# M18™ Work Light

★★★★★ 5.0 (4) [Write a review](#)

OUTSHINE, OUTLAST. The M18™ Work Light lasts 600X longer than conventional incandescent bulbs. Powered by the M18™ REDLITHIUM™ battery, it runs up to 4X longer on a single charge. Its 135° rotating head allows you to easily direct the light beam at the desired work area, while its integrated hook enables hands-free use. With a sealed aluminum head to provide impact and weather resistance, the cordless work light comes with a limited lifetime LED warranty.

#### Best Flashlight, Period!!

This is my new 'go to' flashlight for..everything!! The rubberized flat bottom, hefty 18v battery provides a very stable platform to position the light on a flat surface near your work area. The integrated hook allows you to hang it from a pipe or conduit and the vertical swivel head allows you to position light where you need it. Unlike many LED light products I own,which produce a very small, focused beam of light. This light produces a large bright beam to light up your work area yet can also be used as a spot light. For example, I've used it to spot animals in and around my 2 acre yard! Regarding 'run time', I haven't the slightest idea how many hours a fully charged battery will provide because I've never come close to draining a battery. For that reason, this light will be kept handy for our next power outage!! In closing, the purchase price caused me to hesitate however now that I own it..Wow, it's worth every penny!!

⊕ Pros: Bright, Easy On/Off, Ergonomic, Luminescent, Stable

✔ Yes, I recommend this product.
