

HOW TO DETERMINE YOUR HAT SIZE

OPTION 1: THE MEASURING TAPE METHOD

Start with a measuring tape (or a piece of string you can measure later), and wrap it around your head, placing it where your hat will sit — typically, at the middle of your forehead and about 1/8" above your ear. Hold the tape firmly, but not uncomfortably tight. Find your size using the chart below. If your measurement falls between sizes, order a size up; you can always add a bit of padding in the sweatband to achieve the perfect fit.

OPTION 2: THE SNAPBACK TRICK

A slightly less accurate, but convenient alternative is to grab a snapback hat, and map your most comfortable fit to the chart. As with the above technique, if your measurement falls between sizes, order a size up. You can always add a bit of padding in the sweatband to achieve the perfect fit.

- Size 7** 
- Size 7 1/8** 
- Size 7 1/4** 
- Size 7 3/8** 
- Size 7 1/2** 
- Size 7 5/8** 
- Size 7 3/4**
