Terms and Conditions of Sale

(1) GENERAL

All orders and contracts are subject to acceptance by JCM Industries, Inc. at Nash, Texas. The terms as hereinafter written shall supersede the terms of the customer order in the event of contradiction or inconsistency. Prices, terms and conditions published by JCM Industries, Inc. are subject to change without notice.

(2) TERMS OF PAYMENT

Minimum net billing is fifty U. S. dollars (\$50.00) on all orders. To encourage early payment a one percent (1%) Cash Discount will be allowed on all invoices paid not later than fifteen (15) days from invoice date. Payment of full invoice amount is due within thirty (30) days from invoice date. Past due accounts are subject to the maximum legal rate of interest. Payment is to be in U.S. dollars.

(3) TAX

All sales, use or other taxes imposed on any transaction between JCM Industries, Inc. and the Buyer shall be paid in full by Buyer. Such taxes will be added to the amount shown payable on the invoice.

(4) BIDS AND QUOTATIONS

Specific bids and quotations will be honored for thirty (30) days from written quotation unless otherwise specified therein. Buyer may with the express written consent of JCM Industries, Inc. make changes in the specifications for material or work covered by the contract. In such event the contract price and delivery dates shall be equitably adjusted. JCM Industries, Inc. shall be entitled to payment for reasonable costs and expenses incurred by it for works and materials rendered unnecessary as a result of such changes and for works and materials required to effect said changes, plus JCM Industries, Inc. usual profit thereon.

(5) FREIGHT, SHIPMENT AND TITLE

All sales are made F.O.B. JCM Industries, Inc. shipping point. JCM Industries, Inc. shall have the right to select the carrier and route of shipment. Title for products shipped by JCM Industries, Inc. passes to Buyer upon delivery to the carrier.

(6) INSPECTION AND CLAIMS

All products and parts shall be finally inspected and accepted within ten (10) days after receipt. All claims whatsoever by Buyer (including claims for shortages) excepting only those provided for under the Warranty and Limitation of Liability clauses hereof must be made within said ten (10) day period or they are waived. Title and risk of loss or damage to products shipped by JCM Industries, Inc. passes to the Buyer upon delivery to the carrier. JCM Industries, Inc. will not file claims against carriers for Buyer but will render reasonable assistance to Buyer in filing any such claim.

(7) RETURNS AND CANCELLATIONS

Returns will be accepted only with prior written authorization by JCM Industries, Inc. All returns made without prior written authorization will be refused or returned to the shipper at his expense. Authorized returns are subject to a fifty percent (50%) or a minimum twenty-five dollars (\$25.00) handling charge. No credit will be allowed for products which cannot be made resalable, products manufactured to Buyer's specifications nor any obsolete products. Any returned material requiring reconditioning will be subject to charges equal to those necessary to make the products resalable. Material or work which remains to be furnished may be canceled by Buyer only with the express written consent of JCM Industries, Inc. In the event of such cancellation, JCM Industries, Inc. shall be entitled to payment for the cost and expenses incurred by it in connection with the material or work so canceled, plus an amount determined by applying JCM Industries, Inc. usual rate of profit for similar items to such costs and expenses, or fifteen percent (15%) of the contract price.

(8) WARRANTY - LIMITATION OF LIABILITY - EXCLUSION OF WARRANTIES

All products manufactured by JCM Industries, Inc. are carefully inspected prior to shipment. Each product is warranted against defects in materials and workmanship. In the event a product is found to be defective in materials or workmanship the Buyer's exclusive remedy under this warranty is expressly limited to replacement, repair or repayment of the purchase price at the option of JCM Industries, Inc. The net invoiced price is the limit of liability. No claims or any consequential or special damages will be allowed. Any defective parts of products must be held for inspection by JCM Industries, Inc. and returned to JCM Industries, Inc. Nash, Texas, promptly upon request. THE FOREGOING WARRANTIES AND REMEDIES ARE EXCLUSIVE, AND ARE IN LIEU OF ALL OTHER WARRANTIES (WHETHER WRITTEN, ORAL OR IMPLIED) INCLUDING WARRANTY OF MERCHANTABILITY AND WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE. ALL CLAIMS FOR BREACH OF WARRANTY SHALL BE PRESENTED TO SELLER WITHIN THIRTY (30) DAYS AFTER DISCOVERY OF THE DEFECT IN THE GOODS, OR BE BARRED.

(9) DELIVERY

Delivery dates indicated in order confirmations are approximate and are based on prompt receipt of all necessary information regarding the products covered by the contract. JCM Industries, Inc. will use its best efforts to meet the indicated delivery dates, but cannot be held responsible for its failure to do so due to fire, war, civil commotion, strikes, failure of transportation, any act of God, or other causes beyond its control. In the event of any delay in delivery caused by Buyer, JCM Industries, Inc. will store and handle all items ordered at Buyer's risk and will invoice Buyer for the unpaid portion of the contract price, on or after the date on which the products is ready for delivery. This amount will become due and payable in full within thirty (30) days from invoice date. A monthly storage and extra handling charge of one percent (1%) per month or any fraction thereof of the contract price covering the stored product shall be billable as a separate item.

(10) PRODUCT IMPROVEMENT

Products produced by JCM Industries, Inc. are engineered to meet service requirements. From time to time products will be improved at the discretion of JCM Industries, Inc. When this occurs, previous designs will not be replaced in the field unless they have been proven defective.

(11) CONTRAVENING LAW

Should any term or provision contained in the contract contravene or be invalid under applicable law, the contract shall not fail by reason thereof but shall be construed in the same manner as if such term or provision had not appeared therein.

(12) DEFAULT

Notwithstanding anything herein above to the contrary, all sums due and owing and not paid within thirty (30) days from invoice date shall bear interest at the rate of eighteen (18%) percent per annum from the date incurred until paid. Buyer agrees to pay not only all invoiced amounts, but also interest as provided above and all costs and expenses of collecting the above, including but not limited to court costs, attorney fees reasonable in relation to the work expended, and expenses and costs related to recovery and protection of the goods sold; all sums payable to JCM Industries, Inc. at its offices in Nash, Bowie County, Texas. To secure the payment of all the above sums, principal, interest, and expenses and costs, Buyer hereby grants to JCM Industries, Inc., a security interest in all goods sold to Buyer by JCM Industries, Inc., and all proceeds from, products of, accessions to, and documents of title concerning such goods.

(13) GENERAL

This Agreement and all sales transactions made pursuant to this Agreement shall be governed by the laws of the State of Texas, and to the extent applicable any federal laws having application within the State of Texas. It is provided that in no event whatsoever shall interest be contracted for, charged, or collected in excess of the maximum interest allowable by law.

JCM Universal Clamp Couplings meet or exceed ANSI/AWWA C230 as applicable.

How to Order:

1. Determine O.D. of Pipe
2. Select proper clamp O.D. range and width.
3. Determine Model Number. Model 101 of Standard Clamp, Model 171 for Removeable Lug Clamp
4. Specify clamp number. Example: For Cast Iron Pipe, 6.90 O.D., 6" wide, order: 101-0690-6 or 171-0690-6

*Clamp widths 7" & 15" use 5/8" bolts

Available Options: Special sizes/ranges not listed, Conductive Buttons, Specialty Gaskets

For threaded outlet clamps, see JCM Tapped Clamps

Clamps do not prevent lateral movement of pipe. Applications in which the pipe may move out of the clamp, proper anchorage must be provided.

MATERIAL SPECIFICATIONS

- Band:** 18-8 Type 304 Certifiable Prime Stainless Steel
- Lugs:** Ductile Iron ASTM A-536, 60-40-18
- Bolts:** Corrosion resistant low alloy per ASTM A242, ANSI A21.11, AWWA C-111. National coarse rolled thread and heavy hex nut.
- Gasket:** Virgin Styrene-Butadiene Rubber (SBR) - Compounded for use with water, salt solutions, mild acids and bases. Per ASTM D-2000 M4AA 607. Standard temperature range from -40° to 150°F (-40° to 65° C) constant, maximum intermittent 180° F (82° C).
- Coating:** Corrosion resistant shop coat paint primer.
- Pressure Rating:** Pressure holding capabilities vary according to application. For specific pressure ratings, contact JCM Industries Technical Services.

For Quick, Permanent repairs of solvent weld PVC pipe joints.

JCM 105/135 Collar Leak Clamps provide a simple, quick solution to troublesome leaks in PVC solvent weld pipe systems - without having to cut out fittings or modifying your system. These heavy duty clamps have many features which assure a successful repair, even under the most adverse conditions.

Material Specifications

Lugs: Model 105 - Ductile Iron per ASTM A536

Model 135 - CF8 Cast stainless steel, equal to 304 stainless.

Band: Stainless Steel 18-8 Type 304 per ASTM A240 as applicable.

Gasket: Compounded for use with sewage, water, salt solutions, mild acids, and bases.

Bolts & Nuts: Model 105 - Corrosion resistant, high strength low alloy A242 (ANSI/AWWA C111/A21.11)

Model 135 - Stainless steel, 18-8 Type 304

Finish: Model 105 - Corrosion resistant shop coat paint primer.

Certified to
NSF/ANSI/CAN 61
& NSF/ANSI 372

JCM 106 Bell Joint Leak Clamps - IPS PVC, IPS HDPE

JCM 106 Bell Joint Leak Clamps - For quick repair or water tight joint assurance for rubber joint PVC pipe, solvent weld pipe or coupled pipe specify JCM 106 Bell Joint Leak Clamps. These clamps are engineered to provide a simple, dependable repair or assured joint. In addition, the JCM 106 eliminates possible notching of PVC pipe and offers maximum versatility and corrosion resistance.

JCM 143 Pipe Sizes 4" - 12" Cast Iron Pipe, Ductile Iron Pipe, C-900 PVC

Strong - Split, interlocking rings provide a solid base for maximum gasket compression. Heavy duty ductile iron components for the life of the pipeline. Clamp comes complete to repair cast iron, ductile iron and C-900 PVC in its nominal size. Simple transfer from shelf to job site to pipe joint without confusion. Install under pressure to repair leaking joint or install as a leak preventative on older pipe joints that have been excavated or disturbed during other pipeline maintenance (a low-cost, long-term insurance policy).

JCM 143 Pipe Sizes 14" and Larger for Ductile Iron/Cast Iron Pipe, C900, HDPE Fused Couplings

Fabricated Bell Joint Leak Clamps with split, bolt-on designed provides a positive seal for large diameter Ductile Iron and Cast Iron leaking bells. Designed for long-term service and immediate delivery

JCM 143 Bell Joint Leak Clamp 14" and Larger - Fabricated Steel

Sizes 14" and larger based on working ranges of industry standard pipe tolerances +/-

To ensure exact fit when ordering provide specific bell/spigot outside diameters.

Larger Sizes & Other Ranges Available, Contact JCM Sales Team 1-800-527-8482 or 903-832-2581.

JCM 108 Universal Clamp Coupling for Sewer Pipe

For quick, economical, permanent connection of sewer pipe, straight connections of the same type of pipe, or transition from one type of pipe to another.

The JCM 108 Universal Clamp Coupling for sewer pipe is designed to connect and repair all types of gravity flow sewer pipe. Each clamp coupling has a wide range of sizes to accommodate the manufacturing tolerances of this type of pipe. This assures a simple and proper installation even under the most adverse field conditions. JCM 108 Universal Clamp Couplings are furnished standard to join pipe of the same outside diameter. Transition gasket material is furnished with the clamp coupling when a transition is indicated.

JCM 108 UCC for Sewer Pipe is Priced on Application. For quotation, contact the JCM Inside Sales Team at 1-800-527-8482 or 1-903-832-2581.

108 Straight Clamp Coupling

108 Transition Clamp Coupling

138 All Stainless Clamp Coupling

Repair or connection of similar OD pipe

Repair or connection of different OD Pipes

For hot or acidic soil conditions.
Available in both straight and transition

1. Determine type of pipe and outside diameters of each end to be joined.
2. Determine and advise of any special factors involved - such as pressure sewer line or unusual line content.
3. Order Universal Clamp Coupling as follows:

A. For repairing or joining pipe with same O.D., refer to JCM 101, 102 Universal Clamp Couplings and order clamp to fit O.D. of pipe.

B. Joining ends with different O.D.'s, provide O.D.'s and type of pipe to JCM Inside Sales Team.

JCM 108 Universal Clamp Couplings for sewer pipe are fabricated to fit these types of pipe:

- SDR35 PVC Sewer Pipe
- Clay Pipe
- Cast Iron Soil Pipe
- Asbestos Cement
- C-900 PVC, IPS PVC

Material Specifications

Lugs: Model 108 - Ductile Iron per ASTM A536 **Finish:** Shopcoat Primer

Model 138 - CF8 Cast stainless steel, equal to 304 stainless.

Band: Stainless Steel 18-8 Type 304 per ASTM A240 as applicable.

Gasket: Compounded for use with sewage, water, salt solutions, mild acids, and bases.

Bolts & Nuts: Model 108 - Corrosion resistant, high strength low alloy A242 (ANSI/AWWA C111/A21.11);

Model 138 - Stainless steel, 18-8 Type 304

Transition Gasket

Material (Ra-Seal): Pliable butyl rubber sealant for temperature range -65° to 180° F.

How to Order

- Determine clamp size, material options and width required.
- Order by clamp number. For Stainless Steel Bolt(s), add (SS) to clamp number.
 For ALL Stainless Steel, add (AS) to clamp number.

Example:

All Stainless Steel clamp for 4" IPS/PVC with 4.50 OD 3" wide, order 110-0450-3AS

How to Order

1. Determine clamp size, material options and width required.
2. Order by clamp number.

For Stainless Steel Bolt(s), add (SS) to clamp number.

For ALL Stainless Steel, add (AS) to clamp number.

Example:

All Stainless Steel clamp for 2" IPS/PVC with 2.38 OD 3" wide, order 111-0238-3AS

Material Specifications

Lug: Ductile Iron ASTM A536. Optional CF8 Cast Stainless Steel, equal to 304.

Gasket: Buna - N

Band: Stainless Steel 18-8 Type 304

Hardware: Electro-galvanized steel. Optional 304 Stainless Steel

JCM 111 Full-Repair Clamps are a fast economical means of permanently repairing steel pipe with extensive corrosion, splits, punctures or pin holes. These clamps have a heavy, full circumferential Buna-N gasket with a hardened recessed armor. This provides extra sealing capability for heavily damaged pipe and pipe with reduced diameter due to corrosion.

How to Order:

1. Determine O.D. of Pipe
2. Select proper clamp O.D. range and width.
3. Specify clamp number. Example: For Cast Iron Pipe, 6.90 O.D., 6" wide, order: 121-0690-6

Clamps do not prevent lateral movement of pipe.

Applications in which the pipe may move out of the clamp, proper anchorage must be provided.

*Clamp widths 7" & 15" use 5/8" bolts

Available Options: Special size/range not listed, Conductive Buttons, Specialty Gaskets

For threaded outlet clamps, see JCM Tapped Clamps

Pressure Rating of 121 & 123 Gas Clamps:

Cast Iron Pipe:

- 2" through 8" 100 PSI Gas
- 10" through 12" 60 PSI Gas

Steel Pipe:

- 2" through 8" 100 PSI Gas
- 10" through 12" 60 PSI Gas

Do Not use for the repair of Polyethylene Gas Pipe. Suitable for reshaping and marking squeeze off locations.

Material Specifications

Band: 18-8 Type 304 Certifiable Prime Stainless Steel

Lugs: Ductile Iron ASTM A-536, 60-40-18

Bolts: Corrosion resistant low alloy per ASTM A242, ANSI A21.11, AWWA C-111. National coarse rolled thread and heavy hex nut.

Gasket: Buna N Gasket for natural gas service

Coating: Corrosion resistant shop coat paint primer.

JCM 151 All Stainless Gas Repair Clamps

Meets the Department of Transportation Code 192

How to Order:

1. Determine O.D. of Pipe
2. Select proper clamp O.D. range and width.
3. Specify clamp number. Example: For Cast Iron Pipe, 6.90 O.D., 6" wide, order: 132-0690-6

Clamps do not prevent lateral movement of pipe.

Applications in which the pipe may move out of the clamp, proper anchorage must be provided.

Available Options: Special sizes/ranges not listed, Conductive Buttons, Specialty Gaskets

For threaded outlet clamps, see JCM Tapped Clamps

JCM 132 All Stainless Steel Extd. Range Clamp Coupling - for systems in hot soils or corrosive environments. Provides extra corrosion resistance of all stainless steel. Clamp sizes 10" and larger incorporate 3/4" lugs and bolts for extra bolting power.

All 316 Stainless Steel Clamp Available, request Model 6132

JCM 114 Fabricated Mechanical Joint Repair Sleeve

For the repair of cast iron bells, split or leaking coupling and weld joints, flanged pipe joints or straight runs of pipe without costly shutdown or disruption to critical service.

No Shutdown or Interruption of Critical Service - by implementing a split fabricated mechanical joint design, the JCM 114 prevents costly down time and service disruption.

True Mechanical Joint Design - heavy fabricated steel body and pusher gland construction prevents the warpage and distortion experienced by repair sleeves using the split steel coupling designs.

Custom Built For Specific Application - this versatile mechanical joint fitting is built to meet the specific requirements of special applications. Eliminates lost time due to field or factory modifications.

Strong and Lightweight - the 114 sleeves are ideal for installations where strength, weight and continued service are critical. The reduced weight of high strength steel aids in installation and handling as well as minimizing weight load on the pipe.

Available in Three Styles - the 114 MJ Split Repair Sleeve for use on straight runs of pipe and the 114 MJ Bell Repair Sleeve which is fabricated to accommodate the specific dimensions of the bell, collar or coupling to be repaired. The JCM 114 MJ Repair Sleeve can also be fabricated to accommodate two different O.D.'s of pipe.

Optional Materials - the 114 is available in carbon steel with special coatings and fasteners, or is available fabricated of 304 stainless steel or 316 stainless steel.

Sizes & Configurations - the 114 is available for pipe sizes 4" and larger. Custom design and product submittal for unique or problematic applications provided by JCM Engineering Group.

Other sizes available. Contact JCM.

Data shown is the standard dimensions for JCM 114 MJ Split Repair Sleeves and Bell Repair Sleeves over pipe joint configurations or couplings (effective 10/3/2022). Other sizes are available per supplied requirements (fitting length and/or inside diameter clearance).

Note: Overall outside lengths are approximate and based on normal hardware installation. Exact measurements should be obtained from field when confined spaces are a concern, to confirm that joint configurations have proper clearance, or when special sizes are required. The standard working pressure rating is 150PSI, higher working pressures available upon request.

Material Specifications

- Body:** Carbon Steel per ASTM A36, ASTM A516 Grade 70 or equal. Optional 304 or 316 Stainless Steel.
- Glands:** ASTM A36 Steel or equal. Optional 304 or 316 Stainless Steel.
- Gaskets:** Nitrile - Compounded for use with water, salt solutions, mild acids and bases.
- Bolts:** Corrosion resistant, high strength low alloy ASTM A242, A193 B5, B7. Optional A193 B8 304 stainless steel or 316 stainless steel.
- Finish:** Heavy coat of corrosion resistant shop coat primer. Optional Fusion Epoxy Coating available

JCM 116 Repair Sleeve for Concrete Steel Cylinder Pipe and Large Diameter Pipe

The JCM 116 Repair Sleeve for Concrete Steel Cylinder Pipe provides a quick easy means of repairing and reinforcing damaged concrete steel cylinder pipe of all sizes. This repair sleeve permits repairs to be made on any side of the pipe - without requiring complete stripping of the concrete. The standard repair gasket seals around a 12" damaged area. Larger repair sizes are available. This sleeve is especially recommended for larger sizes of pipe and where the concrete and pipe require reinforcement.

Minimal Pipe Excavation - JCM 116 Repair Sleeve requires limited pipe exposure around the damaged area. Full section joint exposure is eliminated.

Wide Supportive Body - reinforces pipe which is weakened due to structural interruption. The body's grout seal assembly provides a system for replacement of the critical corrosion retarding concrete encasement. By restoring the concrete casing, the steel cylinder is protected from corrosive elements.

Eliminates Excessive Concrete Coating Removal - concrete removal is limited to the damaged area only, preventing further pipe structural damage.

Epoxy Coated Repair Plate - the internal repair plate is fusion epoxy coated to provide a quality repair protected against corrosion in the pipe interior.

Eliminates Welding On Thin Cylinders - JCM 116 directly repairs the damaged cylinder making a watertight seal, preventing the line contents from infiltrating the concrete-steel interface.

Availability - The JCM 116 Repair Sleeve for Concrete Steel Cylinder Pipe is available from JCM on both an emergency and a contingency basis. Timely delivery and installation prevents extensive pipe damage, content loss and environmental violations.

JCM 116 Repair Sleeve for Large Diameter Pipe

The JCM 116 Repair Sleeve is also recommended for repairs on large diameter pipe including cast iron, ductile iron, steel, and other types of large diameter rigid pipe. The direct concentration of bolting pressure to the repair gland area enables the 116 to repair the damaged area while maintaining the pipeline's pressure capability.

JCM 116 Repair Sleeves for Concrete Steel Cylinder Pipe are Priced on Application. For quotation, contact the JCM Engineered and Technical Sales Team at 1-800-527-8482 or 1-903-832-2581

Certified to
NSF/ANSI/CAN 61
& NSF/ANSI 372

JCM 116 Repair Sleeve for Concrete Steel Cylinder Pipe

The JCM 116 Repair sleeve provides fast, economical and permanent repairs to Concrete Pressure Pipe. Sealing around the damaged area on the steel cylinder, the JCM 116 prevents the line contents from leaking between the concrete/steel cylinder interface, and eliminates further possible damage caused by corrosion. The adjustable, separate gland seals directly on the steel cylinder over the damaged area requiring removal of the mortar coating only in the repair area. Universal grouting horns are located to accommodate re-grouting of the damaged area at any position on the

HOW TO ORDER

For pricing and engineering, the following information must be furnished:

- Type of pipe (also manufacturer and class if known)
- Diameter of damaged area
- Outside Diameter of Concrete and Cylinder
- Line Content and Pressure
- Any special requirements or options

JCM 116 Repair Sleeve for Concrete Pressure Pipe - Typical Specification

JCM 116 Fabricated Repair Sleeves for Concrete Steel Cylinder Pipe shall be able to repair and reinforce damaged concrete steel cylinder pipe without requiring complete stripping of the concrete. The repair sleeves shall have a separate gland which permits installation and reinforcement of the pipe prior to the cutting of the prestress wires. The repair gland shall have a fusion epoxy coated pressure plate and a broad gasket set in a retaining groove of the pressure plate which is gusseted to eliminate flexing. Repair Sleeves shall be JCM 116 Repair Sleeves or approved equal. Repair Sleeves shall be ANSI/NSF Standard 61, Annex G and ANSI/AWWA 372

- Body:** ASTM A36 Steel, A516 GR 70 or equal.
- Bolts:** Corrosion resistant, high strength low alloy A242. Optional Stainless Steel, 18-8 Type 304.
- Draw Hardware:** B7 Material
- Coating:** Heavy coat of corrosion resistant shop coat primer on sleeve, gland and straps. Pressure plate of gland is epoxy coated (fusion applied per ANSI/AWWA C-213). Optional epoxy coating on entire sleeve
- Gasket:** Nitrile rubber compounded for use with water, salt solutions, mild acids, bases and sewage.

JCM 118 Fabricated Repair Sleeves

The JCM 118 Repair Sleeve is designed to provide immediate repairs to large diameter pipe in systems which require high working pressure capability. Engineered specifically for the internal pressure forces involved with large pipe and its working characteristics, the JCM 118 is available in pipe sizes up through 120" and larger with several design options for the specific application.

Features built into the design of the JCM 118 include:

Reinforcement of the Pipe Wall - strong, yet lightweight steel (pressure vessel quality) directly reinforces the pipe wall on the circumference of the pipe.

Heavy Duty Design - large fitting components, spacious bolt holes and heavy hardware combine to make installations in less than ideal environments easy and fast. The JCM 118 especially lends itself for easier underwater and low visibility installation applications.

Maximum Gasket Sealing - heavy duty materials provides high levels of bolt torque transferred directly to gasket sealing compression. Higher bolt torques maintain greater working pressures.

Minimal Pipe Excavation - the JCM 118 sleeve requires limited pipe exposure around the damaged area. Full section joint exposure of underground pipelines is eliminated.

Low Profile Stance - the hydro-mechanical lip gasket is trapped both internally and externally in a recessed groove that provides a low profile stance on the pipe eliminating the chance of gasket displacement or "blow-out" in high pressure applications.

Availability - The JCM 118 Repair Sleeve is available from JCM on both an emergency and a contingency basis. Timely delivery and installation prevents extensive pipe damage, content loss and environmental violations.

Simple and fast repair. The damaged area falls within the "Inside Diameter (I.D.) of the gasket" trapping (encompassing) the hole within the gasket area. Repair Sleeve gasket loads faster and provides greater gasket compression on the pipe.

Suitable for these types of damage

Available with or without threaded outlet. Carbon steel, stainless steel (304 or 316)

JCM 136 Heavy Duty Repair Clamps

The JCM 136 Heavy Duty Stainless Steel Repair Clamp incorporates the corrosion resistance of stainless steel, the full circumferential gasketing of a Universal Clamp Coupling and the triangular bolting configuration of the 432 Stainless Steel Tapping Sleeve to provide a repair clamp coupling with high working pressure capabilities.

All Stainless Steel Construction - provides superior corrosion resistance in harsh or acidic environments. The JCM 136 is available fabricated of 304 or 316 stainless steel.

Heavy Duty Stainless Material - the JCM 136 has a minimum standard material of 14 gauge certifiable prime material. This strong, yet flexible stainless shell conforms to uneven or unusual pipe surfaces and provides complete compression of the gasket on the pipe wall.

Tapping Sleeve Bolting System - with a triangular lug design, allows for pass-through, replaceable bolts. This lug configuration eliminates alignment problems and allows tightening from either side of the pipe.

Full Circumferential Gasket - provides a water tight seal on the full circumference of the pipe. The gridded 1/4" thick gasket is of a durometer hardness that allows the rubber to conform to and fill the pits and voids of uneven pipe surfaces.

The JCM 136 Heavy Duty Stainless Repair Clamp is available for all types and sizes of pipe. Options for this fitting includes: 304 Stainless Steel, 316 Stainless Steel, SBR, EPDM or Buna-N Gaskets, 304 Stainless Hardware, 316 Stainless Hardware. Call the JCM Inside Sales Team for product recommendations.

JCM 136 Heavy Duty Stainless Steel Repair Clamp Coupling

JCM 159 Abandoned Corporation Cap

159 Type 1

159 Type 2 & 3

JCM Introduces the Model 159 Cap Sleeve for Abandoned Corporation Services. This sleeve quickly and efficiently installs over the abandoned corporation stop, permanently sealing the service area. This cap ensures a long term, watertight seal for the discarded corporation service and prevents any potential infiltration to the system.

Available in standard pipe sizes and ranges and can be manufactured to fit unusual or exotic pipe diameters.

Available in material options that best withstand the pipeline environment with gasket alternatives to accommodate the pipeline content.

JCM 159 Cap Sleeve is offered in three configurations to best serve the pipeline setting:

- Type 1 - All Stainless Steel (304 or 316) with Full Circumferential Gasket
- Type 2 - Carbon Steel (shopcoat or epoxy coat) with Outlet Seal Gasket
- Type 3 - All Stainless Steel (304 or 316) with Outlet Seal Gasket

The JCM Cap Sleeve is rated for 250 PSI working pressure. For higher pressures, contact JCM Engineered and Technical Services Team.

Number of Bolts			2	3	4	6	8	10

Maximum Width Available 30"

JCM Universal Clamp Couplings meet or exceed ANSI/AWWA 230 as applicable

How to Order:

1. Determine O.D. of Pipe
2. Select proper clamp O.D. range and width.
4. Specify clamp number. Example: For Cast Iron Pipe, 6.90 O.D., 6" wide, order: 161-0690-6

Clamps do not prevent lateral movement of pipe. Applications in which the pipe may move out of the clamp, proper anchorage must

Available Options: Special sizes/ranges not listed, Conductive Buttons, Specialty Gaskets

For threaded outlet clamps, see JCM Tapped Clamps

Material Specifications

Bolt Assembly: 18-8 Type 304 Stainless Steel

Band: 18-8 Type 304 Stainless Steel

Bolts and Nuts: 18-8 Type 304 Stainless Steel

Gasket: Virgin Styrene-Butadiene Rubber (SBR) - Compounded for use with water, salt solutions, mild acids and bases. Per ASTM D-2000 M4AA 607. Standard temperature range from -40° to 150° F (-40° to 65° C) constant, maximum intermittent 180° F (82° C). For applications on high temperatures or chemical pipelines, contact JCM Industries Technical Services.

JCM 100 Series Universal Clamp Couplings are ANSI/NSF Standard 61, Annex G and ANSI/NSF Standard 372 Certified.

Meets or exceed ANSI/AWWA C230 Standard for Stainless -Steel Full-Encirclement Repair and Service Connection Clamps as applicable.

Number of bolts			4	6	8	8	12	16

Maximum width available 30"

JCM Universal Clamp Couplings meet or exceed ANSI/AWWA 230 as applicable

How to Order:

1. Determine O.D. of Pipe
2. Select proper clamp O.D. range and width.
4. Specify clamp number. Example: For Cast Iron Pipe, 6.90 O.D., 6" wide, order: 162-0690-6

Clamps do not prevent lateral movement of pipe. Applications in which the pipe may move out of the clamp, proper anchorage must be provided.

Available Options: Special sizes/ranges not listed, Conductive Buttons, Specialty Gaskets

For threaded outlet clamps, see JCM Tapped Clamps

Material Specifications

Bolt Assembly: 18-8 Type 304 Stainless Steel

Band: 18-8 Type 304 Stainless Steel

Bolts and Nuts: 18-8 Type 304 Stainless Steel

Gasket: Virgin Styrene-Butadiene Rubber (SBR) - Compounded for use with water, salt solutions, mild acids and bases. Per ASTM D-2000 M4AA 607. Standard temperature range from -40° to 150° F (-40° to 65°C) constant, maximum intermittent 180° F (82°C). For applications on high temperatures or chemical pipelines, contact JCM Industries Technical Services.

JCM 100 Series Universal Clamp Couplings are ANSI/NSF Standard 61, Annex G and ANSI/NSF Standard 372 Certified.

Meets or exceed ANSI/AWWA C230 Standard for Stainless –Steel Full-Encirclement Repair and Service Connection Clamps as applicable.

Price List Effective February 3, 2025. Cancels all previous prices. Prices are subject to change without notice.

JCM Tapped Universal Clamp Couplings

JCM Universal Clamp Couplings are available with tapped outlets for repair of direct tap pull outs and broken or split pipe requiring a service outlet.

How To Order

1. Select standard model, size and width clamp to fit pipe.
Select size and type of tapped outlet from outlet guide below. Note minimum widths and range/sizes.
2. Change model number to corresponding Tapped Outlet Clamp Model Number.
3. Add Outlet Tap Code to clamp number. Add-On outlet price to standard clamp list price.

For standard clamp to fit 6" Cast Iron Pipe with 12" width, with 2" IP outlet, order:

103-0690-12X14IP

All Tapped Outlet Clamp Models are Non-Returnable Items

Tapped Clamps are for repair to damaged pipe, leaking service outlet areas and applications that involve previously drilled/tapped pipe. These are not recommended to be used for tapping applications.

Note: Applications in which pipe may move out of the coupling, proper anchorage of the pipe must be provided.

JCM 201 Bolted Couplings meet or exceed the ANSI/AWWA C219 Standard as applicable.

Material Specifications

Middle Rings: 1/2" - 1-1/2" Steel per ASTM A36
2" - 12" Steel per ASTM A36
14" and larger Steel per ASTM A36

Followers: 1/2" - 1-1/2" Ductile Iron ASTM A536
2" - 12" Ductile Iron ASTM A536
14" and larger Steel per ASTM A36

Bolts: 1/2" - 1-1/2" ASTM A242 high strength, low alloy electro coat per Powercron 590-534 black cationic electrocoat.

Nominal sizes 2" and larger: minimum 5/8" bolts ASTM A242/ANSI/AWWA C111/A21.11 corrosion resistant, high strength low alloy; heavy hex nuts A563 per ANSI/AWWA C219. Available Options: Electro-coated Powercron 590-534; Stainless Steel 18-8 Type 304

Gaskets: Nitrile Butadiene Rubber (NBR, Buna-N) per ASTM D2000. Molded virgin rubber. Gasket temperature range -40°F to 212°F (-40°C - 100°C) Recommended for water, salt solutions, mild acids, bases, and sewage. Available Options: EPDM. For natural gas contact JCM Industries.

Finish: 1/2" through 12" ECoat (electrocoat epoxy). 14" and Larger heavy coat of corrosion resistant shop coat primer. Optional fusion applied epoxy per ANSI/AWWA C213.

Pressure: Rated for 250 PSI working pressure when installed per manufacturer's instructions. Please contact JCM concerning pressure rating on specific sizes.

JCM 203 Steel Transition Couplings

The JCM 203 Steel Transition Coupling provides a simple means of joining plain end pipe of the same nominal size but different outside diameter dimensions. The couplings are especially useful in joining old cast iron pipe to ductile iron pipe. Listed are the most common sizes. Other sizes are available upon request. Also see JCM 212 Ductile Iron Couplings.

JCM 204 Steel Reducing Couplings

The JCM 204 Steel Reducing Coupling is the simplest means of connecting any combination of two sizes or types of pipe. There is practically no limit to the pipe sizes that can be connected - either to reduce or increase in size. One common use is joining large steel pipe to ductile iron or C900 (905) PVC pipe. Listed are the most common sizes. Other sizes are available upon request.

Nom Pipe Size (IN)	From Pipe OD Range (IN)	Transition to OD Range (IN)	Catalog Number	List Price Each	Appr Wt Each Lbs

JCM 210 Ductile Iron Couplings

JCM 200 Series Ductile Iron Couplings - 210, 211, 212, 214, 215, 219

Sleeve & Flanges: Ductile Iron Per ASTM A536 65-45-12

Gaskets: Styrene-Butadiene Rubber (SBR) has good physical properties. Compounded for use with water, salt solutions, mild acids and bases; has excellent abrasion resistance. Per ASTM D-2000. Standard temperature range from -40° to 150°F (-40° to 65° C) constant, maximum intermittent 180° F (82°C). For applications on high temperatures or chemical pipelines, contact JCM Industries Technical Services. The material is not recommended for use on oil, ozone or weather resistant applications.

Bolts: 5/8" Corrosion resistant, high strength low alloy oval neck track head bolts per ASTM A242/ANSI 21.11/AWWA C111 and heavy hex nuts per A563 or equal.

Optional Hardware: Stainless Steel 18-8 Type 304 or 316

Epoxy Coated Alloy Hardware, Powercron 590-534 black cationic electrocoat.

Coating: Corrosion resistant shop coat paint primer. Optional fusion applied epoxy coating per ANSI/AWWA C-213. Other coatings available upon request.

Working Pressure: Fittings are rated for 150 PSI working pressure when installed per manufacturer's instructions. Inspection of pipe integrity is the responsibility of the end user. For higher working pressure applications, contact JCM Industries.

214 Pipe End Cap: ASTM A36, A285 Grade C or equal. Fabricated with threaded outlet. Option solid cap available.

JCM 200 Series Steel Couplings are ANSI/NSF Standard 61, Annex G and ANSI/NSF 372 Certified.

JCM 210 Series Bolted Couplings meet or exceed the ANSI/AWWA C219 Standard as applicable.

Actual inside pipe diameter provided by the customer

Smallest I.D./O.D. available 3.50 - Sizes larger than 36" available upon request

Nominal Size Stiffeners 4" - 22" are 17 Gauge Stainless Steel Material

Nominal Size Stiffeners 24" - 36" are 12 Gauge Stainless Steel Material

Available for Steel Size and Ductile Iron Size HDPE in SDR11,13.5, 17, 21, 26, 32.5

Material Specifications: ASTM A240 - TP 304 Stainless Steel.

Optional 316 Stainless Steel available, contact JCM for price and availability

Flared end available up to 35.00 size, larger sizes incorporate tab stop.

HOW TO ORDER

1. Select nominal pipe size of HDPE
2. Select width of stiffener. For 6" width, Model 230. For 12" width, Model 231
3. Insert ACTUAL HDPE PIPE I.D. (provided by end user) @ XXXX.

The pipe I.D. determines the stiffener O.D. and completes the order number

EXAMPLE: To order a 304 stainless, 12" wide stiffener, for IPS size 8" nominal SDR 17 Pipe with an actual pipe I.D. of 7.55, order number: 231-08-0755

Stiffeners are Non-Returnable Items. To ensure proper fit/size, JCM recommends the actual pipe in the field be measured.

JCM 250 Fabricated Mechanical Joint Coupling

Available American Iron and Steel Compliant

Fabricated mechanical joint coupling available to meet the American Iron and Steel (EPA - AIS) domestic materials/construction requirements. This coupling can be manufactured to fit the requirements of the application, the pipe diameters and elevated pressure ratings. Fabricated of Carbon Steel (optional Stainless Steel), the JCM 250 MJ Coupling is the solution to the domestic coupling need. Sizes 4" and 24". Larger sizes available upon request.

Fabricated Construction Ensures:

True Mechanical Joint Design
Available for Exotic & Non-Standard Diameters
4" - 24" Rated for 250 PSI Working Pressure
Custom lengths
Custom diameters
American Iron and Steel Compliant - upon request

Material Specifications:

Body: ASTM A36 Steel, ASTM A285 Grade C Steel or equal.
Optional stainless steel available.

Pusher Glands: ASTM A36 Steel or ASTM A536 Ductile Iron.
Optional stainless steel available.

Bolts: Corrosion resistant, high strength low alloy A242, ANSI/AWWA C111/A21.11.
Optional stainless steel available.

Gasket: Nitrile rubber compounded for use with water, salt solutions, mild acids and bases.

Finish: Heavy coat of corrosion resistant shop coat primer.
Optional fusion epoxy coating per ANSI/AWWA C213.

For Quotation and How to Order

The following information must be furnished.

- Type of Pipe
- Pipe Outside Diameter
- Length Requirements
- Line Content
- Line Pressure
- Finish or Coating Requirements

JCM 250 Mechanical Joint Couplings are Priced on Application.

For quotation, contact the JCM Inside Sales Team at 1-800-527-8482 or 1-903-832-2581.

JCM 251 Heavy Duty Custom Built Steel Couplings

Now offering JCM 251 Heavy Duty Steel Bolted Couplings for joining two plain end pieces of pipe of the same outside diameter without welding or exact field cutting of pipe ends. A combination of the substantial middle ring and two heavy follower flanges join together with the proper number of bolts to fully compress the gasket into the middle ring, creating the flexible, yet leak-proof seal.

JCM 251 Heavy Duty Steel Bolted Couplings offer advantages in a piping system:

- No beveling, costly threading, exact pipe alignment or fitting is required
- Make assembly/disassembly of pipe sections fast.
- Quick, simple to install, using only a wrench.
- Gaskets absorb vibration and pipe movement
- Permits limited expansion/contraction
- Curves can be laid with straight pieces of pipe
- Simple, rugged and serviceable,
- Available for Steel, PVC, HDPE or Ductile Iron (cast iron) pipe sizes
- Available with restraint systems
- Available in American Iron and Steel (AIS/BABA)
- Meets AWWA Standard C219 Bolted Sleeve-Type Couplings for Plain-End Pipe

JCM 251 Heavy Duty follower ring material provides the strength and power to fully compress the gasket into the middle ring - without flexing, stretching or bending. The robust material provides consistent pressure across the full face of the gasket, preventing gasket shifting or protrusion.

The JCM 251 Heavy Duty Steel Coupling delivers the strength, durability and reliability end users have come to appreciate in JCM fittings.

JCM 251 Heavy Duty Couplings are available in sizes larger than 16" and are customizable for undersized/oversized and unique pipe diameters. The adaptability these couplings lend make possible flanged adapters, dismantling joints, reducing and transition couplings, pipe end caps and many other fittings.

Sizes 16" and larger

Middle Ring: ASTM A36

Followers: ASTM A36

Bolts: Corrosion resistant high strength low alloy per AWWA C111, ANSI 21.11. Optional 18-8 Type 304 Stainless Steel.

Heavy coat of corrosion resistant shop coat primer.

Finish: Optional Fusion Epoxy Coating available (AWWA C213).

Gaskets: Nitrile Butadiene Rubber (NBR, Buna-N) per ASTM D2000 of virgin rubber. Gasket temperature range - 40°F to 212°F (-40°C - 100°C) Recommended for water, salt solutions, mild acids, bases, sewage and natural gas. Available Options: EPDM

Pressure Rating: Up to 150PSI. Contact JCM Industries for higher pressure rating requirements.

JCM 262 Fabricated Stainless Steel Couplings

The JCM 262 Fabricated Stainless Steel Coupling provides an economical solution to joining two plain end pieces of pipe. Constructed of Carbon Steel End Rings with resilient Fusion Plastic Coating, a 304 Stainless Steel middle ring and alloy hardware, electrocoated with Powercron 590-534, the JCM 262 is prepared for the harshest of elements, corrosive line content - or both!

For American Iron and Steel (AIS) Compliance, contact JCM Sales Team for price and availability.

Note: Applications in which pipe may move out of the coupling, proper anchorage of the pipe must be provided. Restraint systems will affect laying length dimension, contact JCM Industries.

Custom sizes & lengths available upon request. Contact JCM Industries, Inc.

Purchase orders for the JCM Industries, Inc 262 type coupling signify an agreement between the manufacturer and customer that both parties agree to the JCM test procedure for meeting ANSI/AWWA C219 Standard for Bolted, Sleeve-Type Couplings for Plain-End Pipe. All couplings are pneumatically tested to a minimum of 25 PSI. Additional testing for certification purposes available upon request with additional charge.

JCM 262 Oversized Fabricated Stainless Steel Couplings

The JCM 262 Oversized Fabricated Stainless Steel Coupling provides an economical solution for joining old cast iron, larger classes of asbestos cement and other types of oversized pipe. The JCM 262 Coupling uses the popular and economical JCM G212 Transition Gasket System. Making transitions of the same nominal pipe size easy with just the change of gasket. The JCM 262 Oversized Coupling is constructed of same corrosion resistant materials - Carbon Steel End Rings with resilient Fusion Plastic Coating, a 304 Stainless Steel middle ring and alloy hardware, electrocoated with Powercron 590-534, the JCM 262 is prepared for the harshest of elements, corrosive line content - or both!

For American Iron and Steel (AIS) Compliance, contact JCM Sales Team for price and availability.

301 FCA

301 FCA Restrained

Material Specifications JCM 301 Flanged Coupling Adapters

Sleeve & Flanges: Sleeve - Ductile Iron Per ASTM A536 80-55-06.
Flange - Ductile Iron with ANSI Class 125 & 150 bolt pattern

Gaskets: Styrene-Butadiene Rubber (SBR). Compounded for use with water, salt solutions, mild acids and bases; has excellent abrasion resistance. Per ASTM D-2000. Standard temperature range from -40° to 150°F (-40° to 65°C) constant, maximum intermittent 180°F (82° C). Not recommended for use on oil, ozone or weather resistant applications.

Bolts: 5/8" Corrosion resistant, high strength low alloy oval neck track head bolts per ASTM A242/ANSI 21.11/AWWA C111 and heavy hex nuts per A563 or equal. Optional Hardware: Stainless Steel 18-8 Type 304 or 316 or Epoxy Coated Alloy Hardware, Powercron 590-534 black cationic electrocoat.

Coating: Corrosion resistant shop coat paint primer. Optional fusion applied epoxy coating per ANSI/AWWA C-213. Other coatings available upon request.

Working Pressure: Fittings are rated for 150 PSI working pressure when installed per manufacturer's instructions. For higher working pressure applications, contact JCM Industries.

Set Screws: Mild Carbon - with square head for future disassembly or removal.

RESTRAINED FITTINGS USING SET SCREWS ARE NOT RECOMMENDED FOR ASBESTOS CEMENT, PVC, HDPE, FIBERGLASS OR ANY OTHER TYPES OF NON-RIGID OR BRITTLE PIPE MATERIALS.

JCM 300 Series Flanged Adapters are ANSI/NSF Standard 61, Annex G and ANSI/NSF 372 Certified.

JCM 300 Series Flanged Adapters meet or exceed the ANSI/AWWA C219 Standard as applicable.

Middle Ring: Steel per ASTM A-36

Follower: Steel per ASTM A-36

Flange: AWWA C207 Class D Flange with ANSI 150 lb. drilling.

Gaskets: Nitrile Butadiene Rubber (NBR, Buna-N) per ASTM D2000. Molded virgin rubber. Gasket temperature range -40°F to 212°F (-40°C - 100°C)
Recommended for water, salt solutions, mild acids, bases, sewage and natural gas. Available Options: EPDM

Bolts: Nominal sizes 2" and larger: minimum 5/8" bolts ASTM A242/ANSI 21.11/AWWA C-111 corrosion resistant, high strength low alloy; heavy hex nuts A563 per ANSI/AWWA C219. Available Options: epoxy coated, Powercron 590-534; Stainless Steel 18-8 Type 304, Stainless Steel 18-8 Type 316.

Finish: Heavy coat of corrosion resistant shop coat primer. Optional fusion epoxy coating per AWWA C213.

JCM 300 Series FCA's are ANSI/NSF Standard 61, Annex G and ANSI/NSF 372 Certified. JCM 300 Series FCA's meet or exceed the ANSI/AWWA C219 Standard as applicable.

Sizes 14" and larger incorporate a strap restraint configuration. Other sizes available upon request.

Other flanges available upon request.

309 Dismantling Joints are priced on application. Contact JCM Sales Team.

309 Dismantling Joints simplify installations and replacement of flanged fittings in retrofitting applications. JCM 309 Dismantling Joints provide the solution for adding, repairing or replacing flanged fittings within a flanged pipe system. Adjustable, slip joint design accommodates either wide gaps or close quarter installations and eliminates the need for precise measurements between flange connections. Restraint system standard.

Available in sizes 3" and larger, for ductile iron or flanged steel pipe systems.

Standard flanges ANSI/AWWA C207 Class D Flange with 150 lb. drilling. Other flanges available upon request.

Dismantling joints do not provide for lateral pipe movement.

309 Dismantling Joints rated for 150PSI. Higher pressure ratings available, contact JCM Industries.

Material Specifications

Flange Adapter Body: ASTM A36 or Ductile Iron ASTM A536.

Follower Flange: AISI C1012, ASME SA36, or Ductile Iron ASTM A536.

Flange Extension: Schedule 40 Steel Pipe

Bolts: Corrosion resistant, high strength low alloy ASTM A242, A193 B5, B7. Optional A193 B8 304 stainless steel or 316 stainless steel.

Finish: Heavy coat of corrosion resistant metal primer. Optional Fusion Applied Epoxy Coating per ANSI/AWWA C213 available. Other coatings available.

Gasket: Nitrile - Specially compounded new rubber polymer for superior shelf life and resistance to permanent set. Recommended for water, salt solutions, mild acids, bases.

Flanges: Standard flanges ANSI/AWWA C207 Class D Flange with 150 lb. drilling. Other flanges available.

JCM 300 Series fittings are ANSI/NSF Standard 61, Annex G and ANSI/NSF Standard 372 Certified.

JCM 300 Series fittings meet ANSI/AWWA Standard C219 as applicable.

JCM 362 Fabricated Stainless Steel Flanged Coupling Adapter

The JCM 362 Fabricated Stainless Steel Flanged Adapter provides an economical solution to joining plain end pipe to flanged fittings. Constructed of Carbon Steel End Ring with resilient Fusion Plastic Coating, a 304 Stainless Steel middle ring, flange and hardware. The JCM 362 is prepared for the harshest of elements or corrosive line content - or both!

For American Iron and Steel (AIS) Compliance, contact JCM Sales Team for price and availability.

JCM 362 Oversized Fabricated Stainless Steel Flanged Adapters

The JCM 362 Oversized Fabricated Stainless Steel Flanged Adapters provides an economical solution for joining old cast iron, larger classes of asbestos cement and other types of oversized pipe to flanged fittings within the pipe system. The 362 Oversized Fabricated Stainless Steel Flanged Adapter uses the popular and economical JCM G212 Transition Gasket System. Making transitions of the same nominal pipe size easy with just the change of gasket.

For American Iron and Steel (AIS) Compliance, contact JCM Sales Team for price and availability.

JCM 6362 All 316 Stainless Steel FCA

JCM 400 Series Service Saddle Material Specifications

Body: Wrap around design of Ductile Iron, ASTM A-536 annealed to 60-40-18. Body has a gasket cavity, which provides internal as well as external gasket retention.

Gasket: Nitrile Butadiene Rubber (NBR, Buna-N) per ASTM D2000. Molded virgin rubber with a pressure activated hydromechanical design. Gasket is bonded into a cavity for internal and external retention. Gasket temperature range -40°F to 212°F (-40°C – 100°C) Gasket suitable for water, salt solutions, mild acids, bases, and sewage. Optional EPDM gasket available.

Coating: **401, 402, 403, 404, 407**
Casting is coated with shop primer coating

405, 406, 407, 408
Casting is coated with fusion bonded high density blue plastic, 12 mils minimum thickness, with a dielectric strength of over 12,000 volts. Water absorption less than .20% (less than nylon) prevents undercutting and blistering.

Straps: **401, 402, 407, 408**
Nominal sizes 2" through 12" have corrosion resistant, forged AISI C-1018 steel straps, zinc plated with dichromate seal. Nominal sizes 14" through 24" have two (2) 2-1/2" wide fabricated steel straps for additional stability and strength coated for corrosion resistance.

403, 404, 405, 406
Stainless steel, 18-8 Type 304, passivated for corrosion resistance. Nuts coated with Xylan antiseize compound to reduce friction and galling. Nominal Sizes 2" – 3" with 1/2" UNC roll thread, 1/2" stainless washers and heavy hex nuts, nominal sizes 4" and larger with 5/8" UNC roll thread, 5/8" stainless washers and heavy hex nuts. Optional 316 stainless steel available.

Bolts, Nuts, Washers: **403, 404, 405, 406**
Stainless steel, 18-8 Type 304, passivated for corrosion resistance. Nuts coated with Xylan antiseize compound to reduce friction and galling. Nominal Sizes 2" – 3" with 1/2" UNC roll thread, 1/2" stainless washers and heavy hex nuts, nominal sizes 4" and larger with 5/8" UNC roll thread, 5/8" stainless washers and heavy hex nuts. Optional 316 stainless steel available.

Standards: JCM 400 Series Service Saddles meet or exceed ANSI/AWWA C800 Standard for Underground Service Line Valve and Fittings.

JCM 400 Series Service Saddles are ANSI/NSF Standard 61, Annex G and ANSI/NSF 372 Certified

JCM Industries endorses observance of Uni-Bell Handbook of PVC Pipe/AWWA Manual M23 Design and Installation of PVC Pipe and endorses the recommendations they make for tapping PVC Pipe. Service Fittings are available to adhere to those recommendations.

HOW TO ORDER

1. Determine O.D. of pipe, outlet size and thread type.
2. Select desired saddle type and tap order code.
3. Look under saddle listing to determine order number. Add tap code after base catalog number.

EXAMPLE: For 6" C.I. Pipe with O.D. of 6.90 with 1" IP thread, order: 401-0745 x 08IP. For stainless steel strap, order: 403-0745 x 08IP.

HOW TO ORDER

1. Determine O.D. of pipe, outlet size and thread type.
2. Select desired saddle type and tap order code.
3. Look under saddle listing to determine order number. Add tap code after base catalog number.
EXAMPLE: For 6" C.I. Pipe with O.D. of 6.90 with 1" IP thread, order: 405-0745 x 08IP. For electro galvanized strap, order: 407-0745 x 08IP.

* Longer bolts are required for making taps on pipe with less than 1/4" coating

425 for Standard CSCP

425 for Embedded CSCP

Service Saddle for 3/4" through 2" Taps and Connections on Concrete Steel Cylinder Pipe, Reinforced Concrete Pipe, Large Diameter Cast Iron and Ductile Iron.

The JCM 425 Service Saddle is specifically designed for making safe, dependable taps into Concrete Steel Cylinder Pipe, Concrete Coated Steel Pipe and large diameter Ductile Iron Pipe. The threaded outlet, available in sizes 3/4" through 2" IP or CC, provides critical reinforcement to branch connections for service lines. These saddles can also be used to install air and vacuum valves, pitot tubes, injection lines and other equipment.

The following are important features and benefits this saddle offers:

Provides critical reinforcement of pipe prior to removal of the prestress wire from the outlet area. This is a required feature to maintain pipe integrity on larger taps and many small taps. The separate bolt-in outlet makes possible this essential installation step.

Adjustable outlet accommodates variation in concrete coating from no coating to a thickness of 1-1/8". Special outlets are available for embedded cylinder pipe and thicker coatings of concrete.

High and low pressure performance are assured by a broad, pressure-activated gasket. Permanently set in a retaining cavity, the contoured gasket produces a positive initial seal which increases with increases in line pressure.

Grout Diapers for Service Saddles

These diapers make the recommended grouting of the service saddle a very quick procedure. Diapers are 11" wide with two 5/8" straps and are constructed of one layer of Typar backed by a 6 mil ply of polyethylene film. Order by pipe size.

Order No.	Saddle Size	List Price Each

Available in sizes listed only.

Not available in 316 stainless steel.

Recommended for IPS PVC, C900 PVC, Ductile Iron, Cast Iron, Steel and other types of pipe.

Not recommended for High Density Polyethylene Pipe (HDPE).

JCM INDUSTRIES, INC,

General Application Information

Fittings and Fabrications for High Density Polyethylene Pipe

JCM Products for repairing, connecting and tapping Polyethylene pipe have been tested and evaluated for their suitability and design capability. In each case JCM products have performed satisfactorily in respect to their design application. Test criteria range from short-term for special applications to long-term 1000 hour evaluations with the most common applications. Temperature and pressure cycles are also incorporated to fully address the pipe characteristics and full range of occurrences. Special monitoring equipment is utilized to produce accurate test data and for historical reference.

High Density Polyethylene Pipe (HDPE) has several unique characteristics which are taken into consideration in the following guidelines. The disregard of these guidelines and/or the installation instructions supplied with each fitting may cause unsatisfactory results and void the expressed product warranty.

HDPE Pipe considered for use must be manufactured to the recommendations set forth in the ANSI/AWWA Standard C906 and complies with criteria in reference to size.

HDPE has a high coefficient of thermal expansion and contraction along with a low modulus of elasticity. This sensitivity to pressure and temperature causes HDPE to expand and contract more than traditional water and sewer piping materials. The potential pipe expansion or contraction must be considered when assembling bolt on fittings.

HDPE will relax ("creep") at lower stress levels than other piping materials. Due to these special characteristics, the following parameters should be adhered to when utilizing JCM products for HDPE (ANSI/AWWA C901, C906).

- HDPE and bolt-on fitting connections are vulnerable to forces experienced with expansion/contraction of the pipe and require special consideration. Restraint must be considered when joining plain end pipe to ensure against pipe pull out. HDPE is manufactured with a smooth pipe wall surface resulting in a low coefficient of friction that can enable fittings to slide, shift, move, rotate and/or travel on the pipe after installation. JCM products are limited in the tolerance of axial movement of the pipe.
- JCM products for HDPE are designed for underground pressurized fluid service and are pressure rated to match the pipe SDR pressure rating or with a maximum service rating of 150 PSI (Temperature 35° - 75° F/Maximum test pressure limited to rated pipe pressure or fitting, whichever is lower). For above ground applications, contact JCM Industries Technical Services.
- Pipe stiffeners must be used when joining, or connecting to, HDPE. Pipe systems must be engineered to prevent movement causing fittings to slide or rotate on the pipe. Cutting HDPE can cause the pipe to ovate or "neck" down and become egg shaped. This pipe movement can interfere with the assembly of bolt on fittings.

Thirty years of successful performance has been one of the most stringent proving grounds for JCM products and their application with Polyethylene Pipe. Generally speaking, most common potable water pressure applications utilize HDPE SDR 17 through 11. For applications on thinner wall pipe, special applications, higher pressure ratings and product usage recommendations, please contact JCM.

Note: JCM recommends fusion joints as a primary method of connection. When correctly implemented, fused joints are self-restraining and leak proof. In some instances conditions are not conducive to properly fuse the joint per manufacturers' recommendations. Mechanical fittings to join or repair HDPE are a secondary and limiting choice. The information included on this page is provided to address the known factors when repairing, joining or tapping HDPE with mechanical fittings.

Effective 01/02/18

JCM 418 Carbon Steel Threaded Outlet Tapping Sleeve for HDPE Pipe
JCM 438 Stainless Steel Threaded Outlet Tapping Sleeve for HDPE Pipe

JCM Products for tapping PE pipe have been tested and evaluated for their suitability and design capability. In each case JCM products have performed satisfactorily in respect to their design application.

High Density Polyethylene Pipe (HDPE) has several unique characteristics which must be taken into consideration. HDPE has a high coefficient of thermal expansion and a low modulus of elasticity. This sensitivity to pressure and temperature causes HDPE to expand and contract more than traditional water and sewer piping materials. HDPE will also relax ("creep") at lower stress levels than other piping materials.

In consideration of the unique characteristics, JCM provides fabricated tapping fittings that are sized specifically with applicable ranges for HDPE.

JCM Outlet Seal Threaded Outlet Tapping Sleeves for HDPE Pipe
Model Numbers 418, 438

Available Threaded Outlet Sizes 3/4" thru 4"

How to Order:

- 1) Determine outside diameter of HDPE Pipe (IPS, DI), provide SDR#.
- 2) Select sleeve material (carbon, stainless) and proper size outlet.
- 3) Select model number (418, 438). For full product description see JCM Catalog.
- 4) Select proper sleeve O.D. Range and sleeve number.
- 5) Specify Model Number-Sleeve Number x Outlet Size
 Example: For 24" HDPE SDR 17 IPS O.D. pipe, 2" threaded outlet, carbon steel, order:
 418-2400X14IP
 Example: For 24" HDPE SDR 17 IPS O.D. Pipe, 2" threaded outlet, All Stainless Steel, order:
 438-2400X14IP

Note: 2" CC Threaded Outlet Sleeves are Non Returnable Items

JCM Outlet Seal Tapping Sleeves for HDPE Pipe

2" Mechanical Joint Outlets Not Available

JCM Flanged and Mechanical Joint Outlet Tapping Sleeves furnished with test plugs unless otherwise specified.

How to Order:

Determine outside diameter of HDPE Pipe (IPS, DI), provide SDR#.

Select sleeve material (carbon, stainless) and proper outlet material & type (flange, mechanical joint).

Select model number. For full product description, see JCM Catalog.

Select proper sleeve O.D. Range and sleeve number.

Specify Model Number-Sleeve Number x Outlet Size.

Example: For 24" HDPE SDR 17 IPS O.D. pipe, with 8" flanged outlet, carbon steel, order: 412-2400 x 8

Example: For 24" HDPE SDR 17 IPS O.D. Pipe, with 8" mechanical joint outlet, All Stainless Steel, order: 459-2400 x 8

JCM 412 Fabricated Steel Tapping Sleeves

Built in range assures proper fit on more than one class of pipe - reducing inventory requirements and the chance of not having the right size sleeve.

Ease of assembly eliminates extra equipment, time and specially trained personnel.

Ready availability means taps can be made without long delays - even taps on special sizes of pipe - or services requiring high pressure flanges.

Direct reinforcement of the pipe by the sleeve eliminates flexing or deflection of pipe opposite the tap. Less weight than heavy cast iron sleeves reduces the load on the pipe.

Most important, JCM Fabricated Tapping Sleeves assure a safe dependable tap. A large gasket cross section provides a positive initial seal which increases with increases in line pressure.

Material Specifications

Body: Carbon Steel per ASTM A36, A516 GR 70 or equal.

Flange: Per ANSI/AWWA Standard C207 Class D, ANSI 150 lb. Drilling, recessed for tapping valve per MSS-SP60. Optional flanges available upon request.

Bolts: Sleeve sizes 7.45 and smaller = 5/8", sleeve sizes 9.05 and larger = 3/4"
Electro Coated Powercron 590-534, high strength low alloy oval neck track head bolts per ASTM A242 and nuts (per ASTM A563) or equal.
Optional Stainless Steel Type 304 or Stainless Steel Type 316

Gasket: Nitrile Butadiene Rubber (NBR, Buna-N) per ASTM D2000. Molded virgin rubber with a pressure activated hydromechanical design. Gasket is bonded into a cavity for internal and external retention. Gasket temperature range -40°F to 212°F (-40°C - 100°C) Gasket suitable for water, salt solutions, mild acids, bases, and sewage. Optional gasket materials available. Contact JCM Industries, Inc.

Service

Rating: 2" to 12" Outlets: 175 PSI. Higher service rating available for specific applications and sizes. Higher test and working pressure ratings available upon request, contact JCM Industries.

Finish: Heavy coat of corrosion resistant shop coat primer. Optional fusion applied epoxy coating, minimum 12 mils thickness per ANSI/AWWA Standard C213 Fusion Bonded Epoxy Coatings and Linings for Steel Water Pipe and Fittings.

JCM 400 Series Tapping Sleeves are ANSI/NSF Standard 61, Annex G & ANSI/NSF 372 Certified.

JCM 400 Series Tapping Sleeves meet MSS-SP124 and ANSI/AWWA Standard C223 Fabricated Steel and Stainless Steel Tapping Sleeves.

JCM 411 Fabricated Tapping Sleeve with Plain Outlet available in 412 ranges/outlets. Contact JCM Industries.

JCM 413 Fabricated Tapping Cross available in 412 ranges/outlets. Contact JCM Industries.

JCM 412 Tapping Sleeves furnished with test plugs unless otherwise specified.

JCM 412 Fabricated Steel Tapping Sleeves

Built-in benefits make these heavy fabricated steel sleeves increasingly popular for making larger taps on all types of pipe. By placing the design emphasis on eliminating problems inherent with older pipe and field installations, JCM Fabricated Tapping Sleeves have taken the complexity out of tapping larger pipe.

JCM 411 Fabricated Tapping Sleeve with Plain Outlet - built with the same robust design and materials as the 412 - with a plain outlet that can be provided butt cut or beveled for welding. Contact JCM for details.

JCM 413 Fabricated Tapping Cross - designed for double outlets 180° across. Contact JCM for details.

JCM 414 Mechanical Joint Fabricated Tapping Sleeve

The JCM 414 Fabricated Mechanical Joint Tapping Sleeve is recommended for taps on pipe that will not accommodate a direct top seal tapping sleeve. The 414 utilizes a **true mechanical joint sleeve design** that completely encompasses the tap area, eliminating any potential leaks due to pipe cracks or breaks. Side gaskets are internally and externally trapped in a recessed groove machined into the bolting lug bars that completely compress the gaskets creating the watertight seal on the sides of the sleeve. The end gaskets are compressed into the sleeve housing with mechanical joint pusher glands, providing the water tight seal on the ends of the sleeve and completing the full encapsulation of the tap area.

Features of the Fabricated 414 Tapping Sleeve

High Strength Steel eliminates stress cracked casting or flange possibility. Side And End Gaskets provide complete seal around the pipe.

Fabricated Sleeves provide more strength with significantly reduced weight than a cast sleeve. The lighter sleeve reduces the load on the pipe and aids in installation and handling. For applications in corrosive environments, the JCM 414 is available fabricated in all stainless steel.

Accommodates Non-Standard Pipe Characteristics - Oversize, undersize or irregularities in the pipe O.D. can be accommodated within the fitting increasing performance and safety factor. The JCM 414 is available in larger sizes, non-standard sizes and with many special options (special flanges, special laying lengths, etc.)

Improved Availability - Fabricated sleeves with non-standard sizes have a delivery schedule of three to five weeks, significantly less than a cast sleeve's six to nine months.

How To Order

For pricing and engineering, the following information must be furnished:

- Type of pipe
- Outside diameter of pipe
- Irregular or non-standard pipe characteristics
- Line contents and pressure
- Outlet Size (14" and larger, furnish manufacturer of valve and cutter size)
- Coating and hardware
- Material requirements - options
- Special requirements

JCM 414 Fabricated Mechanical Joint Tapping Sleeves meet or exceed ANSI/AWWA C111/A21.11 as applicable. JCM 400 Series Tapping Sleeves are ANSI/NSF Standard 61, Annex G & ANSI/NSF 372 Certified. JCM 400 Series Tapping Sleeves meet MSS-SP124 and ANSI/AWWA Standard C223 Fabricated Steel and Stainless Steel Tapping Sleeves.

JCM 414 Mechanical Joint Tapping Sleeves are Priced on Application. For quotation, contact the JCM Inside Sales Team at 1-800-527-8482 or 1-903-832-2581.

JCM 415 Tapping Sleeve for Concrete Steel Cylinder Pipe

The JCM 415 Tapping Sleeve for Concrete Steel Cylinder Pipe is the standard in the industry for fast safe taps on Concrete Pressure Pipe. Designed to meet the AWWA M-9 Manual, the JCM 415 is the leading sleeve preferred by PCCP tapping contractors. These fabricated tapping sleeves are designed to reinforce the pipe and provide for easy installation with maximum safety factor. There are many unique features as well as options available on these sleeves. Unique to these sleeves are the following:

Separate Body and Tapping Gland (outlet) - By separating the outlet gland from the sleeve body the sleeve reinforces the pipe prior to removal of the critical prestress wire from the outlet area.

Broad Cross Section Gasket - The 7/8" wide gasket with a hydromechanical lip provides a broad sealing surface which produces an initial seal that increases with increases in line pressure. The broad, flat gasket is very advantageous for sealing on beveled cylinder welds.

Gusseted Pressure Plate - The gusseted pressure plate eliminates problems caused by flexing of the cylinder or tapping sleeve pressure plate. This grooved plate is contoured to fit the cylinder and retains the broad profile gasket to provide an extra margin of safety at this critical point.

Combination Gland/Draw Flange - The combination gland/draw flange on 4" - 12" outlet sizes facilitates tapping with a 25" travel tapping machine. Larger outlets utilize separate flanges for each function to make bolt take-up on large flanges more accessible.

Load Bearing Set Screws - The JCM 415 Tapping Sleeve is furnished with load bearing set screws on the gland flange that are tightened after the gland is installed. These set screws tighten against the sleeve draw flange, transferring any load on the outlet away from the steel cylinder and onto the sleeve.

Grout Seal Assembly - Type I 415 Tapping Sleeve, the standard sleeve, is furnished with straps and a grout seal assembly under the sleeve. These two design features facilitate fitting oversize, undersize and out-of-round pipe by providing the means to pour cement grout into a cavity to make a perfect sleeve fit. This feature is in accordance with AWWA M-9 Manual as recommended by the manufacturers of concrete pressure pipe. Epoxy coated sleeves and sleeves with a solid back sit directly on the pipe, precluding the use of the grout seal assembly.

Epoxy Coated Waterway - The tapping sleeve's waterway is fusion applied epoxy coated to provide a quality connection protected against corrosion in the critical waterway

How To Order

For pricing and engineering, the following information must be furnished:

- Type of pipe (also manufacturer and class if known)
- Type of sleeve
- Outside diameter of pipe and cylinder O.D.
- Line content and pressure
- Outlet size (on outlets 14" and larger furnish manufacturer of valve and cutter size)
- Material requirements or options
- Any special requirements or options.

FOR SLEEVES FOR REINFORCED CONCRETE PIPE ASK FOR JCM 412 TAPPING SLEEVES FOR REINFORCED CONCRETE PIPE.

415 Tapping Sleeve for Concrete Steel Cylinder Pipe

Many agencies have special requirements which are modifications of our standard design. JCM's manufacturing flexibility makes it possible for us to offer a great many modifications without delay in product availability. Some of the more popular options on these sleeves are:

A solid back half in lieu of straps (Type II) for Pretension Concrete Cylinder Pipe.
 Entire sleeve and outlet epoxy coated with stainless steel straps.
 Different locations of the grouting holes.

Meets criteria set forth in the AWWA M9 Manual for Concrete Pressure Pipe

JCM Industries recommends a template of the outside diameter of the pipe surface on all taps with an outlet of 24" or larger, on all taps where the outlet is more than 60% of the pipe size, on pipe which out-of-roundness is suspected and on high-pressure taps where the fit of the sleeve is critical to the high pressure performance. Instructions for this procedure are available from JCM upon request.

JCM 415 Tapping Sleeves for Concrete Steel Cylinder Pipe are Priced on Application. For quotation, contact the JCM Inside Sales Team at 1-800-527-8482 or 1-903-832-2581.

JCM Fabricated Weld On Tapping Outlets

Carbon Steel and All Stainless Steel (304 & 316) Construction Available

JCM Weld On Fittings are fabricated in compliance with the AWWA M11 Manual for Steel Pipe - Fittings Design, Appurtenances - other modifications available.

Outlets, partial sleeves and complete sleeves are readily available for steel pipe 4" and larger with size on size and reducing outlets. Outlets and partial sleeves are also available for tank and bulkhead use.

Various configurations of this design are available. Featured below are the most popular.

Nominal Pipe Size (IN)	Catalog Number (Pipe OD)	Outlet Sizes
4	0450	x 3 x 4
6	0663	x 3 x 4 x 6
8	0863	x 3 x 4 x 6 x 8
10	1075	x 3 x 4 x 6 x 8 x 10
12	1275	x 3 x 4 x 6 x 8 x 10 x 12

416 Type 2 Half-Wrapper

417 Type 1

416 Type 2 Collar

417 Type 2

416 Type 3 Nozzle

Weld On fittings are priced on application, contact JCM Sales Team 1-800-527-8482 or 903-832-2581.

Larger sizes available upon request.

Furnish fitting type and pipe O.D.

Sleeves are fabricated to the exact O.D. of the pipe.

How To Order:

1. Determine nominal pipe O.D. and outlet size.
2. Determine sleeve type required.
3. Specify sleeve type, pipe O.D. and outlet size.

Example: For Steel Pipe with 8.63 O.D. with 6" flanged outlet, full sleeve style, order: 417-0863x6 Type 1

Standard flange ANSI/AWWA C207 Class D, ANSI 150lb. Drilling, recessed for tapping valve MSS-SP60.

AWWA fittings are supplied with test outlet unless otherwise requested.

Available Upon Request

ANSI Flanges, Weld Neck Flanges and others

Outlets Beveled for Welding

Crotch-Plate (Wye Branch Design)

All Stainless Steel Fabrications (304, 316)

Test Ports

Custom Pipe Diameters

JCM Fabricated Products for Branching

Fabricated steel tapping sleeves have become most popular for making taps on all types of pipe. Placing design emphasis on eliminating problems inherent with older pipe and field installations, these fabricated tapping sleeves have taken the complexity out of tapping larger pipe. Fabricated sleeves provide more flexibility and strength than cast sleeves and are not subject to breaking due to concentrated stress. Lighter weight and ease of assembly permits installation with a minimum of crew, equipment and time. For specific product information, contact JCM Industries Sales Team.

PRODUCT	NUMBER & TYPE	APPLICATION, SIZES AND INFORMATION
	411 Plain Outlet Tapping Sleeve	<p>Most economical sleeve for dry taps and connections to be made without a valve. Also excellent as a base sleeve for special sleeves.</p> <p>Available with reducing and size on size outlets for all types of pipe, 6" and larger.</p>
	412 Flanged Outlet Tapping Sleeve	<p>The standard sleeve for quick, economical taps on various types of pipe, standard or high pressure service. Available in all types of standard or special sizes. Available with reducing and size on size outlets, pipe sizes 6" and larger. Special outlets readily available.</p> <p>422 Specially designed tapping sleeve for the exact O.D. of steel pipe, IPS PVC and C900/C909. Sizes 2" - 12".</p> <p>Quick economical cross for all types of pipe 8" and larger. Outlets must be minimum of three nominal sizes smaller than run.</p>
	422 Flanged Outlet Tapping Sleeve for PVC & Steel Pipe	
	413 Flanged Outlet Tapping Cross	
	414 Mechanical Joint Tapping Sleeve & Cross	<p>The sleeve with side and end gaskets to provide extra margin of safety on lines which are subject to problems of beam loads. Available with size on size and reducing outlets. Competitive with cast sleeves in larger and special sizes. Excellent availability.</p>
	415 Concrete Steel Cylinder Tapping Sleeve	<p>Designed to tap the various types and brands of concrete steel cylinder pipe. Sleeve reinforces pipe prior to cutting of pipe reinforcing rod. Extra heavy retained gasket and easily installed gland provide a locked in, positive seal. Available with reducing outlets in pipe sizes 16" and larger.</p>
	416 Weld On Outlets	<p>Outlets, partial sleeves and complete sleeves for pipe sizes 6" and larger with size on size and reducing outlets. These outlets are designed for steel pipe with wall thickness of 1/4" and greater.</p> <p>Split weld on sleeve designed to reinforce pipe to be tapped. Standard sleeve thickness 1/4".</p>
	417 Weld on Tapping Sleeve	

JCM Stainless Steel (316) Products for Branching

Tapping Sleeves featured are available constructed of ALL 316 Stainless Steel material. Four digit model numbers reflect JCM standard tapping sleeve design style and outlet configuration. Fittings are available in same O.D. ranges and outlet sizes as their corresponding model numbers indicate. These fittings are priced on application. Contact JCM Inside Sales Team for information.

PRODUCT	NUMBER & TYPE	APPLICATION, SIZES AND INFORMATION
	6438 All 316 Stainless Steel Threaded Outlet Tapping Sleeve	All 316 stainless steel construction for taps and connections of larger sizes of pipe in corrosive, saltwater and extreme acidic environments. Heavy gasket section and full sleeve offer better performance than strapped saddle. Available with IPS outlets, pipe sizes 4" and larger, outlets 3/4" - 4".
	6432 All 316 Stainless Steel Tapping Sleeve	The sleeve for taps requiring full circumferential seal with high safety factor. Strong stainless construction with independent bolting for higher bolt torque capabilities. Sizes 4" - 24".
	6452 All 316 Stainless Steel Tapping Sleeve with Outlet Seal Gasket	Stainless steel tapping sleeve for large diameter pipe and high pressure applications. Stainless construction provides superior corrosion resistance for long term service. Sizes 6" and larger.
 	6439 All 316 Stainless Steel Sleeve with Mechanical Joint Outlet 6459 All 316 Stainless Steel Sleeve with Mechanical Joint Outlet	True mechanical joint outlet tapping sleeve reduces application costs and inventory by utilizing MJ gate valve in lieu of tapping valve. All stainless steel construction provides corrosion resistance. Unique load bearing set pins transfer load and prevents movement or misalignment during or after the tap. Available in full circumferential gasket style or outlet seal gasket style. Sizes: Outlets 4" - 12", pipe sizes 4" and larger. JCM Mechanical Joint Outlets meet AWWA C111/ANSI 21.11 Standard Dimensions.

JCM 419 Fabricated Tapping Sleeve - Carbon Steel

Material Specifications

Body: Carbon Steel per ASTM A36, A516 GR 70 or equal.

Outlet: Carbon Steel meets ANSI 21.11/AWWA C111 Standard Dimensions
Outlets 3" & 4" = 1/4" test outlet, outlets 6" and larger = 3/4" test outlet

Bolts: Sleeve sizes 7.45 and smaller = 5/8", sleeve sizes 9.05 and larger = 3/4"

Electro Coated Powercron 590-534, high strength low alloy oval neck track head bolts per ASTM A242 and nuts (per ASTM A563) or equal.

Optional Stainless Steel Type 304 or Stainless Steel Type 316

Gasket: Nitrile Butadiene Rubber (NBR, Buna-N) per ASTM D2000. Molded virgin rubber with a pressure activated hydromechanical design. Gasket is bonded into a cavity for internal and external retention. Gasket temperature range -40°F to 212°F (-40°C - 100°C) Gasket suitable for water, salt solutions, mild acids, bases, and sewage. Optional gasket materials available. Contact JCM Industries, Inc.

Service

Rating: 4" – 12"* pipe sizes: 250 PSI working pressure, hydrostatic test pressure of 300 PSI
*12 x 12 w/Stainless Bolts: 200 PSI working pressure, hydrostatic test pressure of 250 PSI
14" – 24" pipe sizes: 200 PSI working pressure, hydrostatic test pressure of 250 PSI

Finish: Heavy coat of corrosion resistant shop coat primer. Optional fusion applied epoxy coating, minimum 12 mils thickness per ANSI/AWWA Standard C213 Fusion Bonded Epoxy Coatings and Linings for Steel Water Pipe and Fittings.

JCM 400 Series Tapping Sleeves are ANSI/NSF Standard 61, Annex G & ANSI/NSF 372 Certified.
JCM 400 Series Tapping Sleeves meet MSS-SP124 and ANSI/AWWA Standard C223 Fabricated Steel and Stainless Steel Tapping Sleeves.

422 Tapping Sleeve for IPS PVC, IPS HDPE, Steel and C900, DIPS HDPE

Material Specifications

Body:

ASTM A36 Carbon Steel or equal.

Bolts:

5/8" Corrosion resistant, high strength low alloy oval neck track head bolt per ASTM A242/ANSI/AWWA C111/A21.11 and heavy hex nut per A563 Electro-coated, Powercron 590-534.
Optional: Stainless Steel 18-8 304 or 316 available.

Flange:

AWWA C207 Class D, ANSI 150 lb. Drilling, recessed for tapping valve MSS-SP60.

Gasket:

Nitrile Butadiene Rubber (NBR, Buna-N) per ASTM D2000. Molded virgin rubber with a pressure activated hydro mechanical design. Gasket is bonded into a cavity for internal and external retention. Gasket temp. range - 40°F to 180°F (-40°C - 82°C). Gasket suitable for water, salt solutions, mild acids, bases, and sewage.

Finish:

Fusion bonded epoxy coating, minimum 12 mils thickness per ANSI/AWWA C213.

Service Rating:

4" to 12" Outlets: 175 PSI. Higher service rating available for specific applications and sizes.

JCM 400 Series Tapping Sleeves are ANSI/NSF Standard 61, Annex G & ANSI/NSF 372 Certified.

JCM 400 Series Tapping Sleeves meet MSS-SP124 and ANSI/AWWA Standard C223 Fabricated Steel and Stainless Steel Tapping Sleeves.

Not recommended for cast iron or ductile iron pipe, for CIP/DIP see JCM 412 Fabricated Tapping Sleeve.

429 Tapping Sleeve for IPS PVC, IPS HDPE, Steel and C900, DIPS HDPE

Material Specifications

Body:

ASTM A36 Carbon Steel or equal.

Bolts:

5/8" Corrosion resistant, high strength low alloy oval neck track head bolt per ASTM A242/ANSI/AWWA C111/A21.11 and heavy hex nut per A563 Electro-coated, Powercron 590-534.

Optional: Stainless Steel 18-8 304 or 316 available.

MJ Outlet:

Carbon Steel meets ANSI 21.11/AWWA C-111 Standard Dimensions.

Gasket:

Nitrile Butadiene Rubber (NBR, Buna-N) per ASTM D2000. Molded virgin rubber with a pressure activated hydro mechanical design. Gasket is bonded into a cavity for internal and external retention. Gasket temp. range - 40°F to 180°F (-40°C - 82°C). Gasket suitable for water, salt solutions, mild acids, bases, and sewage.

Finish:

Fusion bonded epoxy coating, minimum 12 mils thickness per ANSI/AWWA C213.

Service Rating:

Sleeves 4" – 12"* nominal pipe sizes: 250 PSI working pressure, hydrostatic test pressure of 300 PSI.

JCM 400 Series Tapping Sleeves are ANSI/NSF Standard 61, Annex G & ANSI/NSF 372 Certified.

JCM 400 Series Tapping Sleeves meet MSS-SP124 and ANSI/AWWA Standard C223 Fabricated Steel and Stainless Steel Tapping Sleeves.

JCM 462 Stainless Steel Tapping Sleeve - Carbon Steel Flange
Full Circumferential Gasket

JCM 432 All Stainless Steel Tapping Sleeve with Stainless Steel Flange
JCM 462 Stainless Steel Tapping Sleeve with Carbon Steel Flange
Material Specifications

Body: Stainless Steel, 18-8 Type 304

Bolts: Stainless Steel, 18-8 Type 304

Branch Outlet: Schedule 10 Stainless Steel Pipe

Gasket: Full circumferential Virgin Styrene-Butadiene Rubber (SBR) - Compounded for use with water, salt solutions, mild acids and bases. Per ASTM D-2000 M4AA 607. Standard temperature range from -40° to 150°F (-40° to 65°C) constant, maximum intermittent 180° F (82°C). For applications on high temperatures or chemical pipelines, contact JCM Industries Technical Services. Optional: EPDM available.

432 Flange Outlet: 304 Stainless Steel, per ANSI/AWWA Standard C228, ANSI 150lb. Drilling, recessed for tapping valve per MSS-SP 60.

462 Flange Outlet: Carbon Steel per ANSI/AWWA C207 Class D, ANSI 150 lb. Drilling, recessed for tapping valve per MSS-SP60. Coated for corrosion resistance.

JCM 400 Series Tapping Sleeves are ANSI/NSF Standard 61, Annex G & ANSI/NSF 372 Certified. JCM 400 Series Tapping Sleeves meet MSS-SP124 and ANSI/AWWA Standard C223 Fabricated Steel and Stainless Steel Tapping Sleeves.

JCM 469 Stainless Steel with Carbon Steel MJ Outlet Tapping Sleeve
Full Circumferential Gasket

JCM 439 All Stainless Steel Tapping Sleeve with Mechanical Joint Outlet
JCM 469 Stainless Steel Tapping Sleeve with Carbon Steel Mechanical Joint Outlet
Material Specifications

Body: Stainless Steel, 18-8 Type 304

Bolts: Stainless Steel, 18-8 Type 304

Branch Outlet: Schedule 10 Stainless Steel Pipe

Gasket: Full circumferential Virgin Styrene-Butadiene Rubber (SBR) - Compounded for use with water, salt solutions, mild acids and bases. Per ASTM D-2000 M4AA 607. Standard temperature range from -40° to 150°F (-40° to 65°C) constant, maximum intermittent 180° F (82°C). For applications on high temperatures or chemical pipelines, contact JCM Industries Technical Services. Optional: EPDM Available

439 MJ Outlet: CF8 Cast Stainless Steel or 304 Stainless Steel, meets ANSI 21.11/AWWA C111 Standard for Mechanical Joint Dimensions

469 MJ Outlet: Carbon Steel meets ANSI 21.11/AWWA C111 Standard for Mechanical Joint Dimensions.
Carbon steel outlet coated for corrosion resistance.

JCM 400 Series Tapping Sleeves are ANSI/NSF Standard 61, Annex G & ANSI/NSF 372 Certified.
JCM 400 Series Tapping Sleeves meet MSS-SP124 and ANSI/AWWA Standard C223 Fabricated Steel and Stainless Steel Tapping Sleeves.

452 Stainless Steel Tapping Sleeve - Stainless Flange - Outlet Seal Gasket
464 Stainless Tapping Sleeve - Carbon Flange - Outlet Seal Gasket

452

464

JCM 452 All Stainless Steel Tapping Sleeve with Stainless Steel Flange

JCM 464 Stainless Steel Tapping Sleeve with Carbon Steel Flange

Material Specifications

Body: Stainless Steel 18-8 Type 304.

Bolts: Stainless Steel 18-8 Type 304.
 Sleeve sizes 14.20 and smaller = 5/8", sizes 14.75 and larger = 3/4"

452 Flange: 304 Stainless Steel or equivalent, per ANSI/AWWA C228 Class SD. Flange outlets shall be indexed per MSS-SP60 to accept tapping valve and have the equivalent O.D. and drilling as Class 125 Cast-Iron Flanges (ANSI/ASME B16.1) and Class 150 Steel-Ring Flanges (ANSI/ASME B16.5). Other flanges available upon request.

464 Flange: Flanged outlet shall be carbon steel per ANSI/AWWA C207 Class D, ANSI 150 lb. Drilling, recessed for tapping valve per MSS-SP60, coated for corrosion resistance. Other flanges available upon request.

Branch

Outlet: Schedule 10 Stainless Steel Pipe Type 304

Gasket: Nitrile Butadiene Rubber (NBR, Buna-N) per ASTM D2000. Molded virgin rubber with a pressure activated hydro mechanical design. Gasket is bonded into a cavity for internal and external retention. Gasket temperature range -40°F to 212°F (-40°C - 100°C) Gasket suitable for water, salt solutions, mild acids, bases, and sewage.

Service

Rating: 2" - 12" Outlets: 175 PSI, per ANSI/AWWA C228.
 For higher service ratings, contact JCM Technical Services.

JCM 400 Series Tapping Sleeves are ANSI/NSF Standard 61, Annex G & ANSI/NSF Standard 372 Certified.

JCM 400 Series Tapping Sleeves meet MSS-SP124 and ANSI/AWWA Standard C223 Fabricated Steel and Stainless Steel Tapping Sleeves, ANSI/AWWA Standard C228 Stainless Steel Pipe Flanges for Water Service as applicable.

JCM 459 Stainless Steel Tapping Sleeve - Stainless MJ - Outlet Seal Gasket

JCM 465 Stainless Tapping Sleeve - Carbon MJ - Outlet Seal Gasket

JCM 459 All Stainless Steel Tapping Sleeve with Stainless Steel MJ Outlet

JCM 465 Stainless Steel Tapping Sleeve with Carbon Steel MJ Outlet

Material Specifications

Body: Stainless Steel 18-8 Type 304.

Bolts: Stainless Steel 18-8 Type 304.
Sleeve sizes 14.20 and smaller = 5/8", sizes 14.75 and larger = 3/4"

459 Outlet: CF8 Cast Stainless Steel - equivalent to 18-8 Type 304 Stainless Steel meets ANSI 21.11/AWWA C111 Standard Dimensions
Outlets 3" & 4" furnished with 1/4" test outlet
Outlets 6" and larger furnished with 3/4" test outlet

465 Outlet: Carbon Steel Mechanical Joint Outlet shall meet the ANSI 21.11/AWWA C111 Standard for Mechanical Joint Dimensions. Outlet shall be furnished with load bearing alignment set pins to prevent movement of the tapping assembly before or during the tapping process. Coated for corrosion resistance.

Branch

Outlet: Schedule 10 Stainless Steel Pipe Type 304

Gasket: Nitrile Butadiene Rubber (NBR, Buna-N) per ASTM D2000. Molded virgin rubber with a pressure activated hydro mechanical design. Gasket is bonded into a cavity for internal and external retention. Gasket temperature range -40°F to 212°F (-40°C - 100°C) Gasket suitable for water, salt solutions, mild acids, bases, and sewage.

Service

Rating: 4" – 12"* pipe sizes: 250 PSI working pressure, hydrostatic test pressure of 300 PSI
*12 x12 size and 14" – 24" pipe sizes: 200 PSI working pressure, hydrostatic test pressure of 250 PSI

JCM 400 Series Tapping Sleeves are ANSI/NSF Standard 61, Annex G & ANSI/NSF Standard 372 Certified.

JCM 400 Series Tapping Sleeves meet MSS-SP124 and ANSI/AWWA Standard C223 Fabricated Steel and Stainless Steel Tapping Sleeves.

For optional Epoxy Coating add (E) to end of Catalog Number.

For optional Epoxy Coating and stainless steel bolts add (ESS) to end of Catalog Number.

Rated for 150PSI

JCM 607 Fabricated Weld On Restrainer/Joint Anchor Loops

The JCM 607 Fabricated Weld On Restrainer/Joint Anchor Loops are designed to provide permanent restraint for fittings installed on carbon and stainless steel pipelines. The JCM 607 Fabricated Weld On Restrainer/Joint Anchor Loops are available fabricated of carbon steel, 304 or 316 stainless steel and can be custom designed to the specific application.

The JCM 607 consists of an appropriate number of anchor loops (dependent upon pipe size) that are permanently field welded directly to the pipeline. JCM 607's can be installed to provide restraint directly to the fitting (when anchor loops on the fitting are present) or with restraining tie rods that extend across the fitting to the opposite side pipe restraint product (JCM or third party restrainer). Quantity and size of anchor loops tie rods are determined by nominal pipe size, opposite restraint product or by customer provided information. Tie rods provided by JCM is optional.

Standard working pressure allowable: 150PSI, for higher working pressures contact JCM Industries Engineered/Technical Sales.

For quotation or ordering, the following information is required:

- Type of Pipe
- Nominal Size of Pipe
- Outside Diameter of Pipe
- Dimensions of fitting to restrain or restrain over
- Material of construction
- Pressure rating requirements
- Number & Size of restraining tie rods
- Mating Third Party Restrainer - manufacturer or bolting pattern/size
- Any special coatings, materials or customer required modifications

Price on Application - contact JCM Industries Sales Team

JCM 617 Fabricated Weld On Restrainer/Joint Anchor Assembly

The JCM 617 Fabricated Weld On Restrainer Assembly is designed to provide permanent restraint for fittings installed in carbon and stainless steel pipelines. The JCM 617 Weld On Restrainers are available fabricated of carbon steel, 304 or 316 stainless steel and can be custom designed to the specific application.

The JCM 617 consists of an appropriate number of bolting lugs/loops (dependent upon size) that are welded to (2) rolled half rings that are permanently welded to the pipeline. JCM 617's can be installed to provide restraint directly to the fitting (when anchor loops are present) or with restraining tie rods that extend across the fitting to the opposite side pipe restraint product (JCM or third party restrainer). Quantity and size of tie rods are determined by nominal pipe size, opposite restraint product or by customer provided information. Tie rods provided by JCM is optional.

Standard working pressure allowable: 150PSI, for higher working pressures contact JCM Industries Engineered/Technical Sales.

For quotation or ordering, the following information is required:

- Type of Pipe
- Nominal Size of Pipe
- Outside Diameter of Pipe
- Dimensions of fitting to restrain or restrain over
- Material of construction
- Pressure rating requirements
- Number & Size of restraining tie rods
- Mating Third Party Restrainer - manufacturer or bolting pattern/size
- Any special coatings, materials or customer required modifications

Price on Application - contact JCM Industries Sales Team

JCM 650 HDPE Mechanical Wall Anchor Restraint

Bi-Directional Lateral Restraint of HDPE Pipe

BIDIRECTIONAL RESTRAINT - Two-way serration system to counteract lateral pipe movement from either direction. Serrated Restraint - prevents both push/pull-back and radial slipping of the pipe. Serrations are designed to bite into the exterior pipe wall without damaging the pipe.

JCM Fabricated Expansion Joints

JCM Expansion Joints permit up to 10" of concentrated pipe movement that provides for normal expansion/contraction of pipelines subject to variations of both environmental and line content temperatures. JCM Expansion Joints are manufactured using a telescoping design that consists of a fabricated steel body, or housing, that accommodates an inserted internal "slip pipe" that moves in and out of the body. This free movement absorbs the linear, or axial, movement of the section of pipe. The fabricated steel body houses a "packing" area of alternating rings of lubricated flax and rubber that provides the water tight seal during the cycling of the joint. JCM Expansion Joints offer several design options including end connections, coatings, limit rods, stainless steel fabrication and others. JCM Expansion Joints are manufactured for each specific application allowing for the incorporation of special options or engineered features required for the installation.

Heavy Duty Construction - The heavy duty, durable exterior body provides the protective shell for the slip pipe and packing system. For corrosive or acidic environments, the expansion joint may be epoxy coated or fabricated of stainless steel.

Externally Guided Slip Pipe - The machined slip pipe furnishes a hard, corrosion resistant surface that reduces friction between the slip pipe and packing material. For corrosive environments or line contents, slip pipe is fabricated of stainless steel.

Adjustable Packing Gland - Alternating rings of lubricated flax and rubber are packed tightly into the packing area of the body by the adjustable packing gland. This packing gland maintains a consistent compression of the flax/rubber rings to ensure a tight, leak proof seal between the slip pipe and body.

Lubricated Packing - The rings of lubricated flax provide the "lubrication" to the slip pipe ensuring a smooth expanding/contracting movement while the square rubber rings secure the water tight seal. This packing area is easily accessible, without disruption of service, should repacking be required.

How to Order - For price and availability, the following information must be furnished

- Type of pipe
- Outside diameter of pipe
- Type of End Connections
- Line Contents
- Minimum and maximum temperatures
- Maximum working pressure
- Material and Coating specifications

JCM 802 Double End Expansion Joints are designed for special applications such as middle of line use where expansion joint body can be anchored. This fitting permits up to 10" total pipe movement, 5" on each end, with properly anchored body.

Material Specifications

- Body Material:** ASTM A36 Carbon Steel or equal
- Body Flange:** ASTM A36 or equal
- Slip Pipe:** 18-8 Type 304 Stainless Steel per ANSI/AWWA C220, as applicable.
- Packing Gland:** ASTM A36, ASTM A285 Grade C, ASTM A53B or equal.
- Gasket and Flax:** Square packing Buna-N rubber, per ASTM D2000, 55 - 60 durometer, compounded for use with water, salt solutions, mild acids, bases and sewage. Flax: Gurlock waxed, braided cord (hemp).

- Bolts:** ASTM A193 B7, ASTM A194/ASTM A563 or Stainless Steel ASTM A193 B8/B8M,
- Limit Rods:** ASTM A193 B8/B8M/B7 or equal.
- Finish:** Heavy coat of corrosion resistant primer.

Meets or exceeds ANSI/AWWA C221 Fabricated Steel Mechanical Slip-Type Expansion Joints

JCM Fabricated Expansion Joints

JCM Expansion Joints are available as Model 801 Single End design or Model 802 Double End Expansion Joint and are available with the following options:

- (1) Weld-On Ends without Limit Rods
 - (2) Weld-On Ends with Limit Rods
 - (3) Flanged Ends without Limit Rods
 - (4) Flanged Ends with Limit Rods
 - (5) Mechanical Joint Ends without Limit Rods
 - (6) Mechanical Joint Ends with Limit Rods
- Other end connections available
Increased or decreased amounts of pipe movement capability

JCM 801 Single End Expansion Joint

JCM 802 Double End Expansion Joint

JCM Expansion Joint - Typical Specifications

Expansion Joints shall be of the externally guided, slip joint type, permitting up to 10" of concentrated pipe movement. The packing gland shall have alternate rings of lubricated flax and rubber specially compounded for use with water, salt solutions, mild acids, bases, natural gas and sewage. The body of the expansion joint shall have a shop coat primer. The slip pipe shall be stainless steel. Expansion Joints shall be JCM 801 or approved equal.
