Bringing Nature to You™

Perky-Pet® is recognized as a world leader and expert in the wild bird feeding category. We offer the broadest and deepest selection of quality bird feeding products at competitive prices.

Bird feeding isn't just our specialty - it's our lifestyle! We love feeding, watching, and learning about our feathered friends by supporting festivals, sponsoring birding associations, and collaborating with reputable organizations like Cornell Lab of Ornithology. All of our products stem from this commitment to create a bird-feeding experience that is fun, fulfilling and educational in a manner that is easy and cost-effective.

At Perky-Pet®, we believe in Bringing Nature to You™. We strive to find quality, stylish, effective solutions to meet the demands of nature hobbyists and birding enthusiasts alike. Because of that continued innovation, we are confident in our product and our ability to enhance the experience of bird lovers.

FLEXPORTS™

Flexports are soft rubber ports that protect seed and easily flex to let birds feed. The unique design is 4X more shake resistant than standard Perky-Pet ports so there's less seed waste — which means money saved and fewer messes on the ground. The design also allows birds to feed at an optimal position outside of the port, offering improved visibility so they feel safer and visit feeders longer. More birdwatching time for you!

soft rubber ports protect seed and easily flex to let birds feed naturally

WEIGHT
ACTIVATED

Our weight-activated technology allows protection from squirrels accessing the seed. These feeders allow birds to feed comfortably but when the squirrels perch on them, their weight causes the metal casing to slip down, completely blocking the feeding ports and access to the seed.

2-IN-1 PORTS

The Perky-Pet® patented 2-in-1 tube feeders have ports that switch from mixed seed to Nyjer® seed so you can serve all types of seed. These feeders are great for attracting a wide variety of birds including finches that prefer Nyjer® seed, while wild birds will enjoy the mixed and sunflower seeds!

These ports come in two forms, a twist port and a flip port.

TWIST-TO-LOCK™

Some feeders have lids that gently set on top of the feeder. The Twist-to-Lock™ technology allows the lid to tighten into the feeder directly. This prevents squirrels from climbing into the feeder and accessing the seed.

Bird slides down cord.

Bird threads into chimney.

Ready to resist squirrels and hang!

MESH

Our all metal, open mesh construction helps keep seeds fresh and accommodates both clinging and perching birds. We offer a wide variety of top quality mesh bird feeders in many different color and style options.

EVENSEED TECHNOLOGY

Thanks to the feeder's Evenseed technology, seed is evenly dispensed to all tiers for easy access no matter where birds are resting. The all-mesh surface area provides plenty of space for birds to cling while they dine and reduce competition. Perching birds can also feel at home at this feeder due to the attached seed tray. You'll be able to attract more species of birds than ever before!
