## SERIES WTA PRE-CHARGED TANKS

**Designed for Potable Well Water  
and Booster Pump Systems**

### **DESCRIPTION**

The Series WTA expansion tank is an ASME constructed precharged vessel. The WTA tanks will help protect the pump and pressure switches against short cycling. The well tank delivers adequate water under pressure between pump cycles to meet the required demand. It will provide economical system operation by minimizing pump starts, extending the life of the pump motor, and saving energy. The WTA tank will also assist the pump in meeting peak demand.

- Commercial applications
- Designed and built according to ASME Section VIII, Division 1 standards
- Minimize pump run times, extends life of pump
- Integrated bladder integrity monitor on all models
- FDA approved materials
- High maximum operating temperatures
- 125 PSI maximum working pressure
- Higher working pressures available
