

Innovative products and solutions
for life safety and code compliance.

FIRESTOP
SPECIFIED TECHNOLOGIES INC.

Putting products and resources to work for you

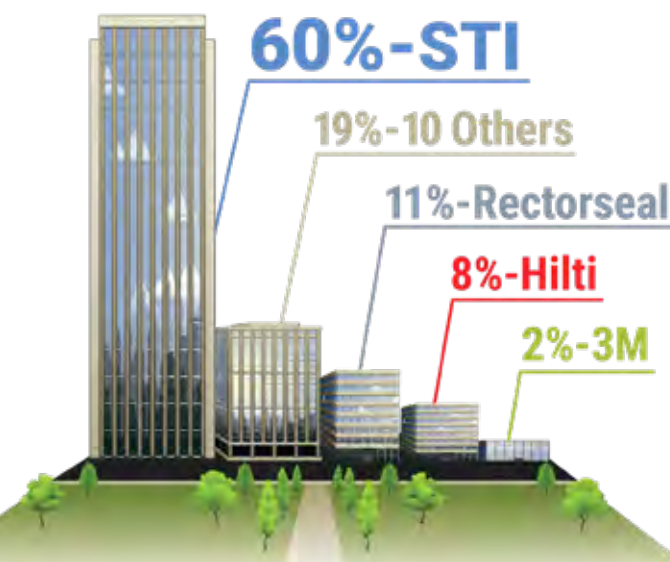

For over 25 years, Specified Technologies Inc. has worked closely with the construction industry to create simple solutions to complex firestopping problems across a broad range of market segments and industries worldwide.

We offer the most comprehensive range of firestop products on the market and back them with the most UL® tested systems in the business—over 1,400—from penetration firestop systems and perimeter barrier solutions to static and dynamic construction joints.

Because firestopping is our exclusive focus, we have been at the forefront of developing the most advanced and cost-effective firestop solutions on the market. STI Firestop is committed to supporting customers by providing sustainable firestop solutions, treating them like partners, and by consistently adding value beyond the sale.

You can depend on STI to provide expert advice, superior performance, premium quality products, best-in-class service, and training and support while delivering a total firestop solution.

Most UL® Certified Perimeter Fire-Barrier Systems* in the Industry

* STI has more UL® Certified perimeter fire-containment systems than all other suppliers combined.
Source: UL® Directory as of 1/2019

Global presence

STI has offices and representation throughout the United States, Canada, Europe, the Middle East, India, China, Southeast Asia, and Latin America. We partner with over forty independent rep agencies and work with over 1,000 distribution outlets worldwide, providing extensive international coverage and offering our customers the personal attention they deserve.

Worldwide Offices & Warehouses

Notable projects

ACCESS STI

One Key. All Access.

STI provides a toolbox of innovative online programs to remove the complexity of designing firestop systems. A set of powerful tools assure that the right systems are selected for the fastest and most cost-effective installation.

Access Guide Specifications for products or solutions for common Firestop issues. STI offers easily editable Word formats for use in the creation of project specifications.

The Firestop University gives you access to all of STI's learning material and product tutorials.

- Receive instant notifications
- Mobile device compatible
- Earn "Blue Bucks" and redeemed for gift cards

- Find firestop systems on your phone, tablet, or web
- Streamlined firestop system submittal package
- Integrate user documents and company logos
- Embed engineering judgement documents

Firestop Locator provides a method to simplify firestop documentation.

- Interactive floor drawings
- Track penetrations, joints, doors, dampers
- Mobile device compatible
- Streamline the Firestop tracking process
- Add team members to any project
- Turn-key solution with pre-printed QR labels
- Generate detailed reports (PDF and Excel)

STI Firestop offers BIM objects for architects and engineers to import into building models. Developed using Autodesk Revit®, these objects offer a quick and effective method to integrate firestop into your complex building design.

A powerful plugin for AutoDesk Revit®. The FCM (Firestop Clash Management) plugin uses clash detection to find locations where penetrants meet fire-rated barriers and automatically selects the appropriate firestop systems. It removes the complexity of designing firestop systems and ensures that when it comes time for construction, the systems selected provide the fastest installation and best installed cost.

Generate a Customized LEED® Credit Letter for submission in any project.

Generate a selection of firestop system details on a CAD detail sheet.

STI's engineering service experts are ready to help you optimize productivity during design, construction, and post-construction. They work in conjunction with our world-renowned engineering team, offering solutions to complex firestopping problems to help you ensure code compliance.

► Research & Development

STI's philosophy is solely focused on firestop innovation. It's all we do. Our engineering development team consistently pushes the envelope to develop new sustainable products and systems to enhance life safety protection.

► On-site Fire Lab

STI is a UL® Approved testing facility equipped with a state-of-the-art environmentally friendly burn furnace. Tests are performed on a consistent basis in order to quickly develop new products and standards for the firestop industry.

► Engineering Services Team

The largest resource of firestop experts in the industry under one roof that deliver timely solutions for:

- Engineering judgments
- Custom firestop training
- Project plan review
- Documentation for AHJ's
- Technical inquiries & LEED letters
- Specification review
- Building Information Modeling (BIM)
- Upfront detail sheet generation

Engineering Judgments in 24* hours or less

Engineering judgments are critical for expediting your projects. Waiting for answers costs you time and money — **why wait?**

We deliver EJ's within 24 hours on average.

*Average turnaround time.

EZPath®
FIRE RATED PATHWAY

DATA COMMUNICATIONS

STI understands the complexities of data and communication cabling distribution in the built environment. We provide end-to-end fire and smoke sealing solutions that alleviate the headaches associated with firestopping methods.

datacom

The Smart Choice.

EZ-Path® saves time, money, and resources by removing ongoing downstream costs.

Only EZ-Path® helps you avoid citations and costs associated with non-compliance. Other sleeves require constant upkeep, ongoing maintenance, and inspection to ensure compliance.

You can never be certain that other sleeves have been activated, plugs and putty have been replaced, or that they have been properly sealed to meet codes. And now that The Joint Commission **mandates 60 DAY RFIs** (Requirements for Improvement) for survey deficiencies— **ongoing code compliance is more important than ever.**

“Most cable penetrations were found to be out of compliance except for EZ-Path®.”

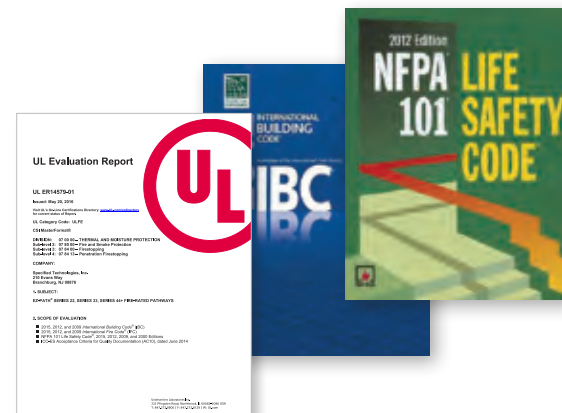

Global Fire Protection
Inspections Department

The Only Maintenance-Free Pathway.

Annual inspection and maintenance of firestop systems is required by code.

An Evaluation Service Report (ESR)* was issued on May 20, 2016 by UL® for EZ-Path® Fire-Rated Pathways confirming code compliance with the International Building Code® (IBC), International Fire Code® (IFC), and NFPA 101, “Life Safety Code®” (LSC). The report goes on to confirm that, when properly installed—**EZ-Path® Pathways are exempt from ongoing maintenance.**

Unlike other sleeves, **EZ-Path®** has no moving parts and requires no action to activate the internal sealing mechanism—making it **the only rated firestop device that is compliant right out of the box.**

EZ-Path® Fire-Rated Pathways do not require regular maintenance...

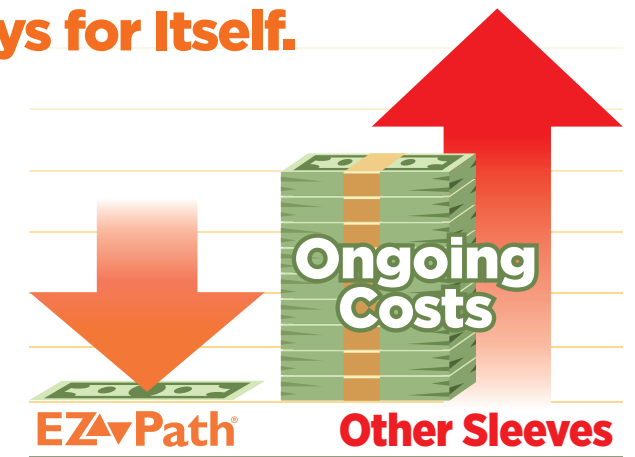

Evaluation Service Report
Underwriters Laboratory

The Only Pathway that Pays for Itself.

Other sleeves incur enormous ongoing costs over the lifecycle of the building.

EZ-Path® offers the ultimate in flexibility and can virtually eliminate fines due to non-compliance, increasing your savings over and over again. **EZ-Path®** is a fully sustainable cable pathway solution for the lifetime of your building.

- ▶ Ends downstream maintenance & inspection costs
- ▶ Eliminates ongoing fire & smoke sealing costs
- ▶ Allows remote cable pulls through multiple barriers
- ▶ Reduces unnecessary trips above the ceiling
- ▶ Limits liability & decreases exposure to pathogens

“Over its lifecycle, EZ-Path® pays for itself many times over.”

Jeff Combs
Fire Marshal, Major U.S. Medical System

The Logical Solution for You.

For Contractors and Maintenance Professionals.

Concerns about failing inspections become a thing of the past with **EZ-Path®**. The system is easy to visually inspect and is ideal for both new construction and existing conditions.

For the Health Care Professional.

Infection control is paramount in healthcare facilities. **EZ-Path®** minimizes the spread of hospital-acquired infections (HAIs) by reducing or eliminating trips above the ceiling to unseal, reseal, or adjust equipment of any kind.

For the Owner.

EZ-Path® eliminates downstream labor costs with the use of pull strings inside the **EZ-Path®** devices, for easy cable MAC work from remote locations—saving you time and money over the life cycle of the building.

For Architects, Consultants, Specifiers, and RCDDs.

EZ-Path® provides you with a complete solution to help protect the legacy of your project. Whether it's the engineered aesthetics, the robust design, the dynamic features, the ability to “future-proof” the design, or the unparalleled performance— **EZ-Path®** has you covered.

For the Cable Installer and IT / ICT Professional.

Recognized as best practice by trade professionals, **EZ-Path®** protects your network. Maintain compliance while navigating the demands of perpetually evolving floor, wall, and ceiling penetrations that result from equipment expansions and technology upgrades. Easy to install with nothing to maintain, **EZ-Path®** lets you execute continuous cable pulls while allowing your network to run at peak performance.

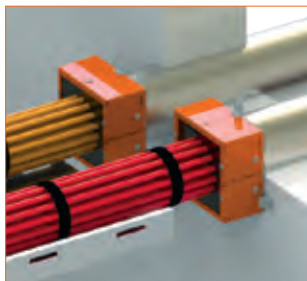

Smoke & acoustical pathway
For non-fire-rated walls

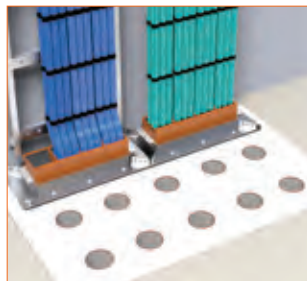

Grommets
For single-cable applications

EZ-Path multigang solutions
For space-saving vertical & horizontal applications

EZDR Retrofit Device
For overfilled sleeves

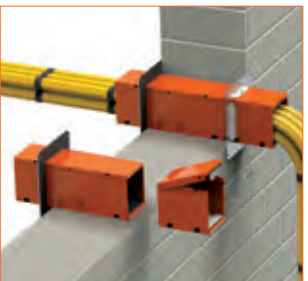

Smaller footprint
For greater cable capacity compared to traditional methods

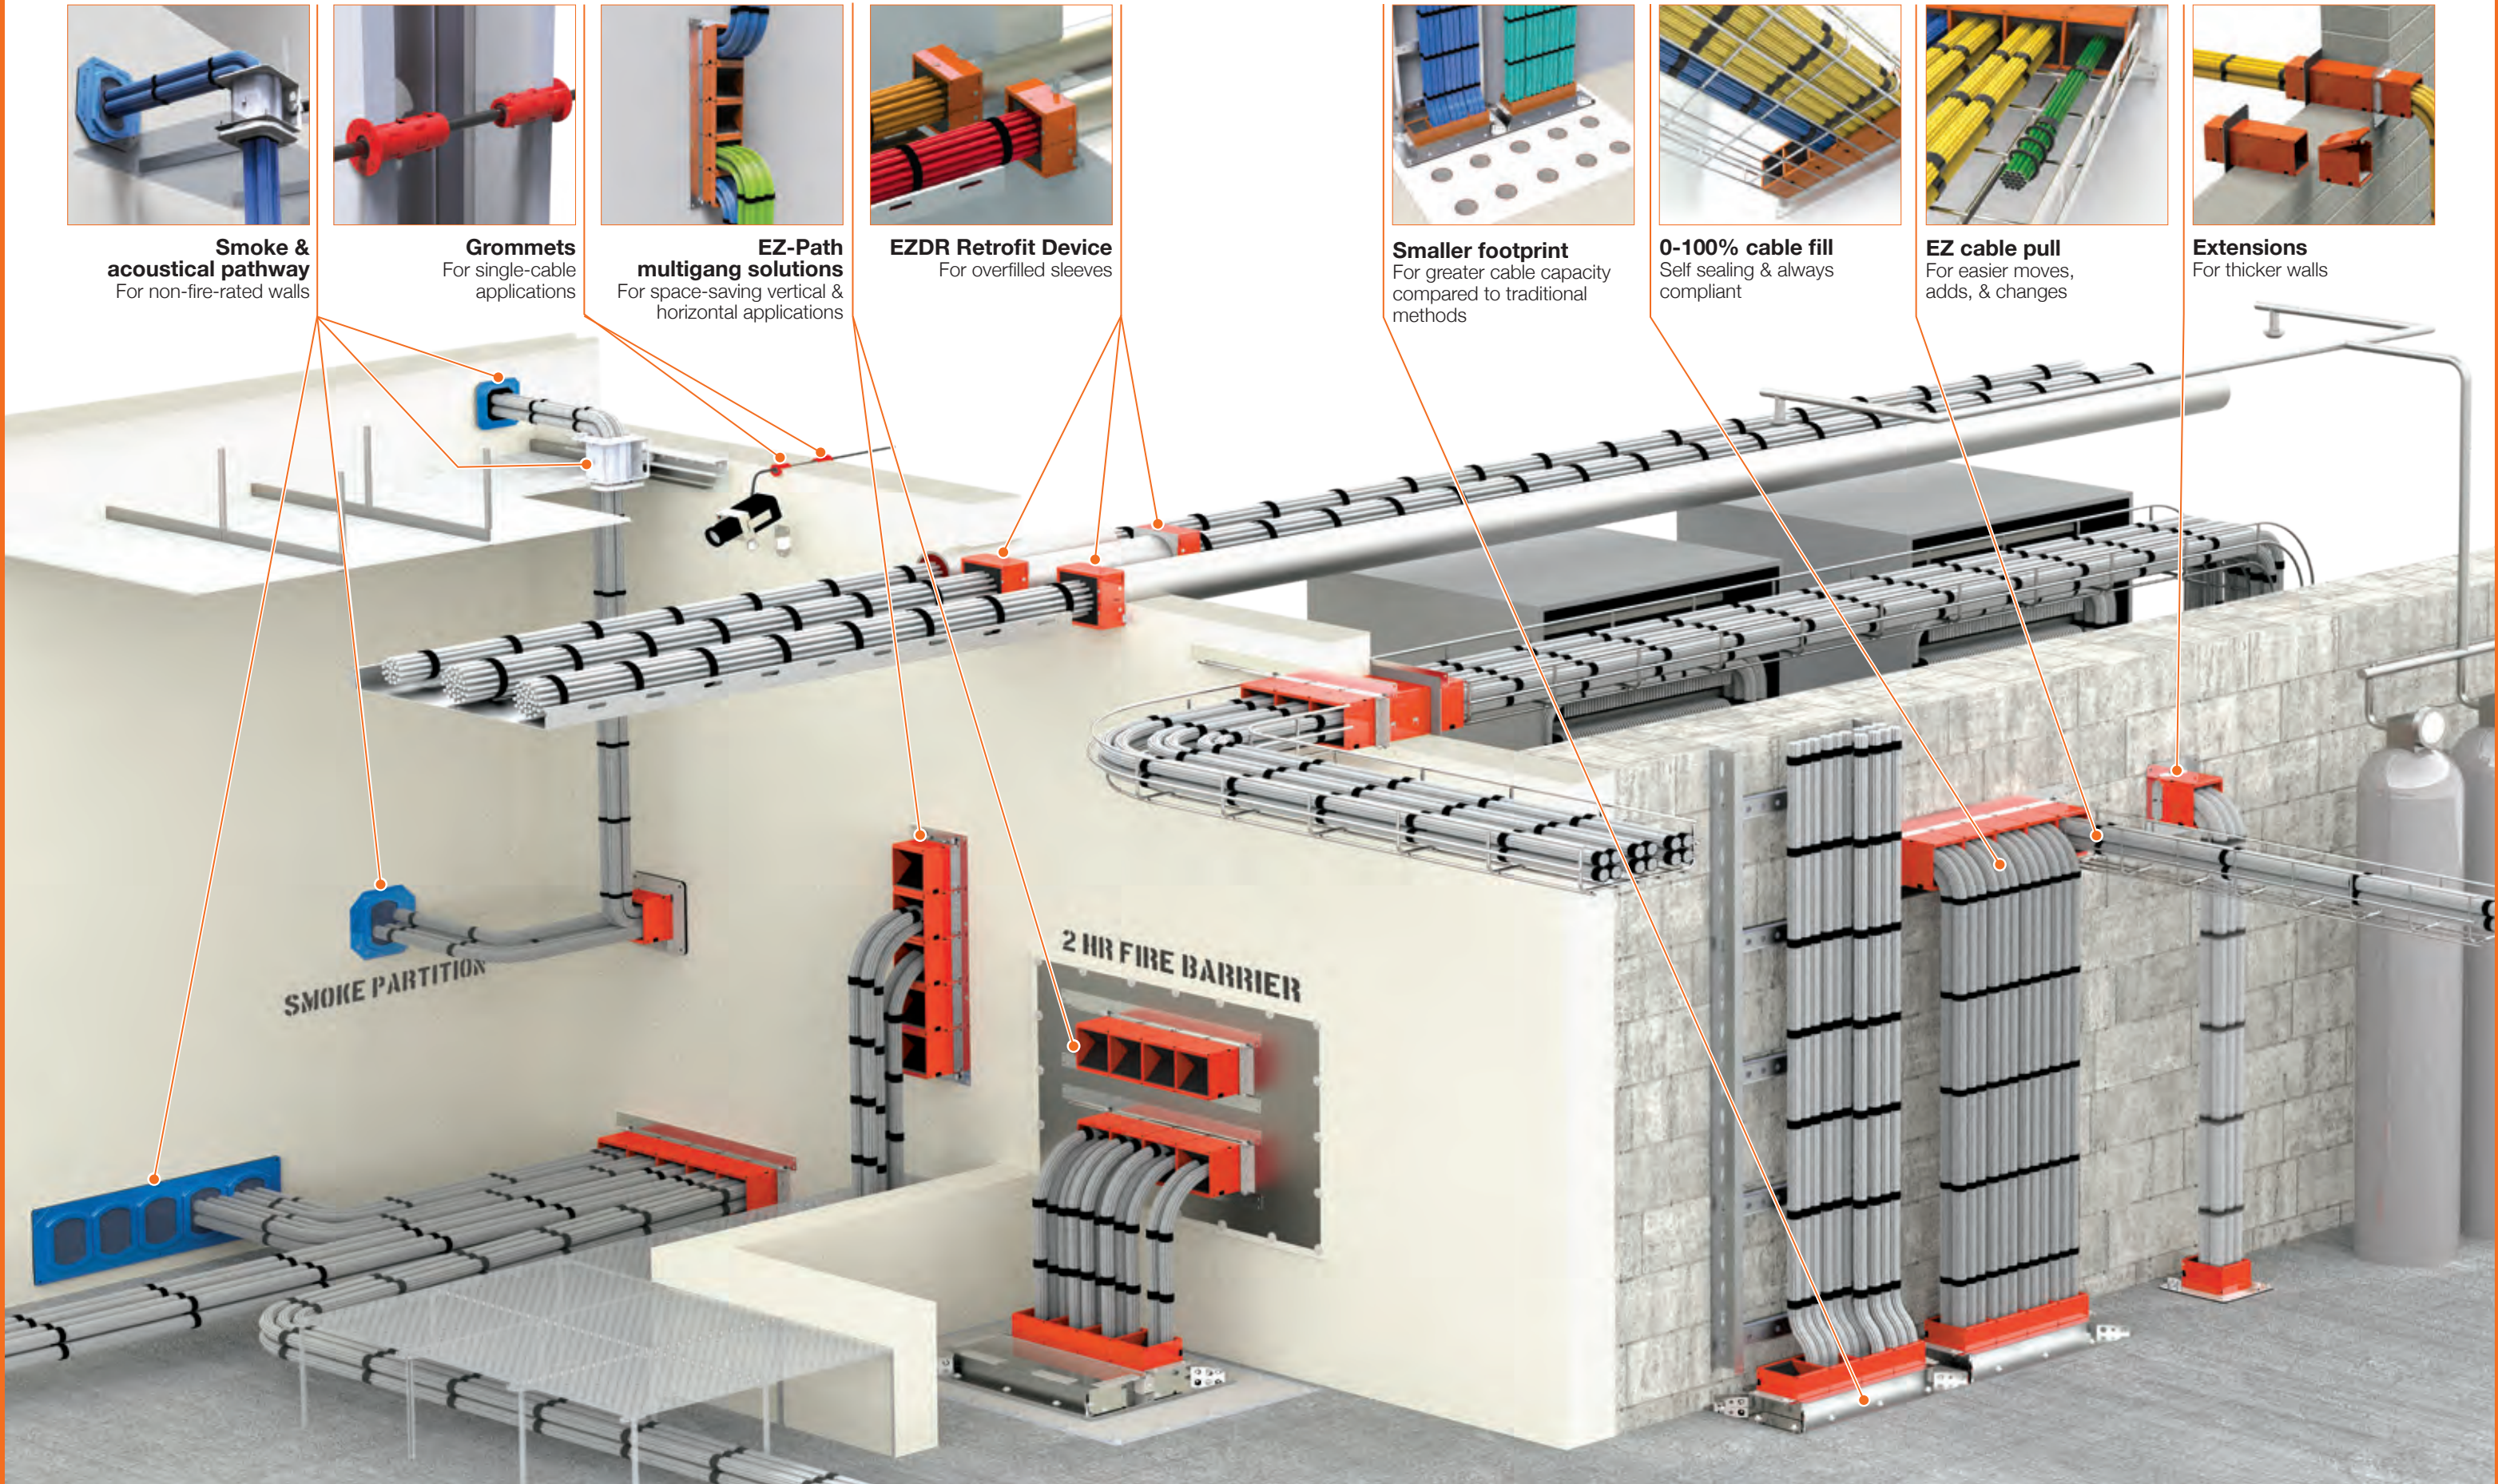

0-100% cable fill
Self sealing & always compliant

EZ cable pull
For easier moves, adds, & changes

Extensions
For thicker walls

1 EZDR 400 width includes locking tab. Device can be rotated to any orientation. (i.e.: 6-1/4 in. H x 5-1/2 in. W)
2 NEZ33 fits walls 4 in. to 8 in. in width.
3 NEZ33CK2 dimension measured from bottom of steel plate abutting unexposed ceiling to top of device.

Series 44+ Fire-Rated Pathway

The EZ-Path® Series 44+ Fire-Rated Pathway is a maintenance-free pathway solution designed for high cable volume conditions through fire-rated walls and floors. The Series 44+ incorporates self-sealing intumescent pads that automatically adjust to the installed cable fill without the need for user manipulation. Under fire exposure, the intumescent pads expand and swell, resisting the passage of smoke and flame.

Features & Benefits:

- Self Sealing design provides exceptional fire and smoke leakage ratings
- Allows for easy moves, adds, and changes
- Designed for new and existing conditions
- Variety of accessories available for any field condition
- Modular grid system for riser applications
- Greatest achievable cable density of any solution on the market

Series 44+ Fire-Rated Pathway

EZ-Path® Modular Floor Grid System

Modular Floor Grid Systems utilize the high volume, EZ-Path® Series 44+ pathways, installed in banks of four, to provide your cabling systems with room to grow. Sturdy steel grids mount one, two, or four banks of pathways in built-in slots for a total of up to sixteen pathways through a single floor opening. A single bank floor grid comes complete with pathways. Multi-bank modular floor grids are installed with firestop panels sealing each slot. As additional cable capacity is required, firestop panels are removed, and pathway modules containing four pathways are installed in each slot.

UPC# 730573	ITEM NO.	CASE QTY (min)	Single-Slot Modular Floor Grid	DEVICE / PLATES
00110	EZDG444S2	1	Available complete with Pathway Module (4 pathways) or with firestop filler panels covering the slots.	 EZDG444S2 Full kit

00449	EZG444CP	1	Join multiple single-bank grids (EZDG444S2) together for use in elongated floor slot penetrations using the Floor Splice Plate.	

Series 33 Fire-Rated Pathway

The EZ-Path® Series 33 Fire-Rated Pathway is a maintenance-free pathway solution for moderate cable volumes through fire-rated walls and floors. The Series 33 incorporates built-in intumescent pads that automatically adjust to cable fills. When exposed to flame and high temperatures, the intumescent pads expand to form a dense insulative char that prevents the passage of smoke and flame.

Features & Benefits:

- Self Sealing design provides exceptional fire and smoke leakage ratings
- Allows for easy moves, adds, and changes
- Designed for new and existing conditions
- Variety of accessories available for any field condition
- Available in an array of colors for easy cable pathway management

UPC# 730573	ITEM NO.	CASE QTY (min)	Single Pathway - Full kit	DEVICE
00004	EZD33FWS	6	The Series 33 Pathway is designed for new or existing cable installations up to 9 in. (229 mm) thick walls without extensions (EZD33E) or min 2-1/2 in. thick floors. The Series 33 pathway can be ganged for additional capacity. A wide variety of accessories easily adapts 33 Series pathways to a broad range of applications.	
UPC# 730573	ITEM NO.	CASE QTY (min)	Circular Wall Plate Kits	DEVICE / PLATES

Specialty Options

UPC# 730573	ITEM NO.	CASE QTY (min)	New Cable Installations Through Floors Using Core Drilled Opening	DEVICE / PLATES
00835	EZDP133FK	1	The Kick-In Floor Kit installs a Series 33 pathway into a 4 in. (102 mm) core drilled round opening. Built-in, self-locking fasteners securely wedge the pathway into the concrete. Installation is simple! Insert plate into opening. Insert pathway into plate and tighten set screws. Pathway is locked in place. No fasteners and no sealant required.	
00833	EZP133K	6		
UPC# 730573	ITEM NO.	CASE QTY (min)	New or Existing Cable Installations in Sleeves or Conduit	DEVICE / PLATES
00036	EZDP133CAK	1	The Conduit Attachment Kit installs a Series 33 Pathway within a 4 in. (102 mm) sleeve or conduit. The split plate design allows for installation in both new and existing cabling applications.	
00138	EZP133CA	1		
UPC# 730573	ITEM NO.	CASE QTY (min)	Previously Installed Cables Through Oversized Openings in Walls	DEVICE / PLATES
00533	EZDP33WR	1	Multi-purpose split mounting plate, designed to facilitate EZ-Path® device installations around previously installed cables—new or existing cabling applications—for large opening or opposing offset openings either in gypsum board or masonry block walls. Two-piece plates measuring 8 in. x 10 in. (203 mm x 254 mm) can be rotated independently of each other in 90° increments to cover irregular or offset openings.	
00535	EZP133R	1		
UPC# 730573	ITEM NO.	CASE QTY (min)	Extension Module	DEVICE / PLATES
00005	EZD33E	1	Extension modules attach to the end(s) of the Series 33 pathway and increase the effective length for thicker barriers. Each extension module increases the effective length by 6 in. (152 mm).	
UPC# 730573	ITEM NO.	CASE QTY (min)	Positioning Clamps	DEVICE / PLATES
00135	EZP133PC	1	Positioning clamps are used to position and secure pathways in applications where standard wall plates will not be used and the device will be either backfilled or caulked into an opening. Sold in pairs.	
UPC# 730573	ITEM NO.	CASE QTY (min)	Radius Control Module	DEVICE / PLATES
00933	RCM33	1	Snap into the ends of pathways and provide a 1 in. (25 mm) minimum bend radius for cables. RCMs support cable bundles at 100% rated loading.	

Series 22 Fire-Rated Pathway

The EZ-Path® Series 22 Fire-Rated Pathway is a maintenance-free pathway solution for smaller cable bundles through fire-rated wall assemblies. The device is offered as a complete kit without the need for additional accessory products for installation.

Features & Benefits:

- Self Sealing design provides exceptional fire and smoke leakage ratings
- Allows for easy moves, adds, and changes
- Designed for new and existing conditions
- Suited for round and rectangular openings

UPC# 730573	ITEM NO.	CASE QTY (min)	Single Pathway - Full kit	DEVICE
00022	EZD22	6	Designed for new or existing cable installations through walls up to 9 in. (229 mm) thick. The pathway is designed to be installed in a 2" (51 mm) round opening or 1-3/4" (44 mm) square opening.	

Retrofit Device

Overfilled cable sleeves are the bane of every facilities team. Bring these deficient openings back into code compliance with the EZ-Path® Retrofit Device. Its two-part clam shell design installs around projecting sleeves and cable bundles, restoring fire and smoke leakage performance. The EZ-Path® Retrofit Device quickly and easily retrofits sleeves of up to 100% visual fill, restoring fire performance without the need for additional firestop products.

Features & Benefits:

- Sized for 2 in. and 4 in. metallic sleeves
- Designed for cable sleeves and stubs
- Professional fit and finish
- Safety Orange for easy identification
- Suited for round and rectangular openings

UPC# 730573	ITEM NO.	CASE QTY (min)	Retrofit Device - Pair	DEVICE
00200	EZDR200	4	EZ-Path® Retrofit Device for 2 in. (2-3/16 in. or 2-3/8 in. O.D.) Sleeves; One Pair (2).	
00201	EZPR150	1	EZDR200 Adapter Plate for 1.5 in. sleeves; One Pair (2).

00401	EZPR300	1	EZDR400 Adapter Plate for 3 in. sleeves; One Pair (2).	

EZ-Firestop® Grommet

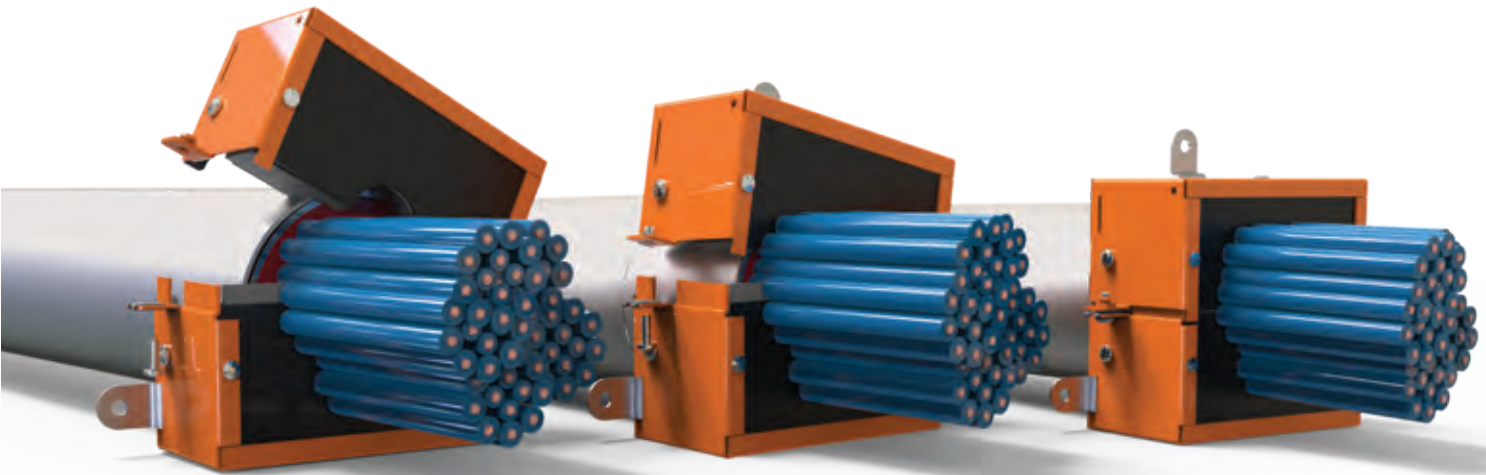

EZ-Firestop® Grommets make sealing penetrations of individual and small bundles of cables through gypsum board walls a snap. Molded from premium plenum-plastics and incorporating a soft foam inner core, EZ-Firestop® Grommets eliminate the need for sleeves, firestop putties, and sealants.

Features & Benefits:

- Suited for addressing single membrane or complete through-penetrations
- Available as a single cable or multiple cable solution
- Ideal for alarm, security, or wireless access point installations
- Designed for 1 & 2 hr fire-rated gypsum board wall assemblies
- Professional finished appearance

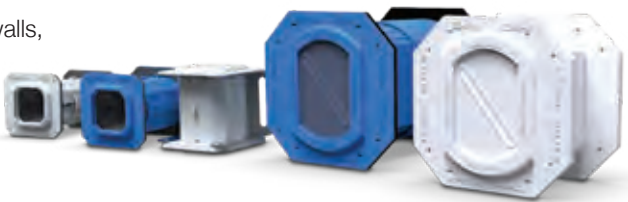

UPC# 730573	ITEM NO.	CASE QTY (min)	Firestop Grommets	DEVICE

cable sleeves

Ready® Sleeve

SpecSeal® Ready® Sleeves are designed for new cabling penetrations where sleeves are required. Each Ready® Sleeve kit includes a preformed steel sleeve with rolled edges, steel escutcheon plates with intumescent gaskets, and a dose of our SpecSeal® SSP Firestop Putty. The rolled edges of each Ready® Sleeve eliminate the need for bushings while the included escutcheon plates and gaskets take the place of steel strut and strap supports.

Features & Benefits:

- Complete—includes sleeve, all mounting hardware, firestopping materials
- Saves money by reducing expensive shop and field labor
- Standard and large escutcheons available
- Meets code requirements for internal/external firestop sealing
- Meets code requirements for wall attachment
- Built-in bushings protect cables*
- Includes SpecSeal® Series SSP Intumescent Firestop Putty sufficient for 1 in. (25 mm) depth at both ends

Applications:

- Protect and seal cables routed through rated and non-rated walls & floors
- All common constructions up to 10 in. (250 mm) thick
- Available trade sizes 1 in. (OD=1.315 in.; 33 mm), 2 in. (OD=2.375 in.; 60 mm), 4 in. (OD=4.5 in.; 114 mm)
- Standard small escutcheons for accurate gypsum board openings
- Large escutcheons for concrete or masonry openings

SpecSeal Ready Sleeve

UPC# 730573	CAT NO.	DESCRIPTION	QTY	CASE QTY	UNIT WEIGHT

Silver Color Re-Enterable Solution 

TEST STANDARDS: ASTM E814(UL 1479), CAN/ULC S115

Ready® Sleeve Split Sleeve

SpecSeal® Ready® Split Sleeve kits easily install around existing cables. Each Ready® Split Sleeve kit includes two preformed steel sleeve halves with rolled edges, steel escutcheon plates with intumescent gaskets, and a dosage of our SpecSeal® SSP Firestop Putty. Ready® Split Sleeve's two-piece body and plates easily capture previously installed cables while tightly fastening to the penetrated barrier.

Features & Benefits:

- Complete—includes sleeve, all mounting hardware, firestopping materials
- Oversized plates for larger or irregular openings
- Built-in bushings protect cables
- Meets code requirements for internal/external firestop sealing
- Escutcheon plates are required to comply with tested systems and NEC
- Includes SpecSeal® Firestop Putty as well as split external firestop gasket

Applications:

- New or existing cable installations through rated and non-rated walls & floors
- All common constructions up to 10 in. (250 mm) thick
- Available trade sizes 1 in. (OD=1.315 in.; 33 mm), 2 in. (OD=2.375 in.; 60 mm), 4 in. (OD=4.5 in.; 114 mm)
- Oversized or irregular openings

cable penetration solutions

Intumescent Firestop Pillows

SpecSeal® SSB Firestop Pillows easily compress and conform around any penetrant. Equally suited for new or existing conditions, SpecSeal® Pillows make short work of even the most complex through-penetration firestop conditions.

Features & Benefits:

- Intumescent —expands in all directions for a tough, tight seal
- Single side application makes installation easy for tough access openings
- Re-installable for easy retrofitting of cables
- Heat-sealed poly cover protects core and makes pillows slide in and out with ease
- Superior air leakage ratings—broad base of tested systems
- Lightweight—easier installation
- Heat-sealed poly bag—strong and durable, no sewn seams to unravel or tear, no irritating fiberglass
- No special tools required
- Monolithic Encapsulated Core: No loose fill

Applications:

- Medium to large openings through common constructions
- Loose cable for power, voice, and data
- Single or multiple cable trays for power, voice, and data
- Multiple metallic conduits and tubing
- Multiple, mixed penetrants of all types
- Bus ducts, HVAC ducts, steel angles are not required on small HVAC ducts

Composite Sheet

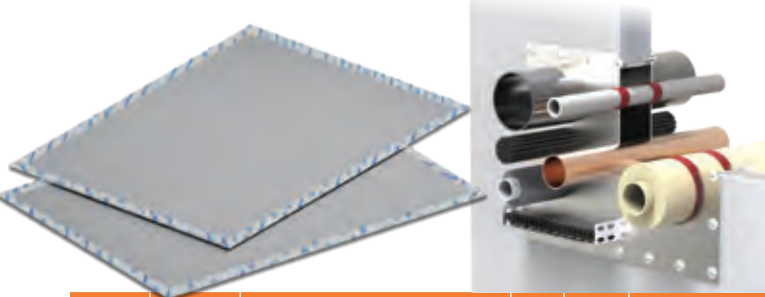

SpecSeal® Composite Sheet is the ideal solution for large openings where a permanent seal is required. Composite Sheet is a lightweight, rigid fire resistant panel consisting of an intumescent layer bonded to a galvanized steel sheet reinforced with steel wire mesh covered with aluminum foil. Composite sheet partners with other SpecSeal® firestop products, such as Firestop Collars and EZ-Path® Devices, to size down oversized openings. Custom sizes available upon request.

Features & Benefits:

- Lighter and thinner—approximately 1/2 the weight and thickness of traditional composite sheet
- Easier to fabricate—engineered with the installer in mind
- Can be cut and installed with common sheet metal tools
- Intumescent—expands up to 15 times when exposed to temperatures in excess of 350°F (177°C) compared to 8-10 times for competing brands; forms a dense insulative char that minimizes heat transfer
- Hole reduction—reduces large openings when used in conjunction with other SpecSeal® or EZ-Path® Products
- Acoustically tested—reduces sound transmission

Applications:

- Medium to large openings through common constructions
- Single or multiple cable trays for power, voice, and data
- Multiple metallic conduits and tubing
- Multiple mixed penetrants of many types
- Suitable for clean room/area environment
- Combine with the EZ-Path® System for cable penetrations through large openings
- Insulated metallic pipes, plastic pipes, and metal pipes
- Blank openings
- Bus ducts, HVAC ducts

cable penetration solutions

Intumescent Firestop Plug

SpecSeal® FP Intumescent Firestop Plugs are easy to install, creating a robust seal against fire and smoke. Firestop plugs make an excellent solution for temporary installation overnight, as well as permanent long-term seals for blank openings, and cable penetrations through common construction such as concrete or gypsum board. Sized to fit 2 in. and 4 in. diameter openings, firestop plugs make sealing conduit stubs and sleeves a breeze.

Features & Benefits:

- Intumescent—expands in all directions
- Easy to install—no special tools required
- Re-installable—easy retrofitting of cables
- Soft and resilient foam—conforms to cable surfaces
- Paintable—can be painted to match surroundings

Applications:

- Blank openings in sleeved concrete wall/floor and sleeved gypsum board steel or wood stud walls
- Cable Penetrations in sleeved concrete wall/floor and sleeved gypsum board steel or wood stud walls
- Max 2 in. diameter metallic and nonmetallic shower drain pipe

Putty

SpecSeal® SSP Firestop Putty excels at sealing cabling penetrations and outlet boxes. SSP Putty is non-hardening and easily hand works around grouped cabling penetrations forming a re-enterable seal allowing for future work.

Features & Benefits:

- Non-hardening for easy installation and retrofitting of cables
- Two-stage intumescence provides aggressive expansion
- Highly adhesive—stays put
- Unaffected by humidity, condensation, and water
- Soft, pliable, and easy to install
- Tested and proven acoustical properties
- No tools required

Applications:

- Small to medium openings through common constructions
- Sleeved openings for cable bundles
- Conduits

For Putty Pads see page 34

Intumescent Sealant

SpecSeal® SSS Firestop Sealant is a premium grade water-based Intumescent firestop sealant, that incorporates our proprietary two-stage intumescent technology making it the go to choice for any combustible or non-combustible penetrants. Only 1/2" applied depth will provide up to a 4 hr fire resistance rating when tested to ASTM E814/UL 1479.

Features & Benefits:

- Patented two-stage intumescent technology—extremely fast and directionalized expansion
- Water-based—easy installation, cleanup, and disposal
- Excellent smoke seal
- Low shrinkage/sandable and paintable (when dry)
- Acoustically tested—reduces noise transmission
- Auto-bonding—allows fresh sealant to adhere to cured sealant
- Water-resistant—will not re-emulsify when dry
- Safe—low VOCs, no solvents, non-halogenated

Applications:

- Metallic pipes, conduits, and tubing
- Nonmetallic pipes, conduits, and tubing (small diameter)
- Insulated pipes
- Multi-service penetrations including AC line sets, electrical, telephone, or TV service entrance and interior penetrations
- Great choice for industrial and institutional power and utility
- Complete wood floor firestopping package for electrical, plumbing, HVAC, TV, and telephone
- Cable, cable trays, and bus duct
- HVAC ductwork

sealants

Endothermic Sealant

SpecSeal® LC Endothermic Sealant is a latex-based gun grade firestop sealant for construction joints and non-combustible penetrations. After application, LC Sealant cures to form a flexible seal against the propagation of fire. Under fire exposure, LC absorbs heat and release water vapor resisting the progress of smoke and flame.

Features & Benefits:

- Water-based—easy installation, cleanup, and disposal
- Endothermic fillers—absorb heat and release water
- High solids formula—low shrinkage
- Auto-bonding—allows fresh sealant to adhere to cured sealant
- Sandable/paintable (when dry)
- Safe—low VOCs, no solvents, non-halogenated
- Excellent sealing properties along with high build capabilities
- Excellent smoke seal
- Acoustically tested—reduces noise transmission

Applications:

- Metallic pipes, conduits, and tubing
- Complex multiple penetrants
- Electrical cabling systems
- Great choice for industrial and institutional power and utility
- Construction joints
- HVAC ductwork

Intumescent Sealant

SpecSeal® LCI Firestop Sealant is a water-based intumescent sealant intended for a wide range of through-penetration and construction joint applications. SpecSeal® LCI Sealant has excellent caulking properties making it easy to apply in vertical applications as well as overhead.

Features & Benefits:

- Fast-acting intumescent—expands up to 10X
- Water-based—easy installation, cleanup, and disposal
- Excellent smoke seal
- Acoustically tested—reduces noise transmission
- Auto-bonding—allows fresh sealant to adhere to cured sealant
- Sandable and paintable (when dry)
- Water-resistant—will not re-emulsify when dry
- Safe—low VOCs, no solvents, non-halogenated

Applications:

- Metallic pipes, conduits, and tubing
- Nonmetallic pipes, conduits, and tubing
- Electrical and electronic cabling including service entrance, power distribution, computer, telephone, and television
- Metal ductwork including HVAC, bath, and dryer vents
- Insulated pipes including heating, cooling, and condensation applications
- Complete wood floor firestopping package for electrical, plumbing, HVAC, TV, and telephone
- Construction joints

Firestop Mortar

SpecSeal® SSM Firestop Mortar is a lightweight, cost-effective solution for oversized openings in concrete walls and floors. Once mixed with water, SpecSeal® Mortar forms a lightweight, low density slurry that easily applies into concrete walls and floors. SpecSeal® Mortar cures quickly and will not spill or crack due to freezing or changes in temperature.

Features & Benefits:

- Lightweight/low density—less forming and support required—easy retrofit
- Fast drying—forms come down faster
- Economical—highest yield per pound means lower installed cost
- Wide range of applications—includes aluminum cable tray
- Red color—easy identification and inspection.
- Chemical adhesion—reduces the need for expensive and time-consuming concrete fasteners
- Trowel-able or self-leveling
- Paintable

Applications:

- Medium to large openings through common constructions
- Loose cable for power, voice, and data
- Single or multiple cable trays for power, voice, and data
- Bus ducts
- Multiple metallic conduits, and lightweight tubing
- Multiple, mixed penetrants of all types

Silicone Sealant

SpecSeal® SIL300 Silicone Sealant is a high performance silicone firestop sealant tested to resist the passage of smoke, flame and water through construction joints and through-penetrations. SIL300 Sealant cures to form a flexible seal and carries a Class 1 W Rating for water resistance (Per ANSI/UL1479).

Features & Benefits:

- Low modulus—allows up to +/-35% movement capability
- Auto-bonding—allows fresh sealant to adhere to cured sealant
- Water-resistant—for water-tight sealing
- Ozone and UV-resistant—for excellent weathering ability and long service life
- Superb chemical resistance—best choice in polluted or corrosive atmospheres
- Outstanding adhesion to most building substrates (primerless adhesion)
- Acoustically tested—reduces noise transmission
- Excellent smoke seal
- Neutral cure
- UL® tested for W ratings

Applications:

- Slab Edge/Curtain wall, safig, and construction gaps
- Through-penetrations and joints
- High temperatures or movement
- Electrical, data, or telephone cables
- Seismic and expansion joints
- Top-of-wall joints
- Single or multiple metallic pipes, conduits, and tubing

Intumescent Firestop Caulk

WF300 Intumescent Firestop Caulk is a latex-based firestop caulk designed for residential wood frame construction. WF300 Caulk is tested for addressing penetrations through wood/frame construction such as wood stud walls and floor/ceiling assemblies. Under fire exposure, WF300 expands to up to four times its original volume.

Features & Benefits:

- Economical—delivers maximum fire protection at the right price
- Water-based—easy installation, cleanup, and disposal
- Intumescent—expansion fills gaps or voids caused by wood shrinkage, or burning or melting of combustible materials
- Auto-bonding—allows fresh sealant to adhere to cured sealant
- Acoustically tested—reduces noise transmission
- Excellent smoke seal
- Sandable/paintable (when dry)
- Water-resistant—will not re-emulsify when dry

Applications:

- Through-penetrations and gaps in wood frame construction

non-fire-rated sealants

SmokeBlock® Fireblock & Draftstop Caulk

SmokeBlock® Caulk is a non-combustible gun grade sealer for fireblocking and draft stopping in wood frame walls and floors. SmokeBlock® is designed for filling annular spaces around penetrants and along seams throughout the building envelope and is suitable for use in one or two family dwellings. Not suitable for use in fire-rated construction.

Features & Benefits:

- Water-based for easy clean-up
- No shaking or mixing required
- Adheres to wood and masonry
- Meets ASTM E136

Applications:

- Single family and Multi family dwellings
- Openings in non-fire-rated walls and floors
- Loose cable for power, voice, and data
- Metallic and Non-Metallic Piping
- HVAC Ducts, AC Linesets, Flue Vents

SmokeBlock® Fireblock Foam

SmokeBlock® Fireblocking Foam installs in seconds filling voids and annular spaces around penetrants preventing the spread of smoke and toxic gasses. SmokeBlock® Fireblocking Foam can be applied in both vertical and horizontal applications and is suitable to use in one and two family dwellings. Not suitable for use in fire-rated construction.

Features & Benefits:

- Meets Fireblock/Draftstop requirements of IBC Section 718 & IRC Section R302.11
- Adheres to wood and masonry
- Dispensable at any angle
- Paintable

Applications:

- Single family and Multi family dwellings
- Openings in non-fire-rated walls and floors
- Loose cable for power, voice, and data

Smoke'N'Sound Acoustical Spray

SpecSeal® Smoke 'N' Sound spray is a high quality acrylic latex spray designed for static or minimally dynamic linear joints or gaps. SpecSeal® Smoke 'N' Sound spray is formulated to adhere to all common construction surfaces and may be applied using airless spray equipment or with a brush (for small applications and touch ups).

Features & Benefits:

- Water-based—for easy installation and cleanup
- Excellent smoke seal
- Acoustically tested—reduces noise transmission
- High build characteristics
- Safe—low VOCs—no solvents, and non-halogenated
- Economical spray application saves labor
- Auto-bonding—allows fresh spray to adhere to cured spray
- Low abrasion—longer pump life and less maintenance
- Paintable (when dry)

Applications:

- Smoke control: where stopping the passage of smoke is necessary such as in smoke partition walls
- Noise control: where reducing the transmission of sound through wall openings is necessary to help ensure occupant privacy and peaceful environment
- Infectious/dust control: where reducing the transmission of dust and other airborne particulates through wall openings is necessary

Smoke'N'Sound Acoustical Sealant

A high quality acrylic latex sealant designed for sealing through-penetrations (such as pipes, conduits, cabling, busways, and openings) and membrane penetrations (such as p-traps and outlet boxes) in smoke resistant walls.

Features & Benefits:

- Economical—high performance without the high price
- Water-resistant—will not re-emulsify when dry
- Water-based—easy installation, cleanup, and disposal
- Remains Flexible—allows movement
- Acoustically tested
- Safe—low VOCs—no solvents, and non-halogenated
- Paintable (when dry)
- Auto-bonding—allows fresh sealant to adhere to cured sealant

Applications:

- Smoke control: where stopping the passage of smoke is necessary such as in smoke partition walls
- Noise control: where reducing the transmission of sound through wall openings is necessary to help ensure occupant privacy and peaceful environment
- Infectious/dust control: where reducing the transmission of dust and other airborne particulates through wall openings is necessary

collars

Intumescent Firestop Collars

SpecSeal® SSC Firestop Collars are factory-manufactured firestop devices sized to plastic pipes of up to 6 in. Trade Size. SSC Collars consist of a restraining collar with a factory applied intumescent ensuring the correct amount of material is applied every time. Under fire exposure, SSC Collars quickly expand and collapse combustible piping forming a dense char, resisting the passage of smoke and flame.

Features & Benefits:

- Easy installation—uses STI's quick closure system
- Water-resistant—no water soluble or hygroscopic ingredients
- Fast-acting expansion (up to 60X)—to seal off burning pipes
- Safe for contact with plastics
- Tested to 50 Pa of pressure (CAN/ULC S115)

Applications:

- Protects a variety of plastic pipes—XFR PVC, PVC, PVC Foam Core (ccPVC), CPVC, ABS, ABS Foam Core (ccABS), FRPP, PP, PVDF, and HDPE pipes
- Vented (DWV) and closed (electrical conduit and water supply) installations

Intumescent Firestop Collars

SpecSeal® RTC Firestop Collars adapt to the size combustible pipe that you are working with. One collar is designed to address standard 3 in. & 4 in. plastic pipes as well as their associated couplings. RTC Firestop Collars adaptable nature make them an excellent tool to have at hand when bringing combustible penetrations up to code.

Features & Benefits:

- Adjustable—one collar fits 3 in. and 4 in. pipes and corresponding couplings
- Rapid expansion—closes off burning pipes quickly
- Small profile—use it in all the tight spots
- Flexible and durable—no loose flakes (eye hazards)
- Water-resistant—no water soluble or hygroscopic ingredients
- Economical—lower installed cost
- High volume char—expands up to 60 times
- Replaces traditional field installed wrap strip/restraining collar systems for pipe couplings.
- Reduces inventory—one convenient product covers 3 in. and 4 in. trade size pipes. Use sealant for 2 in. and smaller trade size pipes

Applications:

- Protects a variety of plastic pipes and couplings including PVC, PVC Cellular Core (ccPVC), CPVC, ABS, and ABS Cellular Core (ccABS)
- Both vented (DWV) and closed (electrical conduit or water supply) installations
- All common constructions including concrete floors, concrete over steel deck, concrete walls, concrete block wall, gypsum board/stud walls, wood flooring/ceiling assemblies

collars, wrap strips

Intumescent Firestop Collars

SpecSeal® LCC Firestop Collars are factory-manufactured firestop devices sized to plastic pipes of up to 4 in. Trade Size. LCC Collars consist of a restraining collar with a factory applied intumescent ensuring the correct amount of material is applied every time.

Features & Benefits:

- Easy installation—uses STI's quick closure system
- Compact profile—use it in all the tight spots
- Water-resistant—no water soluble or hygroscopic ingredients
- Fast-acting expansion (up to 60X)—to seal off burning pipes
- Safe for contact with plastics

Applications

- Protects a variety of plastic pipes—PVC, PVC Foam Core (ccPVC), CPVC, ABS, ABS Foam Core (ccABS), FRPP, PP, PVDF, and HDPE pipes
- Vented (DWV) and closed (electrical conduit and water supply) installations

Intumescent Wrap Strips

Available in a variety of sizes and types to tackle any combustible penetration. SSW Wrap Strips are available in convenient rolls or individually pre-sized strips.

RED2—General purpose wrap strip good for most common penetrants. It is provided in 1-1/2 in. wide by 1/8 in. thick by 12 ft. (38 x 3 mm x 366 cm) rolls.

BLU2—Premium grade wrap strip for more exotic plastics or optimized for various tuck-in methods and larger pipes. It is provided in 2 in. wide by 1/8 in. thick by 12 ft. long (51 x 3 mm x 366 cm) rolls or precut strips.

SSW Series—Made in both 12 ft. (366 cm) rolls and precut strips. Our SSW Series comes in a variety of thicknesses ranging from 1/8 in. (3 mm) to 0.69 in. (17.5 mm) and widths ranging from 1-1/2 in. (38 mm) to 2-1/2 in. (64 mm) to handle the most demanding applications.

Features & Benefits:

- Rapid intumescent expansion—closes off burning penetrants quickly
- Water resistant—no water soluble or hydroscopic ingredients
- Soft and flexible—easy to cut, and easy to wrap
- Suitable for use in field-assembled collars or tuck-in applications

Applications:

- Combustible penetrants such as nonmetallic pipes or pipe insulation
- Concrete floors, concrete walls, gypsum board walls, wood floor/ceilings

pillows, composite sheet

Intumescent Firestop Pillows

SpecSeal® SSB Firestop Pillows easily compress and conform around any penetrant. Equally suited for new or existing conditions, SpecSeal® Pillows make short work of even the most complex through-penetration firestop conditions.

Features & Benefits:

- Intumescent—expands in all directions for a tough, tight seal
- Single side application makes installation easy for tough access openings
- Re-installable for easy retrofitting of cables
- Heat-sealed poly cover protects core and makes pillows slide in and out with ease
- Superior air leakage ratings—broad base of tested systems
- Lightweight—easier installation
- Heat-sealed poly bag—strong and durable
No sewn seams to unravel or tear. No irritating fiberglass
- No special tools required
- Monolithic Encapsulated Core: No loose fill

Applications:

- Medium to large openings through common constructions
- Loose cable for power, voice, and data
- Single or multiple cable trays for power, voice, and data
- Multiple metallic conduits and tubing
- Multiple, mixed penetrants of all types
- Bus ducts, HVAC ducts, and steel angles not required on small HVAC ducts

Composite Sheet

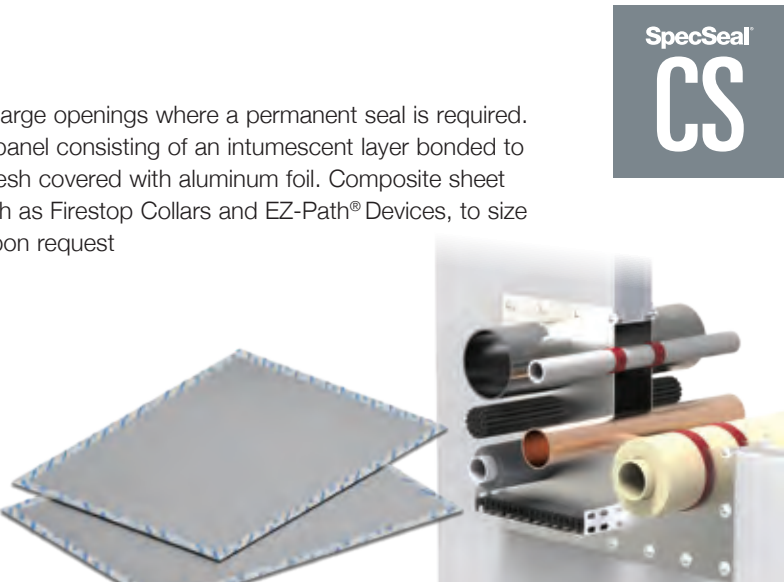

SpecSeal® Composite Sheet is the ideal solution for large openings where a permanent seal is required. Composite Sheet is a lightweight, rigid fire resistant panel consisting of an intumescent layer bonded to a galvanized steel sheet reinforced with steel wire mesh covered with aluminum foil. Composite sheet partners with other SpecSeal® firestop products, such as Firestop Collars and EZ-Path® Devices, to size down oversized openings. Custom sizes available upon request

Features & Benefits:

- Lighter and thinner—approximately 1/2 the lightweight and thickness of the traditional composite sheet
- Easier to fabricate—engineered with the installer in mind
- Can be cut and installed with common sheet metal tools
- Intumescent—expands up to 15 times when exposed to temperatures in excess of 350°F (177°C) compared to 8-10 times for competing brands. Forms a dense insulative char that minimizes heat transfer
- Hole reduction—reduces large openings when used in conjunction with other SpecSeal® or EZ-Path® Products
- Acoustically tested—reduces sound transmission

Applications:

- Medium to large openings through common constructions
- Single or multiple cable trays for power, voice, and data
- Multiple metallic pipes, conduit and tubing
- Multiple mixed penetrants of many types
- Suitable for clean room/area environment
- Combine with the EZ-PATH® System for cable penetrations through large openings
- Insulated metallic pipes, plastic pipes, and metal pipes
- Blank openings
- Bus ducts, HVAC ducts

cast-in devices

Cast-In Firestop Device

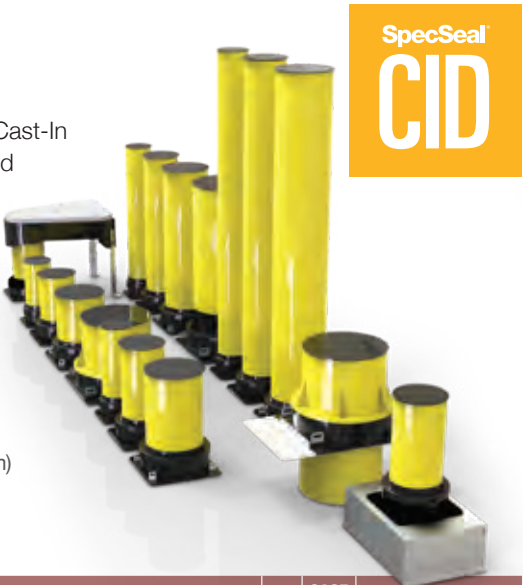

Eliminate coring and firestop before the concrete pour with SpecSeal® CID Cast-In Firestop Devices. SpecSeal® Cast-In Devices are a sleeve, concrete core and firestop rolled into a single device. Custom sizes available upon request.

Features & Benefits:

- Saves money by eliminating core drilling
- Saves time. No firestopping step required
- Provides pre-installed fire and smoke sealing
- Provides added protection against transient water
- Adapts to a wide variety of construction conditions
- Pipes can be installed from top or bottom
- Four heights for a greater range of concrete depth

Applications:

- 2 in. , 3 in. , 4 in. , and 6 in. Trade Size plastic or metallic pipes
- Insulated metallic pipes
- Cable bundles
- Concrete ranging in depth from 2-1/2 in. (64 mm) to 8 in. (204 mm)
- Concrete greater than 8 in. (204 mm) using available extension tubes
- Concrete over steel deck using available Deck Adapter Kit

hvac, plumbing

FyreFlange™ HVAC Firestop Angle

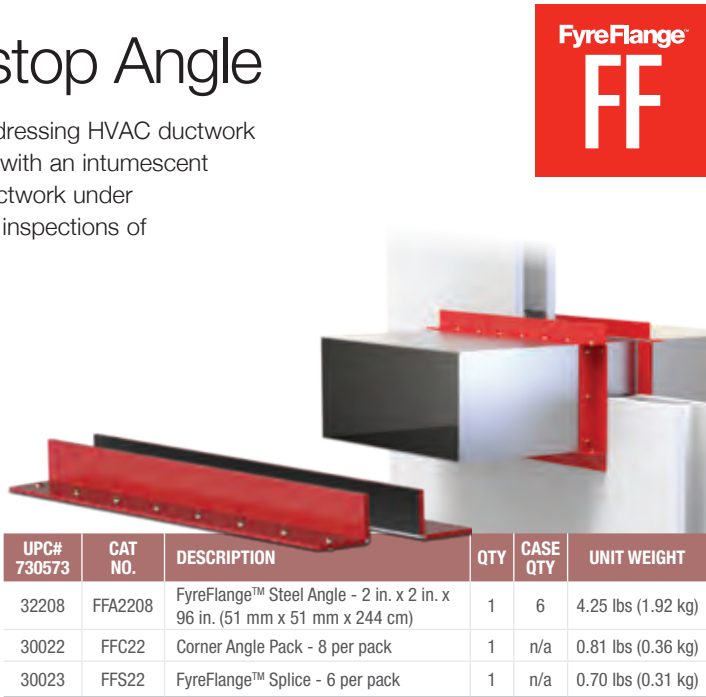

FyreFlange™ Firestop Angle is a single step solution to addressing HVAC ductwork penetrations. FyreFlange™ consists of a heavy steel angle with an intumescent gasket, sealing against fire and smoke while reinforcing ductwork under exposure. Eliminate the headaches of staging and multiple inspections of traditional HVAC firestopping with FyreFlange™.

Features & Benefits:

- Single stage installation
- Economical—saves labor
- Clearly marked for easy inspection
- No additional firestop or backing material required
- Eliminates the need for multiple inspections
- Can be installed over or under duct installation

Applications:

- For use with max. 2 in. thick light density insulation, insulated or non-insulated ducts in walls
- UL® Certified systems for HVAC ducts through masonry walls and gypsum board steel or wood stud walls and concrete floors

UPC#	CAT NO.	DESCRIPTION	QTY	CASE QTY	UNIT WEIGHT

Closet Flange Firestop Gasket

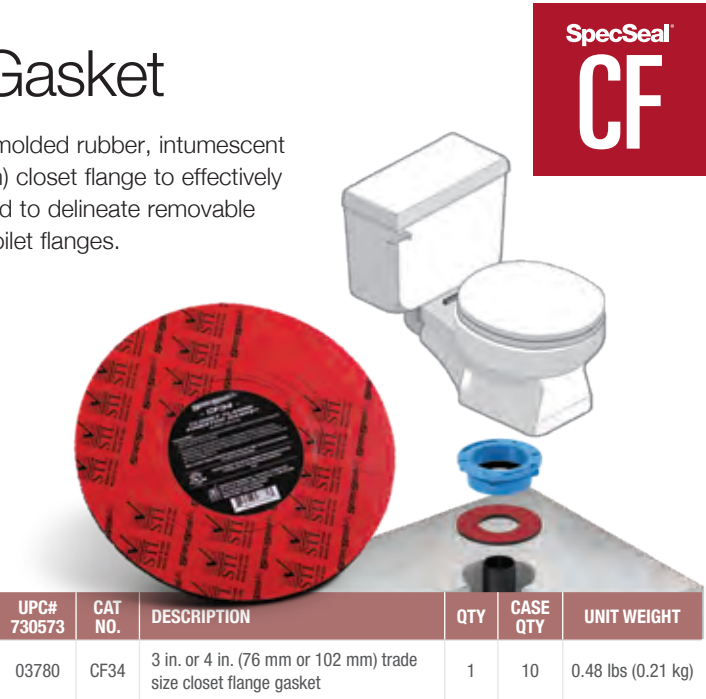

SpecSeal® Closet Flange Firestop Gaskets are one-piece, molded rubber, intumescent pads that install beneath a 3 in. or 4 in. (76 mm or 102 mm) closet flange to effectively firestop the opening. The die cut rubber gasket is perforated to delineate removable inserts sized to accommodate various outer diameters of toilet flanges.

Features & Benefits:

- Seamless fit for fast, easy installation with no tools required
- Lower installation cost
- Foolproof installations
- Installs from the top, saving labor
- No caulk to clean up
- Always ready to use—no shelf life—no caulk tubes to dry out
- UL® Certified code compliant

Applications:

- Designed to allow the drain pipe connected to a toilet flange to be properly firestopped without the need for firestop caulk for typical floor assemblies with plastic or metal pipes
- Iron toilet flange and drain pipe through min 2-1/2 in. thick concrete floor and wood floor/ceiling assembly
- PVC & ABS toilet flange and drain pipe through min 2-1/2 in. thick concrete floor and wood floor/ceiling assembly

plugs, putty, & pads

Intumescent Firestop Plug

SpecSeal® FP Intumescent Firestop Plugs are easy to install, creating a robust seal against fire and smoke. Firestop plugs make an excellent solution for temporary installation overnight, as well as permanent long-term seals for blank openings, and cable penetrations through common construction such as concrete or gypsum board. Sized to fit 2 in. and 4 in. diameter openings, firestop plugs make sealing conduit stubs and sleeves a breeze.

Features & Benefits:

- Intumescent—expands in all directions
- Re-installable—easy retrofitting of cables
- Easy to install—no special tools required
- Soft and resilient foam—conforms to cable surfaces
- Paintable—can be painted to match surroundings

Applications:

- Blank openings in sleeved concrete wall/floor and sleeved gypsum board steel or wood stud walls
- Cable Penetrations in sleeved concrete wall/floor and sleeved gypsum board steel or wood stud walls
- Max 2 in. diameter metallic and nonmetallic shower drain pipe

electrical

PowerShield® Electrical Box Insert

SpecSeal® EP PowerShield® Electrical Box Inserts install within steel electrical boxes directly against the back of the box. PowerShield® Box inserts are equally suited for remediation as well as preinstallation before the boxes have made it to the job site. PowerShield® Box inserts incorporate pre-scored openings allowing for easy installation around ground lugs.

Features & Benefits:

- Easy installation—just peel and stick to inside of box
- Can be installed before or after wall is closed
- Non-conductive liner face and safe for use inside box
- Easy retrofit installation
- Rapid expansion, up to 24X, quickly seals off the passage of fire and smoke
- Low profile for minimum impact on box volume
- Tested and proven acoustical properties
- One step installation saves time and labor
- Conveniently sized to fit common switch and receptacle boxes

Applications:

- Single and multi-gang metallic boxes up to 14 in. (356 mm) long
- Plastic and steel faceplates
- 1 and 2 hour wood or steel stud walls

SpecSeal® EP

TEST STANDARDS: UL263 (ASTM E119, NFPA 251), ASTM E90

Putty Pads

SpecSeal® SSP Firestop Putty excels at sealing cabling penetrations and outlet boxes. SSP Putty is non-hardening and easily hand works around grouped cabling penetrations forming a re-enterable seal allowing for future work. When applied with outlet boxes, SSP Putty easily works into voids and seams forming a continuous seal against fire and the products of combustion.

Putty Features & Benefits:

- Non-hardening for easy installation and retrofitting of cables
- Two-stage intumescence provides aggressive expansion
- Highly adhesive—stays put
- Unaffected by humidity, condensation, water
- Soft, pliable, easy to install
- Tested and proven acoustical properties
- No tools required

Pad Features & Benefits:

- Fits common 4S box with no cutting or trimming
- Poly liner allows hands-off, clean installation
- Single & multi-gang metallic boxes up to 14 in. (356 mm) long
- A variety of non-metallic boxes
- Plastic and steel faceplates
- 1 and 2 hr. wood or steel stud walls

Putty Applications:

- Small to medium openings through common constructions
- Single or multiple cables/trays for power, voice, and data
- Sleeved openings for cable bundles
- Conduits

E-Wrap™ Endothermic Wrap

E-Wrap™ Endothermic Wrap is the ideal solution for fire protection of critical circuits and infrastructure such as fire pumps, signaling equipment, elevators, alarms, process control equipment, or distributed antenna systems (DAS). When this supple, protective wrap is installed around conduits or cable trays, E-Wrap™ provides up to 2 hours of circuit integrity ensuring continued operation under fire conditions.

Features & Benefits:

- Flexible material – easy to install, even on small diameter conduits
- Fewer layers required for protection – better coverage per roll
- Endothermic – releases chemically bound water to have a cooling effect
- Low Density – Weighs less than competing wraps
- May be used to achieve equal F&T Ratings on penetration firestop systems.
- Tested to ASTM E1725 for electrical circuit integrity

TEST STANDARDS: ASTM E1725

electrical

Cable Spray

SpecSeal® Cable Spray applies quickly to grouped cables within cable trays, providing protection against cable jacketing ignition from direct fire exposure and slowing flame propagation. Cable Spray applies quickly with an airless spray rig, only requiring a minimum 1/8" wet applied thickness. Once cured, Cable Spray forms a flexible, water and weather resistance seal adhering to virtually all cable jacketing materials.

Features & Benefits:

- Easy and economical to use
- Water-based—easy cleanup, installation, and disposal
- Low friction formula—less pump wear
- Contains no inorganic fibers, asbestos, or solvents.
- Factory Mutual tested and approved.
- Brushable for touch ups, spot repairs, or small applications

Applications:

- Encapsulate grouped cables.
- Apply as fire breaks in cable tray runs

PERIMETER FIRE BARRIER PROTECTION

A building’s facade is distinctive. Perimeter fire barrier systems in high rise construction are an important life safety consideration, but sound fire containment practices should not interfere with design aesthetics. As a designer or builder, you need perimeter fire barrier systems that afford adaptability to work with your design, and STI can help.

perimeter
fire barrier
protection

PERIMETER FIRE BARRIER PROTECTION

perimeter fire barrier protection

System Coverage Breadth Matters

STI Firestop, the leader in tested and listed curtain wall perimeter fire barrier systems, offers greater flexibility to conform to your design.

Perimeter fire barrier systems are code mandated, and code officials, authorities having jurisdiction (AHJ), or other inspectors verifying building code compliance can scrutinize slab-edge conditions. More tested and listed systems means a greater probability of code conformance, and that keeps your project on track.

Codes & Technology

Curtain wall perimeter fire barrier systems are tested to ASTM E2307. This test method uses a two-story structure known as the intermediate scale multi-story test apparatus (ISMA). The ISMA structure subjects the test assembly to fire exposure from two sides simultaneously with an exterior burner that replicates a fire induced window break. A perimeter fire barrier system must withstand the passage of flame from the lower floor to the upper floor via the gap between the floor and curtain wall.

Building codes, such as the International Building Code® (IBC) and NFPA® 5000, include provisions for preventing the floor-to-floor spread of fire and specifically refer to ASTM E2307.

Tested and Listed Systems Ensure Code Compliance

STI Firestop understands the nuances of curtain wall and perimeter fire barrier systems because of our commitment to research and development. With more tested and listed systems for perimeter fire barrier systems than any other manufacturer, our versatile solutions conform to virtually any jobsite condition.

Back Pan Curtain Walls: Our patented shelf-system replicates real world curtain wall construction. It is the only practical system that can be built in a factory.

Shorter Spandrels; Lower Sill Heights:

Accommodates more vision glass.

More Facade Types: Glass (opaque or clear), aluminum, stone, brick veneer, EIFS, GFRC, precast concrete, composite metal panels, and more.

Multiple Insulation Attachments: A variety of tested methods to support and attach curtain wall insulation offers unmatched flexibility in the field and lowers the overall cost of installation.

Pipes & Cables Through Floor Gap: Pipes for radiators or electrical cables are tested to pass through the safing gap.

Fire Ratings: Tested and listed systems up to 4 hours have you covered.

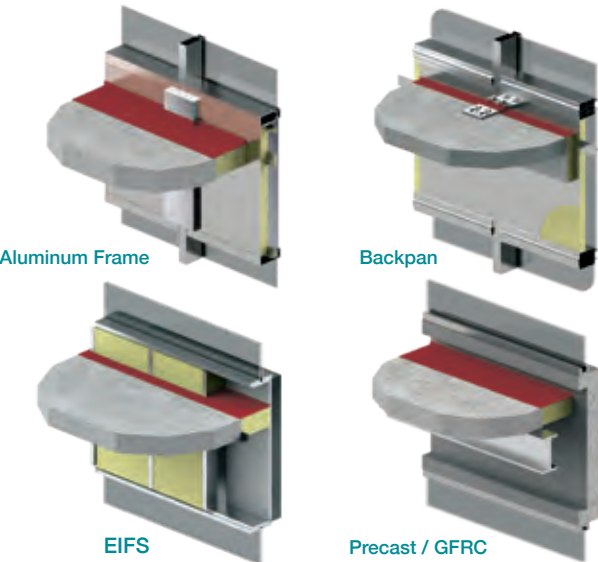

All Major Mineral Wool Brands: Testing for all commercially available mineral wool brands.

Block Smoke Leakage: Low L Ratings (<1 CFM/LF) included in systems to confirm ability of coating to limit air and smoke movement.

Real World Movement: Dynamic tests replicate real world movement ranges and remain practical to install for construction workers using common tools and methods.

Acoustics: Superior STC Ratings to help mitigate the effects of sound flanking at the slab edge.

Water-Resistance: Products dry quickly and will not re-emulsify. Watertight/all weather grade available.

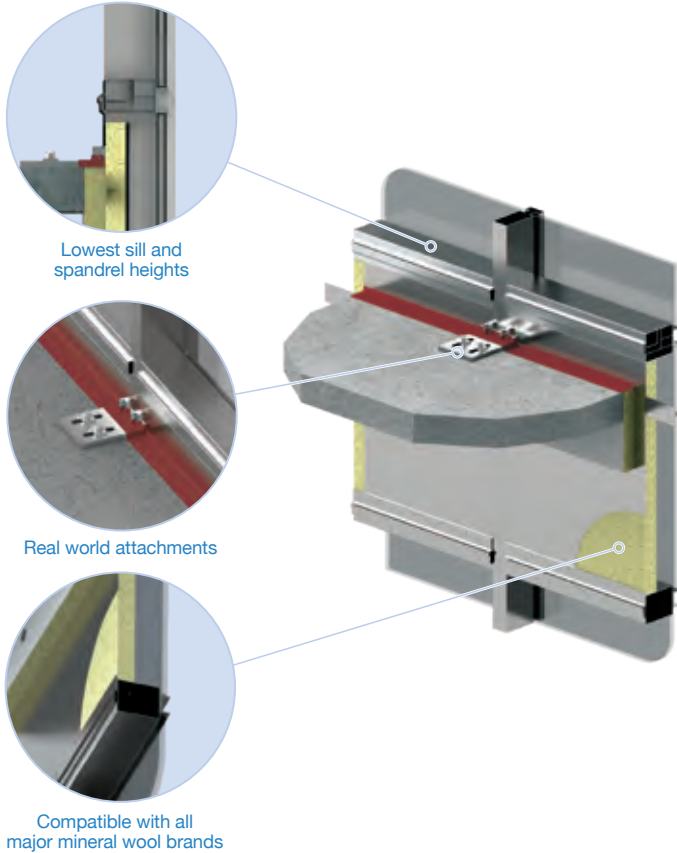

backpans, aluminum frames

Backpans

Unitized backpan designs have become increasingly popular, presenting a multitude of new challenges under fire conditions. During a fire, deflection of the steel backpan can cause severe repercussions on the performance of the spandrel insulation, the safing insulation, and the firestop spray. Our systems are engineered to maintain the integrity of the wall to meet code requirements.

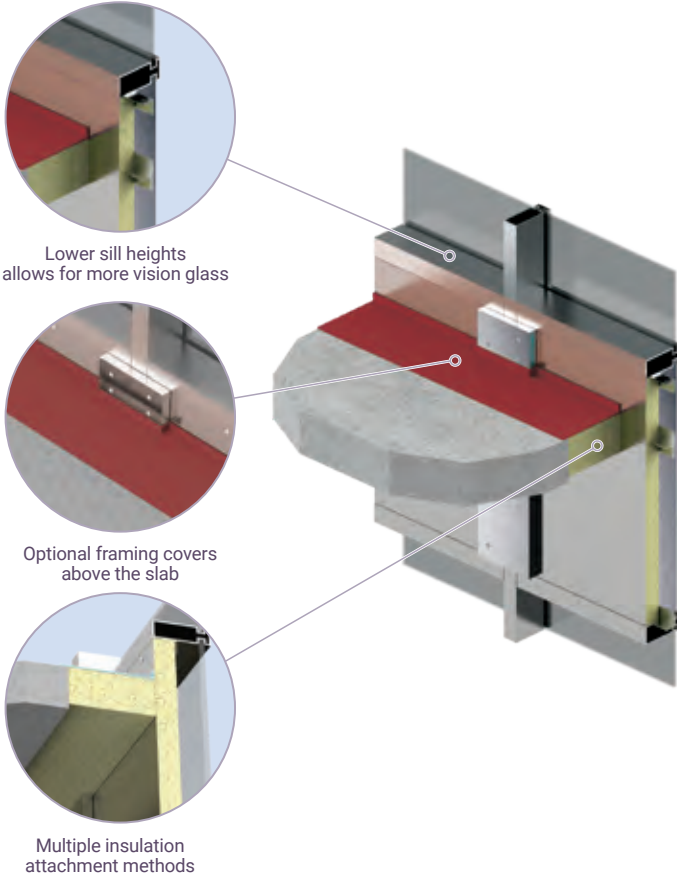

- One or two-piece tubular aluminum frames
- Minimum 22 gauge flush or recessed steel backpans vs. 18 gauge
- Lowest sill and spandrel heights
- Multiple spandrel types
 - Transparent or opaque glass panels
 - Aluminum panels and stone panels
 - Aluminum composite panels
- Optional shadow box for transparent glass panels
- Multiple insulation manufacturers
- Shortest transom spacing
- Shortest sill heights
- Documented "L ratings
- Penetration in the safing slot
- Vertical shear movement

Aluminum Frames

STI has the most extensive testing for aluminum framed curtain walls whether factory-built unitized or field-fabricated stick. Our UL® Certified Systems provide the flexibility you need to complete your project on time with demonstrated code compliance.

- Aluminum tube systems with solid one-piece or split two-piece mullions and transoms
- I-beam mullions
- Lower sill heights and shorter spandrel panels
- Multiple spandrel types
 - Transparent or opaque glass panels
 - Aluminum or aluminum composite panels
 - Stone
- Optional shadow box systems for transparent glass panels
- Multiple spandrel insulation attachment methods
 - Continuous steel angles
 - Hat channels
 - Insulation hangers and steel pins
- Multiple insulation manufacturers
- Optional penetrations in the safing slot
- Documented L Ratings
- Penetration in the safing slot
- Vertical shear movement

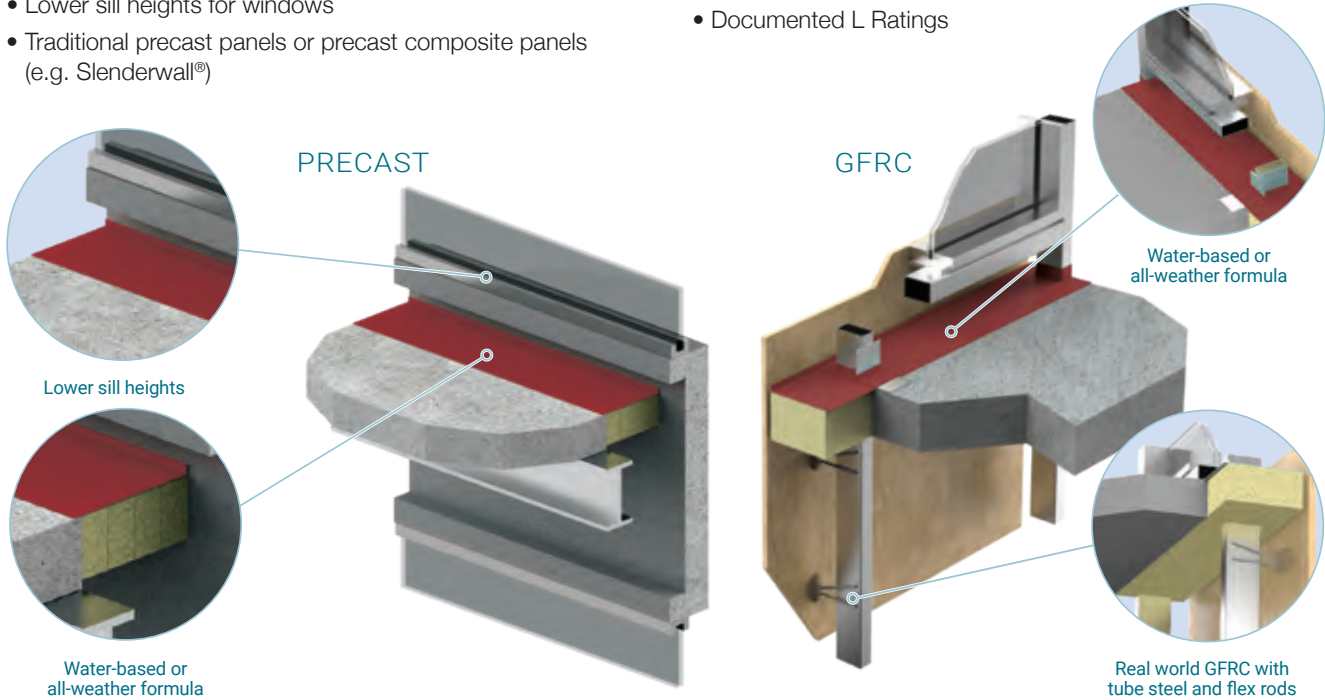

precast, gfrc, eifs

Precast/GFRC

Coverage for precast concrete or GFRC is another one of our specialties, and our UL® Certified Systems are the most comprehensive.

- Lower sill heights for windows
- Traditional precast panels or precast composite panels (e.g. Slenderwall®)

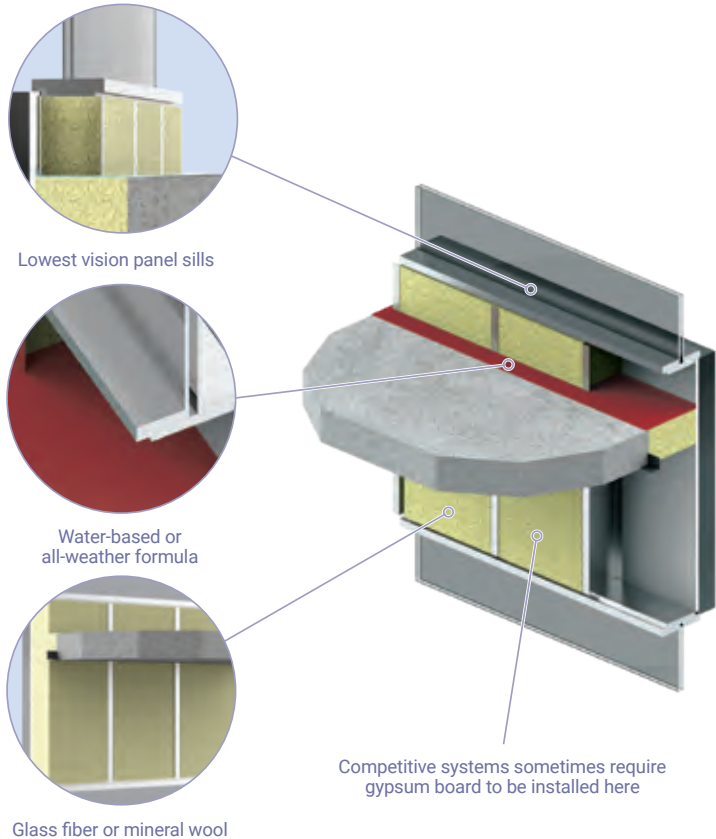

- Real world GFRC on tube steel frames with flex rods
- Insulated or non-insulated designs
- Multiple insulation manufacturers tested
- Documented L Ratings

EIFS

STI has extensive testing with steel-framed exterior walls with EIFS or a variety of different veneers, offering the very best package of UL® Certified systems for common jobsite conditions.

- Lowest sill heights for windows
- Common steel stud configurations
 - Coverage for cantilevered track conditions
 - King stud options
- Gypsum sheathing or cementitious backer units
- Multiple exterior finishes:
 - EIFS
 - Aluminum or steel siding
 - Brick veneer
 - Stucco
 - GFRC
- Glass fiber or mineral wool insulation options
- Penetrations through the safig slot
- Documented L Ratings
- No gypsum on underside of wall

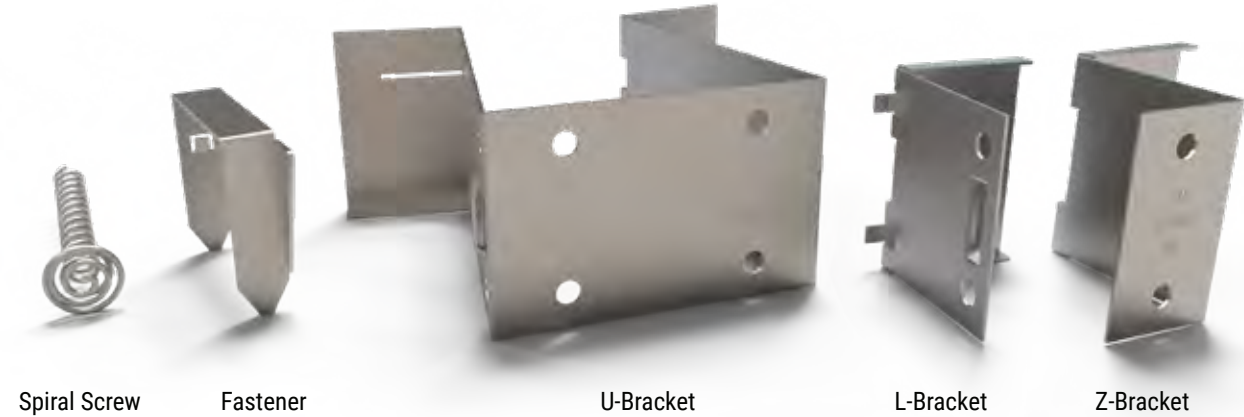

curtain wall

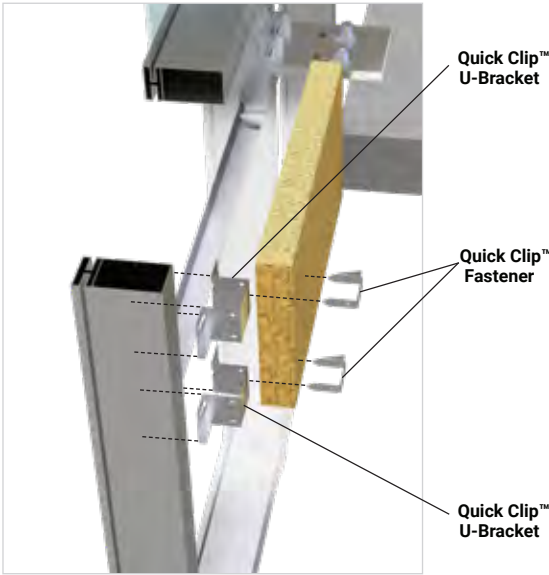

Quick Clip™ Perimeter Fire Barrier System

SpecSeal® Quick Clip™ Perimeter Fire Barrier System is designed to accelerate the installation of curtain wall insulation for perimeter fire barrier systems. The system's unique brackets clip onto the mullions without direct attachment by screws to support the curtain wall insulation. Self-locking fasteners secure the insulation panels in place. Whether it's onsite or factory installed, Quick Clip™ can dramatically reduce your installation costs.

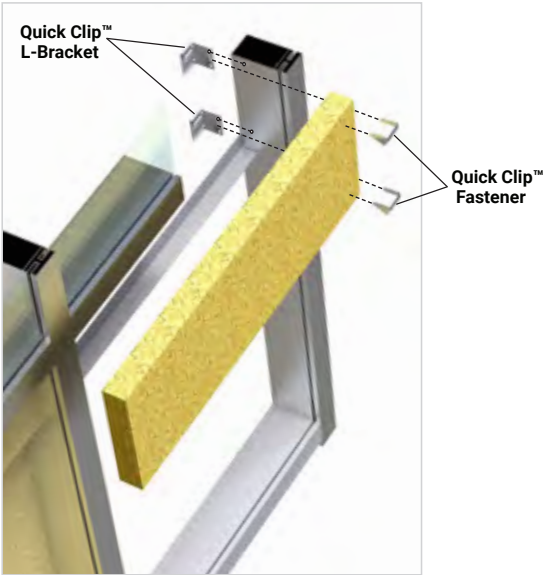

Quick Clip™ Perimeter Fire Barrier System Field Installation

Patent Pending

Quick Clip™ Perimeter Fire Barrier System Factory Installation

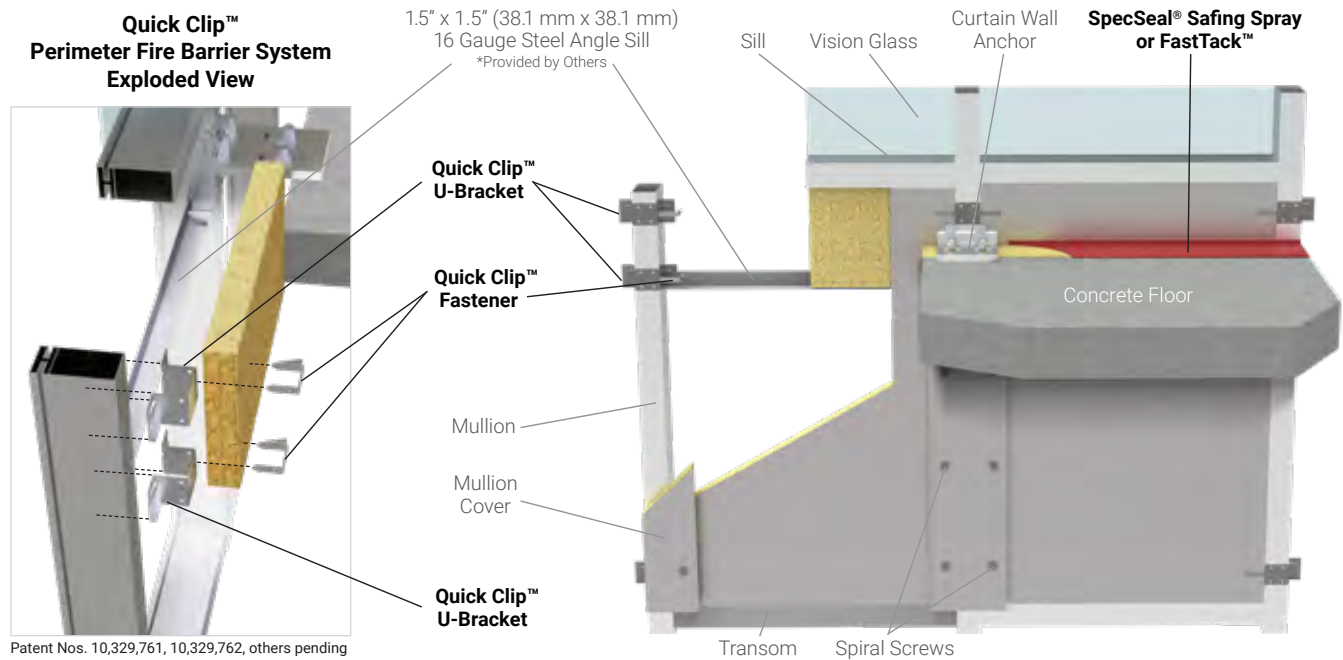

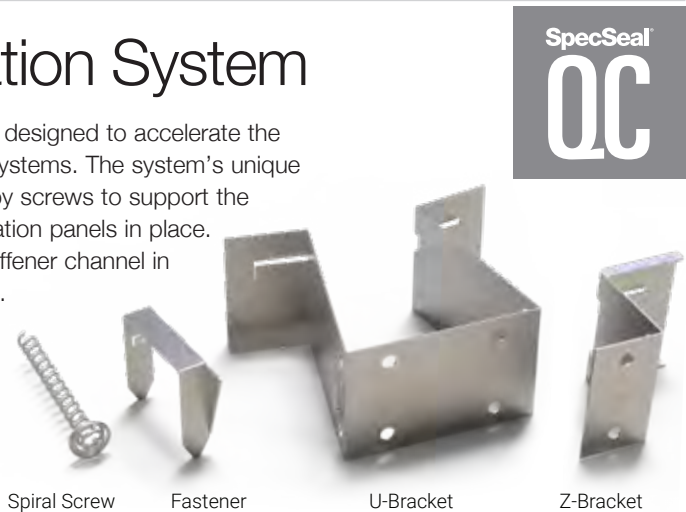

Patent Pending

Quick Clip™ Field Installation System

SpecSeal® Quick Clip™ Perimeter Fire Barrier System is designed to accelerate the installation of curtain wall insulation for perimeter fire barrier systems. The system's unique U-brackets clip onto the mullions without direct attachment by screws to support the curtain wall insulation. Self-locking fasteners secure the insulation panels in place. Each U-bracket has a receiving slot to lock an "L-shaped" stiffener channel in place without the need for mechanical attachment by screws.

Features & Benefits:

- Tested to ASTM E1233 for 100 MPH+ wind-loads
- Reduce or eliminate use of steel screws into framing members
- Meets ASTM E2307 for up to 2 hours of fire resistance

Quick Clip™ Factory Installation System

SpecSeal® Quick Clip™ L-Bracket Perimeter Fire Barrier System is the fastest way to install curtain wall insulation for perimeter fire barrier systems. Simply fasten the L-shaped brackets to the mullion, cut and fit the curtain wall insulation, and then secure the insulation in place with self-locking fasteners. The brackets also allow the stiffener channel to be locked into place without additional mechanical attachment. This versatile system is great for factory-insulated curtain wall panels or recladding projects where the system will be installed from the building's exterior.

Features & Benefits:

- Tested to ASTM E1233 for 100 MPH+ wind-loads
- All components can be installed from the glass side to make glazing easier— no more flipping units
- Meets ASTM E2307 for up to 2 hours of fire resistance

curtain wall sprays

Safing Spray

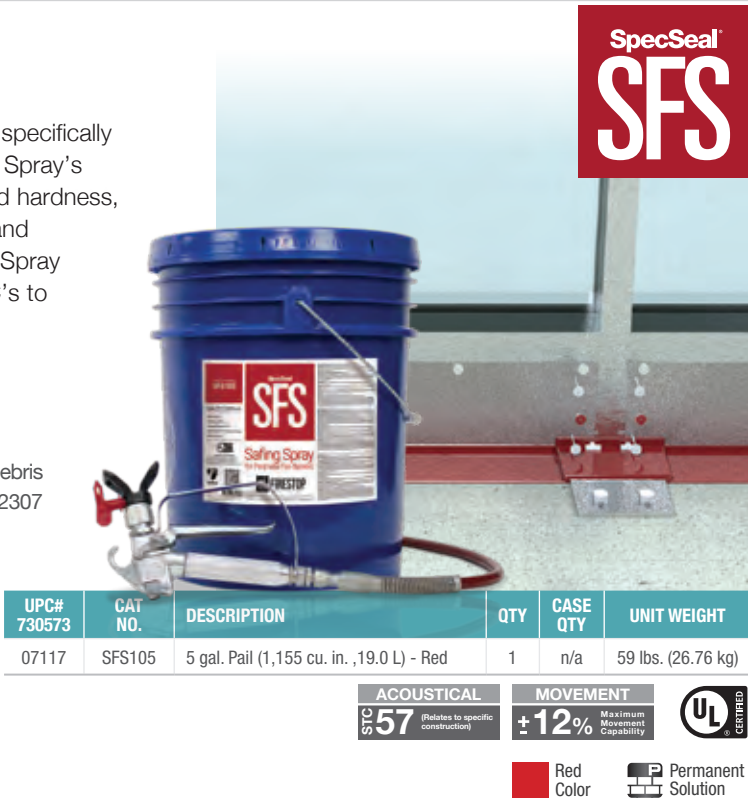

SpecSeal® Safing Spray is a latex-based firestop spray specifically formulated for perimeter fire barrier applications. Safing Spray's formulation is the perfect balance between elasticity and hardness, curing to form a durable seal that is resistant to water and damage from construction debris. Prior to cure, Safing Spray easily cleans up with water and has extremely low VOC's to meet demanding regulatory requirements.

Features & Benefits:

- Optimized for curtain wall conditions
- Shore A Hardness of 65 per ASTM D2240
- Tough polymer designed to resist damage from construction debris
- Tested for up to 4 Hour fire resistance when tested to ASTM E2307
- Fast drying latex binder base
- Easy cleanup with water
- Approved with penetrants in safing slot
- Allows for vertical application for column or shear wall interfaces
- Listed in over 100 UL® tested curtain wall systems

Applications:

- Slab edge/curtain wall conditions

Firestop Spray

FastTack® Firestop Spray is the ultimate in weather resistant firestop sprays. FastTack®'s hybrid copolymer formula was developed to counter the stalling effects of weather while providing unmatched washout resistance and the industry's fastest tack-free times. FastTack® outperforms and outlasts all competing firestop coatings providing the most versatile protection on the market.

Features & Benefits:

- All-weather formula
- Early rain resistance (24 Hr Exposure; ASTM D6904) PASS
- Skins over quickly to resist water
- Tack-free in 35-45 minutes @ 77°F, 50% humidity (ASTM C679)
- For use in extreme weather conditions (cold or rain)
- Cures below freezing
- Can be top coated, spray coated or flow applied
- Auto-bonds for easy touch ups

Applications:

- Slab edge/curtain wall conditions
- Floor to floor joints
- Floor to wall joints

curtain wall anchor protection

Connection Protection

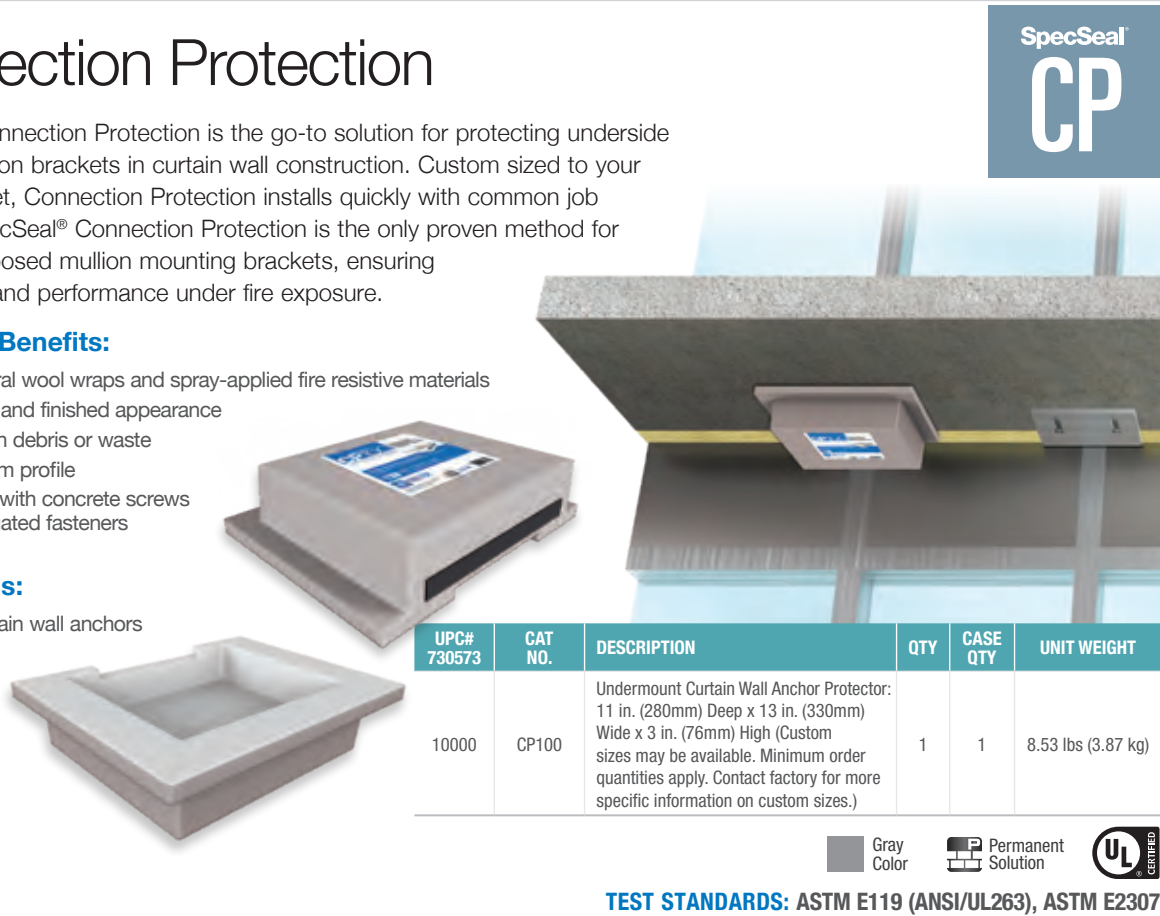

SpecSeal® Connection Protection is the go-to solution for protecting underside mounted mullion brackets in curtain wall construction. Custom sized to your style of bracket, Connection Protection installs quickly with common job site tools. SpecSeal® Connection Protection is the only proven method for protecting exposed mullion mounting brackets, ensuring their integrity and performance under fire exposure.

Features & Benefits:

- Eliminate mineral wool wraps and spray-applied fire resistive materials
- Professional fit and finished appearance
- No construction debris or waste
- Lightweight, slim profile
- Installs quickly with concrete screws or powder actuated fasteners

Applications:

- Slab edge/curtain wall anchors

UPC#	CAT NO.	DESCRIPTION	QTY	CASE QTY	UNIT WEIGHT

Elastomeric Spray

SpecSeal® AS200 Elastomeric Spray is a latex-based elastomeric firestop spray for construction joints and perimeter fire barrier applications. AS200 cures to form a durable seal that resists the passage of the products of combustion while accommodating for high dynamic joint movement.

Features & Benefits:

- Original quick-dry elastomeric formula
- Water-based—for easy installation, cleanup, and disposal
- Thixotropic—superior high-build properties
- Safe—low VOCs, no solvents, non-halogenated
- Auto-bonding—may be re-coated or repaired using ES Sealant
- Low abrasion—for longer pump life and less maintenance
- Tested with direct-applied fireproofing
- Acoustically tested—reduces noise transmission
- Water-resistant—will not re-emulsify when dry
- Paintable (when dry)
- Up to 50% movement (ASTM E1966/UL2079)

Applications:

- Slab edge/curtain wall conditions
- Head of wall—concrete fluted deck to gypsum wall/masonry wall
- Head of wall—concrete slab to gypsum wall/masonry wall
- Control/expansion joints (wall & floor)

Adequate sealing of Construction Joints involves not just the achievable fire and smoke ratings, but also surviving the movement of the underlying joint. STI is a leader in the development of construction joint firestop materials offering products and solutions that exceed even the most extreme of movement needs.

Elastomeric Spray

SpecSeal® AS200 Elastomeric Spray is a latex-based elastomeric firestop spray for construction joints and perimeter fire barrier applications. AS200 cures to form a durable seal that resists the passage of the products of combustion while accommodating for high dynamic joint movement.

Features & Benefits:

- Original quick-dry elastomeric formula
- Water-based—for easy installation, cleanup, and disposal
- Thixotropic—superior high-build properties
- Safe—low VOCs, no solvents, non-halogenated
- Auto-bonding—may be re-coated or repaired using ES Sealant
- Low abrasion—for longer pump life and less maintenance
- Tested with direct-applied fireproofing
- Acoustically tested—reduces noise transmission
- Water-resistant—will not re-emulsify when dry
- Paintable (when dry)
- Up to 50% movement (ASTM E1966/UL2079)

Applications:

- Slab edge/curtain wall conditions
- Head of wall—concrete fluted deck to gypsum wall/masonry wall
- Head of wall—concrete slab to gypsum wall/masonry wall
- Control/expansion joints (wall & floor)
- Metallic pipes
- Steel ducts

Elastomeric Firestop Sealant

SpecSeal® ES Sealant is a latex-based gun grade elastomeric firestop sealant designed for construction joint applications. Once cured, ES Sealant forms a flexible shield against the passage of fire and smoke. In dynamic joint conditions, ES Sealant is tested to accommodate up to 25% compression/extension of the installed joint width.

Features & Benefits:

- Elastomeric—allows movement
- Water-based—easy installation, cleanup and, disposal
- Auto-bonding—allows fresh sealant to adhere to cured sealant
- Compatible with AS200 Spray
- Safe—low VOCs, no solvents, non-halogenated
- Water-resistant—will not re-emulsify when dry
- Paintable (when dry)
- Acoustically tested—reduces noise transmission

Applications:

- Control/expansion joints
- Slab edge conditions
- Head of wall—concrete fluted and slab to gypsum wall/masonry wall
- Bottom of wall-deck to gypsum wall
- Joints and gaps in sound barriers

Endothermic Sealant

SpecSeal® LC Endothermic Sealant is a latex-based gun grade firestop sealant for construction joints and non-combustible penetrations. After application, LC Sealant cures to form a flexible seal against the propagation of fire. Under fire exposure, LC absorbs heat and release water vapor resisting the progress of smoke and flame.

Features & Benefits:

- Water-based—easy installation, cleanup, and disposal
- Endothermic fillers—absorb heat and release water
- High solids formula—low shrinkage
- Auto-bonding—allows fresh sealant to adhere to cured sealant
- Sandable/paintable (when dry)
- Safe—low VOCs, no solvents, non-halogenated
- Excellent sealing properties along with high build capabilities
- Excellent smoke seal
- Acoustically tested—reduces noise transmission

Applications:

- Metallic pipes, conduits, and tubing
- Complex multiple penetrants
- Electrical cabling systems
- Great choice for industrial and institutional power and utility
- Construction joints
- HVAC ductwork

SpeedFlex® Joint Profile System

SpeedFlex® Joint Profile partners with SpecSeal® spray-applied coatings to provide unsurpassed joint movement capabilities in standard gypsum board construction. SpeedFlex® Joint Profile eliminates the need for traditional forming materials allowing for reduced application times increasing productivity.

Features & Benefits:

- Seismic testing
- Allows 100% compression or extension
- Replaces mineral wool in construction joints
- Clean, professional appearance
- Can be used to repair cracked joints
- Alternative to caulking joints
- Use with other SpecSeal® firestop products

Applications:

- Head of wall construction joints
- Fluted deck
- Flat slab
- Repair/retrofit of cracked joints

Silicone Sealant

SpecSeal® SIL300 Silicone Sealant is a high performance silicone firestop sealant tested to resist the passage of smoke, flame and water through construction joints and through-penetrations. SIL300 Sealant cures to form a flexible seal and carries a Class 1 W Rating for water resistance (Per ANSI/UL1479).

Features & Benefits:

- Low modulus—allows up to +/-35% movement capability
- Auto-bonding—allows fresh sealant to adhere to cured sealant
- Excellent water-resistance—for water-tight sealing
- Ozone and UV-resistant—for excellent weathering ability and long service life
- Excellent chemical resistance—best choice in polluted or corrosive atmospheres
- Excellent adhesion to most building substrates
- Acoustically tested—reduces noise transmission
- Excellent smoke seal
- Neutral Cure
- UL® tested for W ratings

Applications:

- Slab Edge/Curtain wall, safin, and construction gaps
- Through-penetrations and joints
- High temperatures or movement
- Electrical, data, or telephone cables
- Seismic and expansion joints
- Top-of-wall joints
- Single or multiple metallic pipes, conduits, and tubing

SpeedFlex® TTG Track Top Gasket

SpeedFlex® TTG Track Top Gasket makes short work of construction joints in gypsum board construction. TTG eliminates the need for firestop sealants or sprays by firestopping as the wall is constructed. Track Top Gasket is easily cut to length with scissors or a sharp knife, installing quick with no waste. Custom sizes available upon request.

Features & Benefits:

- No caulk, no hassle, one-step solution, improves productivity, controls cost
- Works with most ceiling tracks, lightweight, easy to handle rolls
- Eliminates estimating and installation guesswork—inspect at any time
- Simple peel, stick, and shoot installation—water-resistant, no shelf life
- Acoustically tested—reduces noise transmission
- L Ratings per UL2079 for use in smoke barrier construction
- Up to 100% movement

Applications:

- Head-of-wall, bottom-of-wall, wall-to-wall joints
- Perimeter fire-barrier
- Gypsum to flat concrete slab or steel fluted deck
- Non-rated acoustical walls or fire/smoke rated walls

Customized products are now available!

At STI, we know there are times when you need our products in special sizes or colors. Our customizing service can help your next project be more efficient and cost effective. Custom orders do come with minimums and lead times. We will work with you to get you what you need—when you need it.

To request a quote email us at customquotes@stifirestop.com

EZ-Path® Fire-Rated Pathway

Make your work stand out with EZ-Path® Custom Color Fire-Rated Pathways.

Eliminate guesswork. Streamline work flow and increase the visibility of your cable pathways. Segregate cables and systems by use, type and vendor. Perform moves, adds, and changes more easily and head off potential problems by visually organizing your cable systems.

EZ-Path® Custom Color Fire-Rated Pathways—**the only** fire-rated pathway available in colors. Specify your own colors. Custom attachments are also available.

Email us at customquotes@stifirestop.com

Minimums and lead times may apply.

Cast-In Firestop Device

Eliminate coring and firestop before the concrete pour with **SpecSeal® CID Cast-In Firestop Devices**. SpecSeal® Cast-In Devices are a sleeve, concrete core and firestop rolled into a single device.

Get the exact sizes you need for your next project!

We'll custom cut lengths up to 36in. Fill out the form at stifirestop.com/cast-in-quote-form/ or call 800-992-1180 to receive a quote.

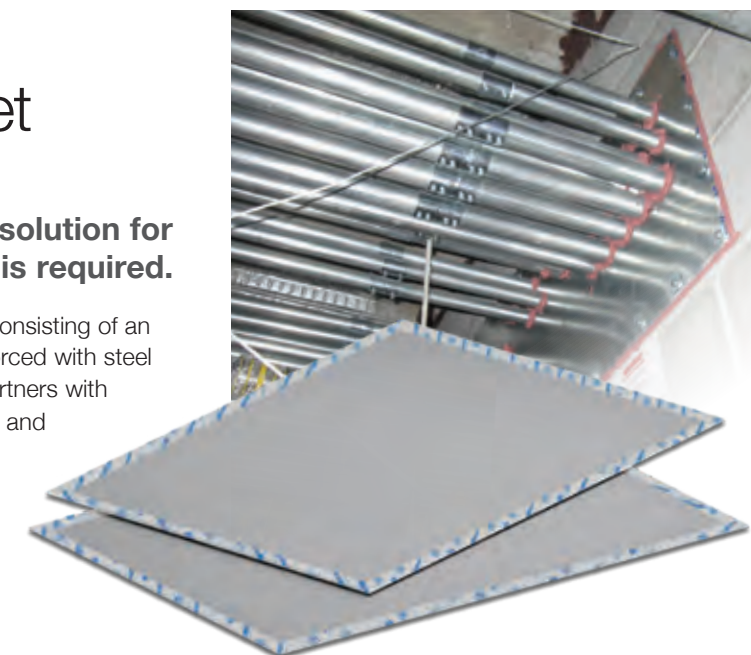

Composite Sheet

SpecSeal® Composite Sheet is the ideal solution for large openings where a permanent seal is required.

Composite Sheet is a lightweight, rigid fire resistant panel consisting of an intumescent layer bonded to a galvanized steel sheet reinforced with steel wire mesh covered with aluminum foil. Composite sheet partners with other SpecSeal® firestop products, such as Firestop Collars and EZ-Path® Devices, to size down oversized openings. See page 31 for standard sizes. Custom sizes, materials and thicknesses available up to 48 in. x 96 in.
