# Smart Cat®

With clumping action that has  
never been seen before!

## Plant-Based

Our product is made with the perfect combination of NON-GMO, USA-farmed corn and wheat, our all-natural litter really does the job. Light in weight but strong in performance, it OUT CLUMPS CLAY, EVERY DAY™.

## “No Smell 🐾 Can’t Tell”

SmartCat All Natural Litter has no added perfumes or fragrances that could be offensive to cats. Our litter clumps on contact by immediately absorbing urine. This quick clumping action traps the odor-causing bacteria, and odors disappear. Clumps will continue to harden and dry until all liquid is absorbed. SmartCat All Natural Litter works great on fecal odors as well. Your litter box will stay clean and odor free.

## Out Clumps Clay, Every Day!™

SmartCat All Natural Litter clumps on contact and will continue to harden until all urine is absorbed. Clumps can easily be scooped within minutes of cat’s elimination. Keeping your litter box clean has never been easier!

## Breathe Clean 99% Dust Free

SmartCat All Natural Litter is virtually dust free. With no dusty residue, the chance of litter related respiratory issues is greatly reduced. SmartCat All Natural Litter also has a creamy sand-like look and texture that most cats accept easily. This makes transitioning from your old litter to SmartCat All Natural Litter quick and simple.

- ✓ Fragrance Free
- ✓ Clay Free
- ✓ Lightweight
- ✓ Lasts longer
- ✓ Strong performance
- ✓ Save money

### LITTER SMART TIPS

At transition use 50/50 mix of new litter with existing litter for one week. After that, use new litter exclusively.

Place litter box(es) in a quiet area with easy access.  
Use 1 litter box per cat plus 1 additional box.

Locate boxes where cats will not have to travel far, with at least one box on each floor.

For best results, litter depth should be kept at 3-4 inches after scooping.

### TOXOPLASMOSIS & PREGNANCY:

Pregnant women should not clean litter boxes. Toxoplasma gondii is a parasite found in numerous foods, such as raw meat, and it may be present in dirty cat litter. If you own a cat and are concerned about toxoplasmosis, talk to your health care provider.
