AGRICULTURE

# TRUST ISN'T GIVEN. IT'S EARNED.

Since 1966, ADS sales reps have earned their customers' trust through honest conversations — providing solutions, not excuses — and never forgetting the meaning of a handshake. We're proud to partner with contractors and farmers across the country to improve yields and keep business thriving.

# TOP TEN REASONS TO TILE

## 1. HIGHER YIELDS

Proper subsurface field drainage improves crop yields by 30% on average.

## 2. LONGER GROWING SEASONS

Accelerated drying creates warmer fields that allow for earlier planting and an environment where plants can thrive.

## 3. HEALTHIER ROOTS

Tiling lowers the water table enabling root systems to seek deeper moisture and create air and water channels resulting in better root growth and soil penetration.

## 4. SUPERIOR SOIL STRUCTURE

Adequately tilled land promotes soil health and creates porous soil that retains the necessary water for optimal growing.

## 5. REDUCES EROSION

Subsurface drainage enables the soil to hold more moisture, reducing run-off and soil erosion.

## 6. BETTER SOIL AERATION

Tiling creates aeration channels that allow more air and water to reach the plant's roots, crucial for healthy plant growth.

## 7. LOWER EQUIPMENT COSTS

Dryer land reduces the costly maintenance associated with using machinery in wet and muddy areas.

## 8. LOWER BREAK-EVEN PRICE

Without increasing inputs or costs, tilled land creates more bushels per acre and lowers the break-even price.

## 9. HIGHER LAND VALUE

Tiling adds value to the land, making subsurface drainage an excellent investment.

## 10. IMPROVED WEED CONTROL

Subsurface drainage creates healthier plants that are able to better withstand and resist weeds and diseases.

Over 50 years ago, ADS began manufacturing single wall pipe to replace traditional pipe materials in the agriculture market. ADS single wall pipe, made from high-density polyethylene (HDPE), allows farmers to get in the field earlier to plant, creates a longer growing season and extends the harvest season.

Farmers choose polyethylene for its ruggedness in various temperatures, easy installation, low cost and long service life. Since the late 1960s, ADS has continued to expand its product line to serve the agriculture market. The unmatched product selection includes:

- 3"-24" (75-600 mm) single wall pipe and fittings
- 4"-60" (100-1500 mm) dual wall pipe and fittings
- 12"-60" (300-1500 mm) high-performance polypropylene pipe
- Grain-Aire® mold-resistant pipe for grain aeration
- Nyloplast® Drainage Structures
- Foundation Drainage Products
- Water Control Structures
  - HP Lift Stations & Pumps
- Animal Guards
- Riser Intakes
- Geotextiles
- Flared End Sections

In addition, ADS can help those in the agriculture market with a number of drainage system tools:

- Water Flow Calculators
- Land Purchase Analysis™
- G.R.O.W. Analysis™

As time moves on and we continue to evolve our products to meet your needs, we are also making our information easier to access. Besides the ADS website, [www.ads-pipe.com](http://www.ads-pipe.com), where information on our agricultural products and services can be found, ADS now has an ag drainage resource app for your smart phone where all of the information can be found easily at any time.

# N-12<sup>®</sup> FLEX

The industry's most advanced, flexible dual-wall pipe solution

## N-12 FLEX from Advanced Drainage Systems

- Leads the industry with more than 17 years of installation performance
- Eliminates the need for an open trench, increasing safety and installation speed
- Requires less labor and equipment, decreasing overhead and operating costs
- Significantly increases quality and efficiency of high water table installations
- Provides higher flow rates and lower risk of obstruction

\*N-12<sup>®</sup> pipe is also available in fine slot. Lead time is required for fine slot orders. \*\*Limited geographic availability

# SPECIALTY PIPE PRODUCTS

## HIGH PERFORMANCE (POLYPROPYLENE) PIPE

### FEATURES:

- Short stick length options for ease of use
- Meets or exceeds ASTM F2881 and AASHTO M330
- Lightweight product to maximize delivery and installation efficiencies
- Offers up to 100% greater pipe stiffness over traditional plastic pipe

### BENEFITS:

- Allows for deeper burial depths
- Suitable for tough conditions or deep burials
- Greater pipe stiffness than HDPE
- Superior joint with extended bell
- Water-tight joints (if needed)

# GRAIN-AIRE PIPE

## FEATURES:

- Resistant to rust and corrosion
- 20' lengths for easy cutting and handling
- Offers more air flow than metal pipe
- Screen available on pipe or in rolls
- Layout and design offered by ADS

## BENEFITS:

- Keeps grain drier, longer
- Allows unrestricted air flow
- Prevents grain from entering pipe
- Our most cost-effective grain aeration system

## GRAIN-AIRE PIPE WITH SCREEN SLEEVE

	DESCRIPTION	PRODUCT CODE

# INSERTA TEE FITTINGS

SAVE TIME AND MONEY.

ADS offers Inserta Tee®, a high performance, easy-to-install service connection consisting of a PVC hub, rubber sleeve, and stainless-steel band. See how much time can be saved on the job site with this unique lateral connection solution.

## KEY BENEFITS OF INSERTA TEE®:

- 5-10x faster installation than traditional fabricated fittings
- Watertight and sturdy, allowing no soil infiltration; requires 100 lbs of pressure to get the fitting out once installed
- Versatile enough to be installed on all products (concrete, clay, plastic, etc.) and sizes. Available in 4-30" diameters
- Take up less space than fabricated fittings and come in multi-fit options so you can eliminate SKUs

# WATER CONTROL STRUCTURES

Inline Water Level Control Structures™ effectively manage the water table in your field, wetland, pond, and a variety of other applications by setting stoplogs within the structure to your desired water level height. Management allows for controlled release of outlet flow, retention of valuable nutrients, and effective flood mitigation.

## FEATURES:

- Constructed of rugged ½" PVC with lockable plastic lid
- Stainless steel screws and custom anodized aluminum corner extrusions used for strength and durability
- Rugged injection molded stoplogs in 5" and 7" heights for adjustability (included in structures with 4" through 12" pipe sizes)
- PVC stoplogs with metal hooks in 5" and 7" heights for adjustability (included in structures with 15" through 24" pipe sizes)
- Stoplogs must remain in track during structure installation
- Structures are intended for gravity flow; some seepage may occur

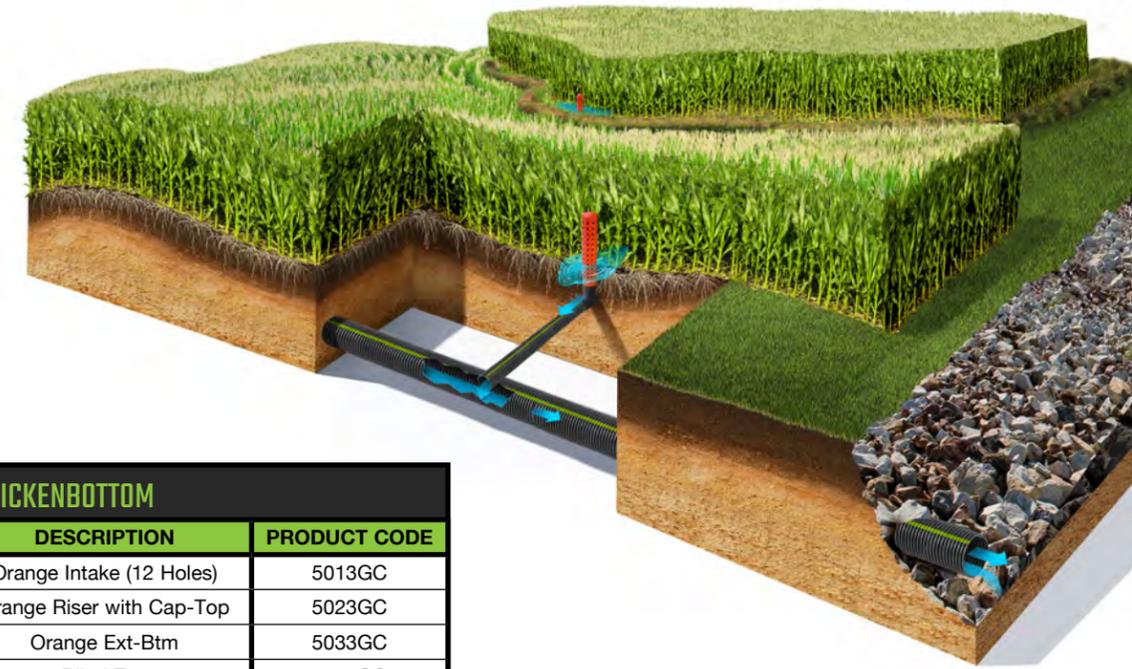

## BENEFITS:

- Increases yield by controlling root zone water availability
- Enables management of changing climate conditions
- Increases profitability of land with limited productivity
- Improves water quality and reduces nutrient run-off into waterways
- Applicable within various nutrient-reduction systems (saturated buffers, drainage water management, sub-irrigation, bioreactors, etc.)

# HP AGRICULTURAL LIFT STATIONS

## FEATURES:

- 1800 rpm means longer bearing motor lifetime and less vibration
- Unique impeller design creates optimal gallon per minute per watt performance
- Electronic panel is completely enclosed and is protected from harsh environmental conditions
- Remote Monitoring System is satellite-based and can be accessed via any web-enabled device
- Electrical schematic stickers on enclosure door shows electrical connections

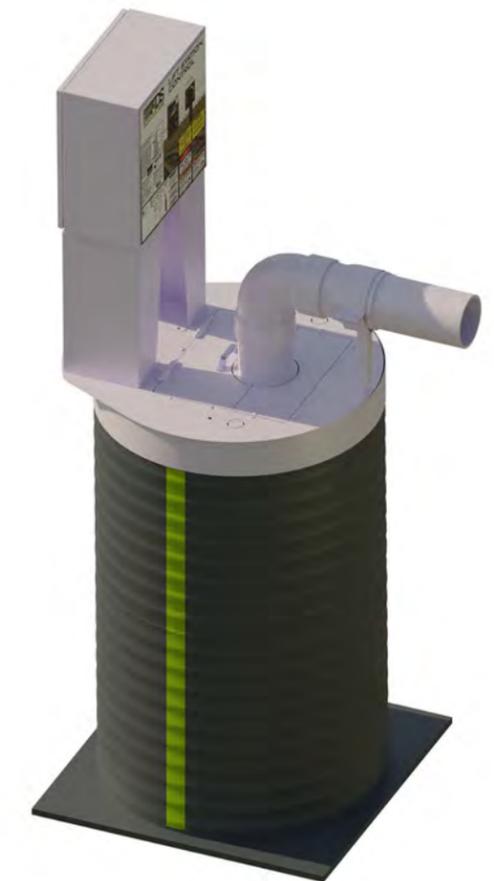

## BENEFITS:

- One system to manage water flow rate, field water table level & power consumption
- Reduces on/off cycles
- Cloud based data storage allows for historical comparisons
- Increases yield by controlling root zone water availability
- Factory-trained support available 24/7 from pump manufacturer

## EROSION CONTROL BLANKETS (ECB) – BIODEGRADABLE

W X L	SY/ROLL	PRODUCT CODE
7.5' x 120' (2.3 x 36.6m)	100 (84 m2)	OOS1TT
7.5' x 120' (2.3 x 36.6m)	100 (84 m2)	OOS2TT
7.5' x 120' (2.3 x 36.6m)	100 (84 m2)	OCS2TT
7.5' x 120' (2.3 x 36.6m)	100 (84 m2)	OOC2TT

## TURF REINFORCEMENT MAT (TRM) – PERMANENT

SIZE	SY/ROLL	PRODUCT CODE
7.5' x 120' (2.3 x 36.6 m)	100 (84 m2)	PP58GTR
7.5' x 120' (2.3 x 36.6 m)	100 (84 m2)	PP510GTR
7.5' x 120' (2.3 x 36.6 m)	100 (84 m2)	PP512GTR

## BIAXIAL GEOTRIDS

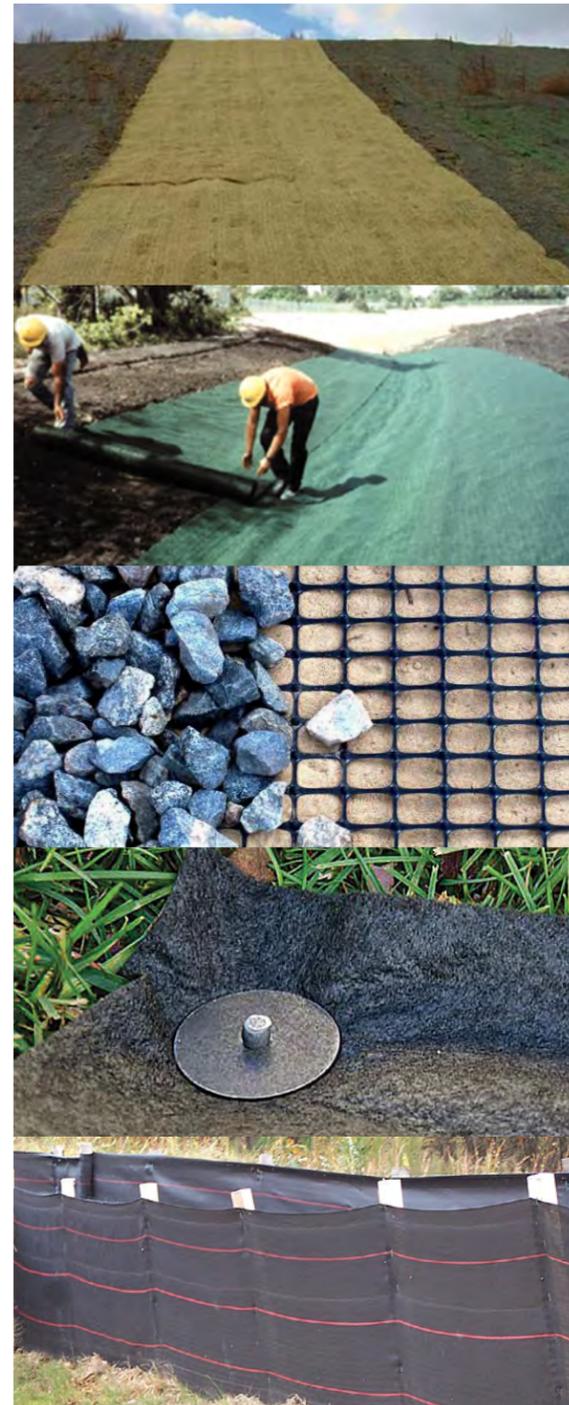

W X L	SY/ROLL	PRODUCT CODE
13.1' x 246' (4.0 x 75.0 m)	359 (300 m2)	BX114GG
13.1' x 164' (4.0 x 50.0 m)	239 (200m2)	BX124GG
13.1' x 164' (4.0 x 50.0 m)	239 (200m2)	BX134GG
13.1' x 164' (4.0 x 50.0 m)	239 (200m2)	BX154GG
13.1' x 246' (4.0 x 75.0 m)	359 (300 m2)	BX414GG

## FABRIC PINS

SIZE	QUANTITY	PRODUCT CODE
6" (50 mm) Staple	1000/box	3206TP
12" (300 mm) Pin	100/box	3212TP

## SILT FENCE

DESCRIPTION	PRODUCT CODE
2' x 100' (.6 x 30 m) rolls with 11 hardwood stakes per roll	3301WE
3' x 100' (.9 x 30 m) rolls with 11 hardwood stakes per roll	3302WE
Premium Silt Fence - AASHTO 3' x 100' (.9 x 30 m)	3302WP

# NATIONAL SPECIFICATIONS

## COMMON ASTM STANDARDS

Pipe Product	Specifications	Descriptions
Single Wall Pipe Standards	ASTM F667	Standard specifications for 3" to 24" (75 to 600 mm) corrugated polyethylene pipe and fittings for non-pressure conveyance of drainage water
	ASTM F477	Elastomeric Seals (Gaskets) for Joining Plastic Pipe Standard Specification
	ASTM D2321	Thermoplastic Pipe Underground Installation for Gravity-Flow Applications
Dual Wall Pipe Standards	ASTM F2306	12" to 60" (300 to 1500 mm) Annular Corrugated Profile-Wall Polyethylene Pipe and Fittings for Gravity-Flow Storm Sewer and Subsurface Drainage Applications
	ASTM D2321	Thermoplastic Pipe Underground Installation for Gravity-Flow Applications
	ASTM F477	Elastomeric Seals (Gaskets) for Joining Plastic Pipe Standard Specification
	ASTM D3212	Joints for Drain and Sewer Plastic Pipes using Flexible Elastomeric Seals (lab test)
Fittings Standards	ASTM F2306	12" to 60" (300 to 1500 mm) Annular Corrugated Profile-Wall Polyethylene Pipe and Fittings for Gravity-Flow Storm Sewer and Subsurface Drainage Applications
	ASTM D2321	Thermoplastic Pipe Underground Installation for Gravity-Flow Applications
	ASTM F477	Elastomeric Seals (Gaskets) for Joining Plastic Pipe Standard Specification
Polypropylene (PP) Pipe Standards	ASTM F2881	Material spec for 12" to 60" (300 to 1500 mm) dual wall polypropylene (PP) pipe with variable pipe stiffness for non-pressure storm sewer system applications
	ASTM F2764*	6" to 60" (750 to 1500 mm) polypropylene (PP) dual wall and triple wall pipe and fittings for non-pressure sanitary sewer applications*
	ASTM D3212	Joints for Drain and Sewer Plastic Pipes using Flexible Elastomeric Seals (lab test)
Geotextiles	ASTM D1117	Standard Guide for Evaluating Nonwoven Fabrics
	ASTM D4355	Standard Test Method for Deterioration of Geotextiles by Exposure to Light, Moisture and Heat
	ASTM D4491	Standard Test Method for Water Permeability of Geotextiles
	ASTM D4533	Standard Test Method for Trapezoid Tearing Strength of Geotextiles
	ASTM D4595	Standard Test Method for Tensile Properties of Geotextiles by the Wide-Width Strip Method
	ASTM D4632	Standard Test Method for Grab Breaking Load and Elongation of Geotextiles
	ASTM D4751	Standard Test Method for Determining Apparent Opening Size of a Geotextile
	ASTM D4833	Standard Test Method for Index Puncture Resistance of Geomembranes
	ASTM D5199	Standard Test Method for Measuring the Nominal Thickness of Geosynthetics
	ASTM D5261	Standard Test Method for Measuring Mass per Unit Area of Geotextiles
	ASTM D6241	Standard Test Method for Static Puncture Strength of Geotextiles
	ASTM D6475	Standard Test Method for Measuring Mass per Unit Area of Erosion Control Blankets
	ASTM D6525	Standard Test Method for Measuring Nominal Thickness of Rolled Erosion Control Products
	ASTM D6567	Standard Test Method for Measuring the Light Penetration of a Turf Reinforcement Mat
	ASTM D6637	Standard Test Method for Determining Tensile Properties of Geogrids
ASTM D6818	Standard Test Method for Ultimate Tensile Properties of Rolled Erosion Control Products
