Dyneema®
The softer strength

These gloves feature the ultimate dexterity and cut protection that only Dyneema® can provide, with a polyurethane palm coating for increased grip. Super stretchy and snug fitting, the fingertips are open on the thumb, index and middle digits. These highly specialized gloves offer versatility in jobs where multiple tasks are being performed. Handling sharp materials poses the greatest risk to the palm and the thumb crotch area. But when cut protection in this area of the hand is combined with open fingers, one can seamlessly switch from a task like material handling, to a task like data entry requiring touch sensitivity, without having to remove gloves.
