# CASE STEEL ROSTER

Use this guide to identify the steel on your Case® Knife.

## STAINLESS STEEL (SS)

A high strength steel alloy with a high percentage of chromium that provides superior corrosion resistance compared to conventional steel. Blades blanked from this material hold an edge longer and have extraordinary blade strength. This type of steel requires minimal care and will resist rusting/tarnishing to a much greater extent than other steels. Stainless has been a manufacturing material at Case since 1916. Identified as the most common type of blade material used at Case, it is referred to as Tru-Sharp™ surgical steel.

## CHROME VANADIUM (CV)

A high carbon 1095 steel containing some Chromium for better hardening and Vanadium to aid in the bonding process. This steel type is known for holding an edge and ease of sharpening. It is important to note that CV steel is not corrosion resistant and is therefore prone to tarnish and rust when exposed to air and moisture. These blades must be kept clean with a thin film of lightweight oil to prevent rusting or discoloration, as well as to maintain the finish of the steel. CV blades will darken over time and develop a rich patina even when well cared for. This steel type was the original material used in Case knives over 135 years ago.

## CARBON STEEL (CS)

Our 1095 steel is part of a class of steels where carbon is the principal alloying element that gives the steel high tensile strength, wear resistance and toughness. Closely resembling our CV blades, our CS steel is also known for its edge retention and ease of re-sharpening while also being susceptible to tarnishing and rusting compared to stainless steel when exposed to air and moisture. A thin coat of oil or other suitable waterproof coating will preserve the steel's original appearance while providing you many years of dependable service.

## 154-CM

A high performance American-made stainless alloy known for its sharpness and edge holding ability. It is manufactured with very few impurities, combining three principle elements: Carbon, Chromium, and Molybdenum. Added levels of Carbon and Chromium enhance the steel's hardness and rust resistant qualities. Re-sharpening can require extra effort. Case began offering this steel type in 2008, appearing in custom maker collaborations and other specially selected knife projects.

## DAMASCUS (DAM)

The crafting of Damascus steel is a tradition that dates back to the Crusades and is named for the famous Syrian city where some of the first man-made metals were traded publicly. It is comprised of thin layers of metal that are heated together to form a laminated solid. Designs take shape as layers are folded in then welded together by forging. Over the years, Case has opted for both carbon and stainless steel Damascus blades for different knife projects. Various Damascus steel patterns used at Case have included: Random, Raindrop, Ladder, Snakeskin, and Tear Drop. Case began using Damascus steel in 1989.

## S35VN

A tough, wear-resistant chrome and vanadium-based steel. It is a second-generation refinement of S30V steel. Experienced knife makers report S35VN is easier to work with, due to the addition of Niobium to the steel chemistry. Once annealed, this S35VN responds well to CNC machining, making it an ideal choice for high-performance blade manufacturing. S35VN blades offer superior edge retention and resistance to chips and breakage. You'll find S35VN steel blades in our Modern EDC knives like the Marilla® and Kinzua® and in our Crossroads™ series like the XR Sod Buster® Jr and XR Barlow.

## NITRO-V

NITRO-V steel's fine carbide structure gives it toughness, superior stain resistance, and versatility in modern manufacturing environments. You'll find NITRO-V steel in one of the Chris Taylor modern fixed blades.

## CPM20CV

A premium powder metallurgy stainless tool steel which offers impressive performance, wear resistance and edge retention with added chromium levels for corrosion resistance. You'll find CPM20CV steel blades in our Longhouse® and Highbanks® models, part of our Bridgeline series.

# CASE TAXONOMY

## HERITAGE

Our traditional slipjoint knives, built to keep your hands sharp and get the job done. These are the styles of knives that have defined the Case brand for more than 135 years.

## PERFORMANCE

This category includes our modern EDC knives like the Kinzua® and the award-winning Marilla® flippers, the Longhouse® and Highbanks® knives from the Bridgeline series, and our all-new Crossroads™ XR Sod Buster® Jr and XR Barlow.

## SPORTING

A wide array of fixed and folding knives that are built for adventuring — everything from fishing and hunting knives to utility knives for general outdoor use — are included in this category.

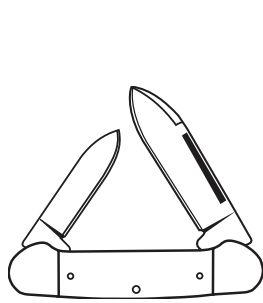

## SPECIALTY

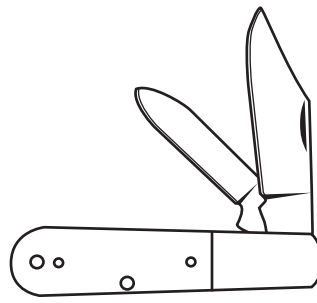

Knives from our household collection, limited editions and knives for special presentations can be found here.

# PATTERN GUIDE

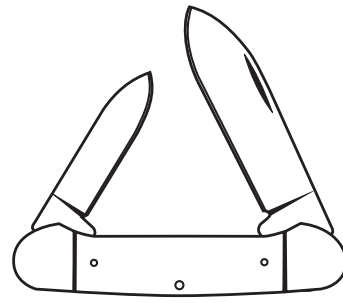

This handy guide provides visual representations of many of the popular traditional folding knives featured in this catalog, along with corresponding weight and measurement information.

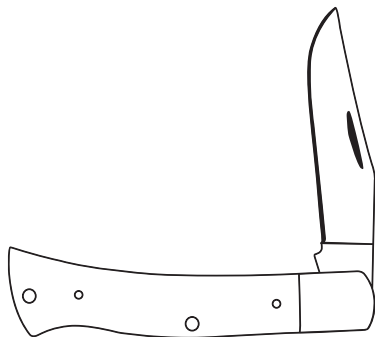

**BABY BUTTERBEAN** ('132)

**TRAPPER ('54)**  
4 1/8 in (10.5 cm) closed, 4.0 oz (113.4 g)

NEW PRODUCTS

NEW

## CASE AXE HANDLE®

Case Knives is proud to introduce an all-new slip joint pattern, the Case Axe Handle®. While Case is known for releasing fresh handle materials, colors, jigs, and shields, it's rare that we unveil a completely new pattern, making this launch truly more significant. Co-designed with award-winning custom knife maker Bill Ruple, the Axe Handle earns its name from its distinctive profile. With this new pattern comes a new pattern stamp: **BR'135**. "BR" honors Ruple's influence, "1" signifies our first in-line collaboration with him, and "35" celebrates his 35 years of custom knife craftsmanship. Fittingly, 135 is also the number of years Case had been in business when work on this knife began. Its 4-inch handle makes it an ideal medium-size carry that feels natural in the hand, and the variety of available materials, colors, and blade steels ensures there's a perfect Axe Handle for every user. Throughout this catalog, you'll find the first nine variants launching this year, with more to come.

Crafting a brand-new knife pattern in an American factory rooted in hand craftsmanship is no small task. But the team at Case knew this design was worth the effort. The Case Axe Handle® is sure to spark a collector following and become a favored EDC among slip joint fans. Don't wait, be among the first to carry a Case Axe Handle®.

# CHEETAH® CUB (‘1 ½L)

The Cheetah Cub returns from the Case XX® Vault in 2026, bringing back a pattern long admired for its compact profile and signature swing guard. First introduced in 2005 as a scaled-down version of the original Cheetah®, it trims the frame to 3 ½ inches for a size comparable to the Mini CopperLock®. Throughout 2026, the Cheetah Cub will be available in a wide range of handle options, but only for a limited time as part of the Vault program. Add one to your collection while you can, before it heads back into retirement.

# CROSSROADS™ XR BARLOW

Meet the XR Barlow, a bold evolution of a Case classic. The Crossroads™ Series re-imagines traditional Case patterns with modern materials and precision craftsmanship. The XR Barlow honors the iconic frame shape while introducing a durable, screwed-together design built for the future. With Richlite® handles and a G-10 liner and bolster, you won't have to sacrifice durability for a lightweight feel. Its premium S35VN steel blade delivers exceptional edge retention and rust resistance, making it ready for whatever comes your way. Proudly crafted in Bradford, PA, the XR Barlow carries the next generation of Case tradition in your pocket.

Knife measures 3.4 in (8.6 cm) closed, 1.3 oz (36.9 g).

# BLUE BONE

There's a reason we call some friends "true blue". That is because we know we can always count on them, no matter what. The same can be said about our Blue Bone knives. Time and again, their Tru-Sharp™ surgical steel blades get the job done and their classic blue handles look even better the longer you carry them.

# HIGHBANKS®

The Highbanks® is a design inspired by traditional patterns, with aluminum frames and bolsters for durability while minimizing weight. The Highbanks features a classic slip joint mechanism with a half stop and durable, luxury composite and wood handle materials like Micarta® and rosewood. The CPM20CV modified Wharncliffe blade has excellent edge retention with an open nail nick providing built-in access to open the blade. The steel deep carry pocket clip is essential for convenient carrying. Knife measures 4 in (10.2 cm) closed, 2.8 oz (79.4 g)

# CASE® ASTRONAUT KNIFE M-1

From its inception in 1958, the National Aeronautics and Space Administration (NASA) has been devoted to researching, educating and enhancing life here on earth.

In support of those ideals, NASA has tapped into American manufacturers to help pioneer custom-made tools for specific projects. In the early 1960's, NASA commissioned Case to create a specialized knife to their exact specifications that would ultimately be equipped on every U.S. manned Gemini and Apollo space flight mission.

Case proudly presents this reproduction of those originals, featuring a 11 ¾ inch taper ground, high carbon stainless steel machete blade with saw teeth along the spine and a smooth white synthetic handle.

## 12019 CASE® ASTRONAUT KNIFE M-1

Embellished Machete Blade Measures 11 ¾ in (29.8 cm)  
Knife measures 17 in (43.2 cm) overall, 10.8 oz (306.2 g)

# HOW TO IDENTIFY A CASE® KNIFE

The number stamped on the tang of one blade of every Case knife identifies the pattern. The first number is the handle material, the second number is the number of blades, and the rest is the factory pattern number. In the example below, 6318 is a #18 factory pattern knife with a jigged bone handle and three blades.

## HANDLE MATERIAL KEY

- 1 . . . . Solid Hardwoods
- 2 . . . . Smooth Black Synthetic or Thermoplastic Rubber
- 3 . . . . Smooth Yellow Synthetic
- 4 . . . . Smooth Synthetic (Various Colors)
- 5 . . . . Genuine Stag
- 6 . . . . Smooth/Jigged Bone (Various Colors), Jigged Synthetic (Various Colors) or Jigged Laminated Hardwood
- 6.5 . . . 6.5 BoneStag
- 7 or P . . Wood or Laminated Hardwood
- 8 . . . . Genuine Mother-of-Pearl, Abalone or Paua
- 9 . . . . Imitation Mother-of-Pearl or Corelon
- 10 . . . Micarta, G-10 or Kirinite®
- I . . . . Ivory, Imitation Ivory or Mammoth Ivory
- EX . . . Exotic Materials
- M . . . . Stainless Steel or Aluminum
- BH . . . Buffalo Horn

## AUTHENTIC CASE COLLECTIBLES

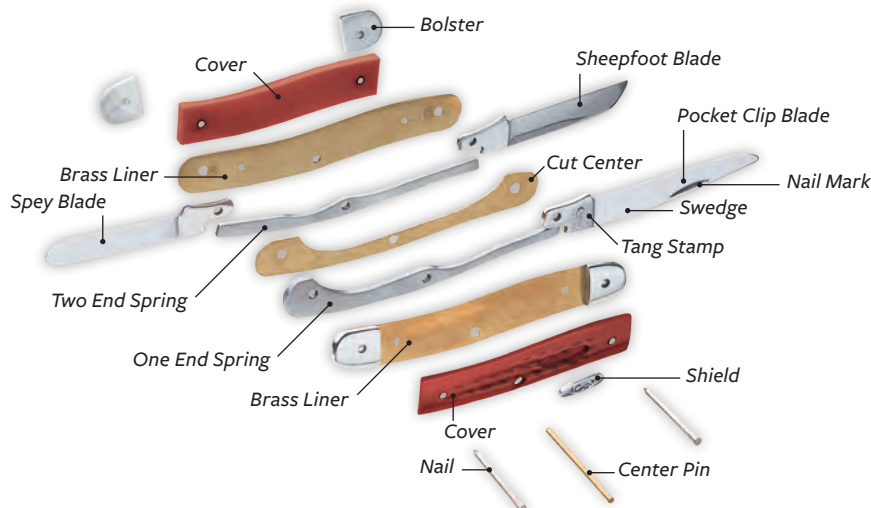

We put the Long Tail C serialization exclusively on collectable products manufactured and sold by Case.

This logo assures you the collectable item is authorized by Case.

# ANATOMY OF A CASE® KNIFE

Hand-crafting a Case knife is an exercise in skill, focus, and, most importantly, patience. Roughly 160 steps go into the creation of each knife, from the handle to the blade to everything in between. To us, the process is just as important as using the finest components in the world, like rich, natural handle materials, premium-quality steel, select brass and superior nickel silver.

# THE CASE TANG STAMP

It's been said that every Case knife tells a story. That story begins with the unique blade marking, or *tang stamp* applied to every Case knife, indicating its date of production. Case has used various tang stamps throughout its history, making it one of the world's most collected knife brands over time. We think you'll agree that now is the perfect time to add a new Case knife to your personal history.

## 2020 Case Tang Stamp

## 2026 Case Tang Stamp

## DETERMINE THE YEAR OF A CASE® KNIFE

In 1970, Case added ten dots beneath the U.S.A. on all knife tangs. Each year a dot was removed.

The same dating system was used during the 1980s. The differences are the “lightning” form of the letter S in Case and USA and the fact that the dots were put above the USA.

The dot system was used again from mid-1993 through 1999.

In 2000, Case introduced a new tang date stamp: five Xs and five dots. From 2000 through 2005, one dot was removed each year. From 2006 through 2009, an X was removed each year.

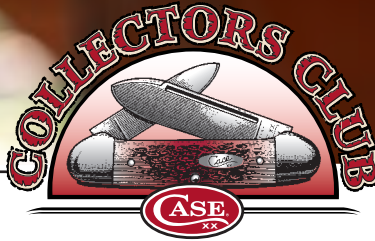

From 1990 to mid-1993, the actual date was stamped on the tang.

The 2010 Tang Stamp design again features five Xs and five dots. From 2010 through 2015, one dot was removed for each year. From 2016 through 2019, an X is removed each year.

## JOIN US TODAY!

Chartered in 1981, the Case Collectors Club® is the premier association for Case knife collectors and enthusiasts worldwide. Paid members receive a quarterly magazine and a host of exclusive benefits including event reminders, access to our online forum and limited production knife offerings. Join the thousands of others who keep the legacy of American craftsmanship alive for future generations.

To learn more, please call us at (888) 442-1932

## THE CASE LIMITED LIFETIME WARRANTY

We warrant each and every Case knife to be free of defects in material and workmanship for the life of the owner, and we will repair or replace with a new Case knife, at our option, any Case knife that is defective. That's how strongly we feel about the quality of our cutlery. If you believe your Case knife has a manufacturing defect, please complete our online form at [caseknives.com/repairform](http://caseknives.com/repairform) to obtain return authorization. Then follow the simple steps provided to send us your knife for service – or contact Case Consumer Relations at +1 (800) 523-6350 for specific instructions.

## CONSUMER AWARENESS STATEMENT

You expect Case to deliver high-quality, razor sharp knives, and in turn each Case blade is honed to an extremely sharp edge. We ask that you be very cautious when opening, closing, using, handling or sharpening our products in any way. Case® knives are tools used exclusively for cutting applications. They are not designed to be, nor should they EVER be used as an awl, chisel, pry-bar, punch, screwdriver or weapon. Use for any purpose other than cutting applications in a safe unharmed manner shall be deemed misuse. If an injury occurs during use (or misuse) of a Case knife, this is a risk that our customers assume, and Case cannot, in any way, be held accountable.

Due to the inherent properties of the materials we use and the manufacturing and coloring techniques that go into our knives, some items may not look exactly as depicted.

## REGULATIONS

Purchaser is responsible for understanding and following any applicable laws, regulations or ordinances relating to the transport, import, purchase, sale, use, or possession of these products. W.R. Case & Sons Cutlery Company reserves the right (but does not have the obligation) to remove from any orders any products that may be restricted for import, or to increase shipping costs to certain locations.
