# **Superstrut® metal framing system**

## Metal framing channel and accessories

**Thomas & Betts is now ABB Installation Products, but our long legacy of quality products and innovation remains the same. From connectors that help wire buildings on Earth to cable ties that help put machines in space, we continue to work every day to make, market, design and sell products that provide a smarter, safer and more reliable flow of electricity, from source to socket.**

# Superstrut® metal framing system

## Overview

New Trivalent GoldGalv® finish is RoHS compliant

ABB is proud to introduce the new and improved Trivalent GoldGalv® finish. GoldGalv® finish is a combination of .5 mils electro-plated zinc and a gold Trivalent Chromium finish.

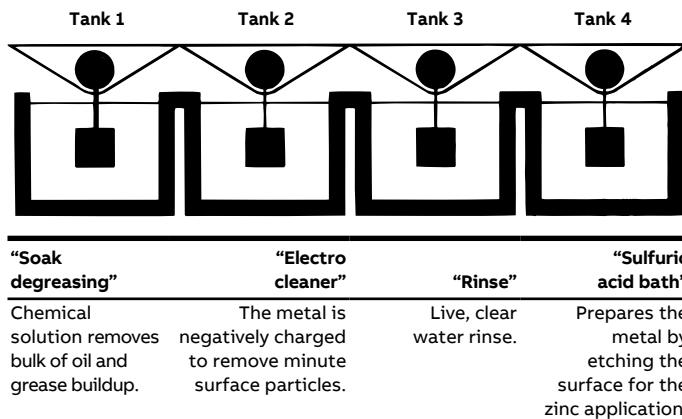

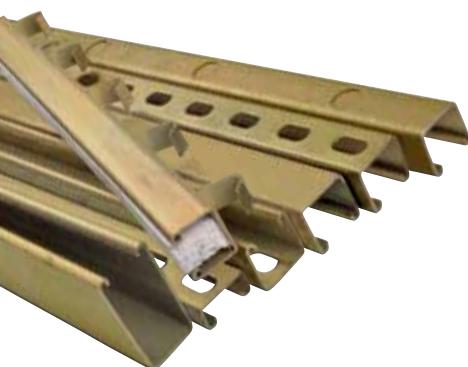

- Gold Trivalent Chromium Finish — The new GoldGalv® finish features a Trivalent Chromium formulation that provides all the features and protection of Hexavalent Chromium (CR VI) without the use of this chemical compound. Hexavalent Chromium is restricted by some standards such as the European Union directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS).
- RoHS Compliant — One great feature for the new Trivalent Chromium formulation is RoHS compliance. Because Hexavalent Chromium is a substance that is restricted by RoHS, moving away from a Hexavalent formulation to the new Trivalent formulation will make the performance of GoldGalv® coating available to customers affected by RoHS and other standards like RoHS around the world.

- Trivalent GoldGalv® Finish Is OSHA Safe — The Hexavalent formulation of the GoldGalv® finish is safe with regard to the revised 2006 OSHA standard. This new Trivalent formulation of the GoldGalv® finish does not contain any Hexavalent Chromium and therefore does not fall under the scope of the OSHA standard at all. As a result, the new Trivalent GoldGalv® finish, just like the Hexavalent GoldGalv® finish, is OSHA compliant.
- ASTM B633 Specification — The improved GoldGalv® finish is applied in compliance with ASTM B633 coating, the same standard as used previously. This standard outlines electro-deposited coatings of zinc on steel.

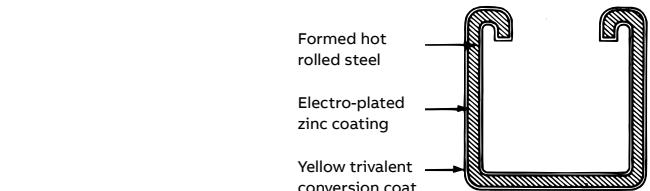

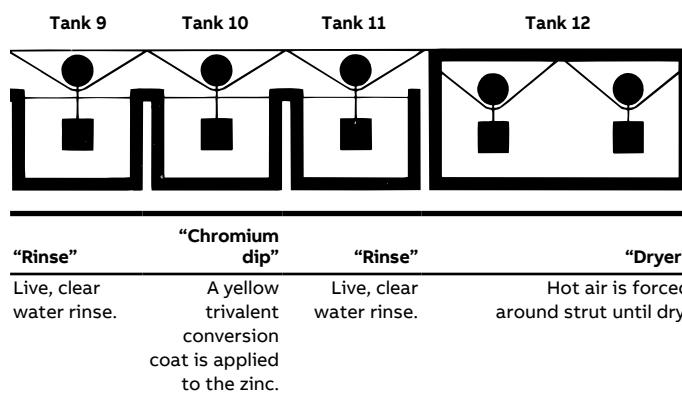

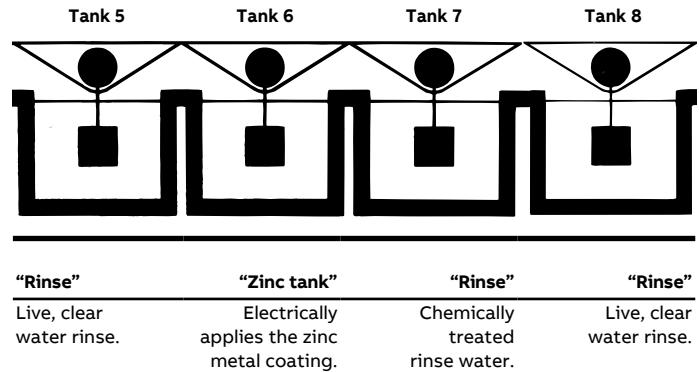

# Superstrut® metal framing system

## Finishes

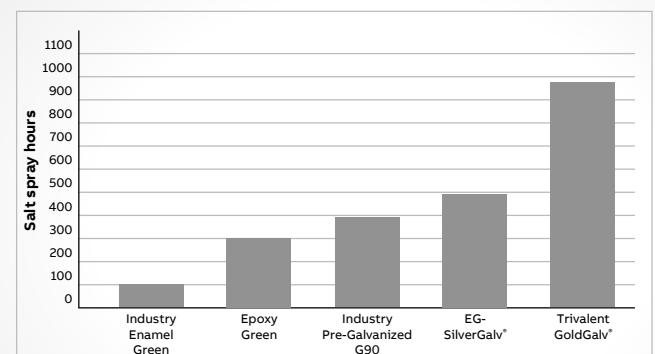

### GoldGalv®

The standard GoldGalv® finish is made up of a multi-step zinc electrogalvanizing process. The Trivalent Chromium finish is applied over the zinc, producing a chemically bonded non-porous barrier for protection from moisture and air. The .5 mil electro-plated zinc and gold Trivalent Chromium finish provides all of the features and protection of Hexavalent Chromium without the use of the chemical.

### Metal framing channel finish

# Superstrut® SilverGalv®

## Overview

Outperforms the competition

The Superstrut® SilverGalv® finish is a post-fabrication, 12-step electrogalvanizing process that applies a clear conversion coat over .5 mils of zinc. This process provides a strong, cohesive molecular bond that locks out moisture and superior corrosion resistance over standard G90 pre-galvanized channel.

- **No more white rust** — With pre-galvanized struts, a common quality issue is the formation of white rust on the zinc finish. With SilverGalv®, a clear conversion coat is applied over the zinc to seal it and stop the formation of white rust.
- **Strong abrasion resistance** — The SilverGalv® finish won't chip or peel like a green painted strut product. It stands up to rough handling.
- **Superior corrosion protection** — One hallmark of the SilverGalv® finish is the superior corrosion protection it provides. In the ASTM B117 salt spray test, the new SilverGalv® finish provided improved protection as compared to painted finishes or G90 Pre-Galvanized. This outstanding corrosion protection means more versatile installations and more service life for SilverGalv® finished products.
- **Punched holes and cut ends are protected** — Unlike a pre-galvanized finish where bare steel holes and cuts have no corrosion protection, SilverGalv® protects every portion of the strut. Because the SilverGalv® finish is applied after fabrication, all punched holes and cut ends share a consistent quality with the rest of the material — even after cutting or fabricating. SilverGalv® will continue to protect with its sacrificial zinc process.

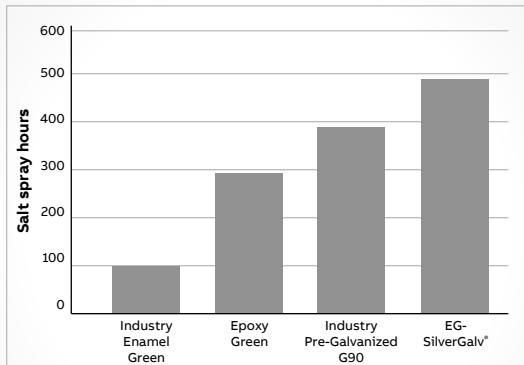

- **Paintable surface** — The new SilverGalv® finish provides a non-porous and non-crystalline surface. Not only does this feature provide enhanced corrosion protection, but also provides an excellent bond for the paint of your choice.
- **Clean finish** — SilverGalv® ensures a finished product that leaves no residue on your hands. In the SilverGalv® process, a zinc finish is applied after fabrication. As a result, all of the oil and grime that accumulates during manufacturing gets thoroughly cleaned off during the plating process.
- **Great electrical conductivity** — Unlike paint or enamel, the SilverGalv® surface offers a minimum of electrical resistance, so electrical applications are easily grounded when grounding is needed.

### Complete offering of SilverGalv® fittings and accessories

Mismatched strut assemblies are a thing of the past with Superstrut SilverGalv. With a complete line of channel, hardware, fittings, hangers and pipe straps, all components have the same electrogalvanized finish for consistent performance and uniform aesthetics.

#### Metal framing channel finish

Corrosion-Resistant Testing, ASTM B117

# Superstrut® metal framing system

## Finishes

### **GoldGalv®**

The standard GoldGalv® finish is made up of a multi-step electrogalvanizing and zinc trivalent chromium process. The trivalent chromium finish is applied over the zinc, producing a chemically bonded non-porous barrier for protection from moisture and air. The .5 mil electro-plated zinc and gold trivalent chromium finish provides all of the features and protection of hexavalent chromium without the use of the chemical.

### **SilverGalv® (Suffix EG)**

Often referred to as “zinc plated” or “electroplated zinc,” the steel and .5 mils of zinc are bonded by an electrolysis process. This is the identical process used in the Superstrut Goldgalv® finish without the numerous benefits of the gold-colored trivalent chromium conversion coat (see GoldGalv® finish for more information). Electrogalvanizing is most commonly applied to small fittings, hardware and threaded products.

### **Green or white urethane powder coated (Suffix GR or WH)**

Urethane powder resins are applied electrostatically to the steel after fabrication. Once the material is completely covered with the powder-form urethane, it proceeds through a 400° baking process for ten minutes, creating a chemical bond. This results in a minimum of 1.5 mil thickness of urethane coating, providing excellent resistance to chipping or peeling.

### **Pregalvanized (Suffix PG)**

A zinc coating is applied by hot-dipping the steel coil at the mill prior to fabrication. Once the material is worked by roll-forming, cutting or punching, minimal protection is provided for raw edges. This weakness is typical with pre-coated material and affects the channel section around holes, extreme ends and the edges of the “U” shape lips. Superstrut pregalvanized material is in conformance with ASTM A-525/G-90 specification standards, representing 0.90 ounces of zinc per square foot of steel. This finish is often referred to as “hot-dipped mill galvanized” or “mill galvanized.”

### **Hot-dipped galvanized (Suffix HDG)**

The material is zinc coated after fabrication, providing total product protection on all surfaces. The fabricated channel or fitting is suspended and then dipped into tanks of hot zinc for a prolonged period, creating a coherent bond. The result is superior corrosion resistance as compared to pregalvanized material. Hot-dipped galvanizing is not recommended for threaded products, because the thickness of the zinc coating will often disrupt the threads. Superstrut hot-dipped galvanized is in conformance with ASTM Specifications A-123 (formerly A-386) and A-153. Superstrut channels maintain a minimum 1.5 ounces of zinc per square foot of steel or 2.5 mils (ASTM A-123, Thickness Grade 65). This finish is also referred to as “hot-dipped galvanized after fabrication.”

# Superstrut® metal framing system

## Finishes (continued)

### PVC coated (Suffix PVC)

A polyvinyl chloride (PVC) plastic coating is fused to the channel, fitting or accessory after fabrication by immersing the part in fluidized PVC tanks. The fused-melt mixed powder PVC coating thickness is 15 mils (.015") plus or minus five mils. PVC material is a thermoplastic and will soften in high temperature. An inherent weakness with PVC coatings occurs when field alterations are applied, such as cutting or drilling. These acts disrupt the sealed PVC product and warrant field touch-up. ABB cannot be held responsible for field-altered PVC coated products.

### Copper plated ("T" inserted as the second digit of the part number; Example: CTL-710-2)

Plain steel proceeds through a series of rinse tanks to clean the material surface. Once cleaned, the fabricated part is etched by dipping into an acid pickle bath to prepare the surface for adhesion. Copper is electrically applied by submerging in a copper bath. To seal the finish, the product continues to a sealer tank and is then dried by forced hot air.

### Black (Suffix B)

A black finish is raw steel with only a light oil finish as supplied by the steel manufacturer. There is no protection against red rust.

### Stainless steel (Suffix SS)

Superstrut channel is supplied in type 304 stainless steel when required. Type 316 stainless steel may be available upon request.

### Aluminum (Suffix AL)

Superstrut channel and hardware are available in aluminum.

**Warning:** Load tables, charts and design criteria provided in this catalog are intended as guides only. Selection of proper product, installation intervals, erection and placement are the responsibility of the user.

Superstrut® products are intended to be used for the support and bracing of fixtures, cable, pipe and conduit. Improper use or installation may result in injury to persons or damage of property.

Material and finish specifications are subject to change without notice.

## Channels

### Standard channels

#### — 01 A-1200

Channel available in Solid, Half Slot, Punched, Slotted and Knockout configurations.  
Wt./Ft. 1.90 lbs.

#### — 02 B-1200

Channel available in Solid, Half Slot, Punched and Slotted configurations.  
Wt./Ft. 1.28 lbs.

#### — 03 C-1200

Channel available in Solid, Half Slot and Punched configurations.  
Wt./Ft. 1.70 lbs.

#### — 04 E-1200

Channel available in Solid, Half Slot and Punched configurations.  
Wt./Ft. 2.47 lbs.

#### — 05 H-1200

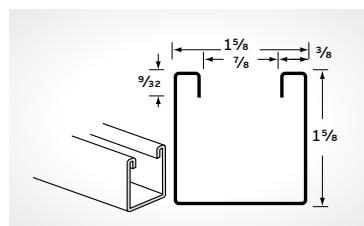

Channel available in Solid, Half Slot and Punched configurations.  
Wt./Ft. 3.05 lbs

#### — 06 A-1400

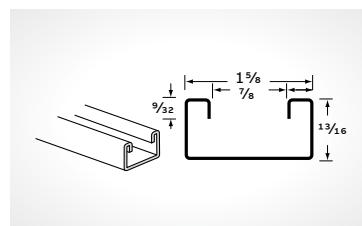

Channel available in Solid, Half Slot, Punched, Slotted and Knockout configurations.  
Wt./Ft. 1.40 lbs.

#### — 07 B-1400

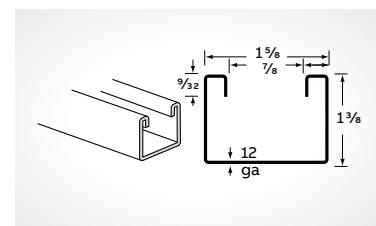

Channel available in Solid, Half Slot, Punched and Slotted configurations.  
Wt./Ft. 0.90 lbs.

### Material

Channels are cold formed from hot-rolled pickled and oiled strip steel.

### Material thickness

- All Series 1200: 12 gauge material
- All Series 1400: 14 gauge material

### Standard lengths

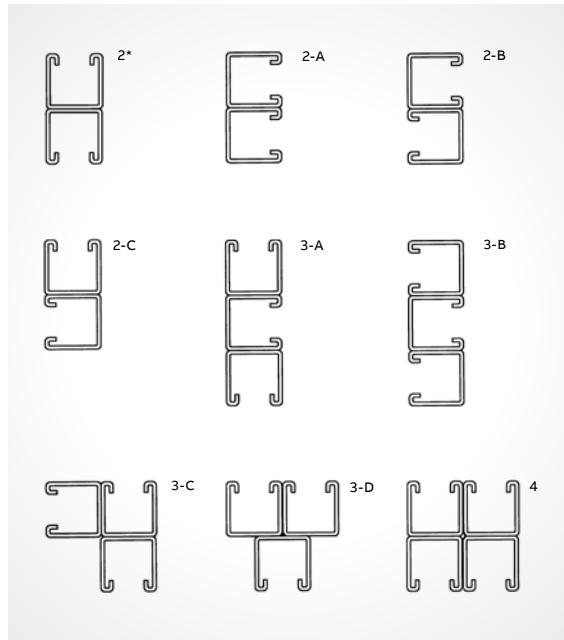

- Standard lengths for channel are 10 ft. and 20 ft.
- Standard length tolerance  $\pm \frac{1}{8}$ ".
- Shorter lengths are available at a small cutting charge.

GoldGalv® hardware finish is standard for all Superstrut products. This is a multi-process finish of electro-plated zinc, followed by gold colored trivalent chromium to give excellent corrosion resistance and superior paint base. See page 7 for a complete description of the GoldGalv® hardware finish. GoldGalv® hardware will be furnished if no other finish is specified.

## Superstrut® channels

### Welding combinations & hole configurations

\* "A" and "B" Series back-to-back combinations are joined using ABB's steel rivet joining process. The riveted channel is offered in standard GoldGalv®, stainless steel, painted, pre-galvanized and hot-dip galvanized finishes.

### Welding combinations

All Superstrut® Channels are available in a variety of combinations — some are shown here. Multiple channels are spot welded on 3" centers.

#### How to order

10 and 20 ft. lengths — steel. Special lengths may be ordered. Replace the 3 last digits of the regular channel catalog number with the designation of the desired combination.

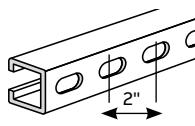

#### Examples:

- Two A-1200 channels back to back are ordered as A-1202.
- Two A-1200 channels back to side are ordered as A-1202-C.

Specify desired finish or material\*.

### Hole configurations

#### Half-slot channel

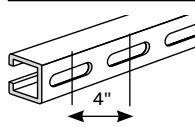

Cat. no.	Dimensions (in)	GA	STD CTN
 A-1200-HS	1 5/8 x 1 5/8	12	*
B-1200-HS	1 5/8 x 1 3/16	12	*
C-1200-HS	1 5/8 x 1 3/8	12	500
E-1200-HS	1 5/8 x 2 7/16	12	500
H-1200-HS	1 5/8 x 3 1/4	12	*
A-1400-HS	1 5/8 x 1 5/8	14	*
B-1400-HS	1 5/8 x 1 3/16	14	500

5/16" x 1 1/8" slots on 2" centers.

\* Standard lengths 10 ft. and 20 ft. for standard cartons.

Please consult your local ABB representative.

#### Slotted channel

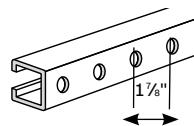

Cat. no.	Dimensions (in)	GA	STD CTN
 A-1200-S	1 5/8 x 1 5/8	12	*
B-1200-S	1 5/8 x 1 3/16	12	*
A-1400-S	1 5/8 x 1 5/8	14	*
B-1400-S	1 5/8 x 1 3/16	14	*

5/16" x 3" slots on 4" centers.

\* Standard lengths 10 ft. and 20 ft. for standard carton.

Please consult your local ABB representative.

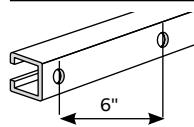

#### Punched channel

Cat. no.	Dimensions (in)	GA	STD CTN
 A-1200-P	1 5/8 x 1 5/8	12	500
B-1200-P	1 5/8 x 1 3/16	12	500
H-1200-P	1 5/8 x 1 3/16	12	500
A-1400-P	1 5/8 x 1 1/2	14	500
B-1400-P	1 5/8 x 1 3/16	14	500

5/16" holes on 1 1/8" centers.

Available in 10 & 20 ft. lengths.

#### Channel with knockouts

Cat. no.	Dimensions (in)	GA	STD CTN
 A-1200-KO	1 5/8 x 1 5/8	12	*
A-1400-KO	1 5/8 x 1 5/8	14	*

KO for 1/2" conduit.

Please consult your local ABB representative.

Standard finish — GoldGalv® brand.

## Threaded products and hardware

### Trapnut® strut fastener

Standard method using nuts and washers.

New method using Trapnut® strut fastener.

—  
01

#### Easy to install

##### 1. Hold in the open position.

- No need to thread the Trapnut® fastener from either end of the rod — saving valuable time
- Perfect for retro-fit applications where the rod ends are not accessible

—  
02

##### 2. Insert the bottom plate on the rod and close the top plate.

- Precision threads trap the threaded rod for a sturdy hold that can be adjusted up or down for fine-tune positioning
- Functions as a hex nut, square washer and flat washer combined

—  
03

##### 3. Press the pin with pliers.

- Locking pin holds it in the desired position
- Can be removed and reused

—  
04

##### 4. Tighten to the desired position with pliers.

- Can be adjusted up or down for fine-tuned positioning
- Sturdy steel construction that is load bearing
- Sized to provide custom fit for either 1 5/8" or 1 1/2" strut systems

The unique scissor action of the Trapnut® Strut Fastener closes at any desired position on the threaded rod. Once closed, precision threads trap the threaded rod for a sturdy hold that can be adjusted up or down for fine-tune positioning. While the versatile Trapnut has a locking pin that holds it in the desired position, it can also be removed and reused.

Unlike a hex nut, there is no need to thread the Trapnut® from either end of the rod, saving valuable time on the job. While the Trapnut® strut fastener is a time-saver for new construction, it is invaluable for retro-fit applications. Rather than disassembling an existing trapeze to run additional conduit above it, the Trapnut® fastener can be clamped between the existing trapeze and the beam clamp for a speedy retro-fit solution. It's ideal for applications where the rod ends are not accessible.

The Trapnut® fastener has a sturdy steel construction that is load bearing, so you can be confident of a solid installation. And, the Trapnut® fastener functions as a hex nut, square washer and flat washer combined, so there are fewer parts to keep up with on the job.

## Threaded products and hardware

### Trap-Eze™ connector

#### Handle retrofit Trapeze applications with ease!

The innovative Trap-Eze™ connector changes a time-consuming retrofit trapeze application into a streamlined process. Using a Trapnut® strut fastener, the new Trap-Eze™ connector can be easily installed above or to the side of an existing assembly, eliminating the need to disassemble and reassemble the trapeze. It is designed for use with shorter strut lengths that can vary in length by as much as an inch, so the strut can be rough cut versus labor-intense precision cuts.

- Easily installs above or to the side of an existing assembly, eliminating the need to disassemble and reassemble the trapeze
- Connectors can be reused upon disassembly of a trapeze
- Designed for either  $\frac{3}{8}$ " and  $\frac{1}{2}$ " threaded rod
- Designed for use with the innovative Trapnut® Strut Fastener, which can take up to 43% less time than standard nuts and washers on retrofit trapeze applications
- View window provides safety zone for strut length

View window provides strut length safety zone for rough cuts versus precision cuts.

Unique safety slot maintains bracket position on threaded rod and prevents disengagement of the trapeze system.

AB-241L-5/8	$\frac{5}{8}$	100

## Threaded products and hardware

### Channel nuts

Superstrut® channel nuts are manufactured from mild steel and are case hardened.

#### Design data

Superstrut® self-aligning channel nuts are designed to provide resistance to pull out and resistance to side slip in excess of the full strength of the channels with which they are used. The extreme resistance to side slip results from the unique design of the alternate teeth, spaced and designed to develop a wedging action that increases with pressure or load.

#### Load ratings for $\frac{1}{4}$ ", $\frac{3}{8}$ " and $\frac{1}{2}$ " strut nuts used in superstrut®

Channel nut sizes (in)	Slip test rating	Pull test rating
$\frac{1}{4}$	300	500
$\frac{3}{8}$	750	1,000
$\frac{1}{2}$	1,200	2,000

If connections will be subjected to dynamic or seismic loading conditions, contact the factory for design assistance.

1. All ratings have safety factor of 3 applied.
2. Load ratings are for Static Applications.

#### UC-100 universal cone nut

Eliminates the inventory and installation hassles of conventional spring nuts. Fits all  $1\frac{5}{8}$ " channel, regardless of depth, with a simple twist of your thumb. Pliable nylon cone secures the nut in place through the entire range of construction site temperatures.

#### Screw threads

Thread size (in)	Threads per inch	Design torque (ft-lbs)
$\frac{1}{4}$	20	$\frac{1}{2}$
$\frac{3}{8}$	16	13
$\frac{1}{2}$	13	50

Standard finish – GoldGalv®, unless otherwise stated.

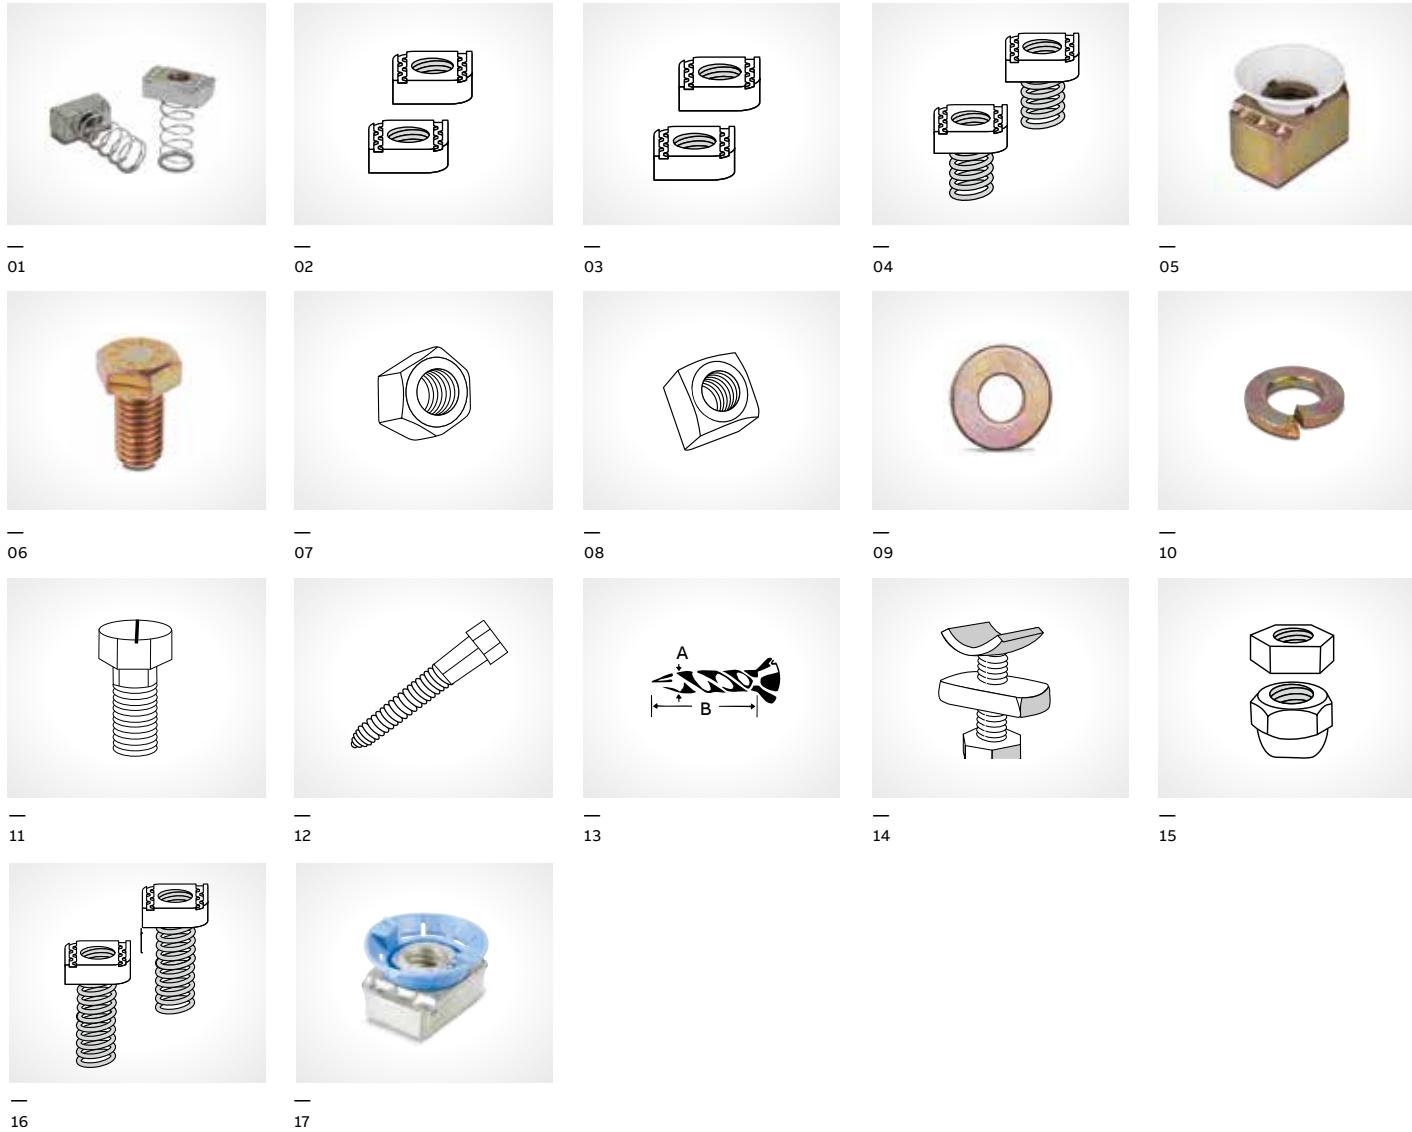

All threaded products are American Standard thread, free fit class 2. GoldGalv® hardware finish is standard for all Superstrut® products. This is a multi-process finish of electro-plated zinc, followed by gold-colored trivalent chromium to give excellent corrosion resistance and a superior paint base. See pages 4-5 for a complete description of the GoldGalv® hardware finish.

**Note:** Standard Spring and Springless Nuts are supplied with a silver electro-galvanized (EG) finish. These items are not visible in a gold system and are universal with other systems' finishes and colorations.

## Threaded products and hardware

### Nuts, washers & screws

**01 A-100 regular spring nut**  
Sizes:  $\frac{1}{4}$ ",  $\frac{5}{16}$ ",  $\frac{3}{8}$ " &  $\frac{1}{2}$ "  
Nut is square over  $\frac{1}{2}$ " size.  
For all "A" and "C" series channel and inserts.

**02 AB-100 springless nut**  
Sizes:  $\frac{1}{4}$ ",  $\frac{5}{16}$ ",  $\frac{3}{8}$ ",  $\frac{1}{2}$ ",  $\frac{5}{8}$ " &  $\frac{3}{4}$ "  
Nut is square over  $\frac{1}{2}$ " size.  
For use with all channels.  
Silver electroplated finish.

**03 AC-100 springless nut**  
Sizes:  $\frac{1}{4}$ ",  $\frac{3}{8}$ ",  $\frac{1}{2}$ ",  $\frac{5}{8}$ " &  $\frac{3}{4}$ "  
Nut is square over  $\frac{1}{2}$ " size.  
For all "A", "C", "E" and "H" series channel and inserts.

**04 B-100 short spring nut**  
Sizes:  $\frac{1}{4}$ ",  $\frac{5}{16}$ ",  $\frac{3}{8}$ " &  $\frac{1}{2}$ "  
Nut is square over  $\frac{1}{2}$ " size. For all "B" series channel and inserts.

**05 CM-100 nylon cone nut**  
Sizes:  $\frac{1}{4}$ ",  $\frac{3}{8}$ " &  $\frac{1}{2}$ "  
For all  $1\frac{1}{8}$ " channel.  
\* Will not fit "B" series channel.  
GoldGalv® finish.

**06 E-142 hex head cap screw**  
Sizes:  $\frac{1}{4}$ " x  $1\frac{1}{2}$ ",  $\frac{3}{8}$ " x  $1\frac{1}{2}$ ",  $\frac{1}{2}$ " x  $1\frac{1}{2}$ " &  $\frac{5}{8}$ " x  $1\frac{1}{2}$ "  
Nut is square over  $\frac{1}{2}$ " size.  
See price sheet for additional sizes.

**07 E-145 standard hex nut**  
Sizes:  $\frac{1}{4}$ ",  $\frac{3}{8}$ ",  $\frac{1}{2}$ " &  $\frac{5}{8}$ "  
GoldGalv® finish.

**08 E-146 standard square nut**  
Sizes:  $\frac{1}{4}$ ",  $\frac{5}{16}$ ",  $\frac{3}{8}$ ",  $\frac{1}{2}$ " &  $\frac{5}{8}$ "  
GoldGalv® finish.

**09 E-147 flat steel washer**  
Sizes:  $\frac{1}{4}$ ",  $\frac{5}{16}$ ",  $\frac{3}{8}$ ",  $\frac{1}{2}$ ",  $\frac{5}{8}$ ",  $\frac{3}{4}$ " &  $\frac{7}{8}$ "  
GoldGalv® finish.

**10 E-148 lock washer**  
Sizes:  $\frac{1}{4}$ ",  $\frac{3}{8}$ ",  $\frac{1}{2}$ " &  $\frac{5}{8}$ "  
GoldGalv® finish.

**11 E-149 slotted hex indented head machine screw**  
Sizes:  $\frac{1}{4}$ " x  $\frac{3}{4}$ ",  $\frac{1}{4}$ " x  $1$ ",  $\frac{5}{16}$ " x  $1\frac{1}{4}$ " &  $\frac{3}{8}$ " x  $1\frac{1}{4}$ "

**12 E-150-S lag bolt screw**  
Size:  $\frac{3}{8}$ " &  $\frac{1}{2}$ "  
Drill Size:  $\frac{1}{4}$ " &  $1\frac{1}{32}$ "

**13 E-151-D wood screw drive**  
Size A:  $\frac{1}{4}$ "  
Size B:  $2^{\prime \prime}$   
Max. Rec. Load: 100 lbs.

**14 ES-142 seismic stiffener nut**  
Size: ES-142- $\frac{1}{2}$  x  $1\frac{1}{2}$ "  
Bolt Dia.:  $\frac{1}{2}$ "

**15 ES-145 swivel nut and jam nut combinations**  
Sizes:  $\frac{3}{8}$ " &  $\frac{1}{2}$ "  
GoldGalv® Finish.

**16 H-100 long spring nut**  
Sizes:  $\frac{3}{8}$ ",  $\frac{1}{2}$ " &  $\frac{5}{8}$ "  
Nut is square over  $\frac{1}{2}$ " size.

For all "E" and "H" series channel and inserts.

**17 UC-100 universal nylon cone nut**  
Sizes:  $\frac{1}{4}$ ",  $\frac{3}{8}$ " &  $\frac{1}{2}$ "  
For all  $1\frac{1}{8}$ " &  $1\frac{1}{2}$ " channels.  
May be used with ALL strut depths. Can be used for CM-100, A-100, B-100 & AB-100 Series. GoldGalv® Finish.

## Threaded products and hardware

### Rod coupling & conduit clamp

#### Standard rod coupling

Cat. No.	Rod size (in)	A (in)	STD CTN
H119-1/4	1/4	7/8	50
H119-5/16	5/16	7/8	50
H119-3/8	3/8	1 1/8	50
H119-1/2	1/2	1 1/4	50
H119-5/8	5/8	2 1/8	50
H119-3/4	3/4	2 1/4	50
H119-7/8	7/8	2 1/2	50
H119-1	1	2 1/4	50

Standard finish – GoldGalv®, unless otherwise stated.

#### Reducing rod coupling

Cat. No.	Rod size (in)	A (in)	STD CTN
H119-1/4x3/8	1/4–3/8	1 1/2	50
H119-3/8x1/2	3/8–1/2	1 1/4	50
H119-1/2x5/8	1/2–5/8	1 1/4	50
H119-5/8x3/4	5/8–3/4	1 1/2	50
H119-3/4x7/8	3/4–7/8	1 3/4	50

Standard finish – GoldGalv®, unless otherwise stated.

#### U-571, U-572 conduit clamp

Cat. No.	Conduit size (in)	Max. flange thickness (in)	Dim. A (in)	STD CTN
U-571, U-572				
U-571	1/2	1	1 1/4	25
U-571	3/4	3/4	1 3/4	25
U-571	1	1/2	1 3/4	25
U-572	3/4	1 1/2	2 1/2	25
U-572	1	1 1/4	2 1/2	25
U-572	1 1/4	1	2 1/2	25
U-572	1 1/2	5/8	2 1/2	25

Standard finish – GoldGalv® brand. For attaching 1/2" thru 1 1/2" conduit to beam, channel, angle or column.  
Secures conduit to the support parallel or at right angles to it. 5/16" set screw, 12 ga. material.

Standard finish – GoldGalv® brand. For attaching 1/2" thru 1 1/2" conduit to beam, channel, angle or column.  
Secures conduit to the support parallel or at right angles to it. 5/16" set screw, 12 ga. material.

## Fittings and brackets

### Series 200

#### Material

Superstrut® fittings and brackets are manufactured from hot rolled carbon steel.

#### Dimensions

The following standard dimensions apply to all fittings except as indicated on the individual drawings.

- Hole spacing:  $1\frac{3}{16}$ " from end of fittings
- Hole spacing:  $1\frac{7}{8}$ " centers
- Hole size:  $\frac{1}{16}$ " diameter
- Material:  $1\frac{5}{8}$ " wide
- Material:  $\frac{1}{4}$ " thickness

#### Application instructions

Parts drawings illustrate a typical use for the fitting, and in many cases other uses for the part are appropriate.

#### Design data

Ratings vary when used with 12 or 14 gauge channel and are shown for each channel material.

GoldGalv® hardware finish is standard for all Superstrut® products. This is a multi-process finish of electro-plated zinc, followed by gold-colored trivalent chromium to give excellent corrosion resistance and a superior paint base. See pages 4-5 for complete description of the GoldGalv® hardware finish. GoldGalv® hardware will be furnished if no other finish is specified.

#### Nuts and bolts required

Unless otherwise noted, nuts and bolts for use with fittings and brackets should be ordered separately.

The standard bolt for the  $\frac{1}{16}$ " hole is a  $\frac{1}{2}$ " hex head cap screw  $1\frac{5}{16}$ " long. The  $1\frac{5}{16}$ " length may be used with all series channel.

#### Standard dimensions

- Hole spacing:  $1\frac{3}{16}$ " from end
- Hole spacing:  $1\frac{7}{8}$ " centers
- Hole size:  $\frac{1}{16}$ " diameter
- Material:  $1\frac{5}{8}$ " width
- Material:  $\frac{1}{4}$ " thick

#### Standard finish

GoldGalv®, unless otherwise stated. Add EG suffix for SilverGalv® finish

## Concrete inserts

(Series 300/400)

Standard lengths 10 ft. and 20 ft. length tolerance  $\frac{3}{16}$ ". Assemblies available in any length from 12" to 20 ft. Consult factory. Insert with end caps and foam filler strip installed.

Superstrut® continuous insert channel is cold formed from 12 gauge hot-rolled strip steel in two basic sizes as follows:

**Cat. No. B-302**

$1\frac{5}{8}$ " x  $1\frac{3}{16}$ " dim.  $\frac{7}{8}$ " slot

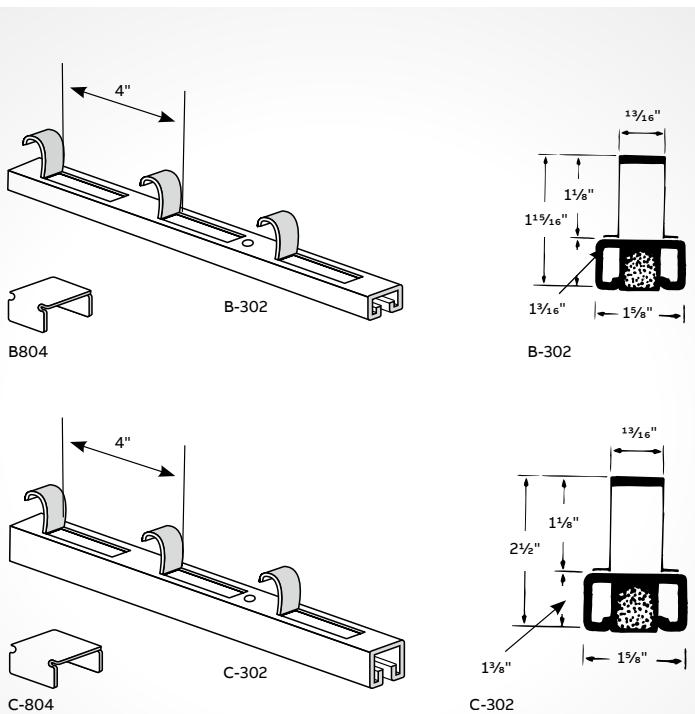

**Cat. No. C-302**

$1\frac{5}{8}$ " x  $1\frac{3}{8}$ " dim.  $\frac{7}{8}$ " slot

**Finishes**

Product is available in GoldGalv® pre-galvanized (PG), hot-dipped galvanized (HDG) and stainless steel (SS). Contact your ABB Sales team for delivery and pricing.

Standard lengths are 10 ft. and 20 ft. Product is supplied with foam filler and end caps to prevent seepage of concrete into channel.

**Application**

For casting into concrete walls, floors or ceilings to provide attachment anywhere along the continuous slot.

**Design data**

Load ratings as shown have a safety factor of 3 in 3,000 lb. hard rock concrete. Where "good" concrete does not exist, the load ratings shall not apply.

GoldGalv® hardware finish is standard for all Superstrut® products. This is a multi-process finish of electro-plated zinc, followed by gold-colored trivalent chromium to give excellent corrosion resistance and a superior paint base. See pages 4-5 for a complete description of the GoldGalv® hardware finish. GoldGalv® hardware will be furnished if no other finish is specified.

**Standard finish**

GoldGalv®, unless otherwise stated.

**Design load lbs.**

2,000 lbs. per foot in 3,000 lbs. hard rock concrete with a safety factor of 2.

**Note:** B-302 and C-302 are furnished with:

- A. Concrete safe tape applied to interior of channel to cover holes.
- B. Styrene insert between tape and  $\frac{7}{8}$ " continuous opening.
- C. Two end caps on either side of strut to prevent concrete seepage.

**Concrete inserts (Series 300/400)**

Cat. No.	Description
B-302*	Insert channel 12 ga. steel — $\frac{3}{16}$ " depth
C-302*	Insert channel 12 ga. steel — $1\frac{3}{8}$ " depth
B804	End cap in B Series Concrete Insert
C-804	End cap in C Series Concrete Insert

\*Add suffix -10 for 10' lengths and -20 for 20' lengths

## Concrete inserts

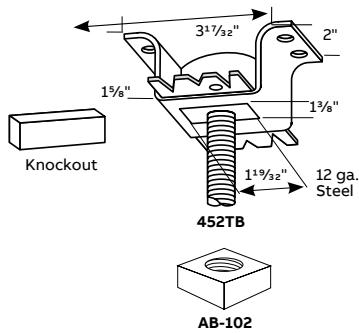

(Series 300/400)

### 452-TB — Spot insert — Top is deep drawn cup

- An insert with a knockout saves covering the opening. Accommodates hanger rod sizes from  $\frac{1}{4}$ " through  $\frac{7}{8}$ " by means of an AB-102 insert nut
- Design load: 1,350 lbs. in 3,000 lb. hard rock concrete with a safety factor of 3
- Order AB-102 nut separately

### AB-102 — Unhardened square nut

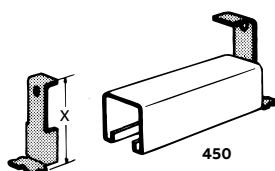

Cat. No.	Size (in)	STD CTN
AB102 1/4	$\frac{1}{4}$	50
AB-102-3/8	$\frac{3}{8}$	100
AB-102-1/2	$\frac{1}{2}$	100
AB-102-5/8	$\frac{5}{8}$	50
AB-1002-3/4	$\frac{3}{4}$	50
AB-102-7/8	$\frac{7}{8}$	50

For use with spot insert - Cat. No. 452.

### 450 — End cap

Cat. No.	For channel	X (in)	Material	STD CTN
C-450TB	C-1,200	3	12 ga.	100

Does not come in pairs, order number of total pieces required.  
Inserts may be assembled from short pieces of channel by use of end caps.  
Order closure strip separately.

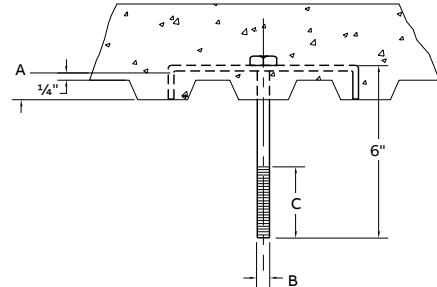

### C475 — Metal deck ceiling bolt

Metal Deck Ceiling Bolts are used with our Figure 123. Rod Couplings ordered separately. Made special to customer order.

- Material: Steel
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify size, dimension “A”, catalog number and finish.

### C475 — Metal deck ceiling bolt

Cat. No.	Weight each	A (in)	B (in)	C (in)	Max. Load (lbs)
C475 3/8	.75	Specify	$\frac{3}{8}$	1	610
C475 1/2	.97		$\frac{1}{2}$	$1\frac{1}{4}$	1,130
C475 5/8	1.11		$\frac{5}{8}$	$1\frac{1}{2}$	1,810
C475 3/4	1.42		$\frac{3}{4}$	$1\frac{1}{4}$	2,710
C475 7/8	2.00		$\frac{7}{8}$	2	3,770
C475 1	6		1	$2\frac{1}{4}$	4,960

## Superstrut® beam clamps

Beam clamps for mounting channel

### Materials

Most products are manufactured from hot-rolled carbon steel bars or hot-rolled strip steel. Pipe rollers are cast iron. Products which are copper plated carry the letter "T" in the prefix.

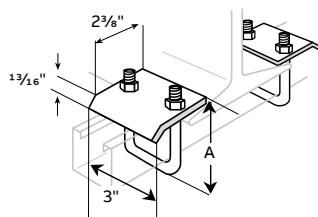

### Design Loads

Where design loads are indicated, they provide for a safety factor of 3 in conformance with the "AMERICAN STANDARD CODE FOR PRESSURE PIPING."

GoldGalv® hardware finish is standard for all Superstrut® products. This is a multi-process finish of electro-plated zinc, followed by gold-colored trivalent chromium to give excellent corrosion resistance and a superior paint base. See pages 4-5 for a complete description of the GoldGalv® hardware finish. GoldGalv® hardware will be furnished if no other finish is specified.

### U501 & U502

Cat. No.	For channel	A (in)	STD CTN
U501	A-1200 A-1400	$3\frac{3}{16}$	20
	B-1200 B-1400		
	C-1200 B-1402		
U502	A-1202 A-1402	$4\frac{13}{16}$	20
	C-1202 H-1200		

Furnished complete.

Design load U501 - 2,150 lbs.

U502 - 3,000 lbs.

## Superstrut® beam clamps

### U-560 — Heavy-duty beam clamp

Cat. No.	Dimensions (in)			Design load (lbs)	STD CTN
	A	B	C		
U560 1/4	$\frac{1}{4}$	$\frac{1}{8}$	$\frac{3}{8} \times 1\frac{1}{2}$	1,050	25
U-560-3/8	$\frac{3}{8}$	$\frac{1}{8}$	$\frac{3}{8} \times 1\frac{1}{2}$	1,050	25
U-560-1/2	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{2} \times 1\frac{1}{2}$	2,650	25
U-560-5/8	$\frac{5}{8}$	$\frac{1}{4}$	$\frac{1}{2} \times 1\frac{1}{2}$	2,650	25

Channel Angle Connector. Standard finish — GoldGalv®.  
Available in Electro-Galvanized (EG) finish.  
Integral pilot, prevents twist.

### U-564 — Heavy-duty beam clamp

Cat. No.	Dimensions (in)			Design load (lbs)	STD CTN
	A	B	C		
U-564-3/8	$\frac{3}{8}$	$\frac{1}{4}$	$\frac{3}{8} \times 2\frac{1}{4}$	1,300	25
U-564-1/2	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{2} \times 2\frac{3}{4}$	3,150	15
U564 5/8	$\frac{5}{8}$	$\frac{1}{4}$	$\frac{1}{2} \times 2\frac{3}{4}$	3,150	25

"C" set screw included  
Tapped hole size  
A  
B  
 $1\frac{1}{32}$ "

Available in Electro-Galvanized (EG) finish.

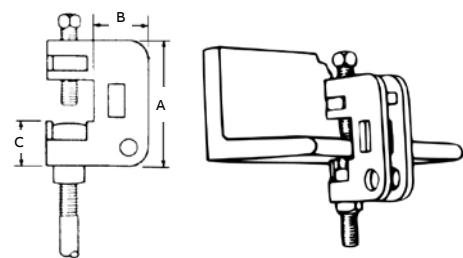

## Superstrut® beam clamps

### Clamps & anchor clips

E-231 — Structural steel clamp

Cat. No.	Dimensions (in)			Weight lbs/c
	A	B	C	
<b><math>\frac{3}{8}</math>" or <math>\frac{1}{2}</math>" Rod</b>				
*E-231-3/8	2 $\frac{1}{2}$	1	$\frac{7}{8}$	31
**E-231-1/2	3	$1\frac{19}{32}$	$1\frac{15}{16}$	53

Assembly requires two H-116-C ( $\frac{3}{8}$ ") or two H-116-D (1/2") square nuts to attach hanger rod.

$\frac{3}{8}$ " steel.

\* Load rating of 500 lbs. with a safety factor of 3.

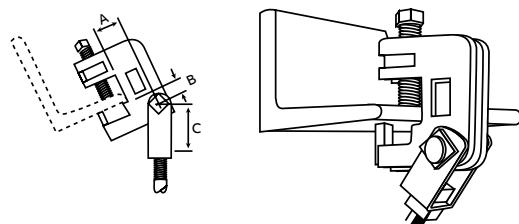

\*\* Load rating of 800 lbs. with a safety factor of 3.

Standard finish – GoldGalv®, unless otherwise stated.

E-232 — Clamp with swing connector

Cat. No.	Diameter for rod (in)	Dimensions (in)			Weight lbs/c
		A	B	C	
<b><math>\frac{3}{8}</math>" or <math>\frac{1}{2}</math>" Rod</b>					
*E-232-3/8	$\frac{3}{8}$	$\frac{9}{16}$	$\frac{7}{16}$	1	48
**E-232-1/2	$\frac{1}{2}$	$\frac{7}{8}$	$2\frac{9}{64}$	$1\frac{1}{8}$	76

E-231 clamp with swing connector. Affords a convenient method of attaching to angled beams.

\* Load rating of 400 lbs. with a safety factor of 3.

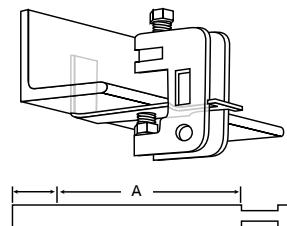

\*\* Load rating of 550 lbs. with a safety factor of 3.

GoldGalv® finish.

E-233 — Anchor clip

Cat. No.	Rod size (in)	Max. beam width "A" (in)	For use with		Weight lbs/c
			E-231-3/8 or E-232-3/8	E-231-1/2 or E-232-1/2	
E-233-3/8-6	$\frac{3}{8}$	6			20
E-233-3/8-10	$\frac{3}{8}$	10			33
E-233-1/2-6	$\frac{1}{2}$	6	E-231-1/2 or E-232-1/2		26
E-233-1/2-10	$\frac{1}{2}$	10		E-231-1/2 or E-232-1/2	37

Clamps to I-beams, channels, angles and column. Two sizes are available, one for  $\frac{3}{8}$ " and the other for  $\frac{1}{2}$ " hanger rod. Each takes flanges up to .8" thickness. Anchor Clips should be used when clamps are subject to excessive vibration. To obtain the correct size clips, add 1 inch to the flange width. If length required is not standard, order next largest standard length. GoldGalv® finish.

For use with E-231 and E-232 clamps when hanger rod is not in straight through position.

## Superstrut® beam clamps

### Beam clamps

#### E-160 — Adjustable beam clamp

Cat. No. ½" hanger rods	Beam flange width (in)	Weight (lbs/c)
<b>½" Rod</b>		
E-160-1/2-6	2½ to 6	115
E-160-1/2-9	5½ to 9	125
E-160-1/2-12	8½ to 12	154

Clamps to I-beam where edge of beam flange does not exceed .8" thickness.  
 Hook rod is furnished in three lengths to fit beam flanges up to 6", 9" or 12" widths.  
 Load rating 800 lbs. with a safety factor of 3.  
 Assembly requires hanger rod of the proper length and size plus two H-114-D nuts  $\frac{3}{16}$ " steel and  $\frac{1}{2}$ " hook rod. GoldGalv® finish.

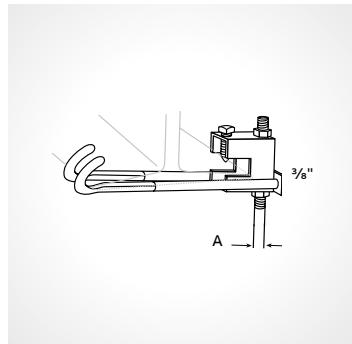

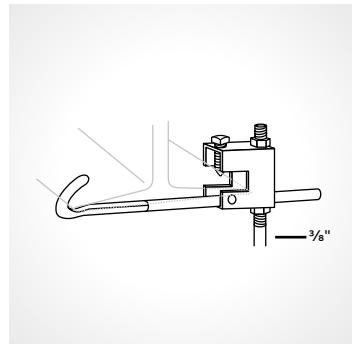

#### U-568 beam clamps

Cat. No.	Beam flange width (in)	A (in)	STD CTN
U568 1	6	8	50
U-568-2	9	11	50
U-568-3	6	9	25
U-568-4	9	12	50
U-568-5	12	15	50
U-568-6	6	9	25
U-568-7	9	12	25
U-568-8	12	15	25

16 ga. material.  
 Standard finish – GoldGalv®, unless otherwise stated.  
 U-568 — Beam clamp safety strap  
 For U-560 and U-564 beam clamp.

**01 U569**  
 Beam clamp  
 Standard finish —  
 GoldGalv®  
 Maximum flange width 5"  
 Design load 400 lbs.

**02 U570**  
 Beam clamp with  
 safety rod  
 Standard finish —  
 GoldGalv®  
 Flange width 4" min. –  
 8" max.  
 Sizes —  $\frac{1}{2}$ " (for use with  
 $\frac{3}{8}$ " rod, see U569)  
 Design load 650°  
 F – 500 lbs.

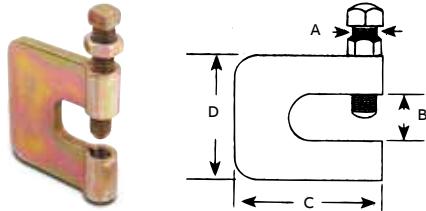

## Superstrut® beam clamps

### Clamps & nuts

#### C-775L — Clamp with lock nut

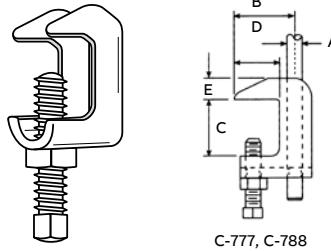

Cat. No.	Rod size (in)	Dimensions (in)				Design load (lbs)	STD CTN
		A	B	C	D		
C-775L 3/8	3/8		3/8	3/4	2 3/8	2 3/8	400
C-775L-1/2	1/2		3/8	3/4	2 3/8	500	100
C-775L-5/8	5/8		1/2	3/4	2 5/16	2 3/8	550
C-775L-3/4	3/4		5/8	3/4	2 5/16	2 3/8	630
C-775L-7/8	7/8		3/4	1	3 5/16	3	1,200

Standard finishes - GoldGalv® brand, Black (B), Stainless Steel (SS) and Electro-Galvanized (EG).  
Carbon Steel.

#### C-777 — Steel top beam clamp & C-778 — Steel wide jaw top beam clamp

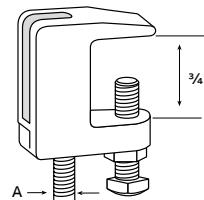

Cat. No.	Rod size A (in)	Pipe size	Dimensions (in)				Design load (lbs)	STD CTN
			B	C	D	E		
C-777 3/8	3/8	1/2-4	1 3/16	3/4	1	7/16	1	900
C-777-1/2	1/2	5-8	1 1/2	3/4	1	9/16	1 1/4	2,430
C-778-3/8	3/8	1/2-4	1 3/16	1 1/4	1	7/16	1	900
C-778-1/2	1/2	5-8	1 1/2	1 1/4	1	9/16	1 1/4	2,430

Standard finish – GoldGalv®, Black (B) and Electro-Galvanized (EG).

#### M-777 — Steel top beam clamp

Rod size A (in)	Design load (lbs)
3/8	350
1/2	470
5/8	550
3/4	700
7/8	1,000

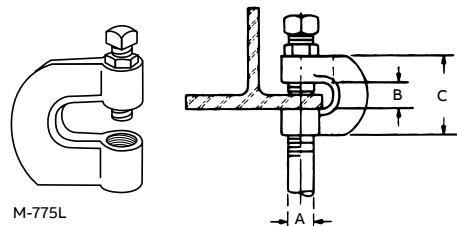

Junior top beam C-clamp  
Standard finish is GoldGalv®  
Available in Electro-Galvanized (EG) or Black (B) Malleable Iron  
Provides clamping under roof installations with bar joist construction (max. joist thickness 5/8")  
Order by Cat. No., rod size

## Superstrut® beam clamps

### Clamps & nuts

#### M-775L — Clamp with lock nut

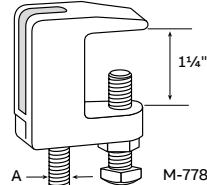

Cat. No.	Rod size A (in)	B (in)	C (in)	Design load (lbs)	STD CTN
M-775L-3/8	3/8	3/4	1 3/4	400	100
M-775L-1/2	1/2	3/4	1 3/4	400	100
M-775L-5/8	5/8	3/4	2	440	50
M-775L-3/4	3/4	3/4	2	500	50

Available in Electro-Galvanized (EG) or Black (B).

#### M-778 — Steel wide jaw top clamp

Rod size A (in)	Design load (lbs)
3/8	400
1/2	500
5/8	850
3/4	900

Top beam C-clamp

Rod Size: 3/8", 1/2", 5/8" and 3/4"

Available in Electro-Galvanized (EG) or Black (B) Malleable Iron

Provides clamping under roof installations with bar joist type construction

Order by Cat. No. and rod size

## Superstrut® beam clamps

### Steel conduit clamps

C-247, C-248 & C-249 — Steel conduit clamps

Conduit size	Max. beam C-247	Flange C-248	Thickness C-249
1/2	5/8	1	
3/4	7/16	3/4	1 1/2
1		1/2	1 1/4
1 1/4		1	
1 1/2			5/8
Dim. A	2 1/4	2 9/16	3 1/4
Dim. B	1 3/8	1 3/4	2 1/2
Dim. C	2 3/4	3	4
Dim. D	9/16	9/16	5/8
Per carton	100	50	50
Weight in lbs./C	33	36	59

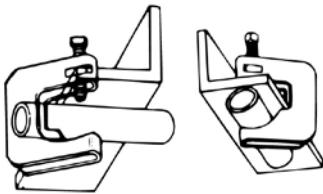

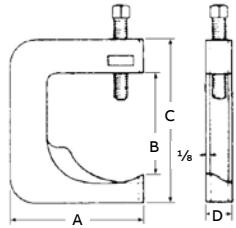

Standard finish – GoldGalv®, unless otherwise stated

A versatile clamp for attaching conduit to any type of beam, channel, angle or column

Designed to hold the conduit snug against the support with conduit either parallel or at right angle to it

The case-hardened set screw bites into the structural member for maximum security

5/16" steel

## Superstrut® beam clamps

### Pipe supports

Three types of pipe clamps are available to provide right angle, vertical and parallel attachment to a beam. Types RC, EC and PC are malleable iron clamps with an edge that grips the structural member for maximum holding power when tightened.

Type RCS clamps are all steel, providing two bearing surfaces for strong attachment for mounting pipe or conduit at right angles to the beam.

All parts are electrogalvanized, including the threads. The clamps are designed for clamping to a wide variety of beam thicknesses and tapers. Can be installed using only a wrench.

#### **RC Clamp — Malleable Iron/RCS Clamp — Steel**

- For mounting pipe or conduit at right angles to the beam
- Use SS316 suffix for 316 Stainless Steel
- Use HDG suffix for hot-dip galvanized

#### **EC Clamp — Malleable Iron**

- For mounting pipe or conduit vertically across the beam
- Use SS316 suffix for 316 Stainless Steel
- Use HDG suffix for hot-dip galvanized

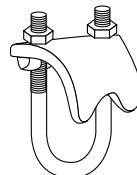

#### **PC Clamp — Malleable Iron**

- For mounting pipe or conduit parallel to the beam
- Use SS316 suffix for 316 Stainless Steel
- Use HDG suffix for hot-dip galvanized

## Pipe straps, conduit clamps and hangers

### Introduction

#### Excellent corrosion resistance and a superior paint base

GoldGalv® hardware finish is standard for all Superstrut® products. This is a multi-process finish of electro-plated zinc, followed by gold-colorized trivalent chromium to give excellent corrosion resistance and a superior paint base. See pages 4-5 for a complete description of the GoldGalv® hardware finish. GoldGalv® hardware will be furnished if no other finish is specified.

#### Materials

Most products are manufactured from hot-rolled carbon steel bars or hot-rolled strip steel. Pipe rollers are cast iron. Products which are copper plated carry the letter "T" in the prefix.

#### Design loads

Where design loads are indicated, they provide for a safety factor of 3 in conformance with the "AMERICAN STANDARD CODE FOR PRESSURE PIPING."

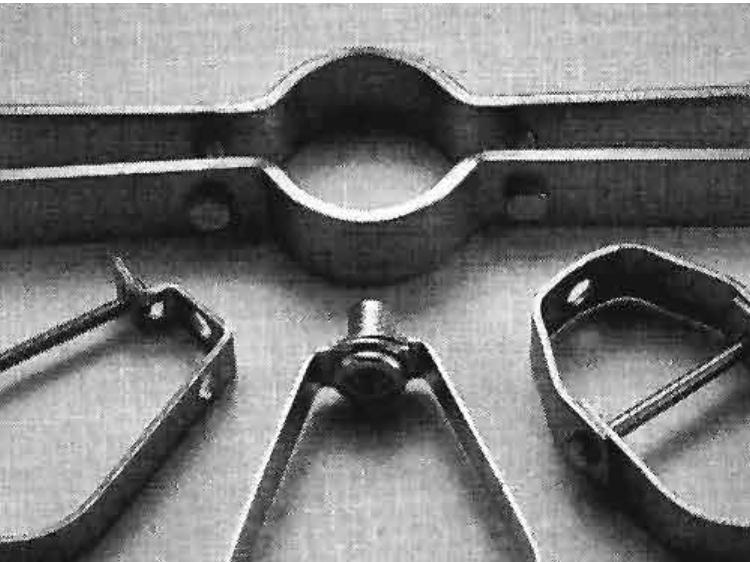

#### Hanger design

Pipe hangers are of advanced design and afford a new and better way of ordinary use.

#### Standard dimensions

The following, except where noted, apply to all beam clamp fittings.

- Hole Size:  $\frac{1}{16}$ " diameter
- Material:  $1\frac{5}{8}$ " wide
- Material:  $\frac{1}{4}$ " thick

#### GoldGalv® Outperforms Copper Plated

In a test conforming to ASTM G-87-84, also known as the Kesternich Test, Superstrut's GoldGalv® electrogalvanized zinc trivalent chromium finish achieved superior corrosion resistance in comparison to copper plated.

Performed and certified by an independent testing laboratory, the stringent Kesternich test is equivalent to an acid rain environment.

The test procedure exposes subject material to condensed moisture containing harsh sulfur dioxide (SO<sub>2</sub>) which accelerates the aging process. During the series of test time cycles, the material is thoroughly inspected for signs and progression of damaging red rust.

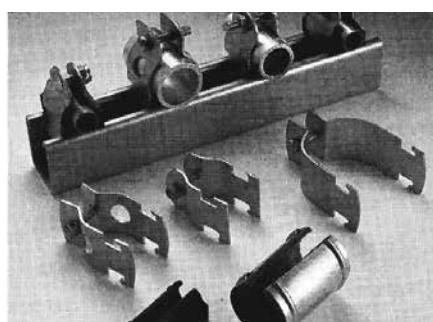

The second test series was performed on various O.D. pipe straps attached to copper tubing and continuous slot channel. GoldGalv® achieved greater red dust resistance by seven times over copper plating.

Once tests were completed, all copper tubes were split open and inspected for signs of electrolysis. The copper tubes showed minimal deterioration as a result of the test and no indication of electrolysis occurrence when attached to material with GoldGalv® finish.

#### ASTM G-87-84 corrosion test results

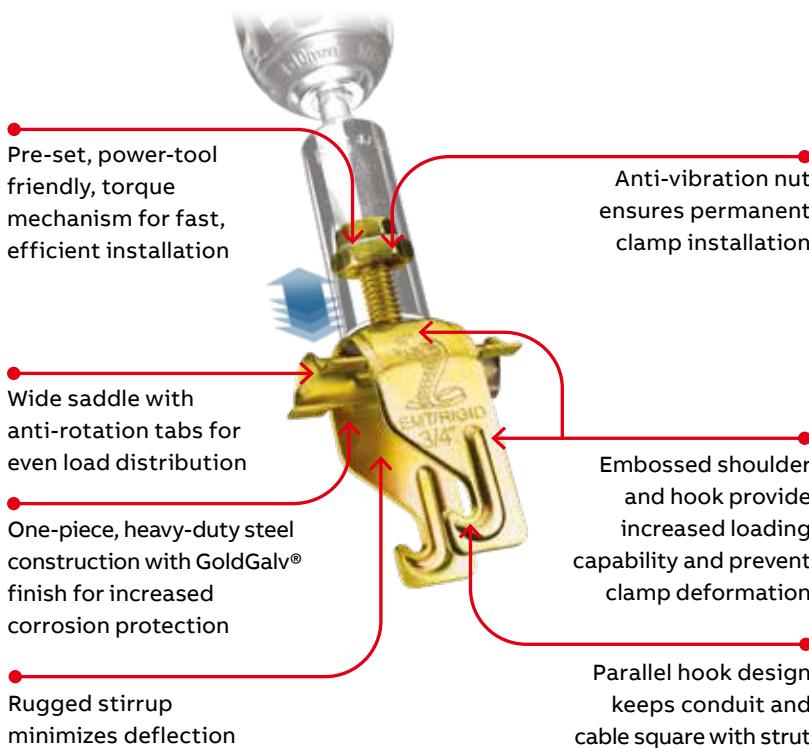

Finish	Initial red rust	50% red rust	100% rust
<b>Test Series I: Light-duty adjustable clevis hanger</b>			
GoldGalv®	120 hours	216 hours	*Never obtained
Copper Plated	24 hours	48 hours	72 hours
<b>Test Series II: O.D. pipe straps</b>			
GoldGalv®	168 hours	192 hours	240 hours
Copper plated	24 hours	48 hours	168 hours

\*Test series ended after 360 hours.  
Standard finish – GoldGalv®, unless otherwise stated.

## Pipe straps, conduit clamps and hangers

LOC-KING™ Cobra® one-piece cable and pipe clamp

01 Position LOC-KING™ Cobra® clamp.

02 Using a power tool fitted with a 1/4" (16mm) socket, tighten lock nut...

03 ...until it 'blocks' and will no longer turn. Installation is complete.  
**Note:** When pre-set torque engages, lock-nut separates from bolt head and stops firmly against clamp body.

04 See Ratings in the Table Below

### The new standard for heavy-duty applications

The LOC-KING™ Cobra® heavy-duty pipe and cable clamp adds two new design innovations to the heavy-duty features of the original King Cobra® clamp.

First, a pre-set torque mechanism takes the guesswork out of installation, ensuring optimum torque and eliminating excess pressure on cables. Since the torque is pre-set, LOC-KING™ Cobra® clamps are ideally suited for use with power tools, making installation faster and more efficient than ever.

Second, the incorporation of an anti-vibration nut means that once installed, LOC-KING™ Cobra® clamps remain securely installed, even in high-vibration environments.

- Designed to be used on tray cable, Teck cable, metal-clad cable and armored cable
- Power-tool compatible for fast and efficient installation
- Pre-set torque mechanism takes the guesswork out of installation, delivering optimum torque even when using power tools
- Pre-set torque prevents over-tightening and excess pressure
- Anti-vibration nut ensures permanent installation, even in high-vibration environments
- Superior design load capabilities for heavy-duty applications: 350 lbs. for 1/2"-2 1/2" trade sizes; 450 lbs. for 3"-4" trade sizes

## Pipe straps, conduit clamps and hangers

### King Cobra® cable and pipe clamp

—  
\* Compared to conventional electrogalvanization.

01 King Cobra® cable and pipe clamp with GoldGalv® finish

—  
02 Cobra® one-piece cable and pipe clamp

01

02

#### King Cobra® cable and pipe clamp with GoldGalv® finish

- Superior design load capabilities for industrial applications: 350 lbs. for  $\frac{1}{2}$ " to  $2\frac{1}{2}$ " trade sizes; 450 lbs. for 3" to 4" trade sizes
- Durable one-piece heavy-duty steel construction — designed specifically for use in industrial applications
- Embossed shoulder and hooks increase loading capability and durability, preventing deformation of clamps
- Rugged stirrup provides increased strength for heavier loads, minimizing deflection
- Wider saddle design with anti-rotation tabs distributes load evenly over a larger surface area, preventing jacket damage
- Increased corrosion protection\* — GoldGalv® (yellow zinc trivalent) finish stands up to harsh industrial applications
- Parallel hook design keeps conduit and cable square with strut
- Heavy-duty  $\frac{5}{16}$ " hex bolt
- One clamp size works on equal trade sizes for both EMT and rigid conduit, simplifying clamp specification

#### Cobra® one-piece cable and pipe clamp

Takes a bite out of your installation time!

- One-piece heavy-duty construction ready to install right out of the box, no need to break apart and reassemble, no screws or bolts to drop
- Installs quickly and securely using one hand
- Universal bolt head accepts a range of tools
- Eliminates the guesswork from clamp selection — one catalog number attaches equal trade sizes of EMT and rigid conduit
- Parallel hook design keeps conduits and cable square with strut
- Reconfigure wiring without complete disassembly. Remove cables easily without disturbing neighboring clamps

## Pipe straps, conduit clamps and hangers

### Superstrut® pipe straps

Design loads

#### Pre-assembled for easy handling and sorting

Superstrut® Pipe Straps are designed to be twist inserted anywhere along the slot side of the channel. Pipes can be placed as closely as pipe couplings permit.

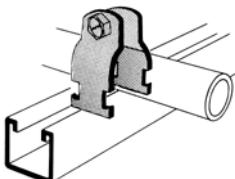

#### Some unique features of the straps include:

- Bolt head is combination slot and hex head for flexibility of attachment
- Square nut is captivated on the shoulder for easy one-handed tightening
- Straps are interchangeable with 1½" strut for broader application
- Straps are shipped assembled so counting and sorting are easier
- Pipe or conduit sizes are shown on the strap for easy identification
- All Superstrut® Straps are preassembled for easy handling and sorting

## Pipe straps, conduit clamps and hangers

A-716 — Snap-Guard® cushioned clamp tube series & P-716 — Pipe series

### P-716 — Pipe series

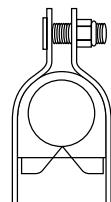

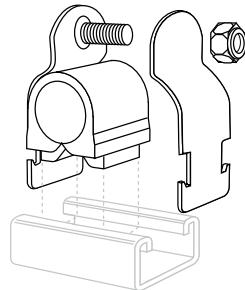

- Assembly consisting of GoldGalv® finish steel clamp with bolt/locknut and cushion
- Secure pipes, tubes and hoses for fluid conductors
- Installation is easy and requires no more time than a simple pipe clamp installation
- Cushion absorbs the shocks and associated vibrations from fluid surges in tubes, pipes and hoses

- Can handle temperatures from -40° F to 300° F
- Cushioned Clamp assemblies are available individually bagged

Standard finishes – GoldGalv® brand. Available in Stainless Steel — use SS suffix.  
(i.e) A-716-1SS, Electro-Galvanized (Silver) — use EG suffix. (i.e) A-716-1EG

## Pipe straps, conduit clamps and hangers

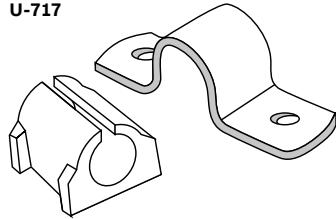

### U-716, U-717 — Two-hole cushioned clamp

- Guides, protects and uniformly spaces line runs. Low-cost, time-saving method of attaching tubing and hose to equipment
- Cushion is built to withstand the effects of most oils, chemical and industrial cleaning compounds, in temperatures from -50° F to 275° F. Interlock edge ensures cushion remains in place
- Clamp available in steel with the GoldGalv® hardware finish
- Attached with two standard fasteners to any flat surface, this clamp eliminates the use of special channels, providing a savings in both space requirements and cost
- Cushioned clamps reduce vibration, shock and noise in fluid systems and eliminate electrolysis

## Pipe straps, conduit clamps and hangers

C-716 — Isolator for copper tubing & S716 — Cushioned strip

### C-716 — Isolator for copper tubing

#### Features

- Designed for use with Superstrut® channel and pipe straps and Superstrut® C-711 Hangers, and may also be used with all standard flatbar or malleable iron hangers.

#### Materials

- Manufactured from one-piece steel shell with reinforcing ribs for stiffening and alignment. Padding is of processed non-conducting hairfelt and is cemented to the metal. Design of ribs creates a hinge so isolator may be opened and closed to install.

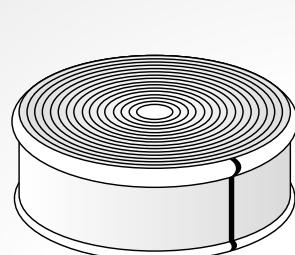

#### Application

- To provide a means to effectively isolate copper tubing from its supports to prevent the transmission of sound and vibration.

#### C-716 — Isolator for copper tubing

Order by Cat. No. and size.  
Standard finish – GoldGalv®

S716

Sold in a carton of 20 feet.

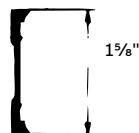

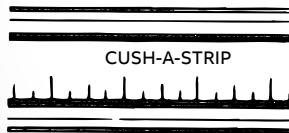

Order 701 clamp separately.

### S716 — Cushioned strip — For isolation and vibration applications

For use with 701 O.D. tubing and pipe clamp. To determine 701 clamp size, add 1/4" to O.D. tube size to allow for the cushioned strip material.

1/4" markings for fast measuring and cutting. Measurement chart is printed on back of carton. 20 feet included in each carton.

Prevent metal-to-metal contact with the cushioned strip material. It aids in sound insulation, shock absorption and protects against corrosion, distortion and abrasion. Cushioned strip material is designed for optimal use between -30° F and 300° F. Cushioned strip material combined with the Superstrut® 701 pipe strap can handle clamping assignments from 1/4" to 6".

Finish – GoldGalv® brand with bronze hardware.

Also fits 1 1/2" wide channel.

## Pipe straps, conduit clamps and hangers

### C-755 — TPE cable clamps

An easy-to-use one-piece insulator made from Sarlink 4339D, a flame-retardant, high hardness grade TPE polymer that is UL Listed. The tapered flange of the insulator ensures complete isolation and protection of the cable. Options include a Stainless Steel Clamp and hardware or an Electro-Galvanized Clamp with Everdur nut and bolt.

- Non-breakable TPE material
- Exceptional chemical resistance
- Dielectric strength of 640 volts per mil
- Stainless Steel Clamps Type 304 or 316
- Electro-Galvanized Steel Clamps with Everdur Nut and Bolt
- Flame-retardant TPE insulator
- Excellent UV resistance

## Pipe straps, conduit clamps and hangers

### C-720, C-720SS — Extension riser clamp

Designed for the support or steadyng of vertical pipe risers. It is made of carbon steel and is designed to hold tight to the pipe, transmitting the load to the structure through the ears on each end. When possible, the clamp should be placed under a coupling, hub or lugs welded to the pipe.

#### Specifications

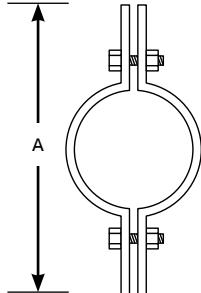

- Material: Carbon Steel
- Compliance: Federal Specification A-A-1192A Type 8, MSS-SP-69 (Type 8) and BSPSS-BS3974.
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”).

**Note:** This product is not designed to be supported with rods. Install using the maximum suggested torque values shown in the Technical Section of this catalog.

## Pipe straps, conduit clamps and hangers

### C-720L — Offset pipe clamp

The offset pipe clamp is used on pipe lines running at a fixed distance from a wall or floor. The standard clearance is two inches from the O.D. of pipe to the face of the surface. Non-standard clearances can be fabricated upon request.

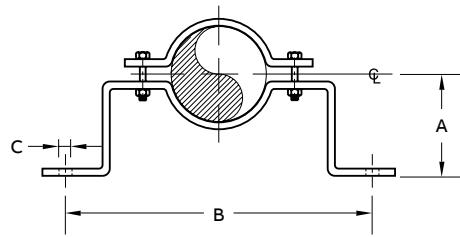

#### Specifications

- Material: Carbon Steel
- Load Rating: Up to 650° F (343° C)
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify pipe size, catalog number and finish

## Pipe straps, conduit clamps and hangers

### CX-725 — Extended offset pipe clamp

Designed to attach directly to piping where the exact distance between the structure and the pipe cannot be determined until the piping is in place. The extended legs can be modified in the field to suit the location. Legs of longer lengths can be furnished on order.

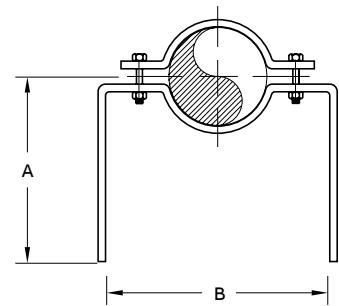

#### Specifications

- Material: Carbon Steel
- Finish: Standard finish – Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify pipe size, catalog number and finish

## Pipe straps, conduit clamps and hangers

### C-720P — PVC-coated riser clamp

The C-720P is normally used for the support of uninsulated vertical piping where no movement will occur. PVC coating the contact surface prevents galvanic corrosion with the pipe. Please use our C-720 for carbon steel piping or CT-720 for copper tubing requirements.

**Note:** This product is not designed to be supported with rods. Install using the maximum suggested torque values shown in the Technical Section of this catalog.

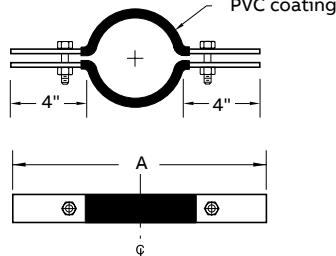

#### Specifications

- Material: Carbon Steel
- Compliance: Federal Specification A-A-1192A Type 8, MSS-SP-69 T 1400° F/600° C
- Finish: Polyvinyl Chloride
- Ordering: Specify pipe size and catalog number

## Pipe straps, conduit clamps and hangers

### CT-720 — Copper riser clamp

Normally used for the support of uninsulated vertical tubing where no movement will occur. Please use C-720 for carbon steel piping or C-720P for plastic coating requirements.

**Note:** This product is not designed to be supported with rods. Install using the maximum suggested torque values shown in the Technical Section of this catalog.

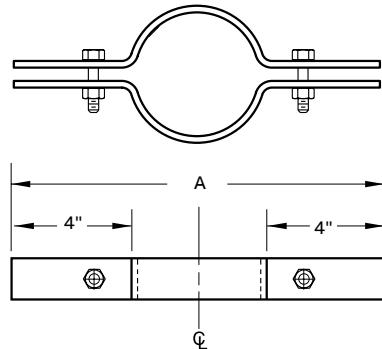

#### Specifications

- Material: Carbon Steel
- Compliance: Federal Specification A-A-1192A Type 8, MSS-SP-69 Type 8
- Finish: Copper
- Ordering: Specify tubing size and catalog number

CT-720-6	6	1,570	15	5.25

Standard finish – GoldGalv®, unless otherwise stated.

## Pipe straps, conduit clamps and hangers

### C-724 — Ductile iron pipe clamp

Can be used to secure mechanical joint piping or socket fittings together to prevent separation under pressure either under or above ground, vertically or horizontally. If using in this fashion, two (2) W-724 Socket Clamp Washers and Figure 133 Rods are also required, but must be ordered separately. The C-724 may also be used to support and guide vertical ductile iron pipe.

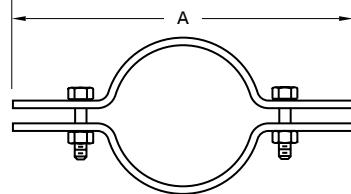

#### Specifications

- Materials: Carbon Steel
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify pipe size, catalog number and finish

**C-724 — Ductile iron pipe clamp**

Standard finish – GoldGalv®, unless otherwise stated.

## Pipe straps, conduit clamps and hangers

### C-725 — Two-bolt pipe clamp

Designed to suspend cold or hot pipe lines where little or no insulation is required. The C-725 is usually used with an E-120-A Weldless Eyenut or E-157 Welded Eyerod. See Figure 298 heavy-duty Two-Bolt Clamp when higher loads are required. We will also design to meet special requirements such as special pipe sizes.

Rated Loads are for up to 750° F (399° C).

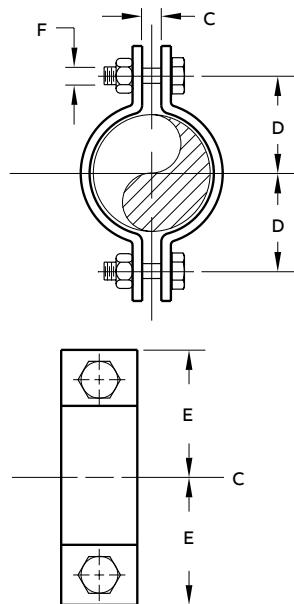

#### Specifications

- Material: Carbon Steel
- Compliance: Federal Specification A-A-1192A Type 4, MSS-SP-69 Type 4 and BSPSS-BS3974
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify catalog number, finish and pipe size. Also, include any special requirements for C-725

## Pipe straps, conduit clamps and hangers

### C-726 — Three-bolt pipe clamp

Designed for hot-insulated pipe lines up to 750° F. The spacer on the top inner bolt provides uniform space for the connecting eyerod or weldless eyenut. We will also design to meet special requirements such as special pipe sizes. Rated Loads are for up to 750° F (399° C).

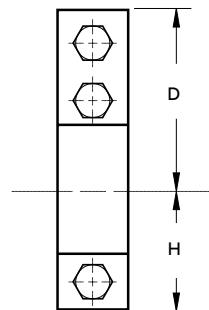

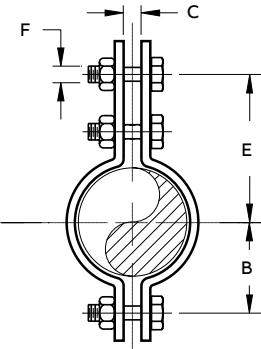

#### Specifications

## Pipe straps, conduit clamps and hangers

### Pipe clamps — A-726, alloy three-bolt pipe clamp

Designed for hot-insulated pipelines. The spacer on the top inner bolt provides uniform space for the connecting eyerod or weldless eyenut.

Temperature range: above 750° F (399° C) to 1050° F (566° C).

#### Specifications

- Material: Chromium Molybdenum Steel, ASTM A-387 Grade 22
- Compliance: Federal Specification A-A-1192A Type 3, MSS-SP-69 Type 3 and BSPSS-BS3974
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify catalog number and pipe size

## Pipe straps, conduit clamps and hangers

Pipe hangers — C-710, C-710F, C-710P, C-710SS

Designed to support non-insulated, stationary lines from above, allowing for approximately 1" to 1½" of vertical adjustment after the pipe is in place. The lower nut (not furnished) adjusts the pipe line to the proper elevation, the top nut (not furnished) prevents loosening due to vibration and must be tightened securely to assure proper hanger performance.

Rated Loads are for up to 650° F (343° C) for carbon steel. Maximum PVC temperature is 140° F (60° C).

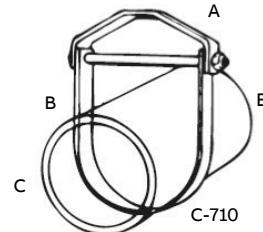

### Specifications

- Material: Carbon Steel (Also available in Stainless Steel as C-710SS)
- Compliance: Federal Specification A-A-1192A Type 1, MSS-SP-69 Type 1, BSPSS-BS3974, UL and FM
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify catalog number, finish and pipe size

Standard finish – GoldGalv®.

Carbon Steel.

Copper tube sized.

For the suspension of stationary copper tubing lines. Order by Cat. No., tubing size.

## Pipe straps, conduit clamps and hangers

CI-710 — Clevis hanger for ductile iron and A.W.W.A. cast iron pipe

Designed to support non-insulated, stationary ductile iron and A.W.W.A. cast iron lines from above, allowing for approximately 1" to 1½" of vertical adjustment after the pipe is in place. The lower nut (not furnished) adjusts the pipe line to the proper elevation. The top nut (not furnished) prevents loosening due to vibration and must be tightened securely to assure proper hanger performance.

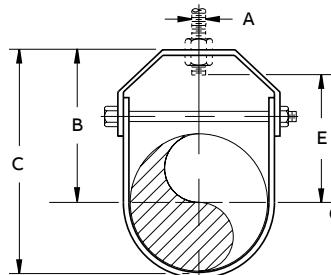

### Specifications

- Material: Carbon Steel
- Compliance: MSS-SP-69 Type 1, A-A-1192A Type 1
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify pipe size, catalog number and finish

## Pipe straps, conduit clamps and hangers

C-711 — J pipe hanger, C-711F — Felt-lined J pipe hanger &  
C-711P — Plastic-coated J pipe hanger

### C-711 — J pipe hanger

- Standard finish – GoldGalv® brand
- Complies with Specification MSS SP 58, Type 5.
- Sizes through 5" conform to Ca. Code Title 24, Div. T22 for seismic restraint bracing.

### C-711F — Felt-lined J pipe hanger

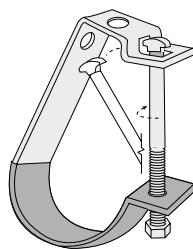

- Standard finish – GoldGalv® brand
- Available in sizes up to 8".

### C-711P — Plastic-coated J pipe hanger

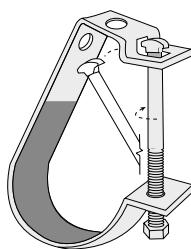

- Standard finish – GoldGalv® brand
- Isolates hanger from glass and other piping for corrosion or cushioning purposes. Available in sizes up to 4". Order by Cat. No. and pipe size. Hole provided for side mounting to wall as bracket.

Standard

Felt lined

Plastic coated

\*Hangers 6" and over have hole instead of slot.

## Pipe straps, conduit clamps and hangers

### C-727 — Adjustable swivel ring

Designed for the support of non-insulated static pipe lines. The swivel nut is knurled to provide a gripping surface when adjusting the pipe elevation.

#### Specifications

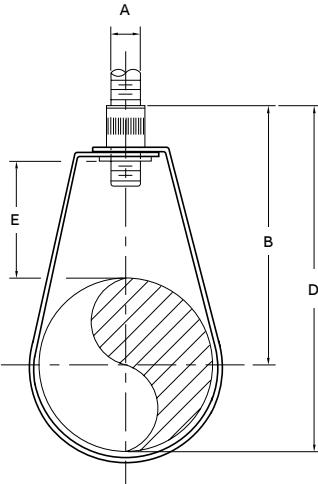

- Compliance: Federal Specification A-A-1192A Type 10, MSS SP-69 Type 10, UL Listed and FM Approved ( $\frac{3}{4}$ " through 8"). We also offer Swivel Ring hangers that are for Copper Tubing (CT-727), PVC coated (C-727-P) and for NFPA requirements (C-727-NFPA) in this catalog

- Material: Carbon Steel
- Finish: Standard finish – Pre-Galv, Electro-Galvanized (add suffix “-EG”) Black (add suffix “-B”)
- Ordering: Specify pipe size, catalog number and finish

C-727 — Adjustable swivel ring

Standard finish: Pre-Galv only.  
Add “F” suffix for felt lining.

## Pipe straps, conduit clamps and hangers

### C-727-P — PVC-coated adjustable swivel ring

Designed for the support of non-insulated static pipe lines and to protect the pipe from coming into direct contact with the hanger by having the contact surface PVC coated. The swivel nut is knurled to provide a gripping surface when adjusting the pipe elevation.

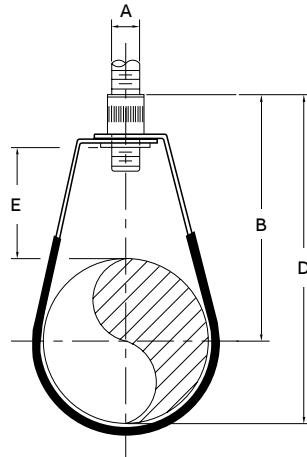

#### Specifications

- Compliance: Federal Specification A-A-1192A Type 10, MSS SP-69 Type 10, UL Listed and FM Approved (3/4" through 8")

- We also offer Swivel Ring hangers that are for Copper Tubing (CT-727) and for NFPA requirements (C-727-NFPA) in this catalog. Operating temperature should not exceed 140° F/60° C
- Material: Carbon Steel
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify pipe size and catalog number

## Pipe straps, conduit clamps and hangers

### C-727-NFPA — NFPA swivel ring

Designed for the support of non-insulated static pipe lines. The swivel nut is knurled to provide a gripping surface when adjusting the tubing elevation and is tapped to the reduced rod standards of NFPA.

#### Specifications

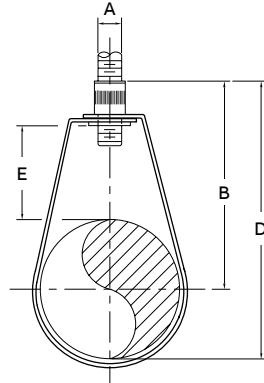

- Compliance: Federal Specification A-A-1192A Type 10, MSS SP-69 Type 10, UL Listed and FM Approved ( $\frac{3}{4}$ " through 8") and NFPA standards

- We also offer Swivel Ring hangers that are for standard commercial pipe (C-727), copper tubing (CT-727) and PVC coated (C-727-P) in this catalog
- Material: Carbon Steel
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify pipe size, catalog number and finish

## Pipe straps, conduit clamps and hangers

### M-718, M-718-B — Extension ring hanger

M-718 — (Rod Tapped – Electro-Galvanized)

M-718-B — (Rod Tapped – Plain Finish)

This split ring hanger is designed for the support of non-insulated stationary pipe lines. Also available in a two-screw design. The MT-742-R Ceiling Plate is normally used with this product.

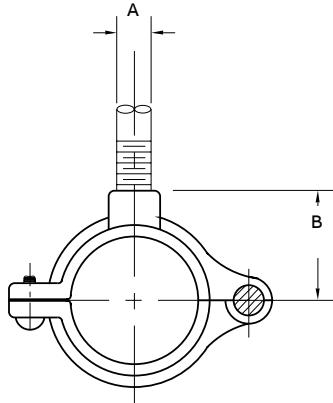

#### Specifications

- Material: Malleable Iron.
- Finish: Standard finish – EG (silver), Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Compliance: Federal Specification A-A-1192A Type 12, MSS-SP-69 Type 12
- Ordering: Specify pipe size and catalog number.

**M-718, M-718-B — Extension ring hanger**

Cat. No.	Pipe size (in)	Max. load (lbs)	Pipe size A (in)	Rod size A (in)	B (in)	Weight each (lbs)

Standard finish – GoldGalv®, unless otherwise stated.

## Pipe straps, conduit clamps and hangers

### MT-718 — Copper extension ring hanger

This split ring hanger is designed for the support of non-insulated copper tubing lines.

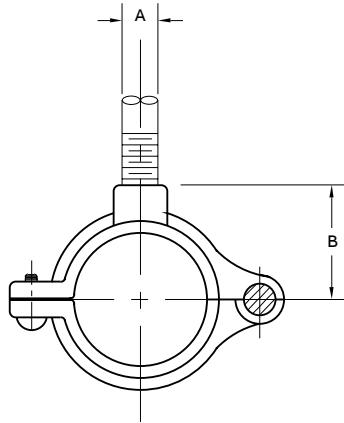

The MT-718 is furnished tapped for bolt thread and is used with the MT-742-R Ceiling Plate. Also available in a two-bolt design.

#### Specifications

- Material: Malleable Iron
- Finish: Copper (for Electro-Galvanizing please see M-718.)
- Compliance: Federal Specification A-A-1192A Type 12, MSS-SP-69 Type 12
- Ordering: Specify tube size and catalog number.

MT-718 — Copper extension ring hanger

Cat. No.	Tube size (in)	Max. load (lbs)	Rod size A (in)	B (in)	Weight each (lbs)
MT718-1/4	1/4	180	3/8	1/2	.10

Standard finish – GoldGalv®, unless otherwise stated.

## Pipe straps, conduit clamps and hangers

### PG-794 — Pipe alignment guide

**Note:** Guides are not designed to carry dead weight loads. Maximum temperature is 750° F.

Designed to maintain the axial alignment of piping as it expands and contracts during operation. It is most typically installed adjacent to expansion joints and at reasonable distances between the expansion joint and the anchor point. Our Figures 1007 and 1010 also offer alternative means for your piping alignment needs.

#### Specifications

- Material: Carbon Steel
- Finish: EG (Silver), Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify pipe size, insulation thickness, catalog number and finish.
- **Example Catalog Number:** PG794 T3-2-1/2 would be 2½" pipe with 2" thick insulation.

#### PG-794 — Pipe alignment guide

Size	Dimensions (in)								Weight each (lbs)

18-24	8	8

## Pipe straps, conduit clamps and hangers

### Structure attachments

#### M-742-R Ceiling Flange

M-742-R, M-742-RB, MT-742-R – Single Plate  
 M-742-R — (Rod Tapped – Electro-Galvanized)  
 M-742-RB — (Rod Tapped – Plain Finish)  
 MT-742-R — (Rod Tapped – Copper Finish)

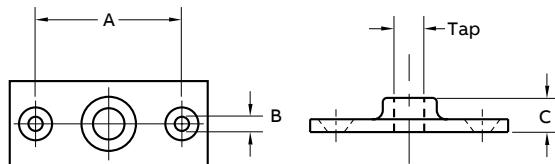

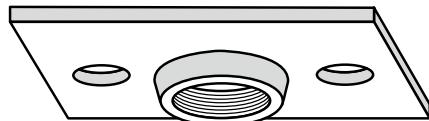

Designed for attaching a rod to a wooden member. This part is normally used in conjunction with our M-718 Split Ring.

#### Specifications

- Material: Malleable Iron. M-742-R is Carbon Steel.
- Ordering: Specify rod size and catalog number.

#### M-742-R Ceiling flange

Cat. No.	Rod tap (in)	Max. load (lbs)	Dimensions (in)			Weight each (lbs)
			A	B	C	
M-742-R-3/8	3/8	180	2	1/4	1/2	.19
M-742-R-1/2	1/2	180	2	1/4	1/2	.18

Standard finish – Black (B), EG (Silver) or Copper-Colored Epoxy Paint.  
 Rod Sizes: 3/8" & 1/2"

#### C-736-Side clip — Steel bracket clip

Clip can be used to support piping 3½" or smaller from the horizontal member of a C-736 Steel Bracket. The clip is composed of two steel plates and one bolt and nut.

#### Specifications

- Material: Carbon Steel
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify size number, catalog number and finish.

#### C-736-Side clip — Steel bracket clip

Cat. No.	Rod tap (in)	Size (in)	Max. load (lbs)	Weight each (lbs)
C-736-Side Clip-1	1	3/8	750	6.99
C-736-Side Clip-2	2	1/2	750	10.10

Standard finish – GoldGalv®, unless otherwise stated.

## Pipe straps, conduit clamps and hangers

### C-736 — Light welded steel bracket

Designed to support up to 6" pipe. This bracket is for installation to walls as shown or inverted, and may require a backing plate. Holes for up to  $\frac{3}{4}$ " rods are located at each end of the bracket to allow for use in either orientation. The C-736 Side Clip Steel Bracket Clip can be attached to the C-736 to support piping  $3\frac{1}{2}$ " or smaller. Please see Figure 79 for more information.

#### Specifications

- Compliance: A-A-1192A Type 31, MSS-SP 69 Type 31
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify size number, catalog number and finish.

**C-736 — Light welded steel bracket**

Cat. No.	Rod tap	Max. load (lbs)	Dimensions (in)			Weight each (lbs)
			A	B	C	
C-736-1	1	750	9	8	6½	6.99
C-736-2	2	750	13	12	10½	10.10
C-736-3	3	750	19	18	16½	10.50

Standard finish – GoldGalv®, unless otherwise stated.

## Pipe straps, conduit clamps and hangers

C-739-H — Heavy welded steel bracket & PG-795 — Pipe block

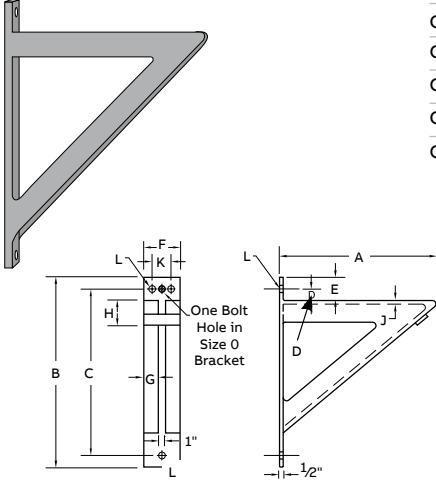

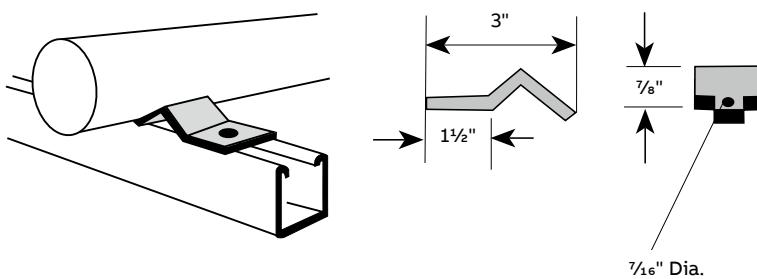

Designed to support pipe from either above or below. Slotted construction allows for drop rod use along the length of the bracket. This bracket is for bolted installation to walls and may require a backing plate. Special steel brackets can be fabricated to customers loads and/or dimensions.

### Specifications

- Compliance: A-A-1192A Type 33, MSS-SP 69 Type 33
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify size number, catalog number and finish.

C-739-H — Heavy welded steel bracket

Cat. No.	Size	Max. load (lbs)	Dimensions (in)											Weight each (lbs)
			A	B	C	D	E	F	G	H	J	K	L

**PG-795 — Pipe block**  
Standard finish — Black (B).

## Pipe straps, conduit clamps and hangers

### Pipe attachments

#### H-115, H-115SS — Standard U-bolt

Our standard U-Bolts are recommended for use as supports or guides for piping. They are supplied with four hex nuts. The H-115SS is recommended for support of stainless steel piping. Please specify the grade of stainless steel you require when ordering. Load Ratings shown are for Carbon Steel. PVC coating should not exceed 140° F/60° C.

#### Specifications

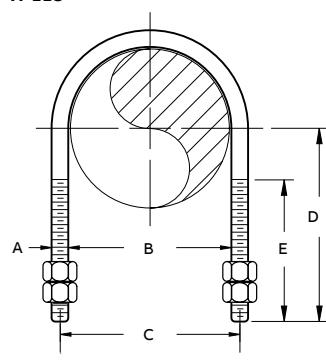

- Materials: Carbon Steel, Stainless Steel
- Compliance: Federal Specification A-A-1192A Type 24, MSS-SP 69 Type 24, and BSPSS-BS3974
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”), SS (add suffix SS), SS6 = 316

- Side loads are given for the H-115 for a maximum temperature of 650° F/343° C.
- When the loading condition requires the simultaneous application of a normal load and side load, the following interaction equation must be used to determine if the H-115 can be used.
- (Actual Load / Maximum Design Load) + (Actual Side Load/Maximum Side Load). The result of this equation cannot exceed the value of 1.0 if the H-115 is to be used.
- Ordering: Specify pipe size, catalog number and finish.

#### H-115, H-115SS — Standard U-bolt

#### M-129 — Extension piece

Designed for attaching rods to the M-732-EXT Clamp and similar types of attachments.

#### Specifications

- Material: Malleable Iron
- Compliance: Federal Specification A-A-1192A Type 30, MSS-SP-69 Type 30 when used with a Figure 82
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Specify rod size, catalog number and finish

#### M-129 — Extension piece

Cat. No.	Rod size (in)	Max. load (lbs)	Dimensions (in)				Weight each (lbs)

## Pipe straps, conduit clamps and hangers

### Structure attachments

#### C-780 W/OB, C-780 W/HWB — Welded beam attachment

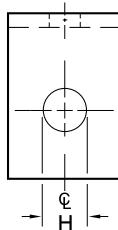

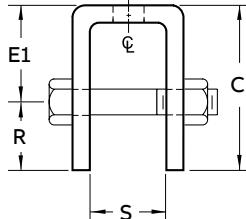

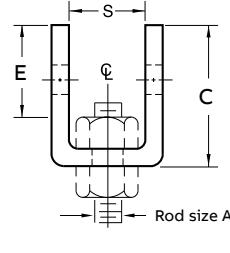

Recommended for attachment to the bottom of beams when little or no pipe movement is expected. C-780 W/HWB is recommended for attachment to the bottom of beams, when pipe movement is expected. A bolt and nut or pin is supplied. A pin with cotters is normally supplied for rod sizes over 1".

#### Specifications

- Compliance: Federal Specification A-A-1192A Type 22, MSS SP-69 Type 22 and BSPSS-BS3974
- Material: Carbon Steel
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify catalog number, rod size and finish.

## Pipe straps, conduit clamps and hangers

### C-755 — Beam clamp

Designed to attach to the bottom of flanged beams. Normally used with the E-157 Eye Rod or E-120-A Eye Nut.

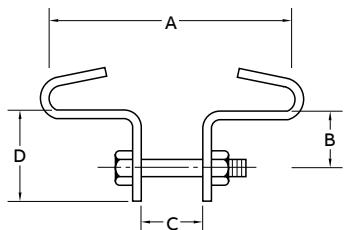

#### Specifications

- Material: Carbon Steel
- Compliance: Federal Specification A-A-1192A Type 21, MSS-SP-69 Type 21

- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”), Thermoplastic (add suffix “-TP”)
- Ordering: Specify clamp size, flange width, flange thickness, catalog number and finish.

C-755 — Beam clamp

Cat. No.	Clamp size	Max. load (lbs)	Dimensions (in)			Bolt size (in)
			B	C	D	
C-755-1	1	500	7/8	1/2	1 1/2	3/8
C-755-2	2	700	1 1/8	5/8	1 3/4	1/2
C-755-3	3	800	1 1/4	5/8	2	1/2
C-755-4	4	1,000	1 3/8	3/4	2 3/8	5/8
C-755-5	5	3,000	1 5/8	7/8	2 5/8	3/4
C-755-6	6	3,000	2	1	3	7/8
C-755-7	7	5,000	2 1/8	1 1/8	4 1/4	1

The technical drawing illustrates the C-755 Beam clamp. Dimension A represents the overall width of the clamp. Dimension B is the distance from the center of the bolt hole to the outer edge of the clamp body. Dimension C is the height of the clamp body. Dimension D is the thickness of the clamp body. Dimension E is the thickness of the beam being clamped.

Cat. No.	Clamp size	Weight each (lbs) Beam width — Dimension "A"

## Pipe straps, conduit clamps and hangers

### M-732-H — Steel beam clamp with weldless eyenut

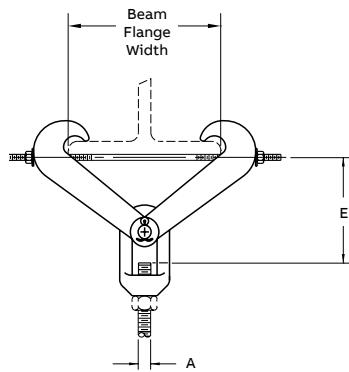

The M-732-H beam clamp with eyenut is used for support where some movement is expected and welding to the structure is prohibited. The clamping effect is produced by the "ice-tong" action of the arms and is locked in place by the through bolt located just under the beam flange.

#### Specifications

- Material: Carbon Steel with Forged Steel Eyenut
- Compliance: Federal Specification A-A-1192A Type 28, MSS-SP-69 Type 28 and BSPSS-BS3974
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify catalog number, rod size, clamp number and finish.

## Pipe straps, conduit clamps and hangers

### M-732-EXT — Adjustable beam clamp

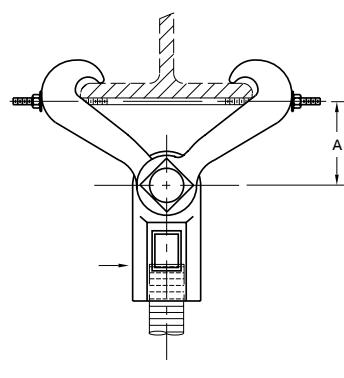

Designed to attach to the bottom of flanged beams without requiring welding. Normally used with the M-129 Extension Piece (not furnished) up to a maximum  $\frac{7}{8}$ " (M20) rod diameter. Loading is achieved through the clamp jaws while locking is accomplished by tightening the through-bolt located directly below the flange. Maximum flange thickness is .60 inches.

#### Specifications

- Material: Malleable Iron
- Compliance: Federal Specification A-A-1192A Type 30, MSS-SP-69 Type 30 when used with a Figure 157
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify catalog number and finish. Order M-129 separately if required.

## Pipe straps, conduit clamps and hangers

C-728 — Pipe roller (pair) & C728H — Pipe roller assembly (pair)

- Cast aluminum rollers, steel brackets
- Designed for standard saddles
- Order separately for each pair of rollers:
  - two  $\frac{1}{2}$ " x  $\frac{5}{16}$ " hex head cap screws
  - two  $\frac{1}{2}$ " channel nuts
- Space to fit O.D. of pipe and wrapping
- Adjustable for radius up to 8"

## Pipe straps, conduit clamps and hangers

### CR-729 — Roller support

Used on steam or hot water systems where pipe is to be supported in tunnels, trenches, structural brackets and frames. Adjustment is made by raising and lowering the top nut on the legs and locked into position by tightening the lower nut.

#### Specifications

- Material: Steel axle, cast iron roll
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)

## Pipe straps, conduit clamps and hangers

### C-729 — Harvard roll hanger

Designed to support piping lines from above, allowing for vertical adjustment and axial movement in the piping. The lower nut (not furnished) adjusts the pipe line to the proper elevation. The top nut (not furnished) prevents loosening due to vibration and must be tightened securely to assure proper hanger performance.

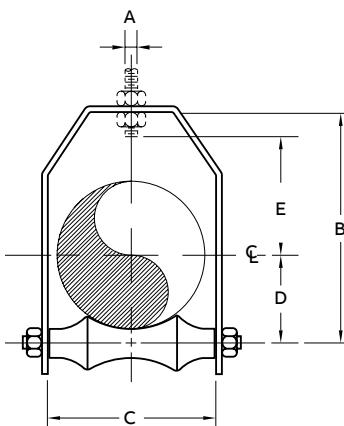

#### Specifications

- Material: Carbon Steel frame with a cast iron roll.
- Do not exceed 450° F/232° C at the contact point to the roll.

- Compliance: A-A-1192A Type 43 and MSS-SP-69 Type 43
- Finish: Black (add suffix “-B”), Electro-Galvanized (add suffix “-HDG”)
- For pipe with insulation and a pipe covering protection saddle the C-729 will have to be oversized to suit. Please see the table below showing the correct sizing for insulated pipe.
- Ordering: Specify pipe size, catalog number and finish.

## Pipe straps, conduit clamps and hangers

### CR-729A — Roller chair

Designed for longitudinal movement of pipe where vertical adjustment is not required. Although two bolts are supplied for installation, the chair can be alternatively welded in position.

#### Specifications

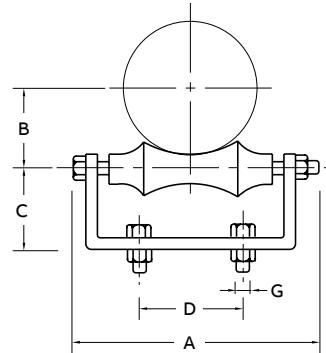

- Material: Carbon steel chair and axle with cast iron pipe roll. Use a Figure 17 when a cast iron chair is required. Do not exceed 450° F/232° C at the contact point to the roll.

- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”).
- For pipe with insulation and a pipe covering protection saddle, the CR-729A will have to be oversized to suit.
- Please see the Table for the RC-729A which shows the correct sizing for insulated pipe.
- Ordering: Specify pipe size, catalog number and finish.

CR-729A — Roller chair

Cat. No.	Pipe size (in)	Max. load (lbs)	Dimensions (in)				Bolt size G (in)	Weight each (lbs)

Standard finish – GoldGalv®, unless otherwise stated.

## Pipe straps, conduit clamps and hangers

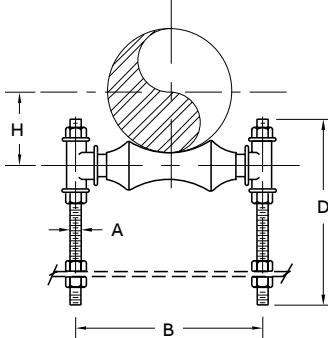

### RC-729 — Adjustable roll support

#### Specifications

- Material: Cast iron pipe roll and sockets, carbon steel axle, continuous thread rods and hex nuts.
- Do not exceed 450° F/232° C at the contact point to the roll.

- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”).  
- For pipe with insulation and a pipe covering protection saddle, the RC-729 will have to be oversized to suit.
- Please see the table for the RC-729A which shows the correct sizing for insulated pipe.
- Ordering: Specify pipe size, catalog number and finish.

## Pipe straps, conduit clamps and hangers

### RC-729A — Adjustable roll support

Designed for longitudinal movement of pipe where vertical adjustment is required. Although primarily used for support of the pipe, this component may also be placed over the pipe to act as a guide.

#### Specifications

- Material: Cast iron pipe roll and sockets with a carbon steel axle. Do not exceed 450° F/232° C at the contact point to the roll.

- Compliance: A-A-1192A Type 42, MSS SP-69 Type 41.
- Finish: Black (add suffix “-B”). Electro-Galvanized (add suffix “-HDG”).
  - For pipe with insulation and a pipe covering protection saddle, the RC-729A will have to be oversized to suit.
  - Please see the table below which shows the correct sizing for insulated pipe.
- Ordering: Specify pipe size, catalog number and finish.

## Pipe straps, conduit clamps and hangers

### S-730-C — Chair and roll

Designed for longitudinal movement of pipe where vertical adjustment is not required. Because the chair is made of steel, it can be either welded or bolted in position.

#### Specifications

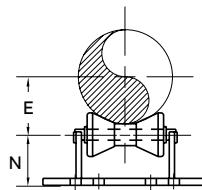

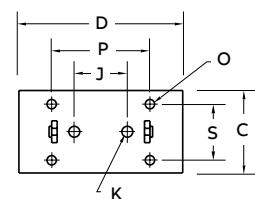

- Material: Carbon steel chair and axle with cast iron pipe roll.
- Use a Figure 17 when a Cast Iron Chair is required.
- Do not exceed 450° F/232° C at the contact point to the roll.

- Compliance: Federal Specification A-A-1192A Type 44, MSS-SP-69 Type 44.
- Finish: Black (add suffix “-B”). Electro-Galvanized (add suffix “-HDG”).
- For pipe with insulation and a pipe covering protection saddle, the S-730-C will have to be oversized to suit.
- Please see the Table below showing the correct sizing for insulated pipe.
- Ordering: Specify chair number, catalog number and finish.

## Pipe straps, conduit clamps and hangers

### C-786 — Adjustable pipe support

Used for support of piping from below without welding to the pipe, and consists of a steel saddle, nipple and pipe reducer. It connects to a threaded pipe standard and base.

Rated loads are for up to 650° F (343° C).

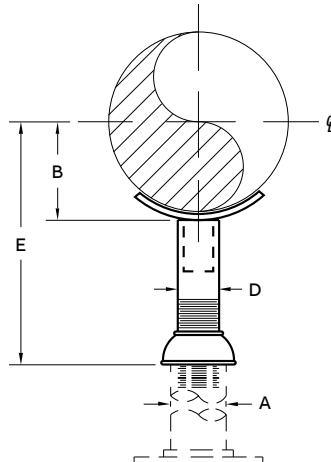

#### Specifications

- Materials: Reducer is cast iron, pipe saddle and nipple are carbon steel.
- Compliance: Federal Specification A-A-1192A Type 39, MSS-SP-69 Type 39.
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”).
- Ordering: Specify pipe size, catalog number and finish.

Standard finish – GoldGalv®, unless otherwise stated.

## Pipe straps, conduit clamps and hangers

C-789, C-789A, C789B, C-789C, C-789D & C-789E — Pipe covering protection saddle

The C-789 saddles are used to protect the insulation against damage and keep heat loss to a minimum. They are designed for 1" to 5" of covering. All Saddles are 12" long with three tabs on each side for welding to pipe. Sizes 12" and larger have a welded-in center rib.

### Specifications

- Material: Carbon steel (except C-789 and C-789-8 which are chromium molybdenum steel).
- Compliance: Federal Specification A-A-1192A Type 39A or 39B, MSS-SP-69 Type 39A or 39B and BSPSS-BS3974.
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”).
- Ordering: Specify catalog number and pipe size.

## Pipe straps, conduit clamps and hangers

### C-790 — Insulation shield

Designed to protect the insulation and distribute the load at the hanger point. This item is usually used with our C-710 Clevis Hanger.

#### Specifications

- Approvals: Federal Specification A-A-1192A Type 40, MSS-SP-69 Type 40
- Material: Carbon Steel
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify hanger size and catalog number

E-151-5/8	⅝	750	2½	2½	.35	.53	.70	.87	.59

The technical drawing illustrates a lag rod assembly. It features a threaded lag bolt at the bottom, a sleeve, and a strap. Dimension A is the width of the strap, dimension B is the distance from the top of the strap to the top of the sleeve, dimension C is the distance from the top of the sleeve to the top of the lag bolt, and dimension L is the total length of the assembly.

Standard finish – GoldGalv®, unless otherwise stated

## Pipe straps, conduit clamps and hangers

### E-157 — Machine thread eye rod

Welded Eyerods are designed to permit swing in the attachment component due to pipe movement.

#### Specifications

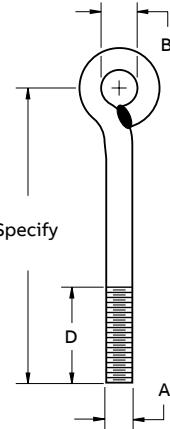

- Material: Carbon Steel. Larger rod diameters over  $2\frac{1}{2}$ ", special materials and special eye dimensions can be furnished upon request

- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify catalog number, finish, rod size, rod length and thread length if other than standard

#### E-157 — Machine thread eye rod

	A (in)	B (in)	Thread length D (in)	Load at (lbs) 650° F/343° C	Load at (lbs) 750° F/399° C

Standard finish – GoldGalv®, unless otherwise stated

## Pipe straps, conduit clamps and hangers

### F-111 — Forged steel clevis

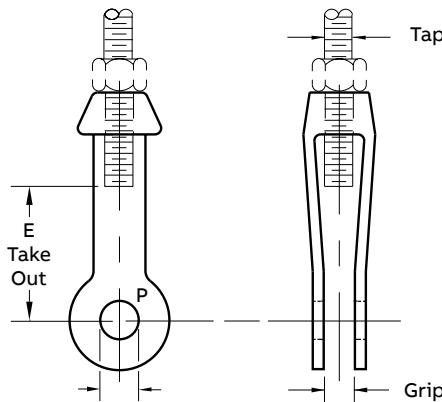

Used to connect rod ends with structural steel welding lug plates or lugs welded to pipe. It provides a pivot point and adjustment. It can be supplied with a pin as F-111.

- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify catalog number, rod size, pin size, grip “G” and finish

#### Specifications

- Material: Forged Steel
- Compliance: Federal Specification A-A-1192A Type 14, MSS-SP 69 Type 14 and BSPSS-BS3974

**F-111 — Forged steel clevis**

Standard finish – GoldGalv®, unless otherwise stated.  
Note: Pins and Cotter Pins supplied when requested as Fig. F-111.

## Pipe straps, conduit clamps and hangers

### E-120-A — Forged weldless eyenut

Used to connect rod ends with structural steel welded beam attachments or pipe clamps as a substitute for a welded eyerod. It provides a pivot point and adjustment. It can also be supplied tapped left hand as E-120-A.

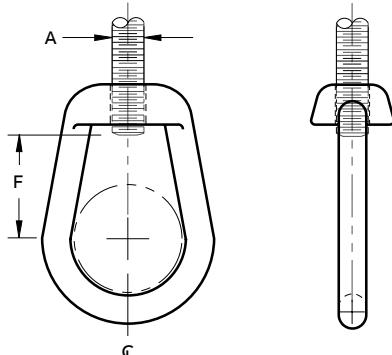

#### Specifications

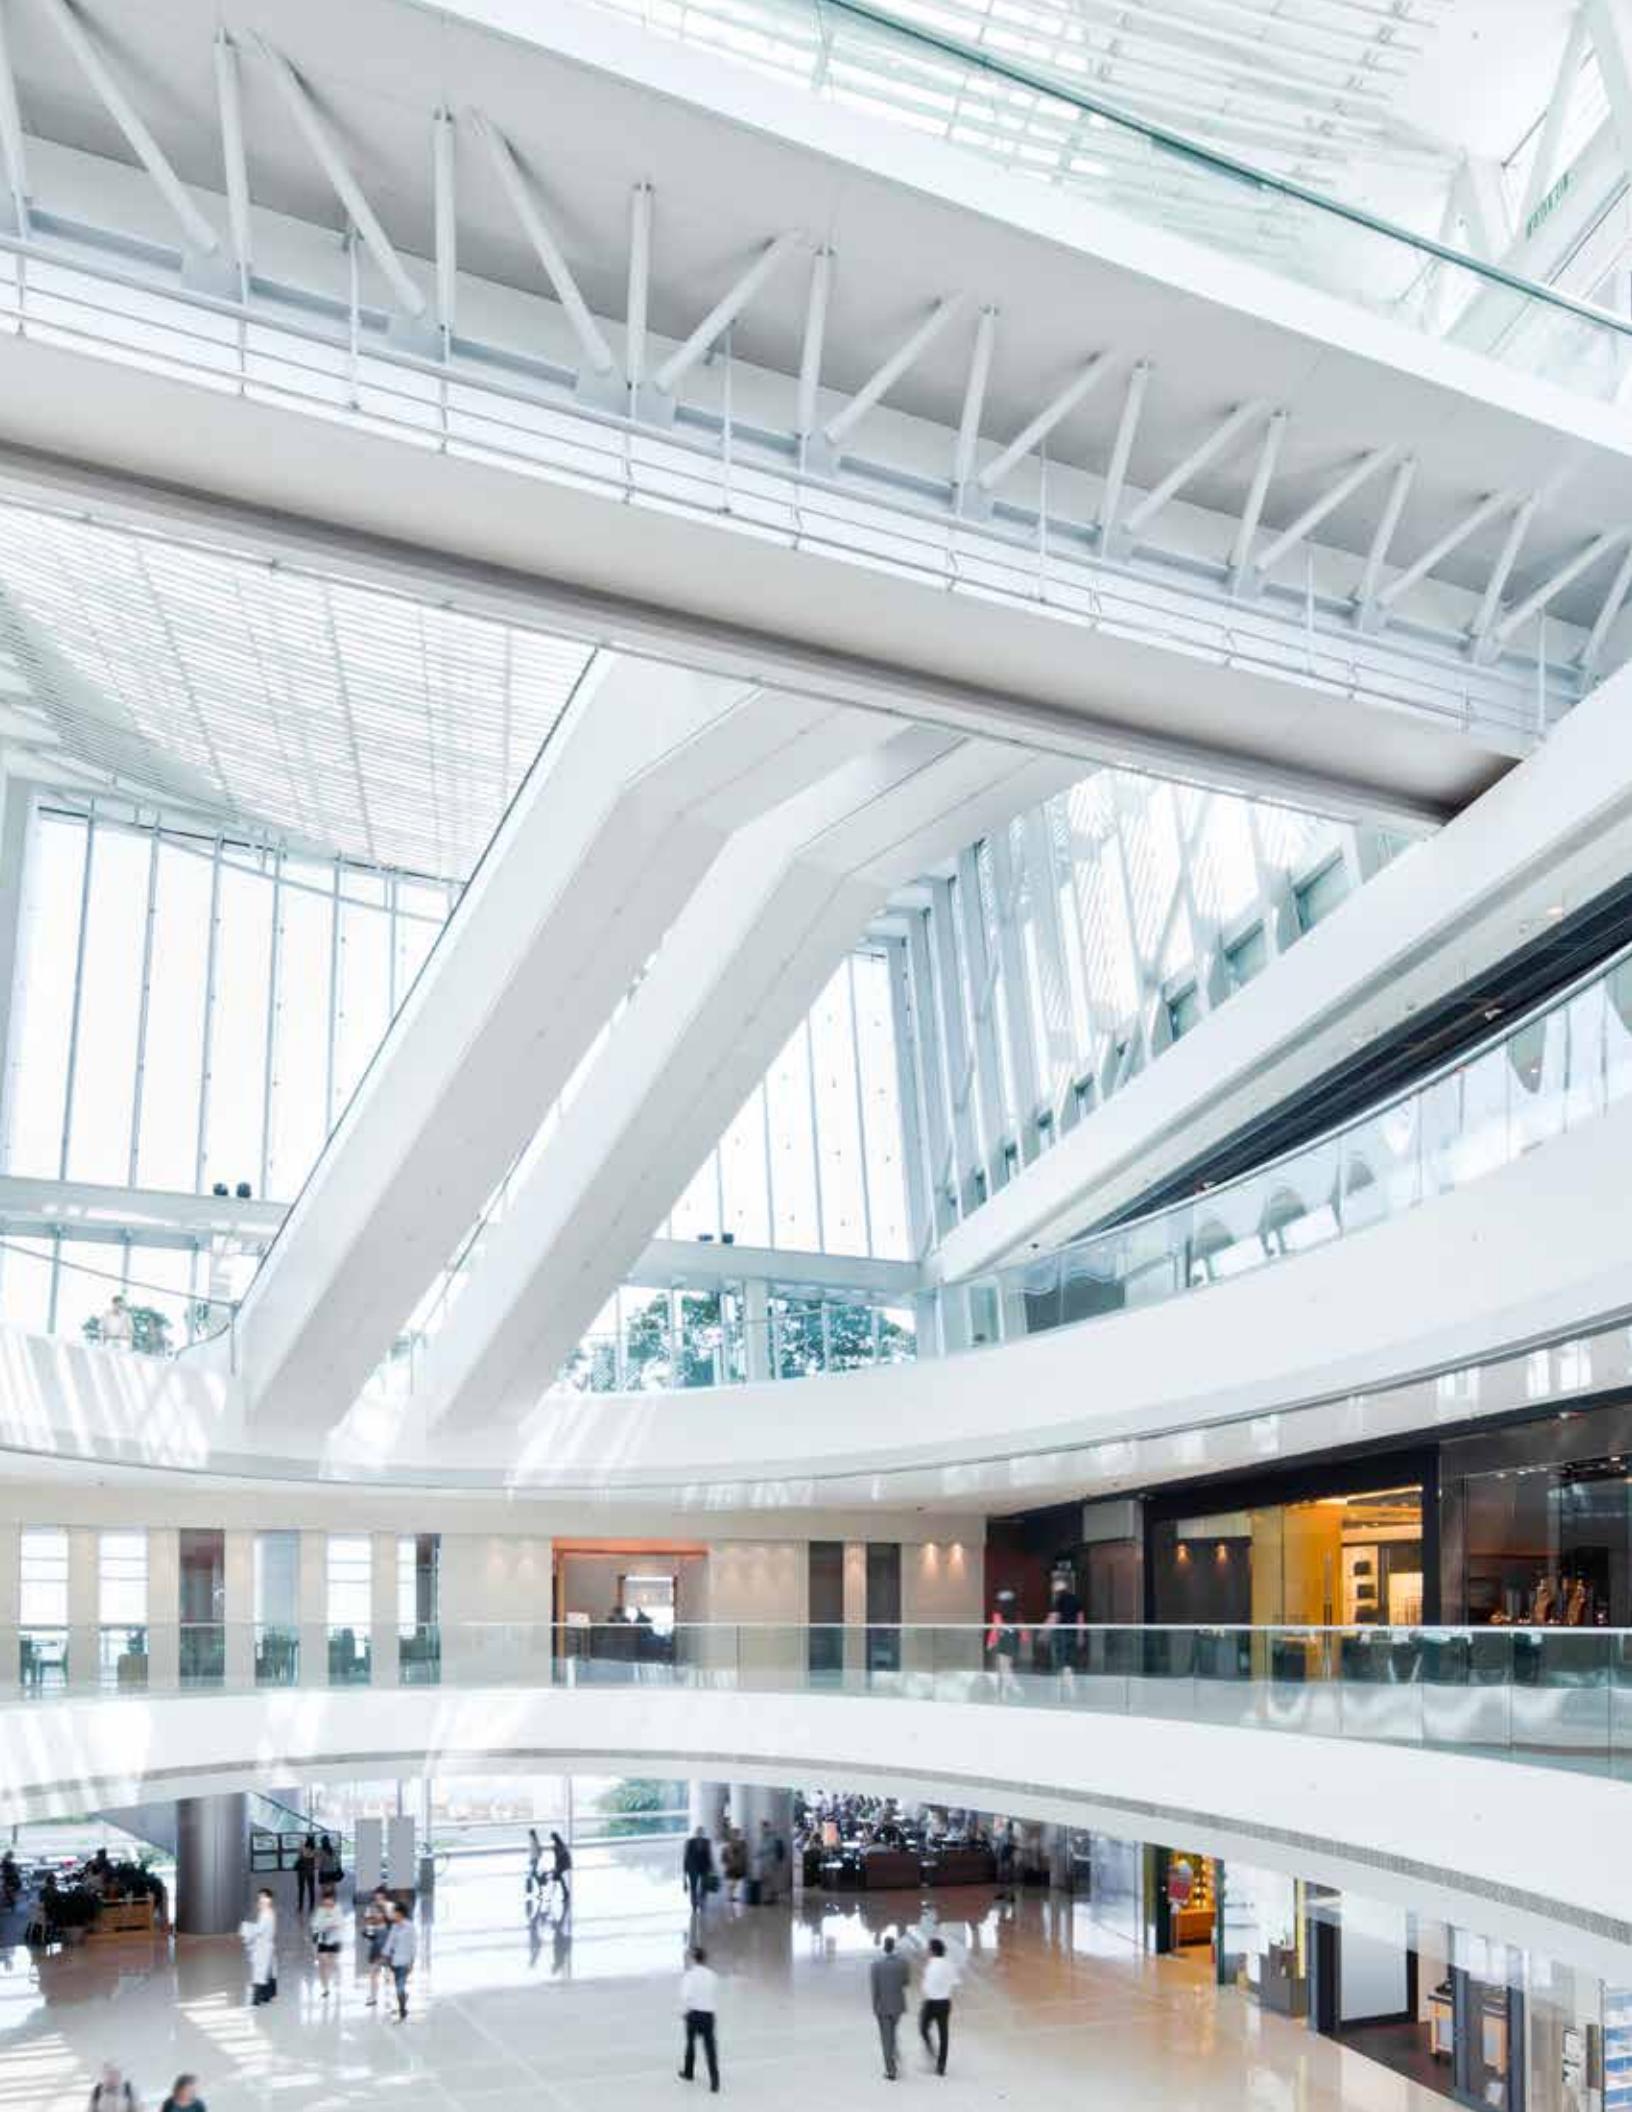

- Material: Forged steel
- Compliance: Federal Specification A-A-1192A Type 14, MSS-SP 69 Type 14 and BSPSS-BS3974
- Finish: Standard finish – GoldGalv®, Black (add suffix “-B”), Electro-Galvanized (add suffix “-EG”)
- Ordering: Specify catalog number, rod size and finish

E-120-A-2-1/2	2 1/2	33,500	3 1/4	16.75

Standard finish – GoldGalv®, unless otherwise stated.

# Surface raceway and lighting systems

## Electrical raceway

### Series 800 surface raceway and lighting systems

Superstrut® channel together with snap-in closure strip is listed by Underwriters Laboratories as a surface metal raceway. Other accessories listed by Underwriters Laboratories are identified on the drawings.

#### Electrical applications

##### **Column A**

Suitable for number of wires indicated when used as a raceway. Also suitable for number of wires indicated when installed to support and supply electric discharge type fixtures when raceway wiring is suitable for not less than 75°C.

##### **Column B**

Suitable for number of wires indicated when used as a raceway. Also suitable for number of wires indicated when installed to support electric discharge type fixtures when clearance of not less than  $\frac{1}{8}$ " is provided between raceway and fixture and when wiring is suitable for 75°C.

GoldGalv® hardware finish is standard for all Superstrut® products. This is a multi-process finish of electro-plated zinc, followed by gold-colored trivalent chromium coating to give excellent corrosion resistance and a superior paint base. See pages 4-5 for a complete description of the GoldGalv® hardware finish. GoldGalv® hardware finish will be furnished if no other finish is specified.

##### **Materials:**

Superstrut® electrical raceway, fixture hanging channel, closure strip and accessories are cold formed from hot-rolled strip steel.

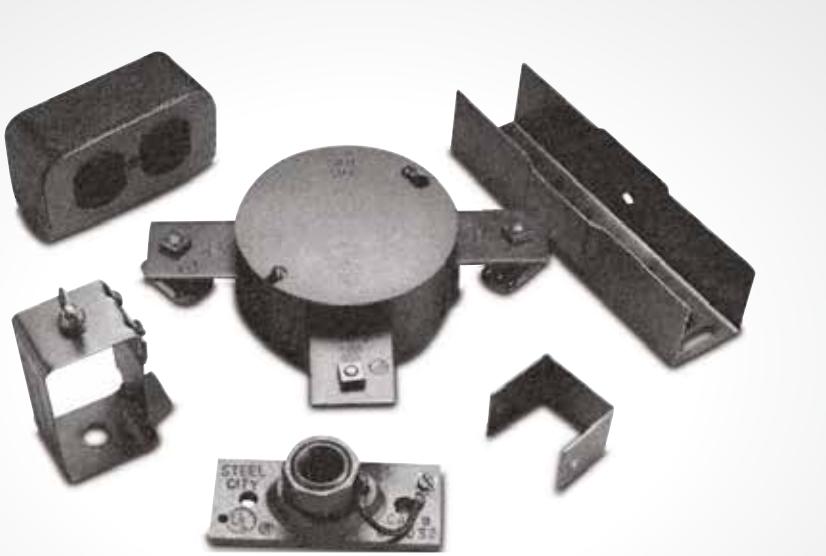

##### **Design data:**

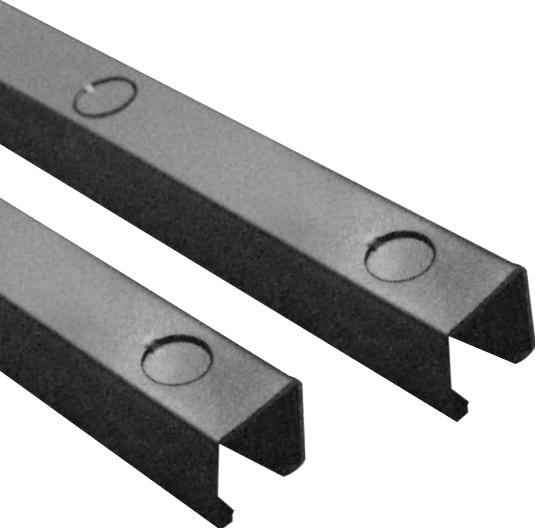

Deflections at various hanger rod spacings for raceway channels, based on 40 to 45 lbs. per fixture.

# Slotted angle metal framing

## Superangle slotted angle metal framing

With Superangle, you get flexibility — simplicity — economy!

### **Create the support framing you need.**

Superangle is manufactured from structural-quality steel in three different sizes. The small sizes are 14 ga. steel, the larger size is 12 ga. steel. With this offering, an endless variety of metal framing requirements can be met, from lightweight supporting needs to larger shelving needs such as inventory storage.

One of the legs on all sizes is  $1\frac{1}{8}$ " wide, while the other is either  $1\frac{1}{8}$ ",  $2\frac{3}{8}$ " or  $3\frac{1}{8}$ " long. Depending on the frame requirements, a single size can be utilized throughout, or the sizes can be interchanged to get the most efficient usage from the material.

### **Installation time is reduced — inventory space is minimal.**

Scribe marks are placed every  $\frac{3}{4}$ ", which saves planning, layout and cutting time and provides accuracy. The exclusive slot and hole pattern, repeated every 3", is scientifically designed for ease of assembly. The proper nuts and bolts are included with the material to ensure fast and easy erection.

Superangle Metal Framing is packaged in 10' and 12' lengths to minimize cutoffs and ensure maximum use of material.

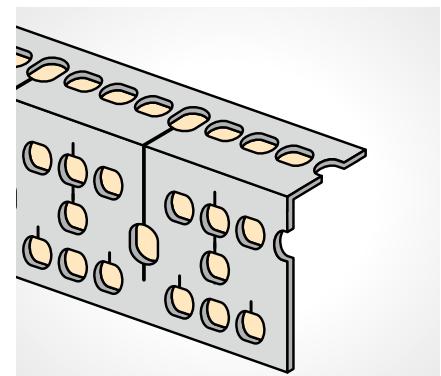

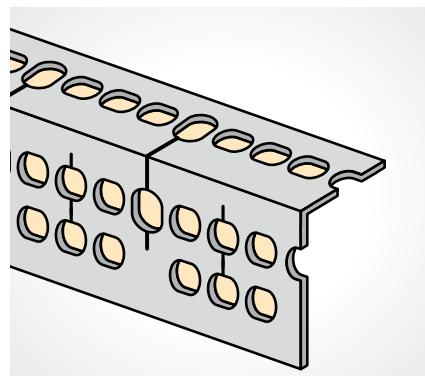

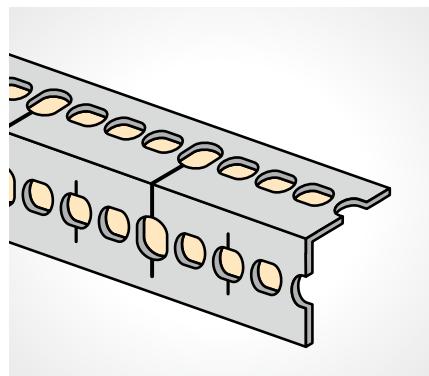

10', 12' lengths of Superangle take up the same amount of space as one 2 x 4. A standard package includes five pieces to a bundle, therefore handling and storage space are significantly reduced.

The importance of cutting Superangle easily, quickly and accurately is the key to time-saving assembly. The portable cutter provides these advantages and makes layout and erection of any structure a light-work job.

### **Finish is designed for long lasting durability.**

The standard GoldGalv® hardware finish is applied to all Superangle products after rolling and punching of the holes. This provides you with a number of benefits. First, raw ends resulting from cuts will be protected by the sacrificial quality of zinc. Second, the edges of all holes are protected against formation of rust, to provide a call-back free installation. Third, the electro-galvanizing process provides an excellent bonding surface for paint if desired for aesthetic reasons.

Note: Product is also available with Pre-Galvanized (PG) sections

## Properties for design — Stainless steel

(Suffix SS/Type 304 and 6SS/Type 316)

Superstrut® stainless steel products are made from high-quality austenitic Type 304 and Type 316 material. Stainless steel contains large amounts of chromium and nickel, is non magnetic and offers superior corrosion resistance. Tolerant to high-temperature environments, Superstrut's stainless steel framing provides dependable support, resulting in reduced maintenance cost. The channel is roll-formed to shape when cold, enhancing its structural strength for the most rigid of applications.

### **Stainless steel channel**

Elements of sections are the same as shown on pages 141-151 for standard steel channel. Load ratings meet or exceed ratings for standard steel channel shown elsewhere in this catalog.

Additional stainless steel and aluminum items are available. Contact your local Superstrut® representative.

## Properties for design aluminum channel (suffix AL)

If connections will be subjected to dynamic or seismic loading conditions, contact ABB Technical Services for design assistance.

## Technical information

### Design data — Metal framing channel (continued)

Design loads for channel used as beam or column

**Table 3**

#### **Beam loads**

Table 3 contains simple beam, uniformly-distributed loads calculated at 25,000 psi fiber stress. Beam loads are based on channel being loaded across the x-x axis. Loads are also listed at reduced deflections for long spans.

#### **Maximum loads @ 25,000 psi stress**

Maximum allowable deflections and maximum uniform loads for all spans @ 25,000 psi fiber stress.

#### **Reduced load for all 1/180 span deflection**

For moderate deflections on the longer spans, reduced loads are listed which will produce a deflection equal to 1/180 of the span. When maximum loads do not induce deflections exceeding 1/180 x the span length, reduced loads are not required.

#### **Reduced load for 1/360 span deflection**

For very slight deflections on the longer spans, reduced loads are listed which will produce a deflection equal to 1/360 of the span. When maximum loads do not induce deflections exceeding 1/360 x the span length, reduced loads are not required.

#### **Concentrated loads**

To obtain values for concentrated loads from Table 3, multiply uniform load by .5 and deflection by 1.25.

#### **Slotted, punched or KO channel**

Reduce load rating 5%.

#### **Long span deep beams**

Support in a manner to prevent rotation at supports and tie between supports to prevent twist.

#### **Column loads**

Allowable column loads given are for uniform axial loading with pinned ends. For eccentric loading or other end conditions, reduce allowable loads according to standard engineering practice.

#### **Dynamic loads**

Allowable dynamic loads may be calculated by dividing the static loads shown in Table 3, by 2.08.

## Technical information

### Design applications

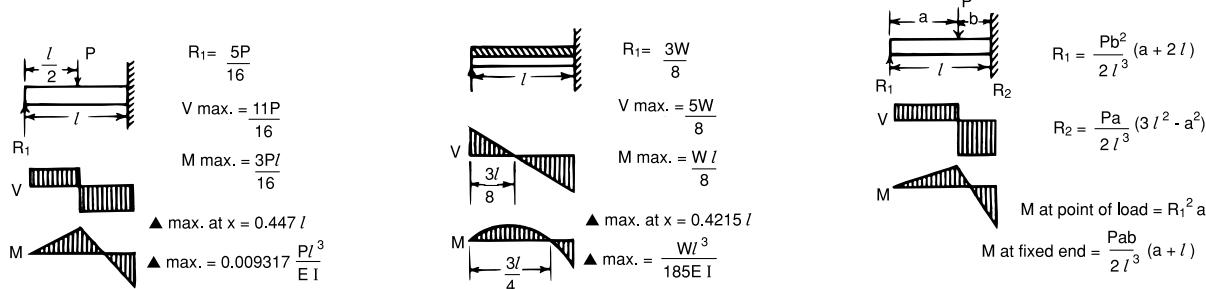

#### Cantilever beams

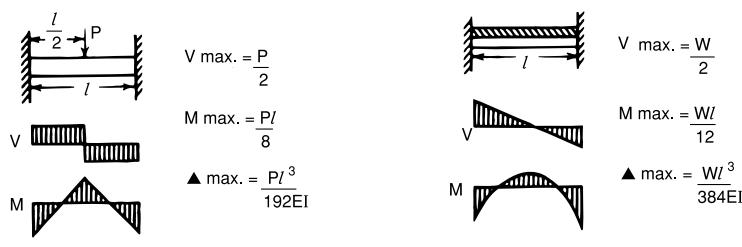

#### Simple beams

#### Beams fixed on one end, supported at other

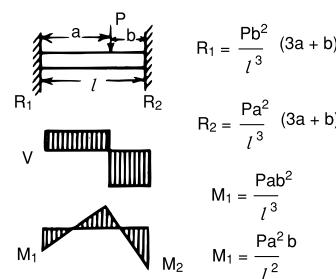

#### Beams fixed at both ends

R – Reaction  
M – Moment  
P – Concentrated load

W – Total uniform load  
V – Shear

▲ – Deflection  
E – Modulus of Elasticity  
I – Moment of Inertia

## Technical information

### Design applications (continued)

**Table 6 — Conversion factors for beams with various static loading conditions\***

Load and support condition		Load factor	Deflection factor
1 Simple beam - Uniform load		1.00	1.00
2 Simple beam - Concentrated load at center		0.50	1.25
3 Simple beam - Two equal concentrated loads at 1/4 points		1.00	1.10
4 Beam fixed at both ends - Uniform load		1.50	0.30
5 Beam fixed at both ends - Concentrated load at center		1.00	0.40
6 Cantilever beam - Uniform load		0.25	2.40
7 Cantilever beam - Concentrated load at end		0.12	3.20
8 Continuous beam - Two equal spans - Uniform load on one span		1.30	0.92
9 Continuous beam - Two equal spans - Uniform load on both ends		1.00	0.42
10 Continuous beam - Two equal spans - Concentrated load at center of one span		0.62	0.71
11 Continuous beam - two equal spans - Concentrated load at center of both spans		0.67	0.48

\* Load tables on pages 141–151 for A, B, C, E and H series channel are for single span beams supported at the ends.

These can be used in the majority of cases. There are times when it is necessary to know what happens with other loading and support conditions.

Some common arrangements are shown in Table 6. Simply multiply the loads from the Design Load Tables times the factors given in Table 6.

Examples shown on page 155

## Technical information

### Design applications (continued)

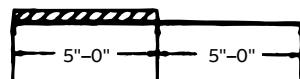

#### Example I

**Problem:**

Determine the load and deflection of an A-1200 beam continuous over one support and loaded uniformly on one span.

**Solution:**

- From load table 3 for A-1200 the load for a 5'0" span is 706 lbs. and deflection is .358".
- Multiply by factors from Table 6.  
Load = 706 lbs.  $\times$  1.30 = 917.8 lbs.  
Deflection = .358  $\times$  .92 = .329"

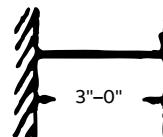

#### Example II

**Problem:**

Determine load and deflection of an E-1200 cantilever beam with a concentrated load on the end.

**Solution:**

- From load table 3 for E-1200 the load for a 3'0" span is 2216 lbs. and deflection is .088".
- Multiply by factors from Table 6.  
Load = 2216 lbs.  $\times$  .12 = 265.9 lbs.  
Deflection = .088  $\times$  3.20 = .282"

#### Column loading

The load bearing capacity of column or compression members is a function of the inherent configurational strength, the unbraced length and design of the end connections.

Values of axial column loading given in Table 3 were calculated using a rotationally free and translation fixed correction at each end (see illustration I). This gives an end condition constant (K) of 1.

If other end conditions are used, axial loading should be calculated using procedures in the AISI specification for the design of cold formed steel structural members (SG671) and the engineering values for Superstrut channel given in Table 1.

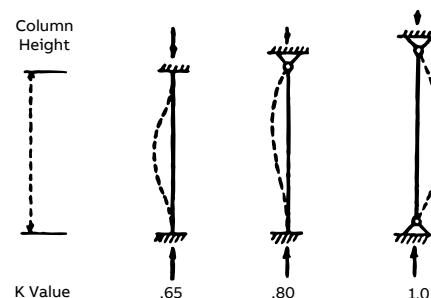

**End condition code**

Rotation fixed and translation fixed

Rotation free and translation fixed

Rotation fixed and translation free

### Design applications (continued)

—  
01 Typical general storage rack for use with plywood or other decking

- General storage racks
- Pallet racks
- Barrel racks
- Bulk furniture racks
- Cable racks
- Bar stock racks
- Display racks
- Special purpose racks
- For Uniform Loads on Horizontal Members, See Table 3 (pages 141–151)
