

USA MADE CAPACITORS

AmRad products come backed by over 80 years of quality, reliability and durability. These USA made capacitors have a double-rolled cover which provides a leak-proof enclosure and are encapsulated in thick non-PCB dielectric fluid to reduce heat.

- Made in the USA
 - Manufactured in Palm Coast, Florida
- 370/440 V single and dual capacitance
- 5 Year Warranty
- Individually tested and labeled with exact MFD rating at completion of manufacturing
- Filled with a thick non-PCB dielectric fluid to reduce heat
- Rust free all brass terminals
- UL/CSA Recognized
- ROHS 3 compliant
- OEM approved
- HERM value capacitors come with CPT®

COMPRESSOR PROTECTOR TERMINAL

When a motor-run capacitor fails in a hard-start system, the hard-start keeps kicking on the compressor without the capacitor regulating. This will cause overheating and a shorter compressor lifespan.

Simple Install with ANY Hard-Start Kit

The **Compressor Protector Terminal (CPT®)** prevents this by acting as a kill switch to take the hard-start out of the system in the event of a failed capacitor.

Attach One of the Hard-Start Wires to the CPT®

Will now be manufactured on single and dual HERM value USA capacitors.

Although AmRad capacitors have an extremely low failure rate, the CPT® has been introduced to ensure American consumers are always protected.
