Perform At Your Peak

**GET CLOSER
TO THE PERFECT BEAD**

Every welder knows

their work would be impossible without a sturdy helmet. But that helmet also has to be multi-functional and comfortable to wear for long hours. Our Leadhead® auto darkening helmets were created with that in mind. Supported by ultra-comfortable headgear, we've engineered helmets that will get you closer to the perfect bead.

When it comes to your craft, not every job requires the same tools. We also offer passive helmets, goggles, and IR tinted eyewear to help you

Perform At Your Peak®.

Which welding helmet is right for you?

Auto Darkening Helmets

- Auto darkening filter (ADF) automatically darks the lens when sensors detect the bright welding arc
- When the lens is not active, the shade is typically at shade 3 or 4 so your visibility is clear
- Variable shade allows you to protect your eyes and get a view of the entire weld
- Larger protected viewing area than passive helmets, goggles, or glasses
- No need to snap your head to lower the welding hood
- Starting of the arc is easier because you can see the position of the stick or gun

Passive Helmets

- Less expensive than auto darkening helmets
- Generally the best option for optical clarity
- Easy to maintain and replace
- Very reliable

ANSI Z87.1

CSA Z94.3

All welding products meet ANSI Z87.1+ standards and some options meet Canadian (CSA Z94.3-15) standards. For specific lens options visit our website or contact your sales representative.

WHAM30 Series ••

Shades: 4 / 5-8 / 9-13 Stepless Variable
View Area: 3.858" x 3.425" (98 x 87 mm)
Operation Controls: Manual Internal
Sensors: Four independent in staggered design
Power Supply: Solar cells and replaceable lithium-battery
Grind Modes: Grinding and welding
Switching Speed: 1/30000 second
TIG Rating: 5 amps and below
Material: High-impact resistant nylon
UV/IR Protection: Up to shade DIN16 at all times

WHAD60 Series ••

Shades: 4 / 5-13 Digital Display
View Area: 3.937" x 2.362" (100 x 60 mm)
Operation Controls: Digital Internal
Sensors: Four independent in staggered design
Power Supply: Solar cells and replaceable lithium-battery
Grind Modes: Grinding and welding
Switching Speed: 1/30000 second
TIG Rating: 5 amps and below
Material: High-impact resistant nylon
UV/IR Protection: Up to shade DIN16 at all times

WHAM10 Series ••

Shades: 4 / 9-13 Stepless Variable
View Area: 3.937" x 1.77" (100 x 45 mm)
Operation Controls: Manual External/Internal
Sensors: Four independent in staggered design
Power Supply: Solar cells and replaceable lithium-battery
Grind Modes: Grinding and welding
Switching Speed: 1/30000 second
TIG Rating: 5 amps and below
Material: High-impact resistant nylon
UV/IR Protection: Up to shade DIN16 at all times

LEADHEAD®

Passive Helmets and Goggles **ANSI CSA**
WHP100, WG100, and WG200

WHP100..

Shades: IR shade #10 welding filter

Lens: Stationary front lens

View Area: 4.25" x 2" (107.95 x 50.8 mm)

Material: Thermoplastic shell with nylon suspension

Features: Optimally balanced "shake down" helmet minimizes carbon monoxide build up

Ample space for respirators

WG100•

IR shade #5, polycarbonate lens

Lift front lens

4" x 1.75" (101.6 x 44.45 mm)

Soft PVC goggle body, durable ABS lens holder

Elastic strap holds goggle firmly in place
Indirectly vented to reduce fogging and control the influx of liquids

WG200•

IR shade #5, polycarbonate lens

Stationary front lens

4" x 1.75" (101.6 x 44.45 mm)

Soft PVC goggle body, durable ABS lens holder

Elastic strap holds goggle firmly in place
Indirectly vented to reduce fogging and control the influx of liquids

ANSI Z87.1

CSA Z94.3

All welding products meet ANSI Z87.1+ standards and some options meet Canadian (CSA Z94.3-15) standards. For specific lens options visit our website or contact your sales representative.
