Company Profile

- Founded by George Tash in 1970, **GT Water Products Inc.** has grown to become recognized as an industry leader in providing patented, high quality, USA made products to the commercial, retail and wholesale trades.
- All of our products are manufactured and assembled in Southern California. Each product is factory tested using the most rigorous quality control standards.
- GT Water Products has continued to grow and thrive in spite of having many of our original designs copied offshore. This is a testament to the appeal of our highest quality, American made, top performing products.

Test Tee Mechanical Test Plugs - TTMP Series

SAFE-T-SEAL®

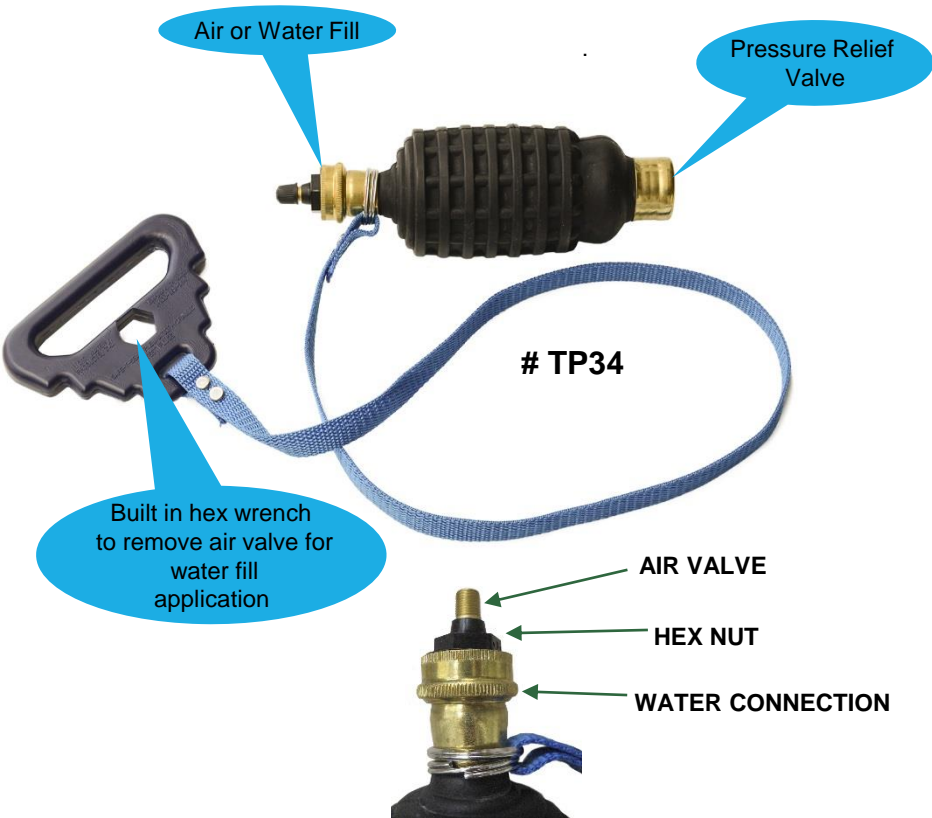

- Fits all pipe materials – Cast Iron, PVC DWV and ABS.
- Fits all pipe sizes – 2” through 10”
- Mechanical Operation – Safe, fast, dependable – No Plug Deflation!
- Durable Rubber Pads – Replaceable rubber pads – USA GoodYear rubber.
- 2-Stage Locking Pin – Locks plug into test position – Locks plug into drain position.

NO BACKSPLASH

Pneumatic / Hydraulic Test Plugs- TP Series

SAFE-T-SEAL[®]

- All Safe-T-Seal plugs fit multiple pipe sizes. Safe Time – Save Money.
- NEVER OVER-INFLATE. Patented built in pressure relief valve releases excess air while still holding pressure.
- Removable air valve allows user to fill the test pipe with water through the plug. AIR or WATER FILL.
- Built in 3/4" hex wrench to remove air valve for water fill application.
- Strong 3' pull strap keeps user safely away from the danger zone.

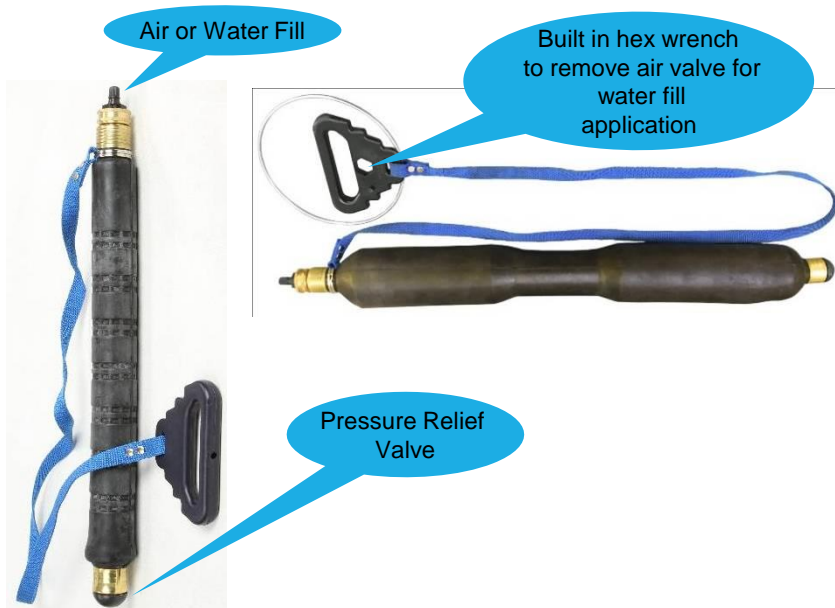

TP34

AIR VALVE

HEX NUT

WATER CONNECTION

Long Pneumatic / Hydraulic Test Plugs- LTP Series

Patented 2-Stage Deflation

When inflated the test plug fills both the access pipe and the drain line. When deflating the lower seal will deflate first, keeping the user dry!

SAFE-T-SEAL®

- All Safe-T-Seal plugs fit multiple pipe sizes. Safe Time – Save Money.
- NEVER OVER-INFLATE. Patented built in pressure relief valve releases excess air while still holding pressure.
- Removable air valve allows user to fill the test pipe with water through the plug. AIR or WATER FILL.
- Built in hex wrench to remove air valve for water fill application.
- Strong 4' pull strap keeps user safely away from the danger zone.
- All LTP plugs come with a 4' air hose.

Combination Cleanout & Test Plug

SAFE-T-SEAL®

- Easy to install
- Removable / Reusable
- No gluing
- No metal parts to rust
- Easily tightens with Crescent wrench
- Makes testing DWV systems sure, simple and economical

1-2-3

Funnel-Nose Low-Flush Toilet Plunger

MP1600

Patented Air Relief Slot
releases air through handle
preventing water overflow

Funnel nose enables
plunger to conform 90 degrees to
securely seal into low-flush
toilet designs.

MASTER PLUNGER™

- Powerful 8 cups of water displacement per plunge.
- Exclusively designed for low-volume 1.6 and 1.28 gallon toilets.
- Funnel Nose fits tightly into all toilets. Air slot prevents water overflow in high water level situations.
- Made in USA, using only the highest quality resins and blow molding techniques.
- Commercial grade quality.

Heavy Duty Surface Drain Plunger

MP200

Large bellows provides plenty of power to reach the deepest floor drain clogs.

Extra tight seal directs power where it is needed.

MASTER PLUNGER™

- Great for wide floor drains, deep sink clogs, urinals and drains with protruding spouts.
- Made in USA, using only the highest quality resins and blow molding techniques.
- Extra large bellows design with 10-cups of powerful water displacement. Reaches the deepest clogs!
- Commercial grade quality and performance.

GT Water Products

Surface Drain, Deep Sink Plunger

MM3

All the power of our large Surface Drain Plunger in a more compact design. Great for Deep Sinks!

Extra tight seal directs power where it is needed.

MASTER PLUNGER™

- Great for floor drains, deep sinks clogs, urinals and drains with protruding spouts.
- Made in USA, using only the highest quality resins and blow molding techniques.
- Bellows design with 6-cups of water displacement reaches those deep clogs.
- Commercial grade quality and performance.
