

Single and Multi-Zone Systems Reference Guide

About Daikin:

Daikin Industries, Ltd. (DIL) is a global Fortune 1000 company which celebrated its 90th anniversary in May 2014. The company is recognized as one of the largest HVAC (Heating, Ventilation, Air Conditioning) manufacturers in the world. DIL is primarily engaged in developing indoor comfort products and refrigeration systems for residential, commercial and industrial applications. Its consistent success is derived, in part, from a focus on innovative, energy-efficient and premium quality indoor climate and comfort management solutions.

WARRANTIES

Single and Multi-Zone Systems [†]		SkyAir ^{††}
15 Series	19 Series, Daikin AURORA™, LV Series, Quaternity™, VISTA™, RMXS / MXS Series	All products
		

* Complete warranty details available from your local dealer or at www.daikincomfort.com. To receive the 10-Year Parts Limited Warranty or 12-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration and some of the additional requirements are not required in California or Quebec.

[†] If product installed in a commercial application, limited warranty period is 5 years

^{††} Limited warranty registration not required for residential or commercial installations.

Proper sizing and installation of equipment is critical to achieving optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet **ENERGY STAR**[®] criteria. Ask your contractor for details or visit www.energystar.gov

Not all models are **ENERGY STAR** certified. Refer to specification sheets for further details.

Additional Information:

Before purchasing this appliance, read important information about its estimated annual energy consumption, yearly operating cost, or energy efficiency rating that is available from your retailer.

ENERGY-INTELLIGENT™ TECHNOLOGY HEATING & COOLING SYSTEMS

SINGLE AND MULTI-ZONE SYSTEM BENEFITS

FEATURES	BENEFITS
INVERTER-DRIVEN COMPRESSORS	Energy savings* by using only the system capacity needed to heat or cool a space
TOTAL ZONE CONTROL	Cool and heat only rooms needing indoor comfort
INDIVIDUAL COMFORT	Personal comfort control in each room or zone
EASY INSTALLATION	Quick and easy installation, often within a day's work
YEAR-ROUND COMFORT	Heat in extreme climates, down to -13° F, without the need of supplemental heat (select models).
QUIET OPERATION	Operating sound levels as low as 22 dB(A) for undisturbed home comfort.

*Compared to 14 SEER Unitary System

INVERTER – THE OF THE DAIKIN SYSTEM

The inverter compressor is the heart of a Daikin system and maximizes energy savings* and provides absolute comfort while only providing the energy needed to heat or cool a space.

USING

LESS ENERGY CONSUMPTION*
WITH AN INVERTER COMPRESSOR
& FAN MOTOR TECHNOLOGY

WORKS BY CONTROLLING A
COMPRESSOR LIKE A THROTTLE
PEDAL CONTROLS A CAR ENGINE

ACHIEVING EFFICIENT PART LOAD PERFOR-
MANCE WITH AVERAGE **75%** OF
TOTAL OPERATING HOURS AT **LESS
THAN 70% OF FULL CAPACITY**

GENERATES THE SAME AMOUNT
OF HEAT OUTPUT AS ELECTRIC
BOOSTER HEAT WITHOUT THE
EXTRA ENERGY

LONGER COMPRESSOR LIFE WITH FEWER
STARTS AND LESS WEAR AND TEAR VS.
NON-INVERTER SYSTEMS

REFRIGERANT FLOW **DELIVERED**=
REFRIGERANT **REQUIRED** FOR SPACE

PRODUCT

Wall-Mounted

Single and Multi-Zone Models

15 Series | FTXN/FTKN | 9,000 - 24,000 BTU/h (Heat Pump or Cooling Only)

- 15 SEER | 8.2 HSPF
- Quiet operation as low as 19 dB(A)

19 Series | FTX/FTK | 9,000 - 24,000 BTU/h (Heat Pump or Cooling Only)

- Up to 19 SEER | 9.0 HSPF
- Quiet operation as low as 19 dB(A)
- Low ambient cooling down to -4°F*
- Low ambient heat operation down to -4°F**

Daikin AURORA™ Wall-Mounted | FTX | 9,000 - 15,000 BTU/h (Heat Pump)

- 20 SEER | Up to 12.5 HSPF
- Quiet operation as low as 19 dB(A)
- Low ambient cooling down to -4°F*
- Low ambient heat operation down to -13°F**

LV Series | FTXS | 9,000 - 36,000 BTU/h (Heat Pump)

- Up to 24.5 SEER | Up to 12.5 HSPF
- Intelligent Eye occupancy sensor
- Weekly timer for programmable comfort
- Low ambient heat operation down to 0°F*
- Low ambient cooling kit available

Quaternity™ | FTXG | 9,000 - 15,000 BTU/h (Heat Pump)

- Up to 26.1 SEER | Up to 11.0 HSPF
- Low ambient heating operation down to -4°F
- Dehumidifying to a preset relative setting
- Integrated air cleaner

SkyAir | FAQ | 18,000 - 36,000 BTU/h (Heat Pump or Cooling Only)

- Up to 18.6 SEER | Up to 8.7 HSPF
- Vertical auto-swing function
- Removable front panel for easy cleaning
- Washable filters

Daikin EMURA™ Wall-Mounted | CTXG | 9,000 - 22,500 BTU/h (Heat Pump)

NEW!

- Up to 18.9 SEER | Up to 12.5 HSPF
- Stylish silver or pure matte white finish
- 14 to 115°F for cooling and -13 to 75°F for heating
- Titanium apatite photo-catalytic air purification filter

NOTE: For multi-zone combinations only

* with optional Air Adjustment Grille

** with optional drain pan heater as applicable

Ceiling-Mount and Floor-Standing

Single and Multi-Zone Models

Daikin VISTA™ Ceiling Cassette | **FFQ** | 9,000 – 18,000 BTU/h (Heat Pump)

NEW!

- Up to 20.9 SEER | Up to 10.3 HSPF
- 2x2 for seamless integration into ceiling tiles
- 2, 3 or 4-way airflow pattern
- Built-in condensate pump (up to 22")
- Fresh air intake knockout
- Presence and floor sensor (optional)

SkyAir Round Flow Cassette | **FCQ** | 18,000 – 42,000 BTU/h

(Heat Pump or Cooling Only)

- Up to 18.6 SEER | Up to 10.3 HSPF
- 23 configurable airflow patterns ensure ideal airflow distribution
- 360° airflow reduces draft
- Stain-resistant decoration panel allows for easy cleaning

SkyAir Ceiling-Suspended | **FHQ** | 18,000 – 42,000 BTU/h

(Heat Pump or Cooling Only)

- Up to 18.0 SEER | Up to 11.1 HSPF
- Auto-swing capability with 100° airflow pattern for comfortable distribution
- Lateral servicing space allows installation in corners, narrow spaces, walls, and ceilings
- Innovative stream fan technology

Daikin AURORA™ Floor-Mounted | **FVXS** | 9,000 – 15,000 BTU/h

(Heat Pump)

- Up to 20.0 SEER | Up to 11.7 HSPF
- Advanced Filtration – Long life, washable filters.
- Enhanced Capacity – Up to 100% Heating Capacity at 5°F (-15°C) and operate efficiently as low as -13°F ambient temperature.
- Up to 100% Cooling Capacity at 104°F (40°C).

INSTALLATION TIPS

SPECIFICATIONS
& ACCESSORIES

DESIGN

Ducted Models

LOW-STATIC (< 0.2) MODELS | FDXS / CDXS | 9,000 – 24,000 BTU/h

(Heat Pump)

- Up to 15.5 SEER | Up to 10.4 HSPF
- Static capability up to 0.16" W.G.
- Compact design (7-7/8" in height)
- Rear or bottom return
- CDXS models compatible with multi-split outdoor models only
- Match with single zone RXS outdoor models or multi-zone MXS outdoor models

SKYAIR HIGH-STATIC (< 0.8) MODELS | FBQ | 18,000 – 42,000 BTU/h

(Heat Pump or Cooling Only)

- Up to 17.5 SEER | Up to 10.6 HSPF
- Medium external static pressure (ESP) capabilities up to 0.8" W.G.
- Three user selected fan speeds available plus fan "Auto" logic
- Built-in condensate pump
- Bottom access for easy service
- Match with RZQ Heat Pump or RZR cooling-only outdoor models

SKYAIR MEDIUM-STATIC (< 0.5) MODELS | FTQ SERIES | 18,000 – 42,000 BTU/h

(Heat Pump)

- Up to 20.0 SEER | Up to 12.0 HSPF
- Low ambient heat operation down to -4°F
- Upflow or horizontal right configurations
- Field-installed electric heat options available from 3 kW to 15 kW
- Match with RZQ Heat Pump Models

Outdoor Units

SINGLE-ZONE MODELS

RK, RKN (Cooling Only)

RX, RXN, RXS, RXG (Heat Pump)

9,000 – 24,000 BTU/h

- Up to 26.1 SEER
- Slim, compact design
- Pre-charged for 33 ft. of refrigerant piping
- For rooms up to 1,600 SF

RZQ (Heat Pump) **RZR** (Cooling Only)

RXS (Heat Pump)

18,000 – 42,000 BTU/h

- Up to 20.0 SEER
- Choose from 6 indoor ducted and non-ducted indoor model types
- Up to 230 ft. total piping length
- Operation down to 0°F (-40°F with optional low ambient cooling kit on select models)
- User-friendly, intelligent controls

MULTI-ZONE MODELS

MXL, MXS, RMXS (Heat Pump)

18,000 – 48,000 BTU/h

- Up to 19.5 SEER and up to 12.5 HSPF
- Mix and match indoor unit flexibility
- Up to 130% connection ratio
- Long piping lengths up to 433 ft. total
- Connect 2-8 indoor units to one outdoor unit

**RMXS48LVJU requires at least one branch port unit.
Refer to Engineering Guide for details.*

Controls

Daikin ENVi Wired Thermostat

Intelligent comfort control anytime, anywhere

The Daikin ENVi Intelligent Thermostat is an intelligent, user-friendly residential control that gives the homeowner full access to comfort control at home or away from home. With supported Wi-Fi connectivity, homeowners can monitor and control their Daikin systems via their PCs, tablets, or smart phones through the User Web Portal or Daikin ENVi apps. The apps work with Apple, Android, and Blackberry devices.

www.DaikinENVi.com

Easy-to-use

User-friendly interface makes it easy to set up your personalized program, adjust your settings, and make adjustments anytime, anywhere.

Energy Friendly

Save money on your utility bills and reduce energy consumption (as compared to non-scheduled systems) with a weekly schedule.

Value

Access your own personal and secure web page to manage all aspects of your thermostat at no cost to you.

Intelligent

Receive automatic alerts and reminders for service due dates, filter changes, and more.

For details, contractor benefits, and access to the Daikin ENVi Contractor Portal, refer to Page 29 or visit

www.ecobee.com/contractors

DACA-TS1-1

Features Include:

- Wi-Fi enabled for access anywhere via smart phone, tablet, or computer
- Weekly schedule
- Live weather forecasts
- Automated alerts and reminders
- Cool, heat, and auto modes with dual set point control
- Setback control
- Room temperature and relative humidity display

Note: A separate adaptor may be required. Refer to engineering guides.
Not available with all products.

Infrared Remote Controller

Comfort control at your fingertips

Want to make your room comfortable at the touch of a single button? No problem. Wall-mounted and slim-ducted units come with a user-friendly remote control featuring a minimalistic, modern design in a matte crystal-white finish that forms a perfect match with the indoor unit.

CONTROLLER FEATURES INCLUDE:

- **FAN:** Fan speed adjustment
- **POWERFUL:** System boost for 20 minutes in current operating mode
- **MODE:** HEAT, COOL, AUTO, DRY
- **TEMP:** Setpoint adjustment
- **COMFORT*:** Adjusts louver position based on mode
- **SENSOR*:** Intelligent Eye occupancy sensor
- **SWING*:** Automatic vertical and horizontal auto-swing
- **WEEKLY*:** 7-day programmable schedule
- **TIMER:** Timer and clock adjustment

**Available on Select Systems*

SELLING & INSTALLATION TIPS

Recommended Installation Tools

Make sure to use installation tools that are exclusively used for R-410A installations to withstand the pressure and to prevent foreign materials from mixing into the system.

- ☐ Tool Kit : DACA-99STK-1
- ☐ 1/4"- 5/8" Torque Wrench *
- ☐ Adjustable Wrenches
- ☐ Charge Hose
- ☐ Deburring Tool *
- ☐ Flare Gauge Set *
- ☐ Flaring Block *
- ☐ Gauge Manifold
- ☐ Nitrogen
- ☐ Phillips Screwdriver
- ☐ Tubing Cutter *
- ☐ Vacuum Pump
- ☐ Micron Gauge

(* included in kit)

Single and Multi-Zone Selling Tips

Look for opportunities to sell Daikin single and multi-zone systems on EVERY call.

1. Discover homeowner problems and needs.

Ask questions and have customers fill out a comfort survey prior to or during the visit.

- ☐ Lifestyle – age of home, family members in home, kids, aging parents, main living areas (bedroom, living room), remodeling, etc.
- ☐ Comfort – airflow issues, hot or cold rooms, noise issues, air quality, etc.
- ☐ Energy – average energy bills, expected utility trends, energy improvements to home, etc.

2. Look for additional comfort and energy saving opportunities throughout the home.

- ☐ Areas with heavy or low sunlight
- ☐ Empty rooms
- ☐ Space heaters or portable air conditioners
- ☐ Air filtration devices
- ☐ Sun rooms, porches, basements, attics, additions

3. Introduce Daikin single and multi-zone systems features and benefits.

- ☐ Next generation heating and cooling
- ☐ Single and multi-zone systems and ducted system options for individual rooms or entire homes
- ☐ Energy efficiency
- ☐ Heat and cool only the rooms you use
- ☐ Individual room comfort control
- ☐ Long-life, washable filters
- ☐ Quick and easy installation
- ☐ High quality, reliable products with outstanding limited warranties*

4. Introduce the benefits of the Daikin Comfort Control App or Daikin ENVi Intelligent Thermostats.

- ☐ Control remotely from anywhere using PC, smart phone or tablet
- ☐ Traditional thermostat functionality
- ☐ Bright, backlit display (ENVi)
- ☐ View room temperature, relative humidity, outdoor temperature and weather forecast (ENVi)
- ☐ Fault notifications (ENVi)

5. Include Daikin single and multi-zone system options with your proposal and differentiate from the competition.

- ☐ Go beyond traditional single and multi-zone systems and offer more comfort choices
- ☐ Recommend an option that includes a Daikin system
- ☐ Provide your customers with superior comfort, control and efficiency

* Complete warranty details available from your Daikin distributor or at www.daikincomfort.com and www.daikinac.com

Single and Multi-Zone System Installation Best Practices

Outdoor Unit (Compressor)

- Locate the outdoor unit on a stable level surface solid enough to bear the weight and potential vibration of the unit.
- Use adjustment risers to place the unit off the ground to minimize debris and snow buildup and improve drainage. Do not place anything under the unit which must be kept away from moisture.
- Secure outdoor units to pads, risers and/or surface using bolts and/or adhesives.

Condensate Drain

- Install with a downhill slope. Drain may be routed with line set and run to a proper termination point so long as it is away from crawl spaces and walkways.

Refrigerant Charge

- Ensure the system has the proper refrigerant charge. Many installations may not require adjustments.
- Gauges to verify refrigerant levels are only needed when adjustments are necessary. A scale must be used to ensure a proper charge when adding or removing refrigerant.

Properly installed Daikin systems can provide:

- Reduced callbacks and improved profitability
- Valuable energy savings for your customers*
- Improved customer satisfaction
- Increased referrals and future sales

*Compared to 14 SEER Unitary System

Attend a Daikin University course for more information.
Register online at www.DaikinUniversity.com

Line Set Insulation and Protection

- Cover the entire line set length with insulation to avoid condensation. Refer to installation manual for proper insulation dimensions.
- Use separate thermal insulation pipes for gas and liquid refrigerant pipes.
- Use line cover to protect the outdoor portion of the insulated line set to avoid premature insulation damage.
- Add UV tape as needed on areas without line cover to ensure protection of the entire line set length.

Cold Climate Efficiency and Installation Tips

Indoors

- Furnaces or Zonal Electric Heat – Set back at the thermostat or shut off at the breaker for furnace or zonal heat so that it does not compete with the Daikin system.
- Temperature Set Back – Set programmable thermostat to HEAT with the fan in ON position for air distribution and set the temperature 4° F below the Daikin system.

Outdoors

- Increase clearance under the outdoor unit to promote easy drainage and reduce snow and ice buildup.
- Consider wall-mount brackets to increase outdoor unit clearance.
- Use a pan heater to avoid defrost discharge freezing inside the condenser in extreme climates.

Homeowner Education

- Use Daikin systems as the primary heating and cooling system to increase comfort and efficiency. Secondary heating and cooling systems can remain off until needed as a supplement.
- Regular washing and cleaning of the filters can maintain performance and efficiency of Daikin single and multi-zone systems.
- Familiarize customers with all features provided on the Remote functionality, please see the Controller Quick User Guides:
 - BRC944B2 Controller Quick User Guide
 - ARC447A3 Quaternity™ Controller Quick User Guide

CONTINUED ON NEXT PAGE

- Introduce the features of the Daikin Comfort Control App or Daikin ENVi Intelligent Thermostats.
 - Wi-Fi set-up
 - Smart phone and tablet control
 - System control and scheduling
 - Outside temperature, humidity and weather forecasts
- Explain temperature control from remote controller, set temperature setpoints that provide the desired comfort level for heat and cool operations.
- Select and set the priority zone setting (Multi-Zone).

Recommended Single and Multi-Zone System Maintenance Performed by an HVAC Technician

- Check and clean air filters
- Wash outdoor coil on a regular bi-annual (twice a year) schedule
- Wash out float reservoir for condensate pumps (spring or fall)
- Check and replace hand-held Remote Controller batteries annually
- Check all electrical connections
- Check flare connections for oil (presence of oil can indicate a refrigerant leak)
- Clean debris (leaves – grass – dirt) from base pan of outdoor unit to ensure condensate drainage in heating season

Daikin ENVi Contractor Portal

Build and grow your customer relationship and business

The ENVi provides you with a Contractor Portal which allows you to enhance your relationship with your customers and grow your business.

Benefits

The Contractor Portal offers a variety of ways to maintain your relationship with your customers such as:

- Uploading your business information and logo so that it appears on your customers' alerts and reminders.
- Sending branded Service Reminders to your customers based upon your preferred service schedule.
- Viewing the make and model of your Daikin HVAC equipment right from your portal.
- Accessing your customers' HVAC Reports for remote trouble-shooting and diagnostics.
- Communicating specials and promotions to your customers and increase your web traffic by adding the Daikin ENVi login portal to your company's web page.

The Preferred Contractor Program is administered by Ecobee

Become A Preferred Contractor

To gain access to the Contractor Portal and be listed as a preferred contractor, you must fill out an application form at:

<https://www.ecobee.com/contractors/account/>

Once approved, you will receive an e-mail confirmation in which you will then be able to access the portal. From there, you are on your way to helping enhance your business and the relationship with your customers.

To be listed as a Preferred Contractor, contractors must have three or more ENVi Thermostats registered to the portal. End users will then be able to see your company on the preferred contractor list from the User Web Portal.

The screenshot shows a web page titled "Create a Contractor Account". It includes a "Thanks for your interest in ecobee!" message, a paragraph about filling out an application form, and a section titled "Want to take your business to the next level? Become an ecobee Preferred Contractor". This section features a photo of a technician working on a thermostat and two paragraphs of text explaining the benefits and requirements of the Preferred Contractor program. The bottom of the page has a blue banner that says "Application Form".

Create a Contractor Account

Thanks for your interest in ecobee!

Fill out the application form below to request an ecobee Contractor Account. By creating an account you will have access to your own Contractor Portal. Once one of our Regional Sales Representatives has approved your request, you will receive an email to complete the account creation process and set your password.

Want to take your business to the next level? Become an ecobee Preferred Contractor

ecobee Preferred Contractors get listed on the ecobee website under Where to Buy. Once you have at least 3 thermostats registered to your Contractor Portal you will be eligible for listing on our website.

Note that all Preferred Contractors are required to respond to ecobee requests through our online Request a Quote system within 72 hours in order to remain in good standing as a Preferred Contractor.

Application Form

Please note that confirmations may take up to 24 hours from the time of registration submission.

The Preferred Contractor Program is administered by Ecobee.

Daikin eQuip

Enhance the way you do business with Daikin eQuip, Daikin's FREE mobile app that gives you single and multi-zone system support at your fingertips.

Daikin eQuip is designed for both smart phones and tablets, and places information in your hands quickly and easily for all of your on-the-go needs. Use this app to:

- Search for information related to Daikin and any of our products, to download your most often referenced documents for quick and easy future access.
- Search, share, and send information via email or text message (SMS) for immediate sharing.
- Receive instant updates (Wi-Fi or Cellular service required) for the most up to date news and information on Daikin.

Multi-Zone Combination Table

Install the indoor unit according to the table below, which shows the relationship between the class of indoor unit and the corresponding port.

The total indoor unit class that can be connected to this unit:

2MXL18* – Up to 24,000 Btu/h

2MXS18* – Up to 24,000 Btu/h

3MXL24* – Up to 39,000 Btu/h

3MXS24* – Up to 39,000 Btu/h

4MXS36* – Up to 48,000 Btu/h

The line set piping size is determined by the size of the indoor unit fittings. Reducers are used at the outdoor unit to accommodate the correct gas line pipe size.

Port	2MX*18*	3MX*24*	4MXS36*
A	07, 09, 12	07, 09, 12	07, 09, 12
B	# # # 07 09 12 15	# # # 07 09 12 15 18	# # # 07 09 12 15 18

DESIGN

⚠ WARNING – HIGH VOLTAGE

DISCONNECT ALL power BEFORE SERVICING. MULTIPLE power SOURCES MAY BE PRESENT. FAILURE TO DO SO MAY CAUSE PROPERTY DAMAGE, PERSONAL INJURY OR DEATH.

Single-Zone Split Systems (RK, RX, RKN, RXN, RXL, RXS, RXG)

Wiring Procedure

Do not turn on the safety breaker until all work is completed.

1. Strip the insulation from the wire ($\frac{3}{4}$ " (20mm)).
2. Connect the connection wires between the indoor and outdoor units so that the terminal numbers match. Tighten the terminal screws securely. We recommend a flathead screwdriver be used.

For stranded wires, make sure to install the round crimp-style terminals on the tip.

Place the round crimp-style terminals on the wires up to the covered part and secure.

When connecting the connection wires to the terminal block using a single core wire, be sure to perform curling. Problems with the work may cause heat and fires.

Stripping wire at terminal block: ○ Correct X Wrong

⚠ WARNING – High Voltage

DISCONNECT ALL POWER BEFORE SERVICING. MULTIPLE POWER SOURCES MAY BE PRESENT. FAILURE TO DO SO MAY CAUSE PROPERTY DAMAGE, PERSONAL INJURY OR DEATH.

Multi-Zone Split Systems (2MXL, 2MXS, 3MXL, 3MXS, 4MXS)

Wiring Procedure

1. Strip the insulation from the wire ($\frac{3}{4}$ inch) (20mm).
2. Connect the connection wires between the indoor and outdoor units **so that the terminal numbers match**. Tighten the terminal screws securely. We recommend a flathead screwdriver be used to tighten the screws.
3. **Be sure to match the symbols for wiring and piping.**
4. Pull the wire lightly to make sure that it does not disconnect.
5. Pass the wiring through the cutout on the bottom of the protection plate.
6. After completing the work, reattach the service lid to its original position.

In case using stranded wires is unavoidable, make sure to install the round crimp-style terminals on the tip.

Place the round crimp-style terminals on the wires up to the covered part and secure.

Round crimp-style terminal

Perform curling when using a single core wire.

○ Correct X Wrong
Stripping wire at terminal block

⚠ WARNING – HIGH VOLTAGE

DISCONNECT ALL power BEFORE SERVICING. MULTIPLE POWER SOURCES MAY BE PRESENT.
FAILURE TO DO SO MAY CAUSE PROPERTY DAMAGE, PERSONAL INJURY OR DEATH.

8-Zone Multi-Split System (RMXS)

The outdoor unit and BP units operate from separate 208/230V single-phase power supplies. Indoor units are powered from the BP unit and wired as Daikin's current 4-wire single split systems reducing the wiring size and easing installation.

Power Supply Wiring

Transmission Wiring

Refer to the installation manual for more detailed instructions.

⚠ WARNING – HIGH VOLTAGE

DISCONNECT ALL power BEFORE SERVICING. MULTIPLE power SOURCES MAY BE PRESENT.
FAILURE TO DO SO MAY CAUSE PROPERTY DAMAGE, PERSONAL INJURY OR DEATH.

SkyAir RZQ, RZR Systems

Complete System Example

* Refer to each system Installation Manual for detailed wiring instructions.

Piping Lengths

DESIGN

System Layout

8-Zone Multi

BP Unit model

For 3 rooms: BPMKS049A3U

For 2 rooms: BPMKS048A2U

8-Zone Multi

PIPING REQUIREMENTS			
Maximum allowable length	Between outdoor and BP units	Total piping length	Pipe length between outdoor and BP units $\leq$ 180 ft.
	Between BP and IU	Total piping length	Piping length between BP and indoor units: 262 ft.
	Between BP and IU	1 room length	Piping length between BP and indoor unit $\leq$ 49 ft.
Allowable height	Between outdoor and IU	Difference in height	Difference in height between outdoor and indoor units $\leq$ 98 ft.
	Between outdoor and BP units	Difference in height	Difference in height between outdoor and indoor units $\leq$ 98 ft.
	Between BP and BP units	Difference in height	Difference in height between BP and BP units $\leq$ 49 ft.
	Between IU and IU	Difference in height	Difference in height between indoor and indoor units $\leq$ 49 ft.
Minimum allowable length			Pipe length between outdoor unit and first refrigerant branch kit (REFNET joint) $\geq$ 16.4 ft.
Allowable length after the branch			Less than 131 ft from first refrigerant branch kit (REFNET joint) to indoor unit
Refrigerant branch kit selection refrigerant branch kits can only be used with R410A			Refrigerant branch kit (REFNET joint) name: KHRP26A22T
Pipe size selection Outer diameter (gas x liquid)			Between outdoor unit and first refrigerant branch kit: 3/4 x 3/8
			Total connected indoor capacity $>$ 17000 BTU: 5/8 x 3/8
How to calculate the additional refrigerant to be charged: Additional refrigerant to be charged R (lb. /kg). R should be rounded off in units of 0.1 lb. (0.1kg).			(Total length (ft. / m) of liquid piping size at 3/8 inch) x 0.036 lb./ft + (Total length (ft. / m) of liquid piping size at 1/4 inch) x 0.015 lb./ft

Low Ambient Cooling Operation

⚠ WARNING – HIGH VOLTAGE

DISCONNECT ALL POWER BEFORE SERVICING. MULTIPLE POWER SOURCES MAY BE PRESENT. FAILURE TO DO SO MAY CAUSE PROPERTY DAMAGE, PERSONAL INJURY OR DEATH.

RK09-24 NMVJU, RX09-24 NMVJU, RXL09-15QMVJU

Cutting jumper 6 (J6) on the circuit board will expand the operation range down to 5°F (–15° CDB). However it will stop if the outdoor temperature drops below –4°F (–20°C) and start back up once the temperature rises again.

RXS09, 12LVJU

Cutting jumper 4 (J4) on the circuit board will expand the operation range down to 14°F (–10°C). However it will stop if the outdoor temperature drops below –0.4°F (–18°C) and start back up once the temperature rises again.

Low Ambient Cooling Operation

⚠ WARNING – HIGH VOLTAGE

DISCONNECT ALL power BEFORE SERVICING. MULTIPLE POWER SOURCES MAY BE PRESENT. FAILURE TO DO SO MAY CAUSE PROPERTY DAMAGE, PERSONAL INJURY OR DEATH.

RXS15, 18LVJU

Cutting jumper 6 (J6) on the circuit board will expand the operation range down to 14°F (–10°C). However it will stop if the outdoor temperature drops below –0.4°F (–18°C) and start back up once the temperature rises again.

RXS24, 30, 36LVJU

You can expand the operation range to 14°F (–10°C) by turning on switch B (SW4) on the PCB. If the outdoor temperature falls to –0.4°F (–18°C) or lower, the operation will stop. If the outdoor temperature rises, the operation will start again.

Ultra-Low Ambient Operation

⚠ WARNING – HIGH VOLTAGE

DISCONNECT ALL POWER BEFORE SERVICING. MULTIPLE POWER SOURCES MAY BE PRESENT.
FAILURE TO DO SO MAY CAUSE PROPERTY DAMAGE, PERSONAL INJURY OR DEATH.

For RKS30, 36LVJU Systems (P/N 2F018535-1 (RKS30) and 2F018535-2 (RKS36))

Installation of the Ultra Low Ambient Kit extends cooling operation down to – 40 °FDB. Refer to Installation Manual for full illustrative, step-by-step instructions.

1. Remove the top plate, right side plate, and front plates.
2. Turn on the facility setting switch by turning on Switch B (SW4) on the printed circuit board.
3. Attach the crank case heater to the compressor.
4. Attach the vinyl tube to the crank case heater.
5. Remove the electrical box and printed circuit board.
6. Attach the code heater.
7. Replace the printed circuit board.
8. Connect the wire harness to each heater's harness.
9. Affix the identification label and electrical wiring diagram label to the right side of the plate.
10. Reattach the top plate, right side plate, and front plates.
11. Check whether the unit is properly operating by conducting the forced cooling operation.

	INDOOR		OUTDOOR		
	EWB	EDB	-40 (°FDB)		
	°F	°F	TC	SHC	PI
30 MBH	57.2	68.0	21.70	16.92	0.46
36 MBH	57.2	68.0	22.41	17.47	0.50

Trial Operation and Testing

From Indoor Unit

1. Turn power on to outdoor unit and measure the supply voltage. Make sure it falls in the specified range.
2. Trial operation should be carried out in either cooling or heating mode.
 - In cooling mode, select the lowest programmable temperature; in heating mode, select the highest programmable temperature.
 - After trial operation is complete, set the temperature to a normal level (78 °F to 82 °F in cooling mode, 68 °F to 75 °F in heating mode).
 - For protection, the system disables restart operation for minutes after it is turned off.
3. Carry out the test operation in accordance with the operation manual to ensure all functions and parts are working properly.

From Remote Controller

1. Press "ON/OFF" button to turn on the system.
2. Press "TEMP" button (2 locations) and "MODE" button at the same time.
3. Press "MODE" button twice.
4. ("7- " will appear on the display to indicate that trial operation mode is selected)
5. Trial operation terminates in approximately 30 minutes and switches into normal mode. To quit a trial operation, press "ON/OFF" button.

Test Items

TEST ITEMS	SYMPTOM (DIAGNOSTIC DISPLAY CHECK ON RC)
Indoor and outdoor units are installed properly on solid basis	Fall, vibration, noise
No refrigerant gas leaks.	Incomplete cooling/heating function
Refrigerant gas and liquid pipes and indoor drain hose extension are thermally insulated	Water leakage
Draining line is properly installed	Water leakage
System is properly grounded	Electrical leakage
The specified wires are used for inter-unit wiring	Inoperative or burn damage
Indoor or outdoor unit's air inlet or air outlet has clear path of air. Stop valves are opened.	Incomplete cooling/heating function
Indoor unit properly receives remote control commands	Inoperative
The heat pump or cooling only mode is selectable with the DIP switch of the remote controller	Remote controller malfunctioning

Easy installation and energy-efficient performance

from a world-leading HVAC manufacturer

COMFORT FOR LIFE

Daikin is a global innovator and provider of energy-efficient indoor comfort solutions. As the world's largest manufacturer of HVAC systems and refrigerants, Daikin offers a complete line of single and multi-zone heating and cooling systems.

- Single room to whole house comfort options
- Inverter technology performance delivers up to 26.1 SEER and 12.5 HSPF
- Intelligent Eye Occupancy Sensor (on select models)
- Quiet and consistent indoor comfort
- Fast, flexible installation for residential, commercial and industrial applications

For 90 years Daikin has been perfecting indoor comfort systems throughout the world.
