

The #1 Flexible Duct in the World.

FlexFlow Elbow™

The FlexFlow Elbow maximizes airflow by economically forming any brand and any size of commercial or residential flexible duct into a highly efficient 90° elbow saving energy and improving room comfort by **eliminating flexible duct kinks and restrictions common to most buildings.**

Simply strap the one size fits all FlexFlow Elbow over the outer jacket of the flexible duct. It's fast, easy and dramatically less expensive than galvanized elbow installations. Adjustable bands allow the FlexFlow Elbow to fit any size and any brand of flexible duct from 4" to 16".

Features

- Installs Over the Flex Duct Jacket in 30 Seconds on New or Existing Air Ducts
- One Piece Design | One Size Fits All—4" to 16" Flexible Duct
- Made in the USA from 100% Recycled Materials
- GreenSpec Listed & UL Classified 2043
- Molded From Advanced Composite Material

Benefits

- Improves Airflow Efficiency—Saves Energy
- No Additional Tools, Sealant or Insulation Required
- Create Efficient 90° Turn Without a Galvanized Elbow
- Works With All Commercial & Residential Flex Duct
