## NEW. IMPROVED.

### SYNANTHIC 15 mL Oral Drench Applicator

#### **NEW** 15 mL DIAL-A-DOSE

One click. One dose. Count on it.

We strengthened the dial-a-dose assembly to withstand the metal housing of the applicator, making it tougher and more durable. The dose range is 3 mL to 15 mL in 1 mL-dose increments.

#### **NEW** HOOK

Ready for action.

The applicator now comes pre-assembled, with the hook already attached and ready to use. An optional short nozzle is also included as an additional attachment.

#### **NEW** BRASS NOZZLE

Durable brass nozzle prevents dripping.

We've replaced the plastic nozzle with a brass nozzle inside the tip. The new nozzle's smaller-diameter orifice prevents product dripping out of the tip.

#### **NEW** VALVE AND SPRING

Comes with a spare.

We've included an extra valve and spring in the bag in case you need it.
