The Matco-Norca Promise

Matco-Norca has been providing quality products exclusively through the wholesale channel for over 69 years. Our faucet lineup features several complete and unique families that encompass multiple designs and price points.

Our pressure balanced rough-in valves (with and without stops) are universal across every family, excluding Value Engineered. Furthermore, four of our families feature ceramic valve technology and we are proud to say that our lavatory and tub & shower products are EPA WaterSense® certified. Last but not least, our faucet program fully complies to the Safe Drinking Water Act (SDWA)/Federal Public Law No. 111-380 and all California Energy Commission requirements.

Matco-Norca's faucet program offers a limited lifetime warranty that fully encompasses both finish and function regardless of the application. Whether you are looking for entry level offerings to "value engineer" a project, or luxury products for your showroom, Matco-Norca has the warranty, breadth of products and finishes to ensure a lifetime of trouble-free satisfaction.

Why buy from Matco-Norca?

Matco-Norca began in 1952 as a pioneer in sourcing valves. Since then, Matco-Norca has grown to be one of the largest independent suppliers of Valves, Fittings & Nipples and Faucets & Plumbing Specialties in the United States. Throughout the decades, Matco-Norca has become an established leader of offering quality products at competitive prices.

In addition, we also have highly trained direct sales personnel combined with outstanding rep agencies to ensure that your needs are met on time, every time. Simply stated, Matco-Norca's culture is rooted in providing consistent quality service to our customers across all facets of our business.

Certifications & Approvals

Matco-Norca is committed to maintaining a high standard of quality for all the products we offer. Most products in this catalog are labeled with a designated approval or certification code. Below is a brief description of these approvals.

ADA American Disabilities Act — Protecting the rights of people with physical or mental disabilities.

ANSI American National Standards Institute — Organization that coordinates work among U.S. Standards writing groups; Works in conjunction with other groups such as ISO, ASME, ASTM, etc.

ASME American Society of Mechanical Engineers — Develops standards and testing criteria for finished products.

ASSE American Society of Sanitary Engineering — Develops standards and qualifies products for plumbing and sanitary installations.

ASTM American Society for Testing Materials — Develops standards for materials, products, systems and services.

AWWA American Water Works Association — Promotes public health through improvement of water quality. Develops standards for valves, fittings and equipment.

CEC California Energy Commission — As the state's primary energy policy and planning agency, the California Energy Commission is committed to reducing energy costs and environmental impacts of energy use - such as greenhouse gas emissions - while ensuring a safe, resilient, and reliable supply of energy.

CSA Canadian Standards Association — Develops standards, tests and qualifies products used in gas lines and gas appliance installations.

FM Factory Mutual — Develops standards and qualifies products for use by the general public.

ISO International Organization for Standardization — A worldwide organization that develops and publishes International Standards with the premise of answering a fundamental question: "What's the best way of doing this?" The ISO 9000 family addresses various aspects of quality management.

MSS Mechanics Standardization Society of the Valves & Fittings Industry, Inc. — A committee of manufacturers that develops technical codes and standards for the valve & fitting industry.

NACE National Association of Corrosion Engineers — Equips society to protect people, assets and the environment from the adverse effects of corrosion.

NSF NSF International — An organization committed to public health that writes standards and certifies products for food, water and consumer products.

SDWA The Safe Drinking Water Act — Is the main federal law that ensures the quality of Americans' drinking water. Under SDWA, EPA sets standards for drinking water quality and oversees the states, localities, and water suppliers who implement those standards. Weighted average lead content of water contact components must be 0.25% or less.

UL Underwriter's Laboratory — Tests and qualifies valve and fittings products under UL standards for safety.

UPC Uniform Plumbing Code — Developed by the International Association of Plumbing and Mechanical Officials to govern the installation and inspection of plumbing systems as a means of promoting the public's health, safety and welfare.

USC University of Southern California — Foundation for Cross-Connection Control and Hydraulic Research that lists approved backflow prevention assemblies.

WS Water Sense — A U.S. Environmental Protection Agency (EPA) program designed to encourage water efficiency in the United States through the use of a special label on consumer products.
