frame to accommodate ceilings 1/2" to 1-1/2" thick. Housing can be pulled through plaster frame for access to junction box. Accommodates lamps up to 150 watts, depending on trim used and presence of ceiling insulation. Ceiling opening of 6-11/16". Dome constructed of heavy-duty steel.
- Plaster Frame: High impact, high temperature, lightweight injection-molded plaster frame. Self-leveling frame ensures accurate positioning. Two pre installed double-headed nails fasten plaster frame to joist. Double-headed 16 penny nails permit easy repositioning if required.
- Socket: Medium base screw shell porcelain socket, mounted with snap-in clips to top of trim.
- Bar Hangers: Each case includes 4 pair of 27" flat BH3 bar hangers. (product is shipped in packs of 8)
- Junction Box: Moveable non-conductive junction box with four pry-out knockouts for non-metallic sheathed cable (Romex) and two 1/2" conduit pry-outs. Captive door hinges upward and stays open to permit fast electrical connections. Romex connectors not required. Staple Romex to joist within 8 inches of junction box. Meets all safety requirements of cULus and the N.E.C.

- IC & Non-IC: Housing is cULus Listed for direct contact with thermal insulation. For Non-IC applications higher wattages maybe used. Insulation must be kept three inches away from housing in non-IC applications.
- Thermal Protection: Standard thermal protection device inside housing automatically takes fixture out of service if temperature becomes excessive from contact with insulation, overlamping, or wrong lamp/trim combination.

listings

- cULus Listed for damp locations and through branch wiring, 4 in/4 out.
- AirSeal™: Fixture is AirSeal™ rated according to ASTM E283 to no more than 2.0 cubic feet of air per minute at 75 pascals. Fixture meets Washington State Energy Code and Energy Conservation Code.

accessories (ordered separately)

- Oversize Trim Ring **OV2**
(For use with full reflector socket supporting-IC type trims.)

options

- Closed Cell Gasket (consult factory) **G**
