### SELECTING THE CORRECT ASPEN MINI-PUMP

#### Five pump models

- Aqua • Orange • Lime
- White • Mini Tank

#### Four considerations

- **Appearance** - A concealed (Aqua) or remote condensate pump (Orange or Mini Tank) will preserve the attractive nature of any mini-split installation. Surface mounted pumps (Lime or White) are neatly covered. All pumps are hidden from view and provide a clean finished appearance.
- **Quiet Operation** - For best practice, choose a remote pump (Orange) installation for the quietest operation in noise sensitive areas. Silent + models are also available. They run quieter and are designated by SP suffix.
- **Ease of Installation** - Aspen pump models can accommodate any installation. See the guide and chart for options.
- **Maintenance** - Pump models with filters must be cleaned regularly. Choose a surface type pump (Lime or White) for easy filter access.

#### Two mini-pump types:

- **Split** - (Orange or Aqua) are designed with separate pump and reservoir. The pump includes an electronic PCB and the pump motor. The reservoir contains the filter and the switching mechanism to activate the pump, and must always be kept level and clean for proper operation of the float switch. The filter must be cleaned regularly. The 2 elements are connected together with a length of 1/4" ID vinyl tube and a communication cable, both of which are usually around 6 feet long.
- **Monobloc** - (Lime, White, or Mini Tank) are designed with both the pump and reservoir as one integral unit, sharing a common body. No connecting tubes or wires are needed. Most mini pumps are cooled and lubricated by the water flowing through them. They require a float switch to detect the presence of water in the drain pan and activate the pump only when water is present, while the new Mini White Silent+ uses an adaptive capacitance sensor that differs from a capacitance sensor, since the Silent+ has variable speeds and no dip switch settings for speeds.

#### Aspen Pumps features:

- Quick and easy to install
- Mini Pumps fit mini-splits up to 54,000 BTU/hr; and Maxi Pumps fit Mini-Splits up to 157,000 BTU/hr
- Self priming
- Hall effect sensors operate on water rise; Mini White Silent+ utilizes an adaptive capacitance sensor
- Dry contact for overflow protection
- Cleanable filters
- Quiet - 19dB(A) to 47dB(A)
- Thermally protected
- Maximum water temperature 104°F
- Discharge hose 1/4" ID
- Kits include all components required
- 1 amp fuse included (must be installed to validate the warranty)

NOTE: Sound level and pump performance varies with voltage and frequency.

### Type 1 Installation

For optimum quietness, the solution is a remote mounted pump. **AQUA, ORANGE, MINI TANK**

### Type 2 3 Installation – rear entry lineset

Lineset enters the evaporator from directly behind.

**WHITE** – Pump assembly mounts on wall surface below the evaporator (easy filter access).

**AQUA** – Both pump and reservoir mount inside of evaporator, below the drain pan.

### Type 4 Installation – exposed straight lineset

Lineset enters the evaporator from either side, extending horizontally to outside wall.

**AQUA** – Pump mounts outside the evaporator hidden inside horizontal lineset cover. Reservoir mounts inside of evaporator, below the drain pan.

### Type 4 Installation – side entry lineset

Lineset enters the evaporator from either side, turns 90 degrees up into the ceiling and is completely concealed by lineset cover (included in kit).

**LIME** – Pump assembly mounts outside the evaporator, behind easy to remove elbow cover. Transparent reservoir clips off pump for easy filter access.
