Fluidmaster: The Global Solution

The Legacy Continues...

A True Leader in the Industry

Fluidmaster, the leading global supplier of fluid management solutions, is found in more toilets than all other brands combined. As the customer's first choice and preferred supplier of toilet tank trim, we have been ingeniously engineering the internal flushing mechanisms of toilets for more than half a century. Built on and inspired by an unsurpassed history of innovation, Fluidmaster has become an icon in the plumbing industry. Our reputation for superior quality continues to grow as we cultivate and support partnerships around the world with retailers, wholesalers and toilet manufacturers, reaffirming the company as a leader in innovation and global supply of sanitaryware products.

Pioneering Innovation for More Than 50 Years

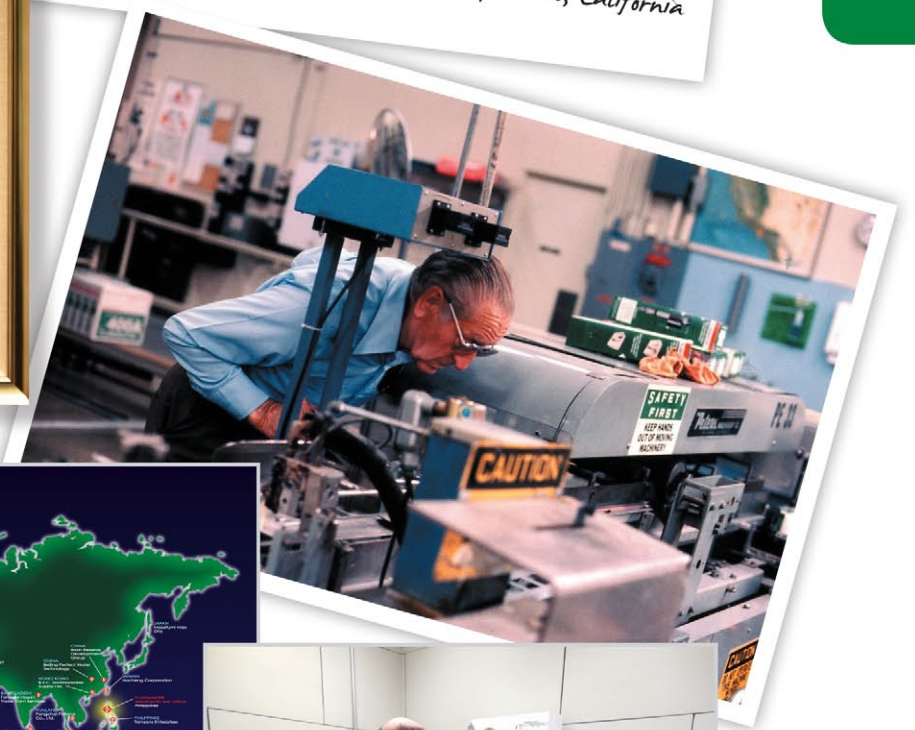

Our company's success began with the desire and drive of founder Adolf Schoepe. Convinced that existing toilet technology was inefficient and unreliable, he sought to create a more advanced fill valve that worked with, rather than against, water pressure. Mr. Schoepe's vision became a reality when he revolutionized the toilet care industry by successfully launching Fluidmaster's innovative pilot fill valve technology in 1957.

Comprehensive Line of Innovative Toilet Repair Products

The popularity of Fluidmaster fill valves has supported our expansion into related product lines through the years. Today, Fluidmaster markets more than 67 million toilet repair products annually and sells more toilet tank replacement valves than any other manufacturer in the world. In addition to the inaugural fill valve, our complete line of toilet repair parts includes flush valves, flappers, tank levers, dual flush valves, bowl wax, toilet repair kits and water supply connectors. Fluidmaster's growing global distribution network reaches more than 80% of the world's population and spans over 87 countries. With manufacturing facilities across the globe, Fluidmaster is quick to market, quick to manufacture and quick to deliver with unparalleled quality.

Fluidmaster Headquarters, San Juan Capistrano, California

WHY FLUIDMASTER

The Toilet Repair Experts

WATER CONSERVATION

What is dual flush for toilets?

Water conservation efforts and related government requirements have reduced water consumption in toilets from 5 or more gallons per flush (gpf) through the 1970s, to 3.5 gpf in the 1980s, to the current 1.6 gpf in toilets sold in the US since 1994. Even so, the toilet is still the biggest user of water inside most homes. New legislation requires that only High Efficiency Toilets (HET) using no more than 1.28 gpf be available for sale in the US, and will be mandated by code in many parts of the country - starting with California on January 1, 2014.

Dual flush technology has been in use for many years in water conscious Australia and other parts of the world, but is only just now coming to North America. Dual flush is a relatively simple and inexpensive way to reduce water use and it allows you to choose the right flush each time:

- Less water for liquid waste (half flush)
- The right amount of water for solid waste (full flush)

Almost 50% of the toilets still being used in the U.S. and Canada are 3.5 gpf or greater and aftermarket dual flush technology allows many users to convert their high capacity toilet to more efficiently use water and save money. Although water savings potential is higher in 3.5 gpf or larger toilets, there are still benefits to using the dual flush technology in 1.6 and 1.28 gpf toilets!

Why Duo Flush™ by Fluidmaster?

Duo Flush™ allows users to take advantage of dual flush technology without compromising flush performance. Fluidmaster products offer these competitive advantages:

- Fits more toilets than any other dual flush conversion valve
- Maximizes toilet performance and water-savings
- Outperforms all other dual flush conversion valves
- Installs in 10 minutes

duoflush™

HALF FLUSH
PUSH UP TO USE LESS WATER FOR LIQUID WASTE

FULL FLUSH
PUSH DOWN FOR A MORE POWERFUL FLUSH TO REMOVE SOLID WASTE

Conservation Tips

HOW TO CONSERVE WATER, STARTING WITH THE TOILET BY FLUIDMASTER

Flushable Fact: A leaky toilet can waste hundreds of gallons of water per day, putting extra strain on your checking account and the environment. With water conservation becoming an increasingly important issue for the majority of Americans (95 percent), water saving considerations are more top of mind.

TIP #1

Identify if your toilet is not working properly. Signs that the toilet is leaking include the sound of running water and the toilet turning on and off without being flushed.

TIP #2

Read your water meter before and after a two-hour period when no water is being used. If it isn't exactly the same, chances are you have a leak somewhere in the house; begin checking in the bathroom first.

For more conservation tips, visit www.fluidmaster.com/conservation-tips

The Toilet Repair Experts

Fluidmaster

FILL VALVES

The fill valve refills the tank and bowl to the correct water levels after the flush. The fill valve is the engine that drives toilet flush performance. It replaces the ballcock and is more efficient and easy to install. From the easy, adjustable 400A to the water-saving Leak Sentry® 400LSR to our quietest and most powerful 400ARHR PerforMAX®, Fluidmaster has the right fill valve for your needs. Replace an old style ballcock or other fill valve with a better performing Fluidmaster fill valve today.

FLUSH VALVES

Flush components control the release of the water from the tank into the toilet bowl once the tank lever handle has been pressed. Fluidmaster has a complete line of highly efficient flush valves to accommodate your needs. Fluidmaster flush valves are easy to install, save water and will stop leaks at the drain. Retrofit any toilet with the water-saving Duo Flush™ replacement valve and save up to 45% of the normally used water.

Fill Valve 400A
The fill valve fills the toilet tank and bowl with water from the water supply line after the tank has been emptied by a flush.

Flush Valve 507A
The flush valve controls the water within the tank and the flapper actuates the flushing action.

Duo Flush™ 550DFR
The Fluidmaster Duo Flush™ saves more water than any other dual flush system on the market.

PerforMAX® High Performance Fill Valve 400ARHR
The quietest and most powerful fill valve on the market.

FILL VALVES & FLUSH VALVES

PerforMAX® HIGH PERFORMANCE FILL VALVE

400ARHR

The quietest and most powerful fill valve on the market. Works with all toilets, including Kohler®, Toto® and American Standard®.

- High Efficiency Toilets HET 1.28 gpf
- Dual Flush, including Duo Flush™
- 1.6 gallon toilets with 2" and 3" flush valves (1994 and newer)
- Older high gallon toilets with 2" flush valve (1994 and older)

Maximize toilet performance and save water:

- 2X greater refill rate than standard fill valves
- Avoids excessive or inadequate bowl fill level
- Quick, easy installation
- Water-saving roller clamp lets you regulate fill level in the bowl, saving water and money
- Anti-siphon
- Code approved

Visit fluidmaster.com for expert solutions for toilet repair

400A AND LEAK SENTRY® UNIVERSAL FILL VALVE

400LSR

- Leak Sentry® automatically suspends refill and alerts users to leaks before money and water are wasted
- Toilet easily resets, remains fully operational
- Anti-siphon, code approved
- Saves up to 3,000 gallons of water per year

5 YEAR WARRANTY

400LSR

Save water and prevent a running toilet with a Leak Sentry® Fill Valve. This revolutionary valve includes a water-saving roller clamp to make sure that the right amount of water goes into the bowl with every flush.

400A FILL VALVE

400A

- Replaces ballcocks
- Easy to install
- Height adjusts 9"-14"
- Refills quickly
- Universal fit for most 1 and 2 piece toilets
- Corrosion-resistant material
- Anti-siphon operation, code approved
- Won't contaminate fresh water supply

5 YEAR WARRANTY

400A

The fill valve fills the toilet tank with water from the water supply line after it has been emptied by a flush. It replaces the ballcock and is more efficient and easy to install. This is an anti-siphon design-fill valve with adjustable height from 9" to 14".

FILL VALVE AND FLAPPER KIT

400CR

- Features the proven 400A anti-siphon fill valve
- Includes the rugged 501 flapper – longest lasting flapper
- Flapper is chlorine-resistant for harsh water regions

5 YEAR WARRANTY

400CR

400A Anti-siphon fill valve and 501 flapper. The perfect combination for 3.5 gpf toilets or larger.

DUO FLUSH™ 550DFR

Water conservation is becoming a bigger and bigger issue all the time. The Fluidmaster Duo Flush™ is a great tool that saves more water than any other dual flush system on the market. This dual flush system retrofits onto any 2" flush valve, and is proven to use up to 45% less water than the original tank parts. It also has been shown to improve flushing power on the full flush, so you can actually see better performance than before. A dual flush tank lever is included with this system.

- Converts existing toilets to dual flush technology
- No tank removal
- Uses up to 45% less water/Save up to \$120 per year
- Durable silicone seal lasts for years
- Fully adjustable full and half flush
- Retrofits any 2" toilet flush valve
- Delivers precise and powerful flushing action
- Patent pending
- Refill module boosts performance when combined with the Fluidmaster PerforMAX® fill valve
- Wide range of settings for optional flush

Visit fluidmaster.com for expert solutions for Toilet Repair

2" FLUSH VALVE 507A

- Easy to install
- Saves water, stops leaks at the drain
- Includes chlorine-resistant flapper

5
YEAR
WARRANTY

507A
The flush valve controls the water within the tank and the flapper actuates the flushing action.

REPAIR KITS

The right parts combined together to make your toilet run like new and priced less than if purchased separately.

Complete Toilet Tank Repair Kit 400AKR
 Contains a flush valve with an adjustable water saving flapper, a fill valve, a chrome tank lever, and the brass bolts and gaskets for installation – everything you need to make your toilet run like new

Flush Valve Repair Kit 555C
 Provides new drain seat for damaged flush valves

Complete Repair Kit with Flush 'n Sparkle® 400AFS
 Flush 'n Sparkle automatically cleans your toilet with every flush

Complete Flush Valve Kit 507AK
 Flush valve replacement kit for 1.6 gpf toilets with 2" flush valve, two brass bolts, four hex nuts and four stainless steel washers, 6 rubber washers

COMPLETE REPAIR KIT WITH FLUSH 'N SPARKLE®

400AFS

All you need to make your toilet just like new plus added bonus of Flush 'n Sparkle® automatic toilet cleaning system.

Everything you need to completely repair and replace your fill and flush valves, including a chrome tank lever. Also includes all the bolts and gaskets necessary for replacement. Our deluxe 400AFS kit includes Flush 'n Sparkle®, which automatically cleans your tank with every flush.

- Flush 'n Sparkle® automatically cleans your toilet with every flush
- Contains: Flush valve with Universal Water-Saving Long Life Flapper, 400A fill valve, chrome tank lever, washers, stainless steel nuts, two brass bolts, gasket and Flush 'n Sparkle®

Visit fluidmaster.com for expert solutions for toilet repair

5 YEAR WARRANTY

COMPLETE TOILET TANK REPAIR KIT

400AK

- Contains a flush valve with an adjustable water saving flapper, a fill valve, a chrome tank lever, and the bolts and gaskets for installation
- Chrome tank lever trims/bends to fit, no pre-measuring needed
- Flapper dials to adjust water volume for a custom flush
- Fits more 2-piece toilets with a 2" flush valve opening

5 YEAR WARRANTY

400AK
Complete kit for 1.6 gallon per flush toilets.

COMPLETE FLUSH VALVE KIT

507AK

- Easy to install
- Saves water, stops leaks at the tank drain
- Flapper dials to adjust water volume for a custom flush
- Universal gasket fits most close-coupled toilets
- Fits most 2-piece toilets with a 2" flush valve opening

5 YEAR WARRANTY

507AK
Flush valve replacement kit for 1.6 gpf toilets with 2" flush opening.

FLUSH VALVE REPAIR KIT

555C

- Provides new drain seat for damaged flush valves
- Works on most 2" flush valve toilets
- Chlorine-resistant, solid frame flapper

5 YEAR WARRANTY

555C
Fix a bad flush valve seat in 5 minutes without taking off the tank with the 555C. The 555C fits right on top of an existing flush valve seat, and is secured down by a special sealant ring that goes on without any messy glues or adhesives.

TANK LEVERS

Fluidmaster

WATER SUPPLY CONNECTORS

Fluidmaster offers a complete line of water supply connectors that are built to last. Made of a tough polymer core covered with braided stainless steel wire, these connectors exceed code requirements for durability. They also have a large inside diameter for higher flow capacity and a five year warranty.

We now offer our Click Seal® connectors which provide a guaranteed no-leak seal and eliminate cross threading and stripping. Fluidmaster has the supply connectors you need for washing machines, icemakers, dishwashers, water heaters, faucets and toilets.

WATER SUPPLY CONNECTORS

WATER SUPPLY CONNECTORS

Fluidmaster water supply connectors are built to last. Made of a tough core covered with braided stainless steel wire, these connectors exceed code requirements for durability. They also have a large inside diameter for higher flow capacity.

- Exceptional flexibility for fast, easy installation
- Won't kink or crease, even in the tightest of spaces
- Heavy-duty brass hex nuts are easy to grip and nickel plated for durability
- Exceeds all code requirements for flexible water connectors

Wax & Wax-Free Gaskets

WAX & WAX-FREE™ GASKETS

Fluidmaster has 3" and 4" wax gaskets for all floor outlet toilet bowls. These are available with or without flange.

For a Wax-free installation, try the Fluidmaster Wax-Free™ gaskets. All gaskets are easy to install and come with the necessary parts to insure a simple and successful installation.

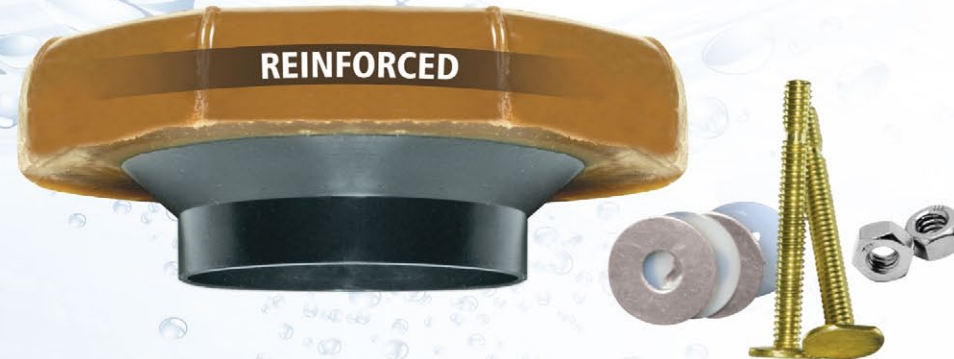

Wax Toilet Bowl Gasket
7510
For all floor outlet toilet bowls.
Fits 3" and 4" waste lines.

Extra Thick Wax Toilet Bowl Gasket
with Flange
7513
Includes extra thick wax ring with
polyethylene flange.

Extra Thick Reinforced Wax Kit
7514
More wax for floors with recessed
flange.

Reinforced Gasket with Flange
7512
Provides better seal on uneven
flooring.

Wax-Free™ Bowl Gasket
7500
This easy to install Wax-Free™ gasket
adapts to all types of flooring and
fits 3" or 4" drain pipes, providing a
secure seal.

WAX & WAX-FREE GASKETS

WAX-FREE™ BOWL GASKET

7500

If you're tired of dealing with messy wax, try the Fluidmaster Wax-Free™ Bowl Gasket. This easy to install, Wax-Free™ gasket adapts to all types of flooring and drain pipes, providing a secure seal. Made from a special rubber, the Wax-Free™ bowl gasket will provide a consistent, complete seal every time without using wax.

- Fits 3" or 4" drain pipes
- Adapts to all types of flooring and drain pipes
- Clean to install, no messy wax
- Seals on uneven floors or over tile floors with recessed flange
- Can be readjusted during installation
- Moisture-proof O-ring seal prevents splash up and rotting of floor flange, and seals tightly to block sewer gases

- No minimum temperature required for installation
- Solid brass bolts and nuts secure bowl to floor

Visit fluidmaster.com for expert solutions to toilet repair

AUTOMATIC TOILET BOWL CLEANING SYSTEMS

Flush 'n Sparkle is Fluidmaster's own automatic toilet cleaning kit. It drips directly into the overflow tube so no chemicals ever touch the fill valve or flapper, avoiding the damage done by drop in tank tablets. Replacing a cartridge is a snap and takes less than one minute. You can install the whole system in less than five minutes. Available with blue cleaning, bleach cleaning or with the BioBalance® septic kit which releases biodegradable enzymes to break down household waste and reduce clogging.

Flush 'n Sparkle® Bleach Kit
8300
The 8300 kit contains a bleach cleaning solution that provides a thorough cleaning and lasts up to three months

Flush 'n Sparkle® Cleaning Kit
8100
Flush 'n Sparkle® puts a cleaning solution directly into the overflow tube of the flush valve, so no chemicals ever touch the flapper or fill valve

Flush 'n Sparkle®
BioBalance® Septic Kit
8200
The Septic Care Kit injects biodegradable enzymes into the septic system every time the toilet is flushed, helping to keep the septic system working smoothly

BLEACH KIT

8300

Automatically cleans your toilet with every flush.

This environmentally friendly product provides cleaning solution directly into the bowl without harming the toilet tank components. Every plumber knows that there is nothing more destructive to toilet tank parts than drop-in bleach tablets. The alternative is Flush 'n Sparkle® Bowl Cleaning System. Flush 'n Sparkle® puts a cleaning solution directly into the overflow tube of the flush valve, so no chemicals ever touch the flapper or fill valve. This prevents the damage that a drop-in tablet normally inflicts while keeping the bowl clean and sparkling. The 8300 kit contains a bleach cleaning solution that provides a thorough cleaning and lasts up to three months. Replacing the cleaning cartridge takes less than one minute.

Visit fluidmaster.com for expert solutions for toilet repair

- Environmentally friendly
- Cleans toilet for three months
- Added Bleach Cleaning Power
- Easily installed in less than five minutes
- Isolates cleaner from the tank water so tank parts aren't damaged by the detergents or bleach used by other in-tank cleaners
- Cleanser-treated water is injected only to the bowl, where it is needed, so cleaner application is efficient
- Surfactant-based cleaning agent reduces spread of viruses and bacteria

CLEANING KIT

8100

- Environmentally friendly
- Cleans toilets for three months
- Easily installed in less than five minutes
- Repels stains with every flush
- Isolates cleaner from the tank water so tank parts aren't damaged by the detergents or bleach used by other in-tank cleaners
- Cleanser-treated water is injected only to the bowl, where it is needed, so cleaner application is efficient
- Surfactant-based cleaning agent reduces spread of viruses and bacteria

8100

The 8100 kit contains a blue cleaning solution that lasts up to three months.

BIOBALANCE® SEPTIC KIT

8200

- Environmentally friendly
- Easily installed in less than five minutes
- Every flush delivers instant septic bio-action
- Biodegradable enzymes break down household waste
- Every flush delivers instant septic bio-action
- Frequent, measured doses reduce drain field clogging

8200

There is nothing worse than having your septic system back up. A way to prevent septic back up is with a Flush 'n Sparkle® with BioBalance® Septic Care Kit. The Septic Care Kit injects biodegradable enzymes into the septic system every time the toilet is flushed, helping to keep the septic system working smoothly. The Septic Care Kit works for three months, and replacing the cartridge takes less than a minute.
